

# Anywhere and anytime

Approve payments and access all your accounts with the multibank-capable  
**UBS KeyPort Mobile App**

## What should I know about the UBS KeyPort Mobile App and how is it used?

The UBS KeyPort Mobile App is a mobile solution for payment transactions based on the Electronic Banking Internet Communication Standard (EBICS).

## Account and transaction overview

UBS KeyPort Mobile gives you a simple and quick overview of your accounts and transaction details. UBS KeyPort Mobile's multibank capability also enables you to keep track of your balance and transactions of accounts with third-party banks.

## Payment approvals

You can electronically sign off payment orders transmitted to the bank with an EBICS client on your mobile device. Single payments can be viewed easily and individually approved. Push notifications keep you informed of pending approvals.

## EBICS and distributed electronic signatures (VEU)

State-of-the-art encryption technology using signatures (EBICS) guarantees the highest security for all processes. UBS KeyPort Mobile offers you added security by enabling you to execute VEU models across channels.

## Technical requirements

UBS KeyPort Mobile supports the Apple iOS and Android operating systems. The typical authentication methods are supported: you can log into the app by using your fingerprint or access your banking by scanning a QR code generated by the bank.

## The most important benefits of the UBS KeyPort Mobile App

- Distributed electronic signatures (VEU) with individual signature classes for order approvals offer the best security.
- UBS KeyPort Mobile has multibank capability and is an ideal addition to UBS KeyPort.
- Use UBS KeyPort Mobile to approve orders on your mobile device across different channels and independent of location.
- UBS KeyPort Mobile lets you access accounts with different banks. You'll have a centralized and harmonized financial overview of all domestic and foreign accounts.
- The app is available in DE, EN, FR, IT and ES. Integrated with the language settings on your device.
