

UBS Stgy Fd Balanced Sust USD (CAD hedged) P-4%-mdist

Fund Fact Sheet

UBS Asset Allocation Funds > UBS Strategy Funds > Balanced

Fund description

- The actively managed fund invests globally in a diversified range of equities, mainly high-quality bonds and money market instruments.
- The fund generally strikes an even balance between equities and bonds.
- Foreign currencies are largely hedged versus the reference currency. Nevertheless, an active currency strategy is applied if opportunities are seen.
- The fund is based on UBS's investment policy, the UBS House View.
- This fund promotes environmental and social characteristics and falls under SFDR Article 8(1).

Please see additional important information on page 3.

Benefits

The fund offers the investor straightforward and convenient access to UBS House View, which draws on the professional insights of UBS investment specialists worldwide. Investors benefit globally from diversified market opportunities in the area of bonds and equities. In addition to high-quality bonds, investments can also be made in other bond segments.

The weighting of the different asset classes is maintained within a specific range in order to take account of the fund's risk profile.

The fund is attractive for investors who would like a fund which aims to generate interest and dividend income as well as capital gains.

Risks

The fund invests in equities, bonds of varying credit quality and money market securities on a global basis, and may therefore be subject to high fluctuations in value. The fund may use derivatives which can reduce investment risk or give rise to additional risks (inter alia the counterparty risk). The value of a unit may fall below the purchase price. This requires an elevated risk tolerance and capacity. Every fund reveals specific risks, a description of these risks can be found in the prospectus.

The monthly 4%-mdist distributing share classes may distribute capital as well as income. It is possible that the distributions result in an erosion of assets and a reduction of invested capital. There are potential negative tax consequences for some investors in some jurisdictions. Investors in some jurisdictions may incur a higher rate of tax on distributed capital than on any capital gains which are realised on disposal of fund shares. Some investors may therefore choose to invest in the accumulating (-acc) instead of the distributing (-dist) share classes. Investors may be taxed at a later point in time on income and capital arising on accumulating (-acc) share classes compared to distributing (-dist) share classes. Investors should seek their own tax advice.

UBS Stgy Fd Balanced Sust USD (CAD hedged) P-4%-mdist

Additional information

- The fund invests without any benchmark restrictions. The performance of the fund is not benchmarked against an index.
- Exposure to movements of local currencies' exchange rates versus USD remains unhedged.
- The exchange rate risk between USD and CAD is largely hedged.
- This share class distributes a constant percentage share of the NAV, not a constant amount.
- This share class is designed for investors who want to profit from performance opportunities on the financial markets and at the same time wish more stable distributions at a specific percentage level to cover recurring liquidity needs.
- As the distributions are substantial, this share class is not designed for investors who want to build wealth. The latter may prefer the accumulating share class.
- This share class must not be seen as an alternative to a savings account or fixed-interest paying investments.
- The percentage distribution rate of this share class is unrelated to the interest or other income generated in the fund. The distribution is a percentage payment of the current amount of investment.
- It is possible that the distributions result in an erosion of assets and a reduction of invested capital.
- This share class may distribute capital as well as income. There are potential negative tax consequences for some investors in some jurisdictions. See risk section below.

For more detailed information about Morningstar's Sustainability, including its methodology, please go to: https://www.morningstar.com/content/dam/marketing/shared/Company/Trends/Sustainability/Detail/Documents/SustainabilityRatingMethodology2019.pdf?cid=AEM_RED00016

Please note that additional fees (e.g. entry or exit fees) may be charged. Please refer to your financial adviser for more details. Investors should read the Key Investor Information Document (KIID), Prospectus and any applicable local offering document prior to investing and to get complete information of the risks. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. For a definition of financial terms refer to the glossary available at www.ubs.com/am-glossary.

For marketing and information purposes by UBS. UBS funds under Luxembourg law. Arrangements for marketing fund units mentioned in this document may be terminated at the initiative of the management company of the fund(s). Representative in Switzerland for UBS funds established under foreign law: UBS Fund Management (Switzerland) AG, P.O. Box, CH-4002 Basel. Paying agent: UBS Switzerland AG, Bahnhofstrasse 45, CH-8001 Zurich. Prospectuses, key information document, the articles of association or the management regulations as well as annual and semi-annual reports of UBS funds are available in a language required by the local applicable law free of charge from UBS Asset Management Switzerland AG, c/o UBS AG, Bahnhofstrasse 45, 8001 Zürich, Switzerland or from UBS Fund Management (Switzerland) AG, P.O. Box, CH-4002 Basel. The product described herein aligns to Article 8 Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector. Information on sustainability-related aspects pursuant to that regulation can be found on www.ubs.com/funds. Before investing in a product please read the latest prospectus and key information document carefully and thoroughly. Any decision to invest should take into account all the characteristics or objectives of the fund as described in its prospectus, or similar legal documentation. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. The information and opinions contained in this document have been compiled or arrived at based upon information obtained from sources believed to be reliable and in good faith, but is not guaranteed as being accurate, nor is it a complete statement or summary of the securities, markets or developments referred to in the document. Members of the UBS Group may have a position in and may make a purchase and / or sale of any of the securities or other financial instruments mentioned in this document. Units of UBS funds mentioned herein may not be eligible for sale in all jurisdictions or to certain categories of investors and may not be offered, sold or delivered in the United States. The information mentioned herein is not intended to be construed as a solicitation or an offer to buy or sell any securities or related financial instruments. Past performance is not a reliable indicator of future results. The calculated performance takes all costs on the fund level into consideration (ongoing costs). The entry and exit costs, which would have a negative impact on the performance, are not taken into consideration. If whole or part of the total costs to be paid is different from your reference currency, the costs may increase or decrease as a result of currency and exchange rate fluctuations. Commissions and costs have a negative impact on the investment and on the expected returns. If the currency of a financial product or financial service is different from your reference currency, the return can increase or decrease as a result of currency and exchange rate fluctuations. This information pays no regard to the specific or future investment objectives, financial or tax situation or particular needs of any specific recipient. Future performance is subject to taxation which depends on the personal situation of each investor and which may change in the future. Glossary

ESG is an abbreviation for Environmental, Social and Governance (factors). These factors are used to evaluate companies and countries on how advanced they are with respect to sustainability. Once sufficient data on these factors are available, they can be used to assess and compare assets and also to inform the investment process when deciding what assets to buy, hold or sell.

UBS AM sustainability approaches applied

Exclusion: Strategies that exclude securities from portfolios where they are not aligned to an investor's values. Includes customized screening criteria.

ESG Integration: Strategies that integrate environmental, social and governance (ESG) factors into fundamental financial analysis to improve risk/return profile.

SI Focus: Strategies where sustainability is an explicit part of the investment guidelines, universe, selection and/or investment process

Impact: Strategies where the intention is to generate

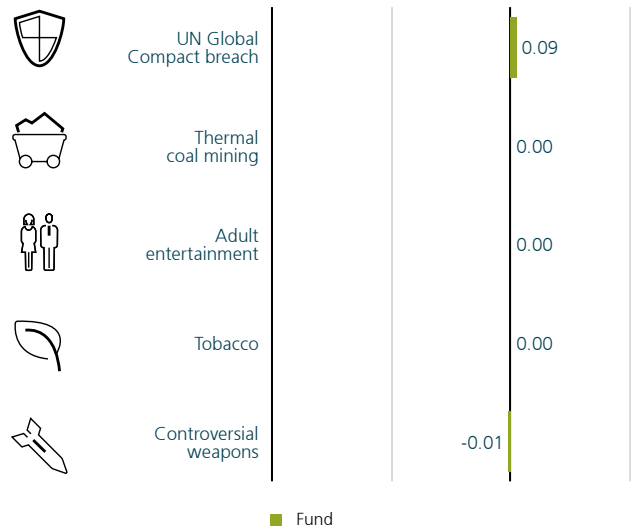

UBS ESG Consensus Score (Holding-weighted average (0-10))

6.9
Fund

Controversy check

(in % of portfolio AuM)¹

¹ Assets under Management

measurable environmental and/or social benefits ("impact") alongside the financial return.

Voting: Exercising shareholder rights by proxy voting on resolutions.

Engagement: (Pro-) actively entering in a dialogue with companies to influence material ESG topics.

ESG Score (UBS ESG Consensus Score): The UBS ESG Consensus Score is based on UBS-internal and independent external ESG data sources. The UBS ESG Consensus Score is industry-adjusted and is measured on a scale from 0 (lowest/worst score) to 10 (highest/best score).

Controversy check: Controversial Business Involvement exposure is the exposure to companies with a revenue share exceeding a certain threshold of the respective field (production). Link to our exclusion policy for more details: -> www.ubs.com/si-exclusion-policy

UBS Stgy Fd Balanced Sust USD – ESG Report

ESG Transparency

This page provides transparency on key sustainability metrics that may be of interest to investors but are not part of the fund's investment process. The following metrics inform investors more broadly on their exposure to selected ESG topics.

MSCI ESG Scores

Holding-weighted average (0-10)

External fund ratings

Weighted average carbon intensity

(tCO₂ equivalents per USD million in sales)

Carbon footprint

(tCO₂ per USD million invested)

Glossary

MSCI ESG scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. ESG scores are also shown a breakdown of the E, S and G scores, in reference to the different components that are considered for the Environmental, Social and Governance pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies. In addition, sectoral differences are taken into account through key industry specific ESG issues. This makes the ESG score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time.

MSCI ESG Fund Ratings** are designed to measure the Environmental, Social and Governance (ESG) characteristics of a fund's underlying holdings, making it possible to rank or screen mutual funds and ETFs on a AAA to CCC ratings scale. MSCI leverages MSCI ESG Ratings for over 10,500 companies (19,500 total issuers including subsidiaries) and more than 760,000 equity and fixed-income securities globally to create ESG scores and metrics for approximately 56,000 multi-asset class Mutual funds and ETFs globally (as of January 17, 2022).

**MSCI ESG Research LLC's ("MSCI ESG") fund metrics and ratings (the "Information") provide environmental, social and governance data with respect to underlying securities within more than 56,000 multi-asset class Mutual funds and ETFs globally (as of January 17, 2022). MSCI ESG is a Registered Investment Adviser under the Investment Advisers Act of 1940. MSCI ESG materials have not been submitted to, nor received approval from, the US SEC or any other regulatory body. None of the Information constitutes an offer to buy or sell, or a promotion or recommendation of any security, financial instrument or product or trading strategy, nor should it be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. None of the Information can be used to determine which securities to buy or sell or when to buy or sell them. The Information is provided "as is" and the user of the Information assumes the entire risk of any use it may make or permit to be made of the Information.

Weighted Average Carbon Intensity (tons CO₂e /USDm sales):

The Weighted Average Carbon Intensity (WACI) measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. This metrics is applicable across asset classes, including fixed income, as it's not based on equity ownership basis. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales). Data provider: MSCI ESG Research

Carbon Footprint (tons CO₂e / USDm invested):

Expresses the greenhouse gas footprint of an investment sum. The carbon emissions scope 1 and 2 are allocated to investors based on an enterprise value (with inclusion of cash) ownership approach and normalized by the current portfolio value. The Carbon Footprint is a normalized measure

UBS Stgy Fd Balanced Sust USD – ESG Report

of a portfolio's contribution to climate change that enables comparison with a benchmark, between portfolios and between individual investments. Metric is Total Carbon Emissions expressed as per currency invested. Data provider: MSCI ESG Research

Use of derivatives / fund of fund investments

Derivatives and fund of fund investments used in the portfolio are treated on a lookthrough basis, whereby the economic exposures to the underlying basket of securities is treated as

Sources: Fund holding data: UBS Asset Management; MSCI ESG Research

an actual investment in the individual securities that make up this basket. This might in the case of broad market derivatives or fund of fund investments lead to minimal exposures to securities that are excluded from direct investments.

Aggregation of ESG/Carbon data

ESG scores of holdings in the portfolio and the reference index are aggregated using their respective individual weights and ESG scores (sum product).

Although UBS Asset Management information providers, including without limitation, MSCI ESG Research LLC and its affiliates (the "ESG Parties"), obtain information from sources they consider reliable, none of the ESG Parties warrants or guarantees the originality, accuracy and/or completeness of any data herein.
