

High level of security

Let your money grow safely with a UBS Time deposit account

With a UBS Time deposit account you can invest your money for a fixed period and secure an interesting return. This straightforward investment instrument is available from just 5,000 Swiss francs or euros, and with an investment term starting from one year and one day.

How the UBS Time deposit account works

The UBS Time deposit account is a modern form of the outdated medium-term note. You can use it to invest amounts you will not need to access during a specific period of time, and by doing so earn an attractive rate of interest in line with the market. Your investment is backed by UBS and its credit rating, which means you enjoy a high level of security.

Conditions

Interest

The rate of interest earned by your UBS Time deposit account remains the same over the entire investment term. Your UBS client advisor will be happy to assist should you wish to invest more than 100,000 Swiss francs or euros. The interest earned will be paid out either every 12 months starting from the date you open your account, or at the end of each year (in the same way as with a savings account).

Investment amounts

Investment amounts start from as little as 5,000 Swiss francs or euros, and you can specify the exact amount you want to invest, right down to five cents.

Investment terms

You are free to choose the investment term you require for your UBS Time deposit account. Terms start from one year and one day and go up to 10 years, with periods including fractions of a year also possible.

Fees

There are no fees: neither for commissions nor for duties.

Key points

- Investment instrument with a fixed term and interesting returns
- Attractive, constant rate of interest
- Flexible choice of investment amount, term, and interest payment dates
- Investments possible from just 5,000 Swiss francs or euros, and from one year and one day
