The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

UBS (Irl) Investor Selection – Equity Opportunity Long Short Fund (the "Fund"), class (EUR) K-1-PF-acc (ISIN: IE00BSSWB887)

A sub fund of UBS (Irl) Investor Selection PLC (the "Company"). UBS Fund Management (Luxembourg) S.A. (the Manager), an authorised UCITS management company, acts as manager to the Company.

Objectives and investment policy

Objective: The fund aims to grow capital while seeking to manage the risks associated with investing in equity markets.

The actively managed Fund will invest in equities and equity related securities (such as real estate investment trusts, American Depositary Receipts and Global Depositary Receipts). The investment manager may use the Index MSCI All Country World for security selection at its own discretion. It may also invest in money market funds and money market instruments. The Fund uses a long-short equity strategy to exploit stock price anomalies in companies around the world, buying long positions in stocks considered undervalued or attractive and selling short positions in overvalued or less attractive stocks. Companies are selected according to a combination of fundamental, quantitative and qualitative research, and the Fund will hold a relatively concentrated portfolio. The net market exposure of the Fund will vary according to market conditions.

The Fund uses over-the-counter and exchange-traded financial derivative instruments (FDIs) to manage currency and equity exposure. The derivatives return is linked to movements in the underlying asset(s) and may result in the Fund being leveraged whereby the exposure of the Fund as a result of all positions held by it may exceed its net asset value.

The Fund is actively managed and may use the referenced index for

security selection and may use a representative cash rate as described in the prospectus for performance comparison.

The base currency of the Fund is EUR.

You can buy or sell your investment until 12:30 pm (Irish time) on any day that is a business day in both Dublin and London.

The income in respect of an accumulation share class is not distributed but is retained in the Fund.

Risk and reward profile

More about this rating

- The Indicator above is not a measure of the risk of capital loss, but a measure of the Fund's price movement over time.
- Historical data, such as used in calculating the Indicator, may not be a reliable indication for the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed and may vary over time.
- No capital guarantee exists for this product so investors can lose the whole of their investment.

Why is this fund in Category 5?

The Fund is in risk category 5 because the volatility of its returns is high.

The Fund delivers a long and short exposure to equities in order to reduce the volatility of the portfolio compared to a long only equity Fund. However the Fund can still be subject to fluctuations in value.

Further material risks relevant to the Fund which are not adequately captured by the Indicator:

- Counterparty Risk, a significant use of over-the-counter instruments exposes the Fund to potential significant counterparty default risk.
- Some of the underlying investments in the Fund may be difficult to buy and sell, which may affect the Fund's value.
- Operational risk inherent in operating this Fund (mainly potential valuation and transaction processing failures) is borne by the Company.
- Derivatives are highly sensitive to change in the value of the assets they are based on. The use of derivatives to generate leverage could impact fund returns as leverage may result in gains or losses that are greater than the original amount invested.

Charges

The charges you pay are used to pay the costs of running the Company and the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest¹

Entry charge	3.00%
Exit charge	0.00%
Conversion charge	0.00%

Charges taken from the fund over a year

Ongoing charges	1.35%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	20.00%
-----------------	--------

Performance fee of 20.00% of the return achieved by the fund that is in excess of both the High Watermark and the Hurdle Rate (Euro OverNight Index Average (EONIA)). Hurdle rate will be zero when (Euro OverNight Index Average (EONIA)) is negative. 0.58% of the net asset value of the share class was paid out for the past financial year.

¹ This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

The **entry charge** shown is a maximum figure. In some cases you might pay less – you can find this out from your financial adviser.

The **ongoing charges** figure is based on the last twelve months prior to the preparation of this document. This figure may vary from year to year. It generally excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares in another collective investment undertaking

For more information, please see Fees and Expenses section of the Company's prospectus or the Fund's supplement, which are available at www.ubs.com/funds.

Past performance

Performance in the past is not a reliable indicator of future results

The chart shows the class's investment returns calculated as percentage year-end over year-end change of the class net asset value in the share class currency. In general any past performance takes account of all ongoing charges, but not the entry charge.

The fund was launched in 2010. The class came into existence in 2015.

The past performance of this share class is calculated in EUR. Where shown, the benchmark is a reference point to which the performance of a share class can be compared. The subfund does not intend to replicate the benchmark.
