Benefits

Clients profit from the return potential of corporate bonds, which is higher than that of government bonds.

Active portfolio management ensures that particular attention is paid to the prevailing economic situation, sector selection and issuers' credit ratings.

Risk is kept in check via meticulous company analysis and broad diversification of the portfolio.

The fund is particularly appropriate for clients with a medium-term investment horizon who are willing to take on more risk than for investments in government bonds in order to benefit from potentially attractive returns.

Risks

Even though the credit quality of the portfolio is investment grade, the default risk is higher with corporate bonds than with government paper. Changes in interest rates have an effect on the value of the portfolio. This requires corresponding risk tolerance and capacity. All investments are subject to market fluctuations. Every fund has specific risks, which can significantly increase under unusual market conditions. The fund can use derivatives, which may result in additional risks (particularly counterparty risk).

All investments are subject to market fluctuations. Every fund has specific risks, which can significantly increase under unusual market conditions. Please consult your client advisor for more information on the investment risks of this product.

Please note that additional fees (e.g. entry or exit fees) may be charged. Please refer to your financial adviser for more details. Investors should read the Key Investor Information Document (KIID), Prospectus and any applicable local offering document prior to investing and to get complete information of the risks. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company.
