Flexible and nimble approach of a small, focused investment team that specializes in managing active funds.

Risks

UBS Opportunity Equity Funds invest in equities and may therefore be subject to high fluctuations in value. For this reason, an investment horizon of at least five years and corresponding risk tolerance and capacity are required. As these UBS Funds pursue an active management style, each Fund's performance can deviate substantially from that of its reference index. All investments are subject to market fluctuations. Every Fund has specific risks, which can significantly increase under unusual market conditions. The fund can use derivatives, which may result in additional risks (particularly counterparty risk).

Please note that additional fees (e.g. entry or exit fees) may be charged. Please refer to your financial adviser for more details. Investors should read the Key Investor Information Document (KIID), Prospectus and any applicable local offering document prior to investing and to get complete information of the risks. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. For a definition of financial terms refer to the glossary available at www.ubs.com/am-glossary.

For marketing and information purposes by UBS. For professional clients / qualified investors only. UBS funds under Luxembourg law. Arrangements for marketing fund units mentioned in this document may be terminated at the initiative of the management company of the fund(s). Before investing in a product please read the latest prospectus and key information document carefully and thoroughly. Any decision to invest should take into account all the characteristics or objectives of the fund as described in its prospectus, or similar legal documentation. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. The information and opinions contained in this document have been compiled or arrived at based upon information obtained from sources believed to be reliable and in good faith, but is not guaranteed as being accurate, nor is it a complete statement or summary of the securities, markets or developments referred to in the document. Members of the UBS Group may have a position in and may make a purchase and / or sale of any of the securities or other financial instruments mentioned in this document. Units of UBS funds mentioned herein may not be eligible for sale in all jurisdictions or to certain categories of investors and may not be offered, sold or delivered in the United States. The information mentioned herein is not intended to be construed as a solicitation or an offer to buy or sell any securities or related financial instruments. Past performance is not a reliable indicator of future results. The calculated performance takes all costs on the fund level into consideration (ongoing costs). The entry and exit costs, which would have a negative impact on the performance, are not taken into consideration. If whole or part of the total costs to be paid is different from your reference currency, the costs may increase or decrease as a result of currency and exchange rate fluctuations. Commissions and costs have a negative impact on the investment and on the expected returns. If the currency of a financial product or financial service is different from your reference currency, the return can increase or decrease as a result of currency and exchange rate fluctuations. Glossary

ESG is an abbreviation for Environmental, Social and Governance (factors). These factors are used to evaluate companies and countries on how advanced they are with respect to sustainability. Once sufficient data on these factors are available, they can be used to assess and compare assets and also to inform the investment process when deciding what assets to buy, hold or sell.

UBS AM sustainability approaches applied

Exclusion: Strategies that exclude securities from portfolios where they are not aligned to an investor's values. Includes customized screening criteria.

ESG Integration: Strategies that integrate environmental, social and governance (ESG) factors into fundamental financial analysis to improve risk/return profile.

SI Focus: Strategies where sustainability is an explicit part of the investment guidelines, universe, selection and/or investment process

Impact: Strategies where the intention is to generate measurable environmental and/or social benefits ("impact")

Controversy check

(in % of portfolio AuM)⁴

¹ The fund excludes issuers identified as violating the UN Global Compact principles without credible corrective action

² AuM = Assets under Management

³ Values may be reduced as a result of short positions held in the fund, and may result in an overall negative value

alongside the financial return.

Voting: Exercising shareholder rights by proxy voting on resolutions.

Engagement: (Pro-) actively entering in a dialogue with companies to influence material ESG topics.

ESG Score (UBS ESG Consensus Score): The UBS ESG Consensus Score is based on UBS-internal and independent external ESG data sources. The UBS ESG Consensus Score is industry-adjusted and is measured on a scale from 0 (lowest/worst score) to 10 (highest/best score).

Controversy check: Controversial Business Involvement exposure is the exposure to companies with a revenue share exceeding a certain threshold of the respective field (production). Link to our exclusion policy for more details: -> www.ubs.com/si-exclusion-policy

ESG Transparency

This page provides transparency on key sustainability metrics that may be of interest to investors but are not part of the fund's investment process. The following metrics inform investors more broadly on their exposure to selected ESG topics.

MSCI ESG Scores

Holding-weighted average (0-10)

External fund ratings

Weighted average carbon intensity

(tCO₂ equivalents per USD million in sales)¹

¹ The fund maintains a lower weighted average carbon intensity profile than the benchmark and/or a low absolute profile (defined as below 100Mt of CO₂ emissions per million dollars of revenue)

Carbon footprint

(tCO₂ per USD million invested)¹

¹ Values may be reduced as a result of short positions held in the fund, and may result in an overall negative value

Glossary

MSCI ESG scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. ESG scores are also shown a breakdown of the E, S and G scores, in reference to the different components that are considered for the Environmental, Social and Governance pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies. In addition, sectoral differences are taken into account through key industry specific ESG issues. This makes the ESG score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time.

MSCI ESG Fund Ratings** are designed to measure the Environmental, Social and Governance (ESG) characteristics of a fund's underlying holdings, making it possible to rank or screen mutual funds and ETFs on a AAA to CCC ratings scale. MSCI leverage MSCI ESG Ratings for over 10,500 companies (19,500 total issuers including subsidiaries) and more than 760,000 equity and fixed-income securities globally to create

ESG scores and metrics for approximately 56,000 multi-asset class Mutual funds and ETFs globally (as of January 17, 2022).

**MSCI ESG Research LLC's ("MSCI ESG") fund metrics and ratings (the "Information") provide environmental, social and governance data with respect to underlying securities within more than 56,000 multi-asset class Mutual funds and ETFs globally (as of January 17, 2022). MSCI ESG is a Registered Investment Adviser under the Investment Advisers Act of 1940. MSCI ESG materials have not been submitted to, nor received approval from, the US SEC or any other regulatory body. Weighted Average Carbon Intensity (tons CO₂e /USDm sales): The Weighted Average Carbon Intensity (WACI) measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. This metrics is applicable across asset classes, including fixed income, as it's not based on equity ownership basis. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales). Data provider: MSCI ESG Research

Carbon Footprint (tons CO₂e / USDm invested): Expresses the greenhouse gas footprint of an investment sum. The

UBS Equity Global Opportunity Unconstrained – ESG Report

carbon emissions scope 1 and 2 are allocated to investors based on an enterprise value ownership (with inclusion of cash) approach and normalized by the current portfolio value. The Carbon Footprint is a normalized measure of a portfolio's contribution to climate change that enables comparison with a benchmark, between portfolios and between individual investments. Metric is Total Carbon Emissions expressed as per currency invested.

are treated on a lookthrough basis, whereby the economic exposures to the underlying basket of securities is treated as an actual investment in the individual securities that make up this basket. This might in the case of broad market derivatives or fund of fund investments lead to minimal exposures to securities that are excluded from direct investments.

Aggregation of ESG/Carbon data

ESG scores of holdings in the portfolio and the reference index are aggregated using their respective individual weights and ESG scores (sum product).
