

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

UBS (Lux) Key Selection SICAV - European Growth and Income (EUR), class (RMB hedged) P-8%-mdist (ISIN: LU1038902760), CNH

a sub-fund of UBS (Lux) Key Selection SICAV

This sub-fund is managed by UBS Fund Management (Luxembourg) S.A (the Fund Management Company).

Objectives and investment policy

The actively managed fund aims to achieve long-term asset growth. The fund manager invests, with a focus on Europe, in equities and bonds (focus on high-yield bonds), as well as convertible bonds, thereby diversifying exposure.

The subfund is actively managed with reference to the benchmark, 1/3 MSCI Europe Index (net div reinvested), 1/3 ICE BofA EUR High Yield 3% Constrained Index, 1/3 convertible bond indices comprised of 50% Refinitiv Eurozone Convertible Bond Index (EUR) and 50% Refinitiv Global Convertible Index - Global Vanilla (hedged in EUR) hedged CNH. The benchmark is used in portfolio composition, performance comparison and risk management.

In principle, investors may ask the Management Company to redeem their units on any business day in Luxembourg.

This share class pays a dividend. Dividends can comprise income and capital and may be paid exclusive of fees.

This share class pays a monthly variable dividend, calculated at a constant annual percentage rate of the NAV. The annual percentage rate is stated in the share class name.

The dividend paid is unrelated to expected or past income or return of the share class or the fund, but is calculated as a percentage of the Total Net Asset value of the share class.

Dividend payments might, in certain circumstances, include a portion

of capital, therefore this share class is not designed for investors who want to build wealth.

The portfolio manager may freely choose how to compile the portfolio, and is not tied to the benchmark in its implementation.

The exchange rate risk of the share class currency is to a large extent hedged against the currency of the fund.

Risk and reward profile

More about the risk category

- The risk category is based on the estimated future volatility of the fund. The method used for this estimate depends on the fund type and historical data.
- Historical performance is not a reliable indicator for future performance.
- The risk category allocated is not static and may vary over time.
- Allocation to the lowest risk category does not mean that an investment in this fund is free of risk.

Why is the fund in this category?

- The fund is in risk category 4 because the volatility of its returns is moderate.

The fund may invest in bonds of varying credit quality, money market securities and equities on a global basis and may be subject to high volatility. The fund invests in convertible bonds. The fund's value may fluctuate due to equity exposure, interest rates or credit quality. This requires corresponding risk tolerance and capacity. The value of a unit may fall below the purchase price.

Further material risks

- Investment in fixed income securities are usually considered as carrying credit risk (i.e. potential loss due to failure of issuer).
- Sub-investment grade bonds are usually subject to a high credit risk (i.e. potential loss due to failure of issuer).
- The fund may use derivatives, which can reduce or increase investment risk (including the risk of loss due to the bankruptcy of the counterparty).
- It is possible that the distributions result in an erosion of assets and a reduction of invested capital.
- Every fund reveals specific risks, a detailed and comprehensive list of risk descriptions can be found in the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	6.00%
Exit charge	0.00%
Conversion fee	6.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	1.87%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	none
-----------------	------

The **entry charge** shown is a maximum figure. In some cases you might pay less – you can find this out from your financial adviser.

The **ongoing charges** figure is based on the last twelve months prior to the preparation of this document. This figure may vary from year to year. It generally excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information, please see the charges section of the fund's prospectus, which is available at www.ubs.com/funds.

Past performance

Historical performance is not a reliable indicator of future results.

The chart shows the class's investment returns calculated as a percentage change in the fund's net asset value from the end of one year to the end of the next. In general, the calculation of past performance takes account of all costs but not the issuing commission. If the fund is managed against a benchmark, its return is also shown.

The class was launched in 2014.

The past performance is calculated in CNH.

Where shown, the benchmark is a reference point to which the performance of a share class can be compared. The subfund does not intend to replicate the benchmark.

Practical information
