

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

UBS Global Emerging Markets Opportunity Fund (the "Fund"), class (SGD) Q-acc (ISIN: IE00BZCDBT70)

A sub fund of UBS (Irl) Investor Selection PLC (the "Company"). UBS Fund Management (Luxembourg) S.A. (the Manager), an authorised UCITS management company, acts as manager to the Company.

Objectives and investment policy

Objective: capital appreciation on a risk adjusted basis over the medium to long term by investing in emerging market equities.

The Fund invests mostly in equities (common or preferred stock and warrants) or equity related instruments (such as American depositary receipts, Global depositary receipts, participation notes and equity linked notes) from global emerging / developing countries around the world.

The investment manager has full discretion in selecting stocks, and selects stocks on their fundamental value, holding typically 20-40 stocks, representing the best ideas of the investment team. These may be of any size and drawn from any sector. The Fund may invest in money market instruments and in cash deposits in various currencies. The Fund may also invest in debt securities, such as bonds issued by governments or corporations (considered investment grade or above by the principal ratings agencies). The Fund may use financial derivative instruments (FDIs) for investment or hedging purposes. Assets in the Fund are priced in a variety of foreign currencies and therefore the value of your investment may fall if your currency rises against other currencies. The Fund may from time to time use investment techniques known as

"hedging" to provide protection against exchange risks. For hedging purposes, the Fund may use FDIs to hedge against fluctuations in the relative values of its portfolio positions due to changes in currency exchange rates and market interest rates.

The base currency of the Fund is USD.

You can buy or sell your investment up until 2.00 pm (Irish time) on the business day in Dublin immediately preceding the subscription/redemption day.

The income in respect of an accumulation share class is not distributed but is retained in the Fund.

The exchange rate risk of the share class currency is not hedged against the currency of the fund.

Risk and reward profile

More about this rating

- The Indicator above is not a measure of the risk of capital loss, but a measure of the Fund's price movement over time.
- Historical data, such as used in calculating the Indicator, may not be a reliable indication for the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed and may vary over time.
- No capital guarantee exists for this product so investors can lose the whole of their investment.

Why is this fund in Category B?

Emerging markets are at an early stage of development which may involve a high level of price volatility, lower market transparency, regulatory hurdles, corporate governance and political and social challenges. There is increased return potential and thus higher risk.

Further material risks relevant to the Fund which are not adequately captured by the Indicator:

- Counterparty Risk, a small usage of over-the-counter instruments exposes the Fund to small potential counterparty default risk.
- Liquidity Risk, a significant portion of the Fund is invested in less liquid instruments whose prices could fluctuate in certain market conditions.
- Operational risk inherent in operating this Fund (mainly potential valuation and transaction processing failures) is borne by the Company.
- Derivative Risk, derivatives may result in gains or losses that are greater than the original amount invested.

Charges

The charges you pay are used to pay the costs of running the Company and the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest¹

Entry charge	3.00%
Exit charge	0.00%
Conversion charge	0.00%

Charges taken from the fund over a year

Ongoing charges	0.96%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	none
-----------------	------

¹ This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

The **entry charge** shown is a maximum figure. In some cases you might pay less – you can find this out from your financial adviser.

The **ongoing charges** are estimated in the absence of historical data or when the calculated figure is considered unsuitable because of a material change. As soon as available or suitable, the calculated ongoing charges are reported and may differ from the estimate. They generally exclude:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares in another collective investment undertaking

For more information, please see Fees and Expenses section of the Company's prospectus or the Fund's supplement, which are available at www.ubs.com/funds.
