¹⁾ The data on the performance of the sub-funds reflects the percentage change of the net asset value per unit (including dividends) during the course of the year under review.

²⁾ The data on the performance of the replicated index reflects the percentage change of the indices in terms of net income over the financial year.

³⁾ The tracking error can be attributed to the fund costs (see total expense ratio), non-reclaimable withholding taxes and income from securities lending. The portfolio manager of the sub-fund aims to replicate the index as closely as possible so that the expected annual return differential (after the deduction of costs) between the performance of the units of a sub-fund and the index of the respective sub-fund is no more than 1% under normal market conditions. In exceptional situations, the return differential of a sub-fund may nevertheless exceed 1% relative to its index.

⁴⁾ Tracking error: annualised standard deviation.

The portfolio manager of the sub-fund aims to ensure that the tracking error, defined as the volatility of the return differential between the performance of the units of a sub-fund and the index of the respective sub-fund, does not exceed 1% at any time under normal market conditions. In exceptional situations, a sub-fund's tracking error may nevertheless exceed 1%. None of the sub-funds recorded a tracking error of more than 1% over a period of 12 months.

Calculation of tracking error:

The tracking error for the past 12 months was calculated using the following formula: = STANDARD DEVIATION (monthly return differential calculated over a period of 12 months) * SQUARE ROOT (12)

⁵⁾ Total expense ratio (TER): This key figure is calculated in accordance with the "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" of the Swiss Funds & Asset Management Association (SFAMA), as amended, and corresponds to the sum of all costs and commissions that are charged to the sub-fund's net assets (operating expenses) on an ongoing basis and expressed retroactively as a percentage of net assets.

* formerly: UBS ETF (CH) – MSCI Switzerland 100% hedged to EUR

** formerly: UBS ETF (CH) – MSCI Switzerland 100% hedged to USD

*** formerly: UBS ETF (CH) – MSCI Switzerland 100% hedged to GBP

The performance of the sub-fund is calculated in accordance with the SFAMA guidelines.

Performance in the past is not a reliable indicator of current or future performance.

The performance shown does not take account of commissions and costs charged when subscribing to and redeeming equities.

Supplementary information

Derivative financial instruments

(Risk assessment process: Commitment approach I [Art. 34 CISO-FINMA])

Repurchase agreements

The fund management company does not conduct any repurchase agreements

Remuneration of the Fund Management

See separate information at the end of the report.

Soft Commission Arrangements

The fund management company has not concluded any arrangements in the form of "soft commission arrangements".

Total Expense Ratio (TER)

This ratio was calculated in accordance with the SFAMA's "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

TER for the last 12 months: 0.26%

Swap costs

This number represents the total costs charged by the swap counterparty. These costs are debited from the fund's assets retrospectively on an ongoing basis as a percentage of the fund's assets. Swap costs are debited from the fund's assets in addition to the TER.

Swap costs for the last 12 months: 1.30%

Supplementary information

Derivative financial instruments

(Risk assessment process: Commitment approach I [Art. 34 CISO-FINMA])

Repurchase agreements

The fund management company does not conduct any repurchase agreements.

Remuneration of the Fund Management

See separate information at the end of the report.

Soft Commission Arrangements

The fund management company has not concluded any arrangements in the form of "soft commission arrangements".

Total Expense Ratio (TER)

This ratio was calculated in accordance with the SFAMA's "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

TER for the last 12 months: 0.26%

Swap costs

This number represents the total costs charged by the swap counterparty. These costs are debited from the fund's assets retrospectively on an ongoing basis as a percentage of the fund's assets. Swap costs are debited from the fund's assets in addition to the TER.

Swap costs for the last 12 months: 0.97%

³ Divergences in the totals may be attributed to rounding differences

Supplementary information

Derivative financial instruments

(Risk assessment process: Commitment approach I [Art. 34 CISO-FINMA])

Repurchase agreements

No securities were used in repurchase agreements at balance sheet date.

Remuneration of the Fund Management

See separate information at the end of the report.

Soft Commission Arrangements

The fund management company has not concluded any arrangements in the form of "soft commission arrangements".

Total Expense Ratio (TER)

This ratio was calculated in accordance with the SFAMA's "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

TER for the last 12 months:
Class (CHF) A-dis

0.20%

UBS ETF (CH)

³ Divergences in the totals may be attributed to rounding differences

⁴ The securities received as collateral are not accounted for in net assets

Supplementary information

Derivative financial instruments

(Risk assessment process: Commitment approach I [Art. 34 CISO-FINMA])

Repurchase agreements

No securities were used in repurchase agreements at balance sheet date.

Remuneration of the Fund Management

See separate information at the end of the report.

Soft Commission Arrangements

The fund management company has not concluded any arrangements in the form of "soft commission arrangements".

Total Expense Ratio (TER)

This ratio was calculated in accordance with the SFAMA's "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

TER for the last 12 months:
Class (CHF) A-dis

0.25%

UBS ETF (CH) – SPI[®]

Supplementary information

Derivative financial instruments

(Risk assessment process: Commitment approach I [Art. 34 CISO-FINMA])

Repurchase agreements

No securities were used in repurchase agreements at balance sheet date.

Remuneration of the Fund Management

See separate information at the end of the report.

Soft Commission Arrangements

The fund management company has not concluded any arrangements in the form of "soft commission arrangements".

Total Expense Ratio (TER)

This ratio was calculated in accordance with the SFAMA's "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

TER for the last 12 months:

Class (EUR) A-dis

Repurchase agreements

No securities were used in repurchase agreements at balance sheet date.

Remuneration of the Fund Management

See separate information at the end of the report.

Soft Commission Arrangements

The fund management company has not concluded any arrangements in the form of "soft commission arrangements".

Total Expense Ratio (TER)

This ratio was calculated in accordance with the SFAMA's "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

TER for the last 12 months:
Class (USD) A-dis

0.30%

Exchange rate

CHF 1 = USD 1.009846

Remuneration of the Fund Management

See separate information at the end of the report.

Soft Commission Arrangements

The fund management company has not concluded any arrangements in the form of "soft commission arrangements".

Total Expense Ratio (TER)

This ratio was calculated in accordance with the SFAMA's "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

TER for the last 12 months:

Class (GBP) A-dis

0.30%

Exchange rate

Replication Strategy for ETFs with physical replication

Our approach to passive equity investment is to use full replication where possible depending on the characteristics of the benchmark index, the size of portfolio and the client's desired tracking accuracy. In some situations, we may utilise stratified sampling where necessary due to size or liquidity.

In practice, the majority of our Equity and Fixed Income ETFs are typically fully replicated. As at 31 December 2015 the following sub-fund utilize stratified sampling:

UBS ETF (CH) – SPI® (CHF)

OTC Derivatives and Securities Lending

If the sub-fund enters into OTC transactions, it may be exposed to risks related to the creditworthiness of the OTC counterparties: when the sub-fund enters into futures contracts, options and swap transactions or uses other derivative techniques it is subject to the risk that an OTC counterparty may not meet (or cannot meet) its obligations under a specific or multiple contracts. Counterparty risk can be reduced by depositing a security. If the sub-fund is owed a security pursuant to an applicable agreement, such security shall be held in custody by the Custodian bank/Custodian in favour of the sub-fund or transferred to the OTC counterparty as agreed between the sub-fund and the OTC counterparty. Bankruptcy and insolvency events or other credit events with the OTC counterparty, the Custodian Bank or within their subcustodian/correspondent bank network may result in the rights or recognition of the sub-fund in connection with the security to be delayed, restricted or even eliminated, which would force the sub-fund to fulfil its obligations in the framework of the OTC transaction, in spite of any security that had previously been made available to cover any such obligation.

The sub-funds may lend portions of their securities portfolio to third parties. In general, securities may only be lent via recognised clearing houses or first-class financial institutions that specialise in activities of this kind and under the terms specified by such intermediaries. The sub-fund receives collateral for the securities lent.

Securities lending for UBS ETFs

An attractive option to boost performance

Securities lending enables ETFs to generate additional income for investors by lending their securities to a borrower acting on its own behalf (principal), or as an agent, in exchange for a lending fee.

For UBS ETFs under Swiss law, 100% of the income (after operating costs have been deducted) from securities lending goes to the ETFs. The fund management sub-fund does not receive any compensation.

UBS operates securities lending on a principal basis, which means that for every lending transaction UBS Switzerland AG is the sole counterparty of the ETF established in Switzerland and guarantees all the UBS ETF's claims. The principal approach has two advantages over alternative methods. Firstly, profitability can be boosted by high lending income for each fund while running costs are kept at a competitive level. Secondly, the risk of default can be minimised as the principal is obliged to comply with collateralisation regulations that are tailored to the securities lending portfolio as a whole.

Securities lending process

Ownership of the collateral to be deposited by UBS Switzerland AG is transferred to the fund management sub-fund and is held in a segregated safekeeping account at the custodian bank in favour of the funds.

As a result, there is no measurable counterparty risk as all the collateral has to qualify as custody account assets within the meaning of the relevant legislation. This means that if the ETF did not get back the securities lent to the borrower, it would have the right to dispose of the collateral deposited and to repurchase the missing securities on the market at current market prices. There would only be a risk of default if the market value of the collateral were no longer sufficient – despite the collateral margin – to cover the shortfalls.

Higher collateral requirements

Securities lending via investment funds is subject to strict regulatory provisions designed to protect investors, which the fund management company and the custodian bank must adhere to at all times. The measures put in place by UBS fund management go beyond the legal requirements in some areas.

Pursuant to the official ordinance on collective investment schemes (CISO-FINMA), the Swiss fund management company is obliged to agree with the borrower that the value of the collateral must amount to at least 100% of the market value of the securities lent at all times. However, in accordance with the securities lending agreement concluded between the fund management company and UBS Switzerland AG, the value of the collateral must always amount to at least 105% for UBS ETFs under Swiss law.

If equities are deposited as collateral for securities lending, an additional valuation discount (haircut) of 15% is applied to the minimum of 100%. Combined with the safety margin, the value of the equities deposited is therefore more than 120% of the value of the securities lent at all times. Furthermore, UBS ETFs far exceed the regulatory requirements in respect of the value, quality, liquidity and diversification of the collateral obtained. To ensure the highest possible correlation with the portfolio structure, appropriate concentration limits are also applied to the collateral portfolio. These limits ensure that only a certain level of securities, rating categories, industrial sectors or asset classes may be held. In particular, only the government bonds of countries in the G10 states or bonds with a minimum rating of "A" are permitted as bond collateral. Stress tests for various scenarios have found that there is a very high probability that the large safety margin can prevent losses from securities lending.

Collateral is held in separate fund-specific custody accounts in order to secure the liabilities arising from the securities lending agreement and into which the borrower transfers securities to be held by the lender in trust. Daily revaluation at market prices ensures that the value of the collateral provided is always adjusted correctly. Collateralisation of the securities lending transactions is continually reviewed and adjusted as necessary. It can therefore be subject to change.

Securities lending and collateral

Offset payments and commission income from securities lending are recognised in the income statements, and the securities lent and the collateral received for securities lent are reported in the inventory of Fund assets in accordance with the principle of settlement date accounting.
