Index description

The MSCI EMU 100% hedged to USD Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of countries within EMU. The impact of currency fluctuations between any foreign currency to the index currency is reduced by selling foreign currency forwards at the one-month Forward rate. The index represents companies within these countries that are available to investors worldwide.

Benefits

Clients benefit from the flexibility of an exchange-traded investment.
Provides access to this segment of the market with a single transaction.
Optimised risk/return profile thanks to a broad diversification across a range of countries and sectors.
The fund offers a high degree of transparency and cost efficiency.
UCITS compliant fund.
Reduced foreign currency risk with currency hedging in fund format.

Risks

This UBS Exchange Traded Fund invests primarily in equities and currency hedge derivatives, which are included in the MSCI EMU 100% hedged to USD. Investors require a corresponding risk tolerance and capacity. All investments are subject to market fluctuations. Every fund has specific risks, which may significantly increase under unusual market conditions. The fund's assets are passively managed. As a result, the net asset value of the fund is directly dependent on the performance of the underlying index. Losses that could be avoided via active management will not be offset. For funds with "hedged" in their name, currency and forward currency transactions may be carried out in order to extensively hedge the net asset value of the funds against the EUR.
