## Directors' Report (continued)

### Significant changes in the state of affairs

On 5 May 2016, the Attribution Managed Investment Trust "AMIT" regime, applying to Managed Investment Trusts ("MITs") was established under the Tax Laws Amendment (New Tax System for Managed Investment Trusts) Act 2016. With its introduction, the Responsible Entity has modified Funds' Constitutions to facilitate each Fund's operation under the new AMIT regime. The Responsible Entity intends to elect for the AMIT Regime to apply to the Funds for the 2017/2018 financial year and this will be done on lodgment of the Funds' tax return. The Funds had determined that the units should continue to be classified as financial liabilities on 30 June 2018 as they do not meet the criteria under AASB 132 Financial Instruments: Presentation to be classified as equity.

In the opinion of the directors, except as disclosed above, there were no other significant changes in the state of affairs of the Funds that occurred during the year/period.

### Likely developments and expected results of operations

The Funds will continue to be managed in accordance with the investment objectives and guidelines as set out in the governing documents of the Funds and in accordance with the provisions of the Funds' Constitutions.

Further information on likely developments in the operations of the Funds and the expected results of those operations have not been included in this report because the Responsible Entity believes it would be likely to result in unreasonable prejudice to the Funds.

### Events occurring after reporting period

No matter or circumstance has arisen since 30 June 2018 that has significantly affected, or may significantly affect:

- (i) the operations of the Funds in future financial years, or
- (ii) the results of those operations in future financial years, or
- (iii) the state of affairs of the Funds in future financial years.

### Indemnification and insurance of officers and auditors

No insurance premiums are paid for out of the assets of the Funds in regards to insurance cover provided to either the officers of UBS Asset Management (Australia) Ltd or the auditors of the Funds. So long as the officers of UBS Asset Management (Australia) Ltd act in accordance with the Funds' Constitutions and the *Corporations Act 2001*, the officers remain indemnified out of the assets of the Funds against losses incurred while acting on behalf of the Funds.

The auditors of the Funds are in no way indemnified out of the assets of the Funds.

### Fees paid to and interests held in the Funds by the Responsible Entity or its associates

Fees paid to the Responsible Entity and its associates out of Funds' assets during the year/period are disclosed in Note 16 to the financial statements.

No fees were paid out of the Funds' assets to the directors of the Responsible Entity during the year/period.

The number of interests in the Funds held by the Responsible Entity or its associates as at the end of the financial year/period are disclosed in Note 16 to the financial statements.

### Interests in the Funds

The movement in units on issue in the Funds during the year/period is disclosed in Note 5 to the financial statements.

The value of the Funds' assets and liabilities is disclosed in the Statement of Financial Position and derived using the basis set out in Note 2 to the financial statements.

### Environmental regulation

The operations of the Funds are not subject to any particular or significant environmental regulations under a Commonwealth, State or Territory law.

## Directors' Report (continued)

### Single set of financial reports

The Funds are entities of the kind referred to in ASIC Corporations (Related Scheme Reports) Instrument 2015/839 issued by the Australian Securities and Investments Commission ("ASIC") and in accordance with that Instrument, Funds with a common Responsible Entity (or related Responsible Entities) can include their financial reports in adjacent columns in a single set of financial reports.

Proceeds from redeeming units in a Fund can be applied to acquire units in other Funds included in these financial statements. All the Funds are open-ended.

### Rounding of amounts

The Funds are entities of the kind referred to in ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191 issued by the Australian Securities and Investments Commission ("ASIC") relating to the "rounding off" of amounts in the Directors' report. For UBS IQ Morningstar Australia Dividend Yield ETF, UBS IQ MSCI Australia Ethical ETF, UBS IQ MSCI Europe Ethical ETF and UBS IQ MSCI World ex Australia Ethical ETF, amounts in the Directors' report have been rounded to the nearest thousand dollars in accordance with that ASIC Instrument, unless otherwise indicated. For UBS IQ Morningstar Australia Quality ETF, UBS IQ MSCI Asia APEX 50 Ethical ETF, UBS IQ MSCI Japan Ethical ETF, UBS IQ MSCI USA Ethical ETF and UBS IQ Cash ETF, amounts in the Directors' report have been rounded to the nearest dollar in accordance with that ASIC Instrument, unless otherwise indicated.

### Auditor's Independence Declaration

A copy of the Auditor's Independence Declaration as required under section 307C of the *Corporations Act 2001* is set out on page 10.

This report is made in accordance with a resolution of the directors.

B J Doherty  
Chairman

A L Anderson  
Director

Sydney  
13 September 2018

## Auditor's Independence Declaration to the Directors of UBS Asset Management (Australia) Ltd, as Responsible Entity for UBS Exchange Traded Funds

For the following UBS Exchanged Traded Funds ("the Funds"):

- ▶ UBS IQ Morningstar Australia Quality ETF
- ▶ UBS IQ Morningstar Australia Dividend Yield ETF
- ▶ UBS IQ MSCI Australia Ethical ETF
- ▶ UBS IQ MSCI Asia APEX 50 Ethical ETF
- ▶ UBS IQ MSCI Europe Ethical ETF
- ▶ UBS IQ MSCI Japan Ethical ETF
- ▶ UBS IQ MSCI USA Ethical ETF
- ▶ UBS IQ Cash ETF
- ▶ UBS IQ MSCI World ex Australia Ethical ETF

As lead auditor for the audit of the Funds for the financial year ended 30 June 2018, I declare to the best of my knowledge and belief, there have been:

- a) no contraventions of the auditor independence requirements of the *Corporations Act 2001* in relation to the audit; and
- b) no contraventions of any applicable code of professional conduct in relation to the audit.

Ernst & Young

Graeme McKenzie  
Partner

## 1 General Information

These financial statements cover the UBS IQ Morningstar Australia Quality ETF, UBS IQ Morningstar Australia Dividend Yield ETF, UBS IQ MSCI Australia Ethical ETF, UBS IQ MSCI Asia APEX 50 Ethical ETF, UBS IQ MSCI Europe Ethical ETF, UBS IQ MSCI Japan Ethical ETF, UBS IQ MSCI USA Ethical ETF, UBS IQ Cash ETF and UBS IQ MSCI World ex Australia Ethical ETF (“the Funds”) as individual entities.

The Responsible Entity of the Funds is UBS Asset Management (Australia) Ltd (“the Responsible Entity”). The Responsible Entity’s registered office is located at Level 16 Chifley Tower, 2 Chifley Square, Sydney NSW 2000. The Responsible Entity is incorporated and domiciled in Australia.

The financial statements of the Funds for the year/period ended 30 June 2018 were authorised for issue in accordance with a resolution of the directors of the Responsible Entity dated 13 September 2018. The directors of the Responsible Entity have the power to amend and reissue the financial statements.

The financial statements are presented in Australian dollars.

On 5 May 2016, the Attribution Managed Investment Trust “AMIT” regime, applying to Managed Investment Trusts (“MITs”) was established under the Tax Laws Amendment (New Tax System for Managed Investment Trusts) Act 2016. With its introduction, the Responsible Entity has modified Funds’ Constitutions to facilitate Funds’ operation under the new AMIT regime. The Responsible Entity intends to elect for the AMIT Regime to apply to the Funds for the 2017/2018 financial year and this will be done on lodgment of the Funds’ tax return. As at 30 June 2018, the Funds met the conditions to be an AMIT and reassessed the other criteria in AASB 132 *Financial Instruments: Presentation* for classifying unitholders’ funds. The Funds had determined that the units should continue to be classified as financial liabilities on 30 June 2018 as they do not meet the criteria under AASB 132 *Financial Instruments: Presentation* to be classified as equity.

See Note 2 for further information.

The Funds contain two classes which are equally subordinate but not identical (one class is quoted and traded on the AQUA market and the other class is unquoted and available to wholesale investors only). Though both classes have applied the same management fee rate during the year, management fees can be varied by the Responsible Entity, and therefore, contractually, the fee rates may differ and the return that the members in each class receive on liquidation may also differ. Therefore, as there are different obligations per each class, the Responsible Entity has a contractual obligation to make distribution, and therefore the liability classification has been retained.

## 2 Summary of significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all years/period presented, unless otherwise stated.

### (a) Basis of preparation

These general purpose financial statements have been prepared in accordance with Australian Accounting Standards and other authoritative pronouncements of the Australian Accounting Standards Board and the *Corporations Act 2001* in Australia.

The Funds are for-profit funds for the purpose of preparing the financial statements.

The financial statements are prepared on the basis of fair value measurement of assets and liabilities except where otherwise stated.

The Statement of Financial Position is presented on a liquidity basis. Assets and liabilities are presented in decreasing order of liquidity and are not distinguished between current and non-current. All balances are expected to be recovered or settled within twelve months, except for investments in financial assets, financial liabilities held at fair value through profit or loss and net assets attributable to unitholders. The amount expected to be recovered or settled within twelve months after the end of the reporting period cannot be reliably determined.

## 2 Summary of significant accounting policies (continued)

### (a) Basis of preparation (continued)

#### (i) Compliance with Australian Accounting Standards and International Financial Reporting Standards (IFRS)

The financial statements of the Funds comply with Australian Accounting Standards as issued by the Australian Accounting Standards Board and also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board.

#### (ii) New and amended standards adopted by the Funds

There are no standards, interpretations or amendments to existing standards that are effective for the first time for the financial year beginning 1 July 2017 that have a material impact on the Funds.

### (b) Investment entities

Funds that meet the definition of an investment entity within AASB 10 are required to measure their subsidiaries at fair value through profit or loss rather than consolidate them. The criteria which define an investment entity are, as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

The Board has concluded that the Funds meet the additional characteristics of an investment entity, in that it has more than one investment; the investments are predominantly in the form of equities and similar securities; it has more than one investor.

The Board has also concluded that the Funds meet the definition of an investment entity. These conclusions will be reassessed on an annual basis, if any of these criteria or characteristics change.

### (c) Financial instruments

#### (i) Classification

The Funds' investments are classified as at fair value through profit or loss. They comprise:

- *Financial instruments held for trading*

Derivative financial instruments are categorised as held for trading within the financial asset or financial liability at fair value through profit or loss category.

- *Financial instruments designated at fair value through profit or loss upon initial recognition*

These include financial assets and financial liabilities that are not held for trading purposes and which may be sold. These are investments in international securities.

Financial assets and liabilities designated at fair value through profit or loss at inception are those that are managed and their performance evaluated on a fair value basis in accordance with the Funds' documented investment strategy. The Funds' policy is for the Responsible Entity to evaluate the information about these financial instruments on a fair value basis together with other related financial information.

#### (ii) Recognition/derecognition

The Funds recognise financial assets and financial liabilities on the date it becomes party to the contractual agreement (trade date) and recognises changes in fair value of the financial assets or financial liabilities from this date.

## 2 Summary of significant accounting policies (continued)

### (c) Financial instruments (continued)

#### (ii) Recognition/derecognition (continued)

A financial asset (or, where applicable a part of a financial asset or part of a group of similar assets) is derecognised where:

- the rights to receive cash flows from the asset have expired;
- the Funds retain the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass through' agreement; or
- the Funds have transferred its rights to receive cash flows from the asset and either:
  - (a) has transferred substantially all the risks and rewards of the asset; or
  - (b) has neither transferred nor retained substantially all the risks and rewards of the asset but has transferred control of the asset.

Any gains or losses arising on derecognition of the asset (calculated as the difference between the disposal proceeds and the carrying amount of the asset) are included in the Statement of Comprehensive Income in the reporting period the asset is derecognised as realised gains or losses on financial instruments.

#### (iii) Measurement

##### *Financial assets and liabilities held at fair value through profit or loss*

Financial assets and liabilities held at fair value through profit or loss are measured initially at fair value excluding any transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability. Transaction costs on financial assets and financial liabilities held at fair value through profit or loss are expensed immediately. Subsequent to initial recognition, all instruments held at fair value through profit or loss are measured at fair value with changes in their fair value recognised in the Statement of Comprehensive Income.

The fair value of financial assets and liabilities traded in active markets is based on their quoted market prices at the end of the financial year/period without any deduction for estimated future selling costs. Financial assets are priced at current bid prices, while financial liabilities are priced at current asking price.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

The fair value of financial assets and liabilities not traded in an active market is determined using valuation techniques. These include the use of recent arm's length market transactions, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

Where discounted cash flow techniques are used, estimated future cash flows are based on management's best estimates and the discount rate used is the market rate at the end of the year/period applicable for an investment with similar terms and conditions.

For other pricing models, inputs are based on market data at the end of the year/period.

There may be a difference between the fair value at initial recognition and amounts determined using a valuation technique. If such a difference exists, the Funds recognise the difference in the Statement of Comprehensive Income to reflect a change in factors, including time, that market participants would consider in setting a price.

The Funds' financial instruments that are valued based on active markets generally include listed instruments ranging from listed equities and/or listed derivatives, where applicable.

The Funds' financial instruments that are valued based on inactive or unquoted markets generally include unlisted instruments such as over the counter derivatives, where applicable.

## 2 Summary of significant accounting policies (continued)

### (c) Financial instruments (continued)

#### (iii) Measurement (continued)

Further details on how the fair values of financial instruments are determined are disclosed in Note 15.

#### (iv) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position when, and only when, there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously. Refer to Note 14 to the financial statements for further information.

### (d) Net assets attributable to unitholders

Units are redeemable at the unitholders' option, however, applications and redemptions may be suspended by the Responsible Entity if it is in the best interests of the unitholders.

The units can be put back to the Funds at any time for cash based on the redemption price, which is equal to a proportionate share of the Funds' net asset value attributable to the unitholders.

The units are carried at the redemption amount that is payable at balance sheet date if the holder exercises the right to put the unit back to the Funds. This amount represents the expected cash flows on redemption of these units.

Units are classified as equity when they satisfy the following criteria under AASB 132 *Financial instruments: Presentation*:

- the puttable financial instrument entitles the holder to a pro-rata share of net assets in the event of the Funds' liquidation;
- the puttable financial instrument is in the class of instruments that is subordinate to all other classes of instruments and class features are identical;
- the puttable financial instrument does not include any contractual obligations to deliver cash or another financial asset, or to exchange financial instruments with another entity under potentially unfavourable conditions to the Funds, and it is not a contract settled in the Fund's own equity instruments; and
- the total expected cash flows attributable to the puttable financial instrument over the life are based substantially on the profit or loss.

As at 30 June 2017, net assets attributable to unitholders are classified as a financial liability. As at 30 June 2018, net assets attributable to unitholders did not meet the criteria under AASB 132 *Financial Instruments: Presentation* to be classified as equity and therefore continue to be classified as a financial liability.

### (e) Cash and cash equivalents

Cash and cash equivalents include cash on hand, deposits held at call with banks or other financial institutions and margin accounts. Margin accounts comprise cash held as collateral for derivative transactions. The cash pertinent to the margin accounts is held by the broker and is only available to meet margin calls.

### (f) Investment income

Interest income and expense is recognised in the Statement of Comprehensive Income for all debt instruments using the effective interest method.

Interest income on discount securities include both interest on maturity and any realized gains/(losses) on discount securities component.

Interest income on discount securities is calculated as the difference between the purchase price and face value on maturity of a security.

## 2 Summary of significant accounting policies (continued)

### (f) Investment income (continued)

Dividend income is recognised on the ex-dividend date when the Funds' right to receive the payment is established and dividend revenue is presented gross of withholding tax in the Statement of Comprehensive Income.

Trust distributions are recognised on a present entitlement basis.

### (g) Expenses

All expenses, including Responsible Entity's fees and other expenses, which include dividend withholding tax, are recognised in the Statement of Comprehensive Income on an accruals basis.

### (h) Income tax

Under current legislation, the Funds are not subject to income tax as unitholders are presently entitled to the income of the Funds and the Funds fully distributes their net taxable income.

### (i) Distributions

In accordance with the Funds' Constitutions, the Funds fully distribute their income adjusted for amounts determined by the Responsible Entity, to unitholders by cash or reinvestment. The distributions are recognised in the Statement of Comprehensive Income as finance costs attributable to unitholders.

### (j) Increase/decrease in net assets attributable to unitholders

Income not distributed is included in the net assets attributable to the unitholders. Where the Funds' units are classified as liabilities, movements in net assets attributable to unitholders are recognized in profit or loss as finance costs.

### (k) Foreign currency translation

#### (i) *Functional and presentation currency*

Items included in the Funds' financial statements are measured using the currency of the primary economic environment in which it operates ("the functional currency"). This is the Australian dollar, which reflects the currency of the economy in which the Funds compete for funds and is regulated. The Australian dollar is also the Funds' presentation currency.

#### (ii) *Transactions and balances*

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translations at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when fair value was determined. Translation differences on assets and liabilities carried at fair value are reported in the Statement of Comprehensive Income on a net basis within net gains/(losses) on financial instruments held at fair value through profit or loss.

## 2 Summary of significant accounting policies (continued)

### (l) Receivables

Receivables may include income receivable and amounts are generally received within 30 days of being recorded as receivables.

Trades are recorded on trade date and normally settled within three business days. Sales of securities and investments that are unsettled at the end of the financial year/period, are included in receivables.

Accrued income may include amounts for dividends, trust distributions and interest.

Dividends and trust distributions are accrued when the right to receive payment is established. Interest is accrued at the end of the year/period from the time of last payment.

### (m) Payables

Payables include liabilities and accrued expenses owing by the Funds which are unpaid as at the end of the year/period.

Trades are recorded on trade date and normally settled within three business days. Purchases of securities and investments that are unsettled at the end of the financial year/period are included in payables.

The distribution amount payable to unitholders as at the end of the year/period is recognised separately on the Statement of Financial Position as unitholders are presently entitled to the distributable income under the Funds' Constitutions.

### (n) Applications and redemptions

Application amounts may be in the form of a parcel of quoted securities transferred through Clearing House Electronic Subregister System (CHES) or can be paid in cash. The parcel of securities related to in-specie applications generally reflect the characteristics of the Funds' underlying Indexes. Investors may purchase units by trading on the Australian Securities Exchange (ASX).

Applications for Units in a Fund may only be made by Authorised Participants, acting as principal. Unitholders may only redeem Units if they are an Authorised Participant acting as principal and are a Qualifying Australian Resident as defined in the Product Disclosure Statement. Investors may sell units by trading on the ASX.

Unit redemption price is determined by reference to the net assets of the Funds divided by the number of units on issue. For unit pricing purposes, net assets are determined using the last reported trade price for securities. These prices may differ from the market price quoted on the ASX.

### (o) Goods and Services Tax (GST)

The GST incurred on the costs of various services provided to the Funds by third parties have been passed on to the Funds. The Funds qualifies for Reduced Input Tax Credits (RITC) at a rate of 55% to 75%. Hence, the costs have been recognised in the Statement of Comprehensive Income net of the amount of GST recoverable from the Australian Taxation Office (ATO).

Accounts payable are inclusive of GST. The net amount of GST recoverable from the ATO is included in receivables in the Statement of Financial Position.

Cash flows relating to GST are included in the Statement of Cash Flow on a gross basis.

### (p) Use of estimates

The Funds makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year/period. Estimates are continually evaluated and based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. No significant estimates were used in the preparation of these financials.

## 2 Summary of significant accounting policies (continued)

### (q) Segment reporting

A business segment is identified for a group of assets and operations engaged in providing products or services that are subject to risks and returns that are different to those of other business segments. A geographical segment is identified when products or services are provided within a particular economic environment subject to risks and returns that are different from those of segments operating in other economic environments.

The Board of the Responsible Entity reviews performance of the segments against the performance of the Funds' benchmark.

### (r) New accounting standards and interpretations

Certain new accounting standards and interpretations have been published that are not mandatory for the year/period ended 30 June 2018 and have not been applied in the Financial Statements. The directors' assessment of the impact of these new standards (to the extent relevant to the Funds) and interpretations is set out below.

#### (i) *AASB 9 Financial Instruments* (and applicable amendments) (effective from 1 July 2018)

AASB 9 Financial Instruments addresses the classification, measurement, recognition and de-recognition of financial assets and financial liabilities. It has now also introduced revised rules for hedge accounting and impairment. The Standard is not applicable until 1 January 2018, and will therefore apply to the Funds from 1 July 2018. The Funds do not intend to early adopt AASB 9 as permitted by the standard.

The application of the standard is not expected to change the classification basis of the Funds current financial instruments as these are predominantly already measured at fair value through profit or loss.

The de-recognition rules have not been changed from the previous requirements and the Funds do not apply hedge accounting.

AASB 9 introduces a new impairment model. Under this new impairment model, the Funds' Cash and Receivables measured at amortised cost are subject to the new impairment rules, which are based on an expected credit loss model. The Funds do not anticipate the new impairment requirements would have any material impact on Cash and Receivables accounts.

#### (ii) *AASB 15 Revenue from Contracts with Customers* (and applicable amendments) (effective from 1 January 2018)

The AASB has issued a new standard for the recognition of revenue. Once applied or effective, AASB 15 will replace AASB 118 Revenue which covers contracts for goods and services and AASB 111 Construction Contracts which covers construction contracts.

AASB 15 is based on the notion that revenue is recognised when control of a good or service transfers to a customer. This notion of control replaces the existing notion of risks and rewards.

The Funds' main source of income includes interest, dividends/distributions and gains on financial instruments held at fair value through profit or loss. All of these are outside the scope of the Revenue standard. Consequently, the Funds do not expect AASB 15 to have a significant impact on the Funds' financial statements. The Funds do not intend to early adopt AASB 15. The Funds will apply AASB 15 in their financial statements for the financial year commencing from 1 July 2018.

### (s) Comparative information

Where appropriate, comparative disclosures have been reclassified/amended to be consistent with the current year's presentation. Such reclassifications/amendments have not significantly affected the Statement of Comprehensive Income or Statement of Financial Position.

## 2 Summary of significant accounting policies (continued)

### (t) Rounding of amounts

The Funds are entities of the kind referred to in ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191 issued by the Australian Securities and Investments Commission (ASIC) relating to the "rounding off" of amounts in the financial statements. For UBS IQ Morningstar Australia Dividend Yield ETF, UBS IQ MSCI Australia Ethical ETF, UBS IQ MSCI Europe Ethical ETF and UBS IQ MSCI World ex Australia Ethical ETF, amounts in the financial statements have been rounded to the nearest thousand dollars in accordance with that ASIC Instrument, unless otherwise indicated. For UBS IQ Morningstar Australia Quality ETF, UBS IQ MSCI Asia APEX 50 Ethical ETF, UBS IQ MSCI Japan Ethical ETF, UBS IQ MSCI USA Ethical ETF and UBS IQ Cash ETF, amounts in the financial statements have been rounded to the nearest dollar in accordance with that ASIC Instrument, unless otherwise indicated.

## 3 Auditor's remuneration

\* These are non-cash applications and redemptions through assets transfer in-specie.

As stipulated within the relevant Funds' Constitutions and the Product Disclosure Statements, each unit in the Funds confers an equal undivided interest in the relevant Class Assets and subject to the liabilities applicable to that unit or class. A unit does not confer an interest in a particular asset. All units in a Class rank equally and each class is a separate class of interests for the purposes of the *Corporations Act 2001*.

### Capital risk management

The Funds manage their net assets attributable to unitholders as capital, notwithstanding net assets attributable to unitholders can change significantly on a daily basis as the Funds are subject to daily applications and redemptions at the discretion of unitholders. The Funds monitor the level of daily applications and redemptions relative to the liquid assets in the Funds.

Two classes of units in the Funds may be offered. One class that is quoted and traded on the AQUA market of the ASX. This is reflected in the current Product Disclosure Statements. The other class is an unquoted class that is available to wholesale investors only. The UBS IQ MSCI World ex Australia Ethical ETF is the only Fund having unquoted class of investors with an outstanding balance of \$15,243,514 as at 30 June 2018 (\$17,545,296 at 30 June 2017).

## 12 Derivative financial instruments

In the normal course of business, the Funds enter into transactions in various derivative financial instruments with certain risks. A derivative is a financial instrument or other contract which is settled at a future date and whose value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index or other variable.

Derivative financial instruments require either no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.

Derivative transactions include many different instruments, such as futures. Derivatives are considered to be part of the investment process and the use of derivatives is an essential part of the Funds' portfolio management. Derivatives are not managed in isolation. Consequently, the use of derivatives is multifaceted and may include:

- hedging to protect an asset or liability of the Funds against a fluctuation in market values or to reduce volatility;
- a substitution for trading of physical securities;
- adjusting asset exposures within the parameters set in the investment strategy.

While derivatives are used for trading purposes, they are not used to gear (leverage) a portfolio. Gearing a portfolio would occur if the level of exposure to the markets exceeds the underlying value of the Funds.

The Funds hold the following derivative instruments:

### (a) Futures

Futures are contractual obligations to buy or sell financial instruments on a future date at a specified price established in an organised market. The futures contracts are collateralised by cash or marketable securities. Changes in futures contracts' values are settled daily with the exchange. Index futures are contractual obligations to receive or pay a net amount based on changes in indices at a future date at a specified price, established in an organised financial market.

### (b) Foreign currency contracts

Foreign currency contracts are used by the Funds for non-Australian dollar denominated trading activities to mitigate foreign exchange rate risks. The Funds agree to receive or deliver a fixed quantity of foreign currency for an agreed upon price on an agreed future date. Currency contracts are valued at the prevailing bid price at the end of each financial year/period. The Funds recognise a gain or loss equal to the change in fair value at the end of each financial year/period.

The Funds's derivative financial instruments at year/period end are detailed below:

### Risk exposures and fair value measurements

Information about the Funds' exposure to price risk, credit risk, foreign exchange risk, interest rate risk, liquidity risk and about the methods and assumptions used in determining fair values is provided in Note 13 to the financial statements. The maximum exposure to credit risk at the end of the year/period is the carrying amount of each class of derivative financial instruments disclosed above.

### 13 Financial risk management

The Funds' activities expose it to a variety of financial risks: market risk (including price risk, foreign exchange risk and interest rate risk), credit risk and liquidity risk.

The Funds' overall risk management programme focuses on ensuring compliance with the Funds' Product Disclosure Statements and seeks to maximise the returns derived for the level of risk to which the Funds are exposed. The Funds may use derivative financial instruments to manage certain risk exposures. Financial risk management is carried out by the Investment Manager under an Investment Mandate approved by the Board of Directors of the Responsible Entity ("the Board").

Compliance with the Funds' Constitutions are monitored on a daily basis and reported to the Board and Compliance Committee on a regular basis.

The Funds use different methods to measure different types of risk to which it is exposed. These methods include sensitivity analysis in the case of market risk.

#### (a) Market risk

Market risk is the risk that the fair value or future cash flow of a financial instrument will fluctuate due to changes in market prices. The Funds' equity investments are publicly traded and are included in their underlying Indexes.

##### (i) Price risk

The Funds, excluding UBS IQ Cash ETF, are exposed to equity securities and derivative securities price risk. This arises from investments held by the Funds for which prices in the future are uncertain. Where non-monetary financial instruments are denominated in currencies other than the Australian dollar, the price in the future will also fluctuate because of changes in foreign exchange rates. Investments are classified in the Statement of Financial Position as at fair value through profit or loss. All securities investments present a risk of loss of capital.

The tables below for respective Funds, excluding UBS IQ Cash ETF, summarise the sensitivity of the Funds' operating profit and net assets attributable to unitholders to equity price risk. The reasonably possible movements in the risk variables have been determined based on management's best estimate, having regard to a number of factors, including historical correlation of the Funds' investments with the relevant benchmark and market volatility. However, actual movements in the risk variables may be greater or less than anticipated due to a number of factors, including unusually large market shocks resulting from changes in the performance of the economies, markets and securities in which the Funds invest. As a result, historic variations in risk variables are not a definitive indicator of future variations in the risk variables.

The Fund tracks on the Morningstar® Australia Moat Focus Index™. The Index is a rules-based, equal-weighted index intended to offer exposure to quality companies that Morningstar determines have sustainable competitive advantages based on a proprietary methodology that considers quantitative and qualitative factors.

The Index is designed to target exposure to approximately 25-50 wide and narrow 'moat' stocks in the Morningstar Australia Index™ with the lowest ratios of current market price to fair value price determined under an independent research process by the Morningstar Equity Research team. The fair value estimate is based primarily on Morningstar's proprietary three-stage discounted cash flow model. Morningstar checks its fair value estimates against other valuation measures, such as sum-of-the-parts, multiples and yields, among others.

Increase/(decrease) in value of financial assets held at fair value through profit or loss	<u>1,100</u>	<u>(1,100)</u>	<u>2,754</u>	<u>(2,754)</u>

The Fund tracks on the Morningstar® Australia Dividend Yield Focus Index™. The Index provides exposure to the equities of high-quality Australian-domiciled companies with strong financial health and an ability to sustain above-average dividend payouts. Companies must have a strong balance sheet and a sustainable competitive advantage as deemed by Morningstar equity research team.

The index consists of 25 stocks screened for their dividend yield. The index is reconstituted and rebalanced semi-annually. The Index is weighted according to the dividends paid by each company that are available to investors. Consequently, the available dividend dollar value is the product of the security's shares outstanding, free float factor, and annual indicated dividend per share. At the time of rebalancing and reconstitution, the largest weight in the index will not exceed 10% and the sum of the constituent weights that are each greater than 5% will not exceed 50%.

## 13 Financial risk management (continued)

### (a) Market risk (continued)

#### (ii) Foreign exchange risk (continued)

The tables below show the sensitivity of the Funds' operating profit and net assets attributable to unitholders to foreign exchange risk. The reasonably possible movement in the risk variable has been determined based on management's best estimate, having regard to a number of factors, including the historical levels of changes in foreign exchange rates. However, actual movements in the risk variables may be greater or less than anticipated due to a number of factors, including unusually large market shocks resulting from changes in the performance of the economies, markets and securities in which the Funds invest in. As a result, historic variations in risk variables are not a definitive indicator of future variations in the risk variable.

The possible impact against other currencies not disclosed above is considered immaterial individually and therefore has not been included in the above table.

#### (iii) Interest rate risk

Interest rate risk is the risk that rate movements will have a negative impact on investment value or returns. Interest rate risk is managed in accordance with the underlying investment strategy of the Funds.

The Funds are exposed to cash flow interest rate risk on financial instruments with variable interest rates. Financial instruments with fixed rates expose the Funds to fair value interest rate risk.

The Funds' interest bearing financial assets expose it to risks associated with the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. The risk is measured using sensitivity analysis.

### 13 Financial risk management (continued)

#### (a) Market risk (continued)

##### (iii) Interest rate risk (continued)

The Funds have direct exposure to interest rate changes on the valuation and cash flows of its interest bearing assets and liabilities. However, it may also be indirectly affected by the impact of interest rate changes on the earnings of certain entities in which the Funds invests and impact on the valuation of certain assets that use interest rates as an input in their valuation model. Therefore, the sensitivity analysis within this note may not fully indicate the total effect on the Funds' net assets attributable to unitholders of future movements in interest rates.

Compliance with the value of cash investments held is monitored daily and reported to the Board and Compliance Committee on a regular basis.

The tables below summarise the Funds' exposure to interest rate risks.

The following table summarises the sensitivity of UBS IQ Cash ETF Fund's operating profit and net assets attributable to unitholders to interest rate risk. The reasonably possible movements in the risk variables have been determined based on management's best estimate, having regard to a number of factors, including historical correlation of the Fund's investments with the relevant benchmark and market volatility. However, actual movements in the risk variables may be greater or less than anticipated due to a number of factors, including unusually large market shocks resulting from changes in the performance of the economies, markets and securities in which the Fund invests. As a result, historic variations in risk variables are not a definitive indicator of future variations in the risk variables.

## 13 Financial risk management (continued)

### (a) Market risk (continued)

#### (iii) Interest rate risk (continued)

	Interest rate risk	
	Impact on operating profit/Net assets attributable to unitholders	
	-100bps	+100bps
	\$	\$
<b>30 June 2018</b>	<b>10,015</b>	<b>(10,015)</b>

The sensitivity to interest rate risk on Cash and cash equivalents for all Funds other than UBS IQ Cash ETF is not considered to be material. An analysis of financial liabilities by maturities is provided in Note 13 (c).

### (b) Credit risk

Credit risk is the risk that a counterparty will be unable to pay its contractual obligations in full when they fall due, causing a financial loss to the Funds.

The Funds (to the exception of UBS IQ Cash ETF) do not have a significant concentration of credit risk that arises from an exposure to a single counterparty or group of counterparties having similar characteristics. The main concentration of credit risk, to which the Funds are exposed, arises from cash and cash equivalents, deposits with banks and other financial institutions and amounts due from brokers. None of these assets are impaired nor past their due date. The maximum exposure to credit risk at the reporting date is the carrying amount disclosed in the Statement of Financial Position.

The main concentration of credit risk, to which UBS IQ Cash ETF is exposed, arises from the Fund's counterparty credit risk on cash and cash equivalents as shown in the table:

	As at 30 June 2018 \$
<b>Debt securities</b>	
AA+ to AA-	993,755
<b>Total</b>	<u>993,755</u>

All Funds (to the exception of UBS IQ Cash ETF) do not consider counterparty risk to be significant, as the Funds only trade with recognised and creditworthy third parties.

### (c) Liquidity risk

The Funds' listed securities are considered readily convertible to cash, as they are listed on various stock exchanges.

The Funds may, from time to time, invest in derivative contracts traded over the counter, which are not traded in an organised market and may be illiquid. As a result, the Funds may not be able to liquidate quickly its investments in these instruments at an amount close to their fair value to meet its liquidity requirements or to respond to specific events such as a deterioration in the creditworthiness of any particular issuer or counterparty. No such investments were held at the end of the year/period (2017: Nil).

UBS IQ Cash ETF had nil net settled derivatives as at 30 June 2018.

UBS IQ MSCI Asia APEX 50 Ethical ETF had nil net settled derivatives as at 30 June 2017.

## 14 Offsetting financial assets and financial liabilities

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The gross and net positions of financial assets and liabilities that have been offset in the Statement of Financial Position are disclosed in the first three columns of the tables below.

### UBS IQ Morningstar Australia Quality ETF

## 14 Offsetting financial assets and financial liabilities (continued)

### (i) Master netting arrangement – currently enforceable

Agreements with derivative counterparties are based on the ISDA Master Agreement. Under the terms of these arrangements, only where certain credit events occur (such as default, insolvency or bankruptcy), the net position owing/receivable to a single counterparty in the same currency will be taken as owing and all the relevant arrangements terminated. As the Funds presently have a legally enforceable right of set-off, these amounts have been offset in the Statement of Financial Position.

## 15 Fair value measurement

The Funds measure and recognise the following assets and liabilities at fair value on a recurring basis:

- Financial assets / liabilities designated at fair value through profit or loss (FVTPL) (see Notes 8 and 9)
- Financial assets / liabilities held for trading (see Notes 8 and 9);
- Derivative financial instruments (see Note 12);

The Funds have no assets or liabilities measured at fair value on a non-recurring basis in the current financial year/period. The Funds are required to classify fair value measurements using a fair value hierarchy that reflects the subjectivity of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- (a) Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities;
- (b) Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly; and
- (c) Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes "observable" requires significant judgement by the Funds. The Funds consider observable data to be market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

All fair value measurement disclosed are recurring fair value measurements.

### (i) Fair value in an active market (level 1)

The fair value of financial assets and liabilities traded in active markets (such as publicly traded derivatives and equity securities) are based on their quoted market prices at the close of trading at the end of the year/period without any deduction for estimated future selling costs. For the majority of investments, information provided by independent pricing services are relied upon for the valuation of investments.

Where the Funds do have financial assets and financial liabilities with offsetting positions in market risks or counterparty credit risk, it may elect to use the measurement exception provided in AASB 13 to measure the fair value of its net risk exposure by applying a price within the bid-ask spread to the net open position as appropriate.

## 15 Fair value measurement (continued)

### (i) Fair value in an active market (level 1) (continued)

If a significant movement in fair value occurs subsequent to the close of trading up to midnight on the reporting date, valuation techniques will be applied to determine the fair value. A significant event is any event that occurs after the last market price for a security, close of market or close of the foreign exchange, but before the Funds' valuation time that materially affects the integrity of the closing prices for any security, instrument, currency or securities affected by that event so that they cannot be considered 'readily available' market quotations. Where the last sale price does not fall within the bid-ask spread, an assessment is performed by the Responsible Entity to determine the appropriate valuation price to use that is most representative of fair value.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

An active market is a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

### (ii) Fair value in an inactive or unquoted market (level 2 and level 3)

The fair value of financial assets and liabilities that are not traded in an active market is determined using valuation techniques. These include the use of recent arm's length market transactions, reference to the current fair value of a substantially similar other instrument, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

Where discounted cash flow techniques are used, estimated future cash flows are based on management's best estimates and the discount rate used is a market rate at the end of the year/period applicable for an instrument with similar terms and conditions.

For other pricing models, inputs are based on market data at the end of the year/period. Fair values for unquoted equity investments are estimated, if possible, using applicable price/earnings ratios for similar listed entities adjusted to reflect the specific circumstances of the issuer.

The fair value of derivatives that are not exchange traded is estimated at the amount that the Funds would receive or pay to terminate the contract at the end of the year/period taking into account current market conditions (volatility and appropriate yield curve) and the current creditworthiness of the counterparties.

The output of a model is always an estimate or approximation of a value that cannot be determined with certainty, and valuation techniques employed may not fully reflect all factors relevant to the positions the Funds hold. Valuations are therefore adjusted, where appropriate, to allow for additional factors including liquidity risk and counterparty risk.

## 15 Fair value measurement (continued)

### Recognised fair value measurement

The table below presents the Funds' financial assets and liabilities (by class) measured and recognised at fair value according to the fair value hierarchy at 30 June 2018 and 30 June 2017.

Management's policy is to recognise transfers into and transfers out of fair value hierarchy levels as at the end of the year/period.

(i) *Transfers between levels*

There have been no transfers between levels for the year/period ended 30 June 2018 and 30 June 2017. There were also no changes made to any of the valuation techniques applied as at 30 June 2018.

(ii) *Fair value measurements using significant unobservable inputs (level 3)*

The Funds did not hold any financial instruments with fair value measurements using significant unobservable inputs for the year/period ended 30 June 2018 and 30 June 2017.

(iii) *Fair values of other financial instruments*

Due to their short-term nature, the carrying amounts of receivables and payables are assumed to approximate fair value.

## 16 Related party transactions

### Responsible Entity

The Responsible Entity of the Funds is UBS Asset Management (Australia) Ltd, whose immediate and ultimate holding company is UBS AG, a publicly listed company incorporated in Switzerland.

## 16 Related party transactions (continued)

### Key management personnel

#### (a) Directors

Key management personnel includes persons who were directors of UBS Asset Management (Australia) Ltd at any time during the year/period and up to the date of this report:

B J Doherty, Chairman  
A L Anderson  
J D Males  
A L Flockart  
R Buehlmann

#### (b) Other key management personnel

There were no other persons with responsibility for planning, directing and controlling the activities of the Funds, directly or indirectly during the year/period.

Key management personnel services are provided by Responsible Entity and included in the Responsible Entity's fees disclosed below. There was no compensation paid directly by the Funds to any of the key management personnel.

### Other transactions within the Funds

Apart from those details disclosed in this note, no key management personnel have entered into a material contract with the Funds during the year/period and there were no material contracts involving key management personnel's interests existing at the end of the year/period.

### Responsible Entity's fees and other transactions

The Responsible Entity's fees paid and payable for administrating and managing the Funds in accordance with the Funds' Product Disclosure Statements for the year/period ended 30 June 2018 are as follows:

	UBS IQ Morningstar Australia Quality ETF		UBS IQ Morningstar Australia Dividend Yield ETF

## 19 Events occurring after the reporting date

No significant events have occurred since 30 June 2018 and up to the date of this report that the Funds have not otherwise dealt within the financial report that has significantly affected or may significantly affect the Funds (30 June 2017: Nil).

## 20 Contingent assets and liabilities and commitments

There are no outstanding contingent assets, liabilities or commitments as at 30 June 2018 (30 June 2017: Nil).

## Directors' Declaration

In the opinion of the directors of the Responsible Entity:

- (a) the financial statements and notes set out on pages 11 to 115 are in accordance with the *Corporations Act 2001*, including:
  - (i) complying with AASB 134 *Interim Financial Reporting*, the *Corporations Regulations 2001* and other mandatory professional reporting requirements; and
  - (ii) giving a true and fair view of the Funds' financial position as at 30 June 2018 and of its performance, as represented by the results of its operations and cash flows, for the year/period ended on that date.
- (b) there are reasonable grounds to believe that the Funds will be able to pay its debts as and when they become due and payable.
- (c) the financial statements are in accordance with the Funds' Constitutions.
- (d) the financial statements also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board as disclosed in Note 2(a).

This declaration is made in accordance with a resolution of the directors.

## Independent auditor's report to the unitholders of UBS Exchange Traded Funds

To the following UBS Exchange Traded Funds (the "Funds")

- ▶ UBS IQ Morningstar Australia Quality ETF (ETF)
- ▶ UBS IQ Morningstar Australia Dividend Yield ETF (DIV)
- ▶ UBS IQ MSCI Australia Ethical ETF (UBA)
- ▶ UBS IQ MSCI Asia APEX 50 Ethical ETF (UBP)
- ▶ UBS IQ MSCI Europe Ethical ETF (UBE)
- ▶ UBS IQ MSCI Japan Ethical ETF (UBJ)
- ▶ UBS IQ MSCI USA Ethical ETF (UBU)
- ▶ UBS IQ Cash ETF (MONY)
- ▶ UBS IQ MSCI World ex Australia Ethical ETF (UBW)

### Opinion

We have audited the financial report of the above Funds, which comprises the Statement of Financial Position as at 30 June 2018, the Statement of Comprehensive Income, the Statement of Changes in Equity and the Statement of Cash Flows for the year then ended, notes to the financial statements, including a summary of significant accounting policies and the Directors' Declaration.

In our opinion:

- a. the accompanying financial report of the Funds is in accordance with the *Corporations Act 2001*, including:
  - i. giving a true and fair view of the Fund's financial position as at 30 June 2018 and of its financial performance for the year ended on that date; and
  - ii. complying with Australian Accounting Standards and the *Corporations Regulations 2001*.
- b. the financial report also complies with *International Financial Reporting Standards* as disclosed in Note 2(a).

### Basis for Opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Report section of our report. We are independent of the Funds in accordance with the Corporations Act 2001 and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES110 Code of Ethics for Professional Accountants (the Code) that are relevant to our audit of the financial report in Australia; and we have fulfilled our other ethical responsibilities in accordance with the Code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial report of the current year. These matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, but we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the Auditor's Responsibilities for the Audit of the Financial Report section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying financial report.

### 1. Investment Valuation

#### Why significant

As exchange traded funds, the Funds have significant investment portfolios consisting primarily of listed equities, listed trusts and cash accounts. As at 30 June 2018, the value of these financial assets, per Note 7 and 8 to the financial statements was as follows:

Fund	Value of investments and cash	Investments and cash as a % of Total Assets held by Fund
ETF	\$8,491,297	99%
DIV	\$11,377,130	100%
UBA	\$204,336,143	99%
UBP	\$8,978,170	99%
UBE	\$11,389,000	99%
UBJ	\$4,536,824	97%
UBU	\$6,857,662	100%
MONY	\$1,001,454	100%
UBW	\$45,240,000	100%

As detailed in the Fund's accounting policy, as described in Note 2 to the financial statements, these financial assets are recognised at fair value through profit or loss in accordance with Australian Accounting Standards.

Volatility and other market drivers can have a significant impact on the value of these financial assets and the financial statements, therefore valuation of the investment portfolio is considered a key area of focus.

#### How our audit addressed the key audit matter

We assessed the effectiveness of the key controls in place around the recognition and valuation of investments, through consideration of the assurance report on the controls of the Fund's administrator and custodian in relation to Fund Administration Services for the year ended 30 June 2018. We considered the auditor's qualifications and objectivity and results of their procedures

We agreed investment holdings, including cash accounts, to third party confirmations at 30 June 2018.

We determined whether the valuation of positions in the portfolios held at 30 June 2018 reflected fair value by agreeing the listed securities values to independent pricing sources and for unlisted funds, we agreed the investment valuations to statements from external fund administrators.

We assessed the adequacy of the disclosures in Note 7, Note 8 and Note 14 to the financial statements.

## 2. Responsible Entity's Fees

### Why significant

Responsible Entity's Fees are the most significant expense for the Funds.

The Funds' accounting policy for Responsible Entity's Fees is described in Note 2 to the financial statements. All expenses are recognised on an accruals basis.

As at 30 June 2018, Responsible Entity's Fees for the Funds totalled:

Fund	Responsible Entity's Fees	Responsible Entity's Fees as a % of Total Expenses incurred
ETF	\$42,779	92%
DIV	\$73,328	95%
UBA	\$308,885	98%
UBP	\$33,879	51%
UBE	\$39,834	47%
UBJ	\$16,418	64%
UBU	\$12,528	42%
MONY	\$1,954	100%
UBW	\$151,918	54%

### How our audit addressed the key audit matter

We assessed the design and operating effectiveness of the key controls in place in relation to the calculation of the Responsible Entity's fees, through review of the assurance report of the administrator referred to above.

We performed a recalculation of Responsible Entity's fees, in accordance with contractual arrangements including agreeing the contract rate to the calculation.

We assessed the adequacy of the disclosures in Note 16 to the financial statements.

### Information Other than the Financial Statements and Auditor's Report Thereon

The directors of UBS Asset Management (Australia) Ltd as Responsible Entity of the Funds are responsible for the other information. The other information is the directors' report accompanying the financial report.

Our opinion on the financial report does not cover the other information and accordingly we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

## **Responsibilities of the Directors for the Financial Report**

The directors are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the Corporations Act 2001 and for such internal controls as the directors determine are necessary to enable the preparation of the financial report that is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the Funds' abilities to continue as a going concern, disclosing, as applicable, matters relating to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Funds or to cease operations, or have no realistic alternative but to do so.

## **Auditor's Responsibilities for the Audit of the Financial Report**

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

As part of an audit in accordance with Australian Auditing Standards, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting in the preparation of the financial report. We also conclude, based on the audit evidence obtained, whether a material uncertainty exists related to events and conditions that may cast significant doubt on the entity's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in the auditor's report to the disclosures in the financial report about the material uncertainty or, if such disclosures are inadequate, to modify the opinion on the financial report. However, future events or conditions may cause an entity to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial report, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated to the directors, we determine those matters that were of most significance in the audit of the financial report of the current year and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.
