

Making online shopping more secure: with your UBS Credit Card and “3-D Secure”. Sign up today.

Using a credit card to make purchases online is commonplace today. UBS is now offering “3-D Secure”, a solution that makes credit card payments on the Internet even more secure.

“3-D Secure” is an internationally recognized standard for credit card payments on the Internet. When making purchases online, you additionally enter a personal password that only you know, which identifies you in the same way as your signature in a shop or your PIN code at an ATM.

Numerous online shops in Switzerland and abroad use “3-D Secure”. One of the logos shown below will tell you whether or not an online store offers “3-D Secure”.

Verified by **MasterCard**
VISA **SecureCode**

Sign up now at www.ubs.com/secure to take immediate advantage of this free service with your UBS Credit Card.

Signing up for “3-D Secure” has no impact on the conditions governing your online purchases from a legal perspective. Of course, you still have the possibility of disputing incorrect transactions within 30 days.

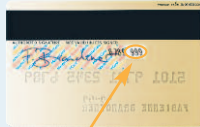

Your advantages at a glance:

- Additional security when making payments on the Internet
- Simple sign-up at www.ubs.com/secure with no need for additional software
- Easy to use when making payments
- No extra costs involved

How do payments work with "3-D Secure"?

For each online shop that offers the "3-D Secure" service, a window appears during the payment process where you can enter your personal "3-D Secure" password. A security message chosen by you ensures that the password check is actually carried out by UBS.

What do you need to sign up?

Three-digit security code
(see back of card)

UBS Credit Card account number
on your credit card statement

How can you sign up for "3-D Secure"?

Sign up for "3-D Secure" now at www.ubs.com/secure

There are three easy steps to follow:

Step 1: Enter your UBS Credit Card number and accept the terms and conditions for the use of "3-D Secure".

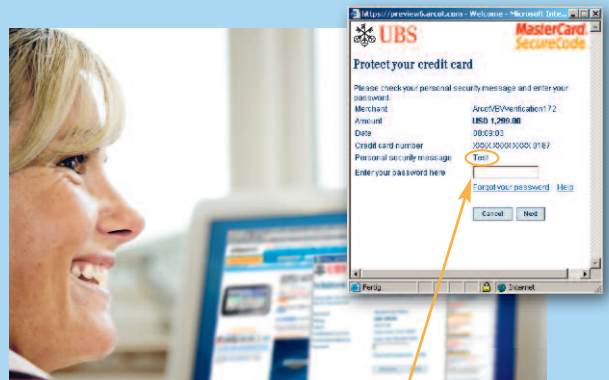

Step 2: Please complete the following fields

- Name shown on the card
- Security code (see back of card)
- Expiry date
- Account number (see statement)
- Date of birth

Step 3: Specify the security message and password and complete the sign-up process.

How do I pay with "3-D Secure"?

For each purchase made from an online shop that offers "3-D Secure", a window appears during the payment process with the transaction details and your personal security message.

Check the security message. If this is shown correctly, confirm the payment by entering your password. This makes your online payments more secure than ever before.

What issues do I need to be aware of?

From now on, when using your UBS Credit Card to make purchases at online shops that offer "3-D Secure", you will be asked to enter your password.

If you have not already signed up, you will be requested to do so when making your next online purchase. If you have several UBS Credit Cards (e.g. main and second card), please register each card separately.
