

UBS Bond Euro High Yield (RMB hedged) P-mdist

Fund Fact Sheet

UBS Bond Funds > UBS High Yield Funds

Fund description

- The actively managed fund invests primarily in high-yield corporate bonds selected using strict criteria, either denominated in EUR or hedged into EUR.
- When selecting issuers of such bonds, particular attention is taken to spread investments across the various credit ratings.
- The portfolio manager is not tied to the benchmark in terms of investment selection or weight.
- The exchange rate risk between EUR and CNH is largely hedged.

Benefits

Investors profit from an actively managed portfolio with high return potential that is composed using strict criteria in terms of security and sector selection and credit quality.

Clients can particularly benefit from UBS's expertise in markets where transparency and access to information may be limited.

The fund represents an attractive addition to a portfolio, offering high return potential and broad risk diversification.

Risks

Depending on the credit quality, the default risk is higher in the case of high yield bonds than with investment grade corporate and government bonds. Changes in interest rates have an effect on the value of the portfolio. This requires corresponding risk tolerance and capacity. All investments are subject to market fluctuations. Every fund has specific risks, which can significantly increase under unusual market conditions. The fund can use derivatives, which may result in additional risks (particularly counterparty risk).

This share class (mdist) may make monthly, gross-of-fee distributions. As a consequence, in addition to income, this share class may also distribute capital. This can have negative tax consequences for investors in some jurisdictions. Investors should seek their own tax advice.

Please note that additional fees (e.g. entry or exit fees) may be charged. Please refer to your financial adviser for more details. Investors should read the Key Investor Information Document (KIID), Prospectus and any applicable local offering document prior to investing and to get complete information of the risks. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. For a definition of financial terms refer to the glossary available at www.ubs.com/am-glossary.
