

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## UBS (Lux) Bond SICAV - USD High Yield (USD), class I-A3-acc (ISIN: LU0396370495), USD

a sub-fund of UBS (Lux) Bond SICAV

This subfund is managed by UBS Fund Management (Luxembourg) S.A.(the "Management Company"), a company of the UBS AG.

## Objectives and investment policy

The investment fund invests mainly in high-yield corporate bonds denominated in USD from issuers which must satisfy strict selection criteria.

The fund manager combines carefully selected issuers from various countries and securities with different maturities with the objective of exploiting interesting earnings opportunities and in doing so keeping the level of risk under control.

In principle, investors may ask the Management Company to redeem their units on any business day in Luxembourg.

Income of this share class is reinvested.

## Risk and reward profile

### More about the risk category

- The risk category is based on the estimated future volatility of the fund. The method used for this estimate depends on the fund type and historical data.
- Historical performance is not a reliable indicator for future performance.
- The risk category allocated is not static and may vary over time.
- Allocation to the lowest risk category does not mean that an investment in this fund is free of risk.

### Why is the fund in this category?

- The fund is in risk category 4 because the volatility of its returns is moderate.
- The fund invests in bonds and may therefore be subject to volatility. This requires corresponding risk tolerance and capacity. The value of a unit may fall below the purchase price. Changes in interest rates have an effect on the value of the portfolio.

### Further material risks

- Sub-investment grade bonds are usually subject to a high credit risk (i.e. potential loss due to failure of issuer).
- The fund can invest in less liquid assets that may be difficult to sell in distressed markets.
- The fund may use derivatives which can reduce investor risks or give rise to market risks as well as potential loss due to failure of counterparty
- Conversion Risk can arise from the use of contingent convertibles. Contingent convertibles are subject to equity conversion or principal writedown, resulting in a permanent loss, if bank regulatory capital falls below predefined thresholds.
- Every fund reveals specific risks, a detailed and comprehensive list of risk descriptions can be found in the prospectus.

## Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	2.00%
Exit charge	0.00%
Conversion fee	2.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

### Charges taken from the fund over a year

Ongoing charges	0.53%
-----------------	-------

### Charges taken from the fund under certain specific conditions

Performance fee	none
-----------------	------

The **entry charge** shown is a maximum figure. In some cases you might pay less – you can find this out from your financial adviser.

The **ongoing charges** are estimated in the absence of historical data or when the calculated figure is considered unsuitable because of a material change. As soon as available or suitable, the calculated ongoing charges are reported and may differ from the estimate. They generally exclude:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.
