

UBS Connect

E-banking for financial intermediaries

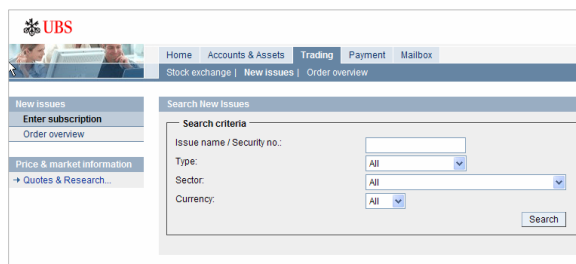

Your professional e-banking solution

UBS Connect gives you direct access to UBS client accounts and custody accounts. You can place stock market orders individually or collectively. You can also view clients' portfolios online at any time and can quickly and conveniently obtain a printed statement of assets.

You can define client groups so that you can structure your client book clearly and efficiently, allowing you to carry out all processes in a single step that you want to repeat for a number of clients. With client groups you can also streamline your internal organization, for example to regulate the appointment of deputies.

Securities trading and new issues

Online links to the major international stock markets make it possible for you to process orders instantly during official trading hours. Financial intermediaries domiciled in Switzerland also have the option of subscribing and managing online fully assignable new issues (e.g. structured products and investment funds).

Broad range of financial market data

The UBS Quotes platform provides round-the-clock price information, as well as up-to-date news bulletins from the world's main financial centres. These bulletins plus numerous detailed key data are directly linked to each financial instrument.

Key benefits at a glance:

- Access to current portfolio data (account and custody account information)
- Efficient order processing, plus confirmation of execution and order status
- Asset reports can be ordered and retrieved online
- Detailed monitoring of asset performance and portfolio valuation
- Direct access to comprehensive research and financial market data
- Access to the main international financial and trading markets
- Access 24 hours a day, 7 days a week
- Advice, training and support provided by specialists (on site upon request)
- Clearly structured GUI in English, German, French and Italian

In addition, the UBS Wealth Management Research is integrated in full into the various instruments. UBS Quotes contains its own research platform that provides details of financial analyses arranged by investment category and is equipped with a comprehensive search function. Subscriptions to research publications can also be requested via e-mail.

Functions for optimizing portfolio management

UBS Connect includes a function for calculating asset performance at any time, plus a variety of portfolio valuations, and thus enables you to make decisions professionally and implement them efficiently. The asset reporting function is being constantly expanded to meet the changing needs of professional users, and new functions are being added all the time.

Security/log-in

UBS aims to provide you with the highest possible level of security when carrying out your banking transactions via the Internet. For this purpose it has decided in favour of a chip-card solution for logging in to UBS Connect, coupled with highly sophisticated data encryption.

Furthermore, the following security features are used for protecting access to UBS Connect:

- Your UBS Connect agreement number
- Access Card with separate PIN
- UBS e-banking card reader

System requirements

UBS Connect does not have to be installed on your computer, but for security reasons we recommend using the browser versions listed below. It is also important to ensure that you install all security updates for your operating system and browser, and keep your system up to date at all times.

Operating systems

- Windows 2000, XP, Vista
- Macintosh OS X

Internet browsers:

- Internet Explorer 6.0, SP1/SP2; IE 7.0
- Firefox 1.5; 2.0
- Safari 1.3.2; 2.0.4

The best results can be obtained using the screen resolution setting 1240x1024 pixels.

Support

The UBS Connect Hotline is available on weekdays from 8 a.m. to 6 p.m. (CET):

Switzerland: **0800 80 50 50**

International: +41-848 80 00 50
