² YTD: year-to-date (since beginning of the year)

Markets continue to be impacted by persistent inflation figures and worries that monetary policy is going to stay restrictive for longer. Higher-than-anticipated interest rates resulted in some turmoil in the banking sector, sending out an additional signal of uncertainty and halting short-term financial market growth.

Monthly performance

In March the fund performed positively with 1.5%. March saw risk assets recover from the earlier pullback and continue their positive trend in the year to date. Only UK equities fell in March. Returns across fixed income were also positive in March.

YTD performance

YTD as of the end of March, the fund has delivered a positive performance of 2.8%. Risk assets continue to exhibit a positive performance in the year to date. Both developed and emerging markets had a positive first quarter of the year, with developed markets in particular performing strongly. Bond markets have performed positively this year.

Performance contributors

Fixed income investments were the top contributors in March, with the Multilateral Development Bank and USD Investment Grade Corporates Sustainable strategies performing especially well. Equities also made a positive contribution overall. The Global Opportunity Sustainable, Long Term Themes, Active Climate Aware and Global Sustainable Improvers strategies were the top contributors within equities.

Performance detractors

Currency hedging as well as the Global Impact and Gender Equality strategies were the only detractors in March.

Current investment strategy

We increased our US corporate bond exposure by reducing our holdings in global equities and our position in the Gender Equality ETF. We are holding on to our positions in the EM Socially Responsible ETF and the Gender Equality ETF, sourced from ESG Leaders and ESG Improvers. We are also keeping our AUD overweight, sourced from the USD.

Risks

The fund invests in bonds of varying credit quality, money market securities and equities on a global basis, and may therefore be subject to fluctuations in value. The fund may use derivatives which can reduce investment risk or give rise to additional risks (inter alia the counterparty risk). The value of a unit may fall below the purchase price. This requires an elevated risk tolerance and capacity. Every fund reveals specific risks, a description of these risks can be found in the prospectus.
