² YTD: year-to-date (since beginning of the year)

Markets continue to be impacted by persistent inflation figures and concerns that monetary policy is going to remain restrictive for longer. The higher-than-anticipated interest rates resulted in some turmoil in the banking sector, sending an additional signal of uncertainty and putting a halt to short-term financial market growth.

In March the fund performed positively with 1.8%. Fixed income assets were mostly positive in March despite recent uncertainty in the markets.

YTD performance

YTD as of the end of March, the fund has delivered a positive performance of 2.1%. Fixed income assets continue to deliver a neutral to positive performance in the year to date.

Performance contributors

The overall contribution from bonds was positive in March. All bonds made a positive contribution. However, the biggest contributors were sustainable US corporate, green social sustainable and multilateral development bank bonds. Currency hedging made a slightly positive contribution as well.

Performance detractors

There were no significant performance detractors in March.
