

# UBS (Lux) Equity SICAV – Global Income (USD) I-A2-8%-mdist

## Portrait

- This actively managed, defensive equity fund invests in companies from across the globe that offer a high dividend yield.
- The fund aims to generate additional income through call overwriting.
- The fund focuses on quality factors to exclude low quality stocks, including the company's ability to pay stable or growing dividends.
- Local currency risks are largely hedged versus USD.
- The strategy is based on a quantitative model.
- This sub-fund promotes environmental and social characteristics and falls under Article 8(1) of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector.
- The portfolio manager is not tied to the benchmark in terms of investment selection or weight.
- UBS Equity Funds invest in equities and may therefore be subject to high fluctuations in value. For this reason, an investment horizon of at least five years and corresponding risk tolerance and capacity are required. As these UBS funds pursue an active management style, each fund's performance can deviate substantially from that of its reference index. All investments are subject to market fluctuations. Every fund has specific risks, which can significantly increase under unusual market conditions. The fund can use derivatives, which may result in additional risks (particularly counterparty risk). In distributing share classes, the equity yield, net of fund fees, will be distributed. The distributing (-dist) share classes of this fund intend to distribute capital as well as income (e.g. from dividends). Investors in some jurisdictions may incur a higher rate of tax on distributed capital than on any capital gains which are realized on disposal of fund shares. Some investors may therefore choose to invest in the accumulating (-acc) instead of the distributing (-dist) share classes. Investors may be taxed at a later point in time on income and capital arising on accumulating (-acc) share classes compared to distributing (-dist) share classes. Investors should seek their own tax advice.
