

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

UBS (Lux) Strategy SICAV - Systematic Allocation Portfolio Defensive (USD), class (CHF hedged) K-1-acc (ISIN: LU1622991070), CHF

a sub-fund of UBS (Lux) Strategy SICAV

This sub-fund is managed by UBS Fund Management (Luxembourg) S.A (the Fund Management Company).

Objectives and investment policy

The investment fund invests in bonds primarily of high quality as well as in money market instruments and equities. It invests worldwide and with a variable ratio. In doing so, the proportion of fund assets invested in stocks can vary greatly and total up to 40%. Hedge funds and commodities can also be added to a lesser degree.

The fund manager combines carefully selected securities from a wide range of asset classes with the aim of exploiting attractive return opportunities while maintaining risk control.

The actively managed fund uses a composite benchmark as a reference for risk management, consisting of 23% Bloomberg Barclays Eurodollar Corporate AAA-BBB 1-5Y Index; 28% Bloomberg Barclays Capital US Corporate Investment Grade Index; 5% ICE BofA US High Yield Constrained Index; 4% J.P. Morgan Emerging Market Bond Index Global Diversified; 30% MSCI World Index (net div. reinvested) (hedged in USD); 10% HFRX Global Hedge Fund Index. The fund is not restricted by a benchmark in its investments.

In principle, investors may ask the Management Company to redeem their units on any business day in Luxembourg.

Income of this share class is reinvested.

The exchange rate risk of the share class currency is to a large extent hedged against the currency of the fund.

Risk and reward profile

More about the risk category

- The risk category is based on the estimated future volatility of the fund. The method used for this estimate depends on the fund type and historical data.
- Historical performance is not a reliable indicator for future performance.
- The risk category allocated is not static and may vary over time.
- Allocation to the lowest risk category does not mean that an investment in this fund is free of risk.

Why is the fund in this category?

- The fund is in risk category 4 because the volatility of its returns is moderate.
- The fund may invest in bonds of varying credit quality, money market securities, equities and alternative assets and may be subject to high volatility. This requires corresponding risk tolerance and capacity. The value of a unit may fall below the purchase price.

Further material risks

- Investment in fixed income securities are usually considered as carrying credit risk (i.e. potential loss due to failure of issuer).
- Operational risks/third parties: The fund may invest in funds managed by third parties. If the third parties are affected by an event, this could have a negative impact on the sub-fund and even cause a financial loss.
- The fund can invest in less liquid assets that may be difficult to sell in distressed markets.
- The fund may use derivatives, which can reduce or increase investment risk (including the risk of loss due to the bankruptcy of the counterparty).
- The fund pursues a very active management approach. This means that the fund's performance may deviate considerably from the market rate of return.
- Every fund is exposed to specific risks. A detailed and comprehensive list of risk descriptions can be found in the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	4.00%
Exit charge	0.00%
Conversion fee	4.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	1.27%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	none
-----------------	------

The **entry charge** shown is a maximum figure. In some cases you might pay less – you can find this out from your financial adviser.

The **ongoing charges** figure is based on the last twelve months prior to the preparation of this document. This figure may vary from year to year. It generally excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information, please see the charges section of the fund's prospectus, which is available at www.ubs.com/funds.

Past performance

Historical performance is not a reliable indicator of future results.

The chart shows the class's investment returns calculated as a percentage change in the fund's net asset value from the end of one year to the end of the next. In general, the calculation of past performance takes account of all costs but not the issuing commission. If the fund is managed against a benchmark, its return is also shown.

The class was launched in 2019. The fund was launched in 2017.

The past performance is calculated in CHF.

Where shown, the benchmark is a reference point to which the performance of a share class can be compared. The subfund does not intend to replicate the benchmark.
