See accompanying notes.
1. Organization

UBS Financial Services Incorporated of Puerto Rico (the "Company" or "UBSFSIPR") is a registered broker-dealer with the Securities and Exchange Commission ("SEC") and is a member of various exchanges and the Financial Industry Regulatory Authority ("FINRA"). The Company's business activities include trading of Puerto Rico Government National Mortgage Association securities, United States government and agency obligations, Puerto Rico municipal obligations, commercial paper, other short-term debt, and equity securities. In addition, the Company provides brokerage and advisory services to retail, corporate, and institutional clients as well as mutual funds.

The Company is a wholly owned subsidiary of UBS Financial Services Inc. ("UBSFSI"). UBSFSI is a wholly owned subsidiary of UBS Americas Inc. ("UBS Americas") which is a wholly owned subsidiary of UBS Americas Holding LLC (UBSAHL"). UBSAHL was established in order to become the intermediate holding company for all United States subsidiaries of UBS Group AG ("UBS") pursuant to the rules enacted for foreign banks in the United States. UBSAHL is a wholly owned subsidiary of UBS AG which is a wholly owned subsidiary of UBS.

2. Summary of Significant Accounting Policies

Basis of Presentation

The financial statement is prepared in conformity with accounting principles generally accepted in the United States, which requires management to make judgments and assumptions that affect the amounts reported in the statement of financial condition and accompanying notes. Actual results could differ from those estimates. Management makes estimates regarding valuations of certain assets and liabilities, the outcome of litigation, the carrying amount of goodwill and other intangible assets, certain accruals and other matters that affect the reported amounts and disclosures of contingencies in the Company's statement of financial condition.

The spread of the coronavirus disease (COVID-19) pandemic and the governmental measures taken to contain the pandemic have significantly adversely affected, and will likely continue to adversely affect, global economic conditions, resulting in meaningful contraction in the global economy, substantial volatility in the financial markets, increased unemployment, increased credit and counterparty risk, and operational challenges such as the temporary closures of businesses, sheltering-in-place directives and increased remote work protocols. Governments and central banks around the world have reacted to the economic crisis caused by the pandemic by implementing stimulus and liquidity programs and cutting interest rates, though it is unclear whether these or future actions will be successful in countering the economic disruption.
2. Summary of Significant Accounting Policies (continued)

If the pandemic is prolonged or the actions of governments and central banks are unsuccessful, the adverse impact on the global economy will deepen, and our results of operations and financial condition in future quarters may be adversely affected. In the short-term the Company may benefit from higher transaction volumes and increased volatility, although continuation of these trends is uncertain.

Cash and Cash Equivalents

Cash and cash equivalents are defined as highly liquid investments with an original maturity of three months or less when purchased. The Company had no cash equivalents as of June 30, 2020.

Financial Instruments

Financial instruments owned, financial instruments owned and pledged as collateral, and financial instruments sold, not yet purchased, are stated at fair value and recorded on a trade date basis. Fair value is determined by quoted market prices, when available. If quoted market prices are not available, fair value is determined using pricing models which incorporate management’s best estimates of critical assumptions, which take into account time value, volatility and other factors underlying the securities.

Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 820, "Fair Value Measurements" ("ASC 820"), defines fair value, establishes a framework for measuring fair value, and establishes a fair value hierarchy which prioritizes the inputs to valuation techniques. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. Valuation techniques, as specified by ASC 820, are used to measure fair value.

The Company's fair value and valuation model governance structure includes numerous controls and procedural safeguards that are intended to maximize the quality of fair value measurements
2. Summary of Significant Accounting Policies (continued)

reported in the financial statements. In carrying out their valuation responsibilities, the businesses are required to consider the availability and quality of external market information and to provide justification and rationale for their fair value estimates. Independent price verification of financial instruments measured at fair value is undertaken by UBS's valuation control group. The objective of the independent price verification process is to independently corroborate the business’s estimates of fair value against observable market information. By benchmarking the business’s fair value estimates with observable market information, the degree of valuation uncertainty embedded in these measurements can be assessed and managed as required in the governance framework. As a result of the valuation controls employed, valuation adjustments may be made to the business’s estimate of fair value.

All financial instruments at fair value are categorized into one of three fair value hierarchy levels, based upon the lowest level input that is significant to the financial instrument's fair value measurement in its entirety:

Level 1: Quoted market prices (unadjusted) in active markets for identical assets or liabilities that the Company can assess at the measurement date.

Level 2: Valuation techniques for which all significant inputs are or are based on observable market data.

Level 3: Valuation techniques which include significant inputs that are not based on observable market data.

The following is a description of the valuation techniques applied to the Company’s major categories of assets and liabilities measured at fair value:

**U.S. Government securities and agency obligations:** U.S. Government securities are generally actively traded and are valued using quoted market prices. Where market prices are not available, these securities are valued against yield curves implied from similar issuances. Agency obligations are comprised of agency-issued debt. Non-callable agency-issued debt securities are generally valued using quoted market prices. Callable agency-issued debt securities are valued by benchmarking model-derived prices to quoted market prices and trade data for identical or comparable securities.

**Mutual Funds:** Mutual funds are generally valued using quoted market prices or, valuation techniques which use observable inputs if not traded in an active market. In some instances significant inputs are not based on observable market data.
2. Summary of Significant Accounting Policies (continued)

State and municipal obligations: These securities are comprised of bonds issued by states and municipalities. These financial instruments are priced based on recent trades or broker and dealer quotes.

Collateralized Agreements

Securities purchased under agreements to resell ("resale agreements") and securities sold under agreements to repurchase ("repurchase agreements") are generally collateralized by mortgage-backed, municipal and U.S. government and agency securities, and are accounted for as financing transactions at their contractual amounts, plus accrued interest which represents amounts at which the securities will be subsequently resold or repurchased.

For resale agreements, it is the Company's policy to obtain collateral in the form of securities, which has a fair value in excess of the original principal amount loaned. The Company is required to deliver securities to counterparties in order to collateralize repurchase agreements. The risk related to a decline in the market value of collateral (pledged or received) is managed by setting appropriate market-based haircuts. On a daily basis, the Company monitors the fair value of the securities purchased and sold under these agreements. Should the fair value of the securities purchased decline, or the fair value of securities sold increase, additional collateral is requested or excess collateral is returned when deemed appropriate to maintain contractual margin protection.

The Company manages credit exposure arising from resale and repurchase agreements by, in appropriate circumstances, entering into master netting agreements and collateral agreements with counterparties that provide the Company, in the event of a counterparty default (such as bankruptcy or a counterparty's failure to pay or perform), with the right to net a counterparty's rights and obligations under such agreement and liquidate and set off collateral held by the Company against the net amount owed by the counterparty. The Company elects to net repurchase agreements and resale agreements when the requirements of FASB ASC 210-20-45-11 "Balance Sheet - Offsetting: Repurchase and Reverse Repurchase Agreements" are met. At June 30, 2020, the Company did not net any repurchase and resale agreements.

Securities borrowed and securities loaned transactions are recorded at the amount of cash advanced or received in connection with the transaction. Securities borrowed transactions require the Company to deposit cash or other collateral with the lender. With respect to securities loaned, the Company receives collateral, principally cash. The initial collateral advanced or received has a fair value equal to or greater than the fair value of the securities borrowed or loaned. The Company monitors the fair value of the securities borrowed and loaned on a daily basis and requests additional collateral or returns excess collateral, as appropriate. Accrued interest income
2. Summary of Significant Accounting Policies (continued)

and expense on these transactions are reflected in dividends and interest receivable and payable on the statement of financial condition.

Principal Transactions

When acting as a principal, the Company enters into a transaction in its own name and for its own account. As a principal, the Company has beneficial ownership of and legal title to the assets. Transactions in which securities flow through the Company's inventory are considered principal transactions. The Company assumes both credit risk and market risk from the inception of the transaction. Amounts receivable and payable for principal transactions that have not reached their contractual settlement date are recorded as receivables from and payables to brokers, dealers and clearing organizations in the statement of financial condition.

Depreciation and Amortization

The Company depreciates office equipment using the straight-line method over estimated useful lives of three to ten years. Leasehold improvements are amortized over the lesser of the estimated useful life of the asset or the remaining term of the lease.

Income Taxes

In accordance with the provisions of FASB ASC Topic 740, “Income Taxes” (“ASC Topic 740”), deferred tax assets and liabilities are recognized for the future tax effect of differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted rates expected to be in effect during the year in which the basis differences reverse. In the event it is more likely than not that a deferred tax asset will not be realized, a valuation allowance is recorded.

ASC Topic 740 sets out a consistent framework to determine the appropriate level of tax reserves to maintain for uncertain tax positions. This interpretation uses a two-step approach wherein a tax benefit is recognized if a position is more likely than not to be sustained. The amount of benefit is then measured to be the highest tax benefit that is greater than 50% likely to be realized.

The Company files income tax returns with the Commonwealth of Puerto Rico.
2. Summary of Significant Accounting Policies (continued)

Receivables from Clients and Allowance for Doubtful Accounts

Receivables from clients consist of a portfolio of loans collateralized by securities that were purchased by the Company from an affiliated entity. The loans were originally recorded at the purchase price and adjusted for any charge offs or allowance for doubtful accounts.

Any allowance for doubtful accounts represents the Company's estimate of losses inherent in the loan portfolio as of the date of the statement of financial condition. The Company's exposure to credit risk associated with its loans is measured on an individual customer basis. All loans are subject to the Company's credit review and monitoring procedures.

Loans are evaluated for impairment in accordance with FASB ASC 310, "Receivables". A loan is determined to be impaired when it is probable, based on current information and events, that the Company will not be able to collect all the principal and interest due under the contractual terms of the loan. If a loan is considered impaired, the Company measures the amount of impairment based on the fair value of the collateral. Loans are generally placed on non-accrual status at the point when a maintenance call is not satisfied by the borrower. Any accrued interest receivable related to a loan that is placed on non-accrual status is added to the principal amount due. Payments received while a loan is on non-accrual status are recorded as a reduction of principal. Income on non-accrual loans is recognized only to the extent that cash payments are in excess of the carrying value of the loan. If the borrower has demonstrated over a period of time, the ability to make periodic interest and principal payments as scheduled, the loan will be returned to accrual status.

Interest income on loans is calculated by applying the contractual interest rate to the daily balances of the outstanding principal amount.

Share-based and Other Deferred Compensation Plans

UBS has established several share-based compensation plans that are settled in UBS's equity instruments or an amount that is based on the value of such instruments. These awards are generally subject to conditions that require employees to complete a specified period of service and, for performance shares, to satisfy specified performance conditions. For equity-settled instruments, fair value is determined at the date of grant and is not re-measured unless its terms are modified such that the fair value immediately after modification exceeds the fair value immediately prior to modification. For cash-settled awards, fair value is re-measured at each reporting date such that the cumulative expense recognized equals the cash distributed.
2. Summary of Significant Accounting Policies (continued)

UBS has established deferred compensation plans that are settled in cash or financial instruments other than UBS equity instruments, the amount of which may be fixed or may vary based on the achievement of specified performance conditions or the value of specified underlying assets.

Accounting Developments

Adopted in 2020

In June 2016, the Financial Accounting Standards Board ("FASB") issued ASU 2016-13, "Financial Instruments – Credit Losses" (Topic 326) Measurement of Credit Losses on Financial Instruments (the "ASU" or "standard"). Subsequently, the FASB issued ASU 2018-19, to clarify that receivables arising from operating leases are within the scope of the lease accounting standard. Further, the FASB issued ASU No. 2019-04, ASU No. 2019-05, ASU 2019-10, ASU 2019-11, ASU 2020-02 and ASU 2020-03 to provide additional guidance on the standard. The amendments replace the accounting under the existing incurred loss model and introduce a new credit loss model; the Current Expected Credit Losses ("CECL") model, which requires earlier recognition of credit losses when compared to the existing incurred loss approach. The CECL model requires the measurement of expected credit losses for financial assets measured at amortized cost, net investments in leases, and certain off-balance-sheet credit exposures based on historical experience, current conditions and reasonable and supportable forecasts over the remaining contractual life of the financial assets, considering expected prepayments as appropriate. The overall estimate of the allowance for credit losses is based on both quantitative and qualitative considerations. The Company adopted the ASU on its required effective date of January 1, 2020. As a result of the adoption there will be no material impact on the Company's financial statements.

In August 2018, the FASB issued ASU 2018-13, "Disclosure Framework – Changes to the Disclosure Requirements for Fair Value Measurement". The amendments remove, modify and add certain disclosure requirements in ASC Topic 820, "Fair Value Measurement". The Company adopted the standard on its mandatory effective date on January 1, 2020. The impact of the Company’s adoption was limited to changes in the Company’s financial statement disclosures regarding fair value measurement, primarily those disclosures related to disclosure of the range and weighted average used to develop significant unobservable inputs for Level 3 fair value measurements, when applicable. As these amendments relate to disclosures, the adoption did not have an impact on the Company’s statement of financial condition.
2. Summary of Significant Accounting Policies (continued)

In November 2019, the FASB issued ASU 2019-08, Compensation—Stock Compensation (Topic 718) and Revenue from Contracts with Customers (Topic 606): Codification Improvements—Share-Based Consideration Payable to a Customer. The amendments require entities to measure and classify (on the balance sheet) share-based payments to customers by applying the guidance in Topic 718 Compensation—Stock Compensation. As a result, the amount recorded as a reduction in revenue would be measured based on the grant-date fair value of the share-based payment. The Company adopted the standard as of its effective date on January 1, 2020 and adoption did not have a material impact on the Company's consolidated statement of financial condition.

Pending Adoption

In July 2018, the FASB issued ASU 2018-14 "Disclosure Requirements for Defined Benefit Plans". ASU 2018-14 contains several amendments to the disclosure requirements for employers that sponsor defined benefit pension and other post-retirement plans. Several disclosure requirements that are no longer considered cost beneficial are removed, specific disclosure requirements are clarified, and certain disclosures are added. ASU 2018-14 is effective for annual reporting periods and interim periods within those periods beginning after December 15, 2020. Early adoption is permitted. As these amendments relate to disclosures, the adoption will not have an impact on the Company's consolidated statement of financial condition. The Company is currently evaluating the impact of the adoption of the amendments in ASU 2018-14.

In December 2019, the FASB issued ASU 2019-12, which provides guidance that simplifies the accounting for income taxes by eliminating certain exceptions to ASC 740 related to, among other things, the approach for intra-period tax allocation, the methodology for calculating income taxes in an interim period and the recognition of deferred tax liabilities for outside basis differences, and other codification improvements. In addition, the ASU specifies that an entity is not required to allocate the consolidated amount of current and deferred tax expense to a legal entity that is not subject to tax in its separate financial statements. However, an entity may elect to do so (on an entity-by-entity basis) for a legal entity that is both not subject to tax and disregarded by the taxing authority. The amendments in this Update are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2020. The Company early adopted the ASU on January 1, 2020. The adoption of the ASU did not have material impact on Company's statement of financial condition.
2. Summary of Significant Accounting Policies (continued)

In January 2020, the FASB issued ASU 2020-01 which addresses two accounting issues: (1) application of the measurement alternative under Topic 321 in correlation with the transition into and out of the equity method under Topic 323 and (2) the measurement of certain forward contracts and purchased options to acquire equity securities. ASU 2020-01 clarifies that an entity applying the measurement alternative under Topic 321 that must transition to the equity method under Topic 323 because of an observable transaction will remeasure its investment immediately before transition, whereas an entity applying the equity method under Topic 323 that must transition to Topic 321 because of an observable transaction will remeasure its investment immediately after transition. ASU 2020-01 also clarifies that certain forward contracts or purchased call options to acquire equity securities generally will be measured using the fair value principles of Topic 321 before settlement or exercise. ASU 2020-01 is effective for interim and annual periods beginning after December 15, 2020. The Company does not expect the adoption of ASU 2020-01 will have a significant impact on the Company’s statement of financial condition.

In March, 2020, the FASB released ASU 2020-04, Facilitation of the Effects of Reference Rate Reform on Financial Reporting, in response to operational challenges likely to arise in accounting for contract modifications and hedge accounting due to regulatory reform initiatives to replace various Interbank Offered Rate (IBOR). The amendments in this ASU provide optional guidance for a limited period of time to ease the potential burden in accounting for (or recognizing the effects of) reference rate reform on financial reporting. The Company may elect to apply the amendments for contract modifications as of any date from the beginning of an interim period that includes or is subsequent to March 12, 2020, or prospectively from a date within an interim period that includes or is subsequent to March 12, 2020, up to the date that the financial statements are available to be issued. The Company may elect to apply the amendments in the ASU to eligible hedging relationships existing as of the beginning of the interim period that includes March 12, 2020 and to new eligible hedging relationships entered into after the beginning of the interim period that includes March 12, 2020. UBS Group has established a cross-divisional, cross-regional governance structure and change program to address the scale and complexity of the transition to alternative reference rates (ARRs) and is currently assessing the implications of the Update on the Company's statement of financial condition.
3. Fair Value Measurement

At June 30, 2020, the fair value hierarchy classification of financial assets and liabilities measured at fair value is summarized below:

<table>
<thead>
<tr>
<th>Financial Instruments Owned, at fair value</th>
<th>Level 1</th>
<th>Level 2</th>
<th>Level 3</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>U.S. Government securities</td>
<td>$120</td>
<td>$-</td>
<td>$-</td>
<td>$120</td>
</tr>
<tr>
<td>Mutual funds</td>
<td>$-</td>
<td>$-</td>
<td>$8,744</td>
<td>$8,744</td>
</tr>
<tr>
<td>Total</td>
<td>$120</td>
<td>$-</td>
<td>$8,744</td>
<td>$8,864</td>
</tr>
</tbody>
</table>

During 2020, the Company did not have any transfers of financial instruments owned, at fair value between levels 1 and 2 of the valuation hierarchy. Additionally, the Company added $1,451 short inventory of US Treasury securities.

The Company is the primary liquidity provider in the market for a number of closed-end mutual funds ("the Funds") invested in Puerto Rico municipal securities. These Funds use leverage, which is currently provided through repurchase agreements between the Funds and the Company. Since 2013, the Puerto Rico market has experienced a downturn and liquidity issues became prevalent with the Funds. The fair value of these Funds is based on valuation techniques for which significant inputs are not based on observable data.

The following table provides a reconciliation of the beginning and ending balances for the various classes of assets measured at fair value using unobservable inputs – Level 3.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Financial assets and liabilities not measured at fair value

Other financial assets and liabilities are recorded by the Company at their contract values and include cash and cash equivalents, cash and securities segregated and on deposit for federal and other regulations, securities purchased under agreements to resell, receivables and payables from (i) clients, (ii) interest, (iii) fees and other and, (iv) affiliated companies and subordinated debt.

All financial assets and liabilities carried at contract amounts that either have short-term maturities (one year or less) or bear market interest rates are carried at amounts that approximate fair value. The carrying value of loans included in receivables from clients approximate fair value as these loans re-price daily and there is no stated maturity date.

The following table represents the carrying value, fair value, and fair value hierarchy category of certain financial assets and liabilities that are not recorded at fair value in the Company's statement of financial condition. The following table excludes all non-financial assets and liabilities.

4. Collateralized Agreements

The Company enters into reverse repurchase agreements, repurchase agreements, securities borrowed and securities loaned transactions to, among other things, acquire securities to cover short positions and settle other securities obligations, to accommodate customers’ needs and for the Company’s financing transactions.

Secured Financing Transactions-Maturities and Collateral Pledged

As of June 30, 2020 there were no gross obligations for repurchase agreements.

Offsetting of Collateral Agreements

The Company manages credit risk by entering into netting agreements with counterparties. These netting agreements generally enable the counterparties to offset liabilities against assets received in the event that the counterparty to the transaction is unable to fulfill its contractual obligation.

The Company offsets these financial assets and financial liabilities on the statement of financial condition only when it has an enforceable legal right to offset the respective recognized amounts and intends to settle on a net basis.
4. Collateralized Agreements (continues)

In the normal course of business, the Company obtains securities under agreements to resell and on terms which permit it to re-pledge or resell the securities to others. At June 30, 2020, the Company obtained and had available securities with a fair value of approximately $365,270. As of June 30, 2020, the Company neither pledged nor otherwise transferred to others in connection with the Company's financing activities or to satisfy commitments under short sales.

5. Cash and Securities Segregated and on Deposit for Federal and Other Regulations

The Company is required to segregate cash in a special reserve bank account for the exclusive benefit of customers under SEC Rule 15c3-3, the Customer Protection Rule. At June 30, 2020, the Company included $3,200 of qualified securities on deposit for federal and other regulations.

6. Receivables from Allowance for Doubtful Accounts

Client receivables as of June 30, 2020 are $45,262; consisting of a portfolio of loans collateralized by securities that were purchased by the Company from an affiliated entity.

Client receivables are demand facilities with variable interest rates (the "Loans") and are fully secured by cash and client securities, a portion of which includes Puerto Rico closed-end funds and Puerto Rico municipal securities.

The client is required to post collateral in excess of the value of the Loans and the collateral must meet certain lending value criteria as defined by the Company. Collateral is monitored daily for price volatility in order to maintain adequate margins. If the collateral value drops below the minimum required levels, a maintenance call is issued. The borrower must satisfy the call by providing additional securities or by paying down the Loan. If the borrower does not satisfy the call, the Company may liquidate collateral to achieve required levels of collateralizations. Significant market volatility could have a negative impact on the borrower's ability to satisfy the call or the Company's ability to liquidate collateral. To limit the Company's credit risk exposure, the credit facilities are uncommitted.
7. Related Party Transactions

In the normal course of business, the Company enters into transactions with affiliated companies.

At June 30, 2020, the statement of financial condition included the following balances with affiliates:

**Assets**
- Securities purchased under agreements to resell: $136,810
- Receivables from affiliated companies: $16,882

**Liabilities**
- Accrued compensation and benefits: $260
- Payables to affiliated companies: $1,140
- Subordinated liabilities (Note 8): $150,000

**Service Level Agreements**

Pursuant to service level arrangements, the Company receives services from / provides services to affiliates (operational / administrative / securities research / other). The significant arrangements where the Company receives or provides such support services include arrangements with, UBS Business Solutions LLC ("UBS BS"), UBS Business Solutions AG ("UBS BS AG"), UBS AG Stamford branch ("Stamford branch"), UBSFSI and UBS Trust Company of Puerto Rico ("UBSTCPR").

Retail clients of UBSFSIPR are introduced to UBSFSI on a fully disclosed basis. The Company has a fully disclosed clearing agreement pursuant to which UBSFSI provides certain clearing and related functions. Under this arrangement, UBSFSI assumes the physical custody of, and conducts the brokerage settlement activities for accounts of UBSFSIPR and its clients.

**Finance Arrangements**

At June 30, 2020, the Company had resale agreements of $42,168 with mutual funds co-managed by an affiliate.
7. Related Party Transactions (continued)

Compensatory Arrangements

Certain employees of the Company have been issued loans by an affiliate as part of the Company’s compensation programs related to employee recruiting and retention (see Note 12). These loans bear interest and have terms generally between seven and nine years.

Clearing Agreements among Retail Clients

Retail clients of the Company are introduced to UBSFSI on a fully disclosed basis. The Company has a fully disclosed clearing agreement with UBSFSI pursuant to which UBSFSI provides certain clearing and related functions. Under this arrangement, UBSFSI, under the Company’s continuing supervision, assumes the physical custody of, and conducts the brokerage settlement activities for, accounts of the Company and its clients.

Securities Purchased under Agreements to Resell

As of June 30, 2020, the Company entered into a resale agreement with UBSAHL in the amount of $208,745. The agreement is collateralized by U.S. Treasury Notes.

8. Subordinated Liabilities

At June 30, 2020, subordinated borrowings and total credit facilities outstanding with UBSAHL consisted of the following:

<table>
<thead>
<tr>
<th>Maturity</th>
<th>Amount Outstanding</th>
<th>Total Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Subordinated term loan May 31, 2022</td>
<td>$50,000</td>

<td>50,000</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>$150,000</strong></td>
<td><strong>$150,000</strong></td>
</tr>
</tbody>
</table>
8. Subordinated Liabilities (continued)

These loans are subordinated to claims of general creditors, are covered by agreements approved by FINRA and other regulatory authorities, and are included by the Company for purposes of computing net capital under the SEC Uniform Net Capital Rule. To the extent that such borrowings are required for the Company's continued compliance with minimum net capital requirements, these loans may not be repaid unless first approved by FINRA and the National Futures Association. The revolving subordinated loan bears interest at a rate based upon USD overnight LIBOR as posted daily by the British Banker’s Associates.

9. Risk Management

The Company's risk management policies and related procedures are aligned with those of UBS. The Company's risk governance framework operates along three lines of defense. The first line of defense, business management, owns respective risk exposures and is required to maintain effective processes and systems to manage its risks, including robust and comprehensive internal controls and documented procedures. Business management has appropriate supervisory controls and review processes in place designed to identify control weaknesses and inadequate processes. The second line of defense, the control functions, provides independent oversight of risks, including assisting in setting risk limits and protecting against non-compliance with applicable laws and regulations. Internal audit forms the third line of defense, evaluation of the overall effectiveness of governance, risk management and the control environment, including the assessment of how the first and second lines of defense meet their objectives.

The Company's risk management and control principles are as follows:

- Protection of financial strength. Protecting the financial strength of the Company by controlling risk exposures and avoiding potential risks concentrations at individual exposure levels, at specific portfolio levels and at an aggregate Company level across all risk types.
- Protection of reputation. Protecting the Company's reputation through a sound risk culture characterized by a holistic and integrated view of risk, performance and reward, and through full compliance with the Company's standards and principles, particularly the Company's Code of Business Conduct and Ethics.
- Business management accountability. Ensuring management accountability, whereby business management, as opposed to Risk Control, owns all risks assumed throughout the Company and is responsible for the continuous and active management of all risk exposures to ensure that risk and return are balanced.
9. Risk Management (continued)

- Independent controls. Independent control functions which monitor the effectiveness of the business's risk management and oversee risk-taking activities.
- Risk disclosure. Disclosure of risks to senior management, the Board of Directors, investors, regulators, credit rating agencies and other stakeholders with an appropriate level of comprehensiveness and transparency.

Market Risk

Market risk is the risk of loss from changes in market variables. There are two broad categories of changes: general market risk factors driven by macroeconomic, geopolitical and other market-wide considerations and market risk factors that are specific to individual companies or entities.

General market risk factors include interest rates, level of equity market indices, foreign currency exchange rates and other factors. Market risk factors that are specific to individual companies or entities cannot be explained by general market moves. In the normal course of business the Company is exposed to general and specific market risks related to its trading activities and some non-trading businesses are also subject to market risk.

The Company has two major portfolio measures to monitor market risk: Value at Risk and Stress Loss. The two major portfolio measures are complemented by concentration and other supplementary limits on portfolios, sub-portfolios or asset classes. The senior management of each relevant business area is responsible for reviewing trading and non-trading positions, exposures, profits and losses, and trading strategies. The Company has a risk control group which reviews the Company’s risk profile and independently monitors development in trading and non-trading portfolios according to established limits. The risk control group also reviews trading positions and economic hedging strategies, performs market risk modeling and aids in setting risk policies of the Company.

Operational Risk

Operational risk is the risk resulting from inadequate or failed internal processes, people and systems, or from external causes (e.g., deliberate, accidental or natural).

Events may be direct financial losses or indirect in the form of revenue forgone as a result of business suspension. They may also result in damage to the Company’s reputation and franchise, which have longer term financial consequences.
9. Risk Management (continued)

Operational risk is an inevitable consequence of being in business, and managing operational risk is a core element of the Company's business activities. It is not possible to eliminate every source of operational risk, but the Company's aim is to provide a framework that supports the identification and assessment of all material operational risks and their potential concentrations in order to achieve an appropriate balance between risk and return.

A comprehensive operational risk taxonomy is established that defines the universe of inherent material operational risks which arise as a consequence of business activities. This enables a common understanding and provides a standard and consistent categorization of operational risk across all business divisions. The aggregated impact of control deficiencies and the adequacy of remediation efforts are assessed by Operational Risk Control for all relevant operational risk taxonomy categories as part of the operational risk assessment process. This front-to-back process, complemented by internal subject matter expertise, provides a transparent assessment of the current operational risk exposure against agreed risk appetite statements and measures.

Significant control deficiencies that surface during the internal control and operational risk assessment processes must be reported in the operational risk inventory and sustainable remediation must be initiated.

Credit Risk

Credit risk is the risk of financial loss resulting from failure by a client or counterparty to meet its contractual obligations to the Company. This can be caused by factors directly related to the counterparty or from failures in the settlement process. It can also be triggered by economic or political factors in the country in which the counterparty is based or where it has substantial assets. Counterparties to the Company’s financing activities are primarily affiliates, other financial institutions, including banks, brokers and dealers, investment funds and insurance companies, individuals and non-financial operating entities. Credit losses could arise should counterparties fail to perform and the value of any collateral held prove inadequate due to market conditions.

The Company manages credit risk by monitoring net exposure to individual counterparties on a daily basis, monitoring credit limits and requiring additional collateral where appropriate.

Client transactions are entered on either a cash or margin basis. In a margin transaction, the Company extends credit to a client, using the securities purchased and/or other securities held on behalf of the client, as collateral for amounts loaned. Amounts loaned are limited by margin
9. Risk Management (continued)

regulations of the Federal Reserve Board and other regulatory authorities and are subject to the Company’s credit review and daily monitoring procedures. Market declines could, however, reduce the value of any collateral below the principal amount loaned, plus accrued interest, before the collateral can be sold.

Client transactions include positions in written options, financial instruments sold, not yet purchased and commodities and financial futures. The risk to the Company’s clients in these transactions can be substantial, principally due to price volatility which can reduce the clients’ ability to meet their obligations. To the extent clients are unable to meet their commitments to the Company and margin deposits are insufficient to cover outstanding liabilities, the Company may take action as appropriate.

Client trades are recorded on a settlement date basis. Should either the client or broker fail to perform, the Company may be required to complete the transaction at prevailing market prices.

Trades pending at June 30, 2020 were settled without material adverse effect on the financial statements, taken as a whole.

Receivables and payables with brokers and dealers, agreements to resell and repurchase securities, and securities borrowed and loaned are generally collateralized by cash, U.S. Government and agency securities. Additional collateral is requested when considered necessary. The Company may pledge clients’ margin securities as collateral in support of securities loaned and bank loans, as well as to satisfy margin requirements at clearing organizations. For margin loans, the amounts loaned or pledged are limited to the extent permitted by applicable margin regulations. Should the counterparty fail to return the clients’ securities, the Company may be required to replace them at prevailing market prices. At June 30, 2020, the market value of securities loaned to other brokers approximated the amounts due or collateral obtained.

The Company has direct exposure to Puerto Rico municipal securities and closed-end funds arising from its secondary market activities, which was $8,744 at June 30, 2020. In addition, securities-backed lending facilities, including purpose and non-purpose loans, provided by the Company to its customers and repurchase agreements with institutional clients are, in part, collateralized by Puerto Rico municipal securities and closed-end funds primarily invested in Puerto Rico municipal securities. This collateral is subject to lending value haircuts and daily margining.
9. Risk Management (continued)

Since 2015, the Commonwealth of Puerto Rico along with certain agencies and public corporations of the Commonwealth have defaulted on various debt instruments. In May 2017, certain debt of the Commonwealth was placed into a bankruptcy-like proceeding (refer to Note 10). As a result of these recurring events, the Company continues to limit lending value on most Puerto Rico municipal securities and closed-end funds.

10. Commitments and Contingencies

Legal Proceedings

The Company operates in a legal and regulatory environment that exposes it to significant litigation risks and similar risks arising from disputes and regulatory proceedings. As a result, the Company is involved in various disputes and legal proceedings, including litigation, arbitration, and regulatory and criminal investigations.

Such matters are subject to many uncertainties, and the outcome and timing of resolution are often difficult to predict, particularly in the earlier stages of a case. There are also situations where the Company may enter into a settlement agreement. This may occur in order to avoid the expense, management distraction or reputational implications of continuing to contest liability, even for those matters for which the Company believes it should be exonerated. The uncertainties inherent in all such matters affect the amount and timing of any potential outflows for both matters with respect to which provisions have been established and other contingent liabilities. The Company makes provisions for matters brought against it when, in the opinion of management after seeking legal advice, it is more likely than not that the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required, and the amount can be reliably estimated. Where these factors are otherwise satisfied, a provision may be established for claims that have not yet been asserted against the Company, but are nevertheless expected to be, based on the Company's experience with similar asserted claims. If any of those conditions are not met, such matters result in contingent liabilities. If the amount of an obligation cannot be reliably estimated, a liability exists that is not recognized even if an outflow of resources is probable. Accordingly, no provision is established even if the potential outflow of resources with respect to such matters could be significant. Developments relating to a matter that occur after the relevant
10. Commitments and Contingencies (continued)

reporting period, but prior to the issuance of financial statements, which affect management’s assessment of the provision for such matter, because, for example, the developments provide evidence of conditions that existed at the end of the reporting period, are adjusting events after the reporting period under IAS 10 and must be recognized in the financial statements for the reporting period.

It is not practicable to provide an aggregate estimate of liability for our litigation, regulatory and similar matters as a class of contingent liabilities. Doing so would require the Company to provide speculative legal assessments as to claims and proceedings that involve unique fact patterns or novel legal theories, which have not yet been initiated or are at early stages of adjudication, or as to which alleged damages have not been quantified by the claimants. Although we therefore cannot provide a numerical estimate of the future losses that could arise from the class of litigation, regulatory and similar matters, the Company believes that the aggregate amount of possible future losses from this class that are more than remote substantially exceeds the level of current provisions.

In the matters disclosed below, the Company does not state whether a provision has been established. Either a) the Company has not established a provision and the matter is treated as a contingent liability under the applicable accounting standard or b) the Company has established a provision but expects disclosure of that fact would prejudice seriously the Company's position with other parties in that matter because it would reveal the fact that the Company believes an outflow of resources to be probable and reliably estimable.

In addition to the matters mentioned below, the Company is involved in litigation as well as regulatory matters arising in the normal course of business.

Puerto Rico Matters

Declines since 2013 in the market prices of Puerto Rico municipal bonds and of closed-end funds (funds) that are sole-managed and co-managed by UBSTCPR and distributed by the Company have led to multiple regulatory inquiries, as well as customer complaints and arbitrations with aggregate claimed damages of $3,400,000 of which claims with aggregate claimed damages of $2,600,000 have been resolved through settlements, arbitration or withdrawal of the claim. The claims have been filed by clients in Puerto Rico who own the funds or Puerto Rico municipal bonds and / or who used their UBS account assets as collateral for UBS non-purpose loans; customer complaint and arbitration allegations include fraud, misrepresentation and unsuitability of the funds and of the loans.
10. Commitments and Contingencies (continued)

A shareholder derivative action was filed in 2014 against UBSFSI, UBSFSIPR and UBSTCPR and current and certain former directors of the funds, alleging hundreds of millions of US dollars in losses in the funds. In 2015, defendants' motion to dismiss was denied and a request for permission to appeal that ruling was denied by the Puerto Rico Supreme Court. In 2014, a federal class action complaint was filed against various UBS entities, certain members of UBSFSIPR's senior management and the co-manager of certain of the funds seeking damages for investor losses in the funds during the period from May 2008 through May 2014. Following denial of the plaintiff's motion for class certification, the case was dismissed in October 2018.

In 2014 and 2015, UBS entered into settlements with the Office of the Commissioner of Financial Institutions for the Commonwealth of Puerto Rico (OCFI), the SEC and the Financial Industry Regulatory Authority (FINRA) in relation to their examinations of UBS’s operations.

In 2011, a purported derivative action was filed on behalf of the Employee Retirement System of the Commonwealth of Puerto Rico ("System") against over forty defendants, including UBSFSIPR, which was named in connection with its underwriting and consulting services. Plaintiffs alleged that defendants violated their purported fiduciary duties and contractual obligations in connection with the issuance and underwriting of $3,000,000 of bonds by the System in 2008 and sought damages of over $800,000. In 2016, the court granted the System's request to join the action as a plaintiff, but ordered that plaintiffs must file an amended complaint. In 2017, the court denied defendants' motion to dismiss the amended complaint.

Beginning in 2015, and continuing through 2017 certain agencies and public corporations of the Commonwealth of Puerto Rico (Commonwealth) defaulted on certain interest payments on Puerto Rico bonds. In 2016, federal legislation created an oversight board with power to oversee Puerto Rico's finances and to restructure its debt. The oversight board has imposed a stay on the exercise of creditors' rights. In 2017, the oversight board placed certain of the bonds into a bankruptcy-like proceeding under the supervision of a Federal District Judge. These events, further defaults, any further legislative action to create a legal means of restructuring Commonwealth obligations or to impose additional oversight on the Commonwealth's finances, or any restructuring of the Commonwealth's obligations may increase the number of claims against UBSFSIPR concerning Puerto Rico securities, as well as potential damages sought.
10. Commitments and Contingencies (continued)

In May 2019 the oversight board filed complaints in Puerto Rico federal district court bringing claims against financial, legal and accounting firms that had participated in Puerto Rico municipal bond offerings, including UBFSI and UBSFSI PR, seeking a return of underwriting and swap fees paid in connection with those offerings. UBS estimates that it received approximately $125,000 in fees in the relevant offerings.

The Company's statement of financial condition as of June 30, 2020 reflected provisions with respect to these matters in amounts that the Company believes to be appropriate under the applicable accounting standards. As in the case of other matters for which the Company has established provisions, the future outflow of resources in respect of such matters cannot be determined with certainty based on currently available information, and accordingly may ultimately prove to be substantially greater (or may be less) than the provisions that have been recognized.

In August 2019, and February 2020, three US insurance companies that insured issues of Puerto Rico municipal bonds sued UBSFSI and seven other underwriters of Puerto Rico municipal bonds. The actions collectively seek recovery of an aggregate of USD 955,000 in damages from the defendants. The plaintiffs in these cases claim that defendants failed to reasonably investigate financial statements in the offering materials for the insured Puerto Rico bonds issued between 2002 and 2007, which plaintiffs argue they relied upon in agreeing to insure the bonds notwithstanding that they had no contractual relationship with the underwriters.

11. Net Capital Requirements

The Company is subject to the SEC Uniform Net Capital Rule (Rule 15c3-1). The Company computes its net capital requirement under the alternative method. Under this method of computing capital requirements adopted by the Company, net capital shall not be less than the excess margin collected on resale agreements plus $1,000. As of June 30, 2020, the Company's net capital, as defined, was $140,985, which exceeded minimum net capital requirement by $138,824.

Dividend payments, equity withdrawals and advances to UBSFSI or any of its affiliates are subject to certain notification and other provisions of the SEC Uniform Net Capital Rule.
12. Equity Participation and Other Compensation Plans

UBS has several equity participation and other compensation plans to align the interests of executives, managers and staff with the interests of shareholders while continuously meeting regulatory requirements.

**Equity Ownership Plan ("EOP")**

EOP is a mandatory share-based compensation plan for all employees with total compensation above a defined threshold. These employees receive a portion of their annual performance-related compensation above the threshold in the form of notional shares. Furthermore, notional shares granted to (i) Group Managing Directors, (ii) employees who by the nature of their role have been determined to materially set, commit or control significant amounts of the firm's resources or exert significant influence over its risk profile and (iii) employees whose incentive exceeds a certain threshold are subject to performance conditions. The performance conditions are based on the UBS return on tangible equity and the divisional return on attributed equity. Certain awards, such as replacement awards issued outside the normal performance year cycle, such as replacement awards or sign-on awards, may take the form of deferred cash under the EOP plan rules.

Notional shares represent a promise to receive UBS shares at vesting and do not carry voting rights during the vesting period. Notional shares granted before February 2014 have no rights to dividends, whereas for awards granted since February 2014 carry a dividend equivalent which may be paid in notional shares or cash and which vests on the same terms and conditions as the awards.

Awards are settled by delivering UBS shares at vesting. EOP awards generally vest in equal increments after two and three years following grant. The awards are generally forfeitable upon, among other circumstances, voluntary termination of employment with the Company.

**Deferred Contingent Capital Plan ("DCCP")**

DCCP is a mandatory deferred cash compensation plan for all employees with total compensation above a defined threshold. DCCP awards granted up to January 2015 represent a right to receive a cash payment at vesting. For awards granted since February 2015, DCCP takes the form of notional additional tier 1 (AT1) capital instruments, which may be settled at the discretion of UBS in the form of a cash payment or a marketable AT1 capital instrument. Awards vest in full after five years unless there is a trigger or viability event.

Awards granted under the DCCP are written down if UBS's common equity tier 1 capital ratio falls below defined thresholds. DCCP awards are also forfeited if a viability event occurs, that
12. Equity Participation and Other Compensation Plans (continued)

is if the Swiss Financial Market Supervisory Authority provides a written notice to UBS that the DCCP awards must be written down to prevent an insolvency, bankruptcy or failure of UBS, or if UBS receives a commitment of extraordinary support from the public sector that is necessary to prevent such an event.

For awards granted up to January 2015, interest on the awards is paid annually, provided that UBS achieves an adjusted profit before tax in the preceding year. For awards granted since February 2015, interest payments are discretionary. The awards are generally forfeitable upon, among other circumstances, voluntary termination of employment with the Company.

**Equity Plus Plan**

Equity Plus is a voluntary share-based compensation plan that provides eligible employees with the opportunity to purchase shares of UBS at market value and receive one notional UBS share for every three shares purchased, up to a maximum annual limit. Share purchases may be made annually from the performance award and/or monthly through regular deductions from salary. If the shares purchased are held for three years and, in general, if the employee remains in employment, the notional shares vest. For notional shares granted since April 2014, employees are entitled to receive a dividend equivalent which may be paid in notional shares and/or cash.

**Financial Advisor Compensation**

The compensation for financial advisors is based on production payout and deferred compensation awards. Production payout, paid monthly in the form of non-deferred cash payments, is primarily based on compensable revenue generated by financial advisors. Financial advisors may also qualify for supplemental compensation in the form of deferred compensation awards, which vest over various time periods of up to ten years depending on the type of award. Production payout rates and deferred compensation awards may be reduced for, among other things, negligence or carelessness, or a failure to comply with the firm's rules, standards, practices and policies or applicable laws and regulations.

Strategic objective awards are deferred compensation awards based on strategic performance measures, including production, length of service with the firm and net new business. These awards are granted in the form of both deferred share-based and deferred cash-based awards with a vesting period of up to 6 years. Through performance year 2016, strategic objective awards were partly granted to eligible financial advisors under the Partner Plus deferred cash plan. In addition to such granted awards (Company contributions), participants were also allowed to voluntarily contribute additional amounts otherwise payable as production payout up
12. Equity Participation and Other Compensation Plans (continued)

to a certain percentage, which vest upon contribution. Company contributions and voluntary contributions are credited with interest in accordance with the terms of the plan. Rather than being credited with interest, a participant may elect to have voluntary contributions, along with vested Company Contributions, credited with notional earnings based on the performance of various mutual funds. Company contributions and interest on both Company and voluntary contributions ratably vest in 20% installments six to ten year following the grant date.

Company contributions and interest on notional earnings are forfeitable under certain circumstances.

The Company enters into compensatory arrangements to incentivize certain eligible active financial advisors to achieve specified revenue production and other performance thresholds.

Growth Plus is an incentive program for selected financial advisors whose revenue production and length of service exceeds defined thresholds from 2010 through 2017. Compensation arrangements were granted in 2010, 2011 and 2015 and 2018. The awards vest ratably over seven years from grant with the exception of the 2018 arrangement which vests over five years.

The Company also enters into compensatory arrangements with certain new financial advisors primarily as a recruitment incentive. The compensation may be earned and paid to the financial advisor during a period of continued employment and may be forfeited under certain circumstances.

In addition to these compensation arrangements, the Company may issue loans to certain new and active financial advisors.

13. Employee Benefit Plans

Eligible employees of the Company were included in the non-contributory defined benefit pension plan of UBSFSI, which was frozen in 1998.

Additionally, employees of the Company are eligible to participate in the UBS Financial Services Inc. of Puerto Rico Savings Plus Plan, which includes an employee savings investment plan and a defined contribution pension plan.

UBSFSI also provides certain life insurance and health care benefits to employees of the Company.
14. Income Taxes

Deferred income taxes reflect the net tax effects of temporary differences between carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. For financial reporting purposes, net deferred tax assets are included in other assets in the Statement of Financial Condition and are reflected with a reduction for a valuation allowance.

In accordance with ASC Topic 740, if it is more-likely-than-not that the ultimate realization of deferred tax assets is not going to be recognized, a valuation allowance should be recorded. In assessing the recoverability of the deferred tax assets, the Company considered all available positive and negative evidence, including history of earnings as well as all possible tax planning strategies.

After consideration of all relevant evidence, the Company believes that it is more-likely-than-not that a benefit will not be realized for any of its deferred tax assets, and accordingly, a full valuation allowance of $508,497 has been recorded. Since December 31, 2019, the valuation allowance increased by $3,588.

As of June 30, 2020, the Company had net deferred tax assets of $508,497 before any valuation allowance, of which $427,436 related to net operating losses, $77,512 related to accelerated income and deferred deductions, $(915) related to employee benefits, and $4,464 related to alternative minimum tax.

The Company recognizes accrued interest and penalties related to unrecognized tax benefits in income taxes.

The Company files income tax returns with the Commonwealth of Puerto Rico. The tax years that remain subject to examination are from 2014 through 2018. In the next twelve months the Company believes that there will be no material changes to unrecognized tax benefits.

15. Subsequent Events

The Company has evaluated its subsequent event disclosure through September 4, 2020, the date the Company's financial statements were issued, and has determined that there are no other events that would have a material impact on the financial statements.
