Benefits

Through the diversified bond portfolio investors can participate in the Asian market's opportunities for higher yielding corporate bonds and local currencies. Active management in accordance with market conditions allows the portfolio to be dynamically adjusted throughout market cycles. Investors can particularly benefit from UBS's expertise in markets where transparency and access to information may be limited.

Additional information

- The fund allows the portfolio manager team to opportunistically invest up to 20% of the portfolio in Asian local currencies as an additional return driver.
- The fund is managed by the pan-Asian fixed income team located in Singapore, whose regional specialists are integrated with the global fixed income team and thus can leverage significant resources of the wider group.
- The portfolio manager is not tied to the benchmark in terms of investment selection or weight.

Risks

Depending on the credit quality, the default risk is higher in the case of high yield bonds than with investment grade corporate and government bonds. Changes in interest and exchange rates have an effect on the value of the portfolio. This requires corresponding risk tolerance and capacity. All investments are subject to market fluctuations. Every fund has specific risks, which can significantly increase under unusual market conditions.
