

Cut-off times for payment orders

Ensuring your orders are executed on time.

Times valid from July 2025.

The cut-off times refer to the last possible time the corresponding currency can be delivered so that transfers involving same-day values can be executed. For the order to be executed correctly, the terms and conditions for payments apply.

Country	Currency	Cut-off times ¹	Notification amounts ²
		Order placement via UBS Digital Banking UBS KeyPort UBS Multimat UBS KeyLink UBS Swift one-time order ³	In local currencies as from
Switzerland and Liechtenstein ⁴	CHF	16:00 V*

UK	GBP	16:15 V	1,000,000
USA	USD	18:00 V	800,000

1 The cut-off times are indicated in CET and apply only to Swiss UBS branch offices.

The cut-off times refer to the point at which an order is received. UBS has no influence on the value date on which the payment will arrive in the beneficiary's account.

V = value date – example: The cut-off time for online products in AUD is 1700 V-1, i.e. one bank working day before the value date. Please also bear in mind that special cut-off times may apply in the event of half-day or full-day public holidays called at short notice, depending on the country or currency. Payment orders received after this time will be executed using the best possible value date. The information is valid on condition that there are sufficient funds on the debit account on the execution day and that payment orders do not require manual post-processing or callbacks.

2 To enable the amount to be credited with the expected value date, UBS must be advised of receipt of payment before the cut-off time. Please note the notification amounts for the respective currency.

3 Payment orders that are submitted for execution by clients in person, via a payment form, letter, phone or e-mail, count as one-time orders. The one-time order must be submitted for processing a day before the given cut-off time so that transfers involving same-day values can be executed.

4 There are no cut-off times for instant payments via UBS Digital Banking; they are executed immediately and credited to the payee without delay. A surcharge is applied to each instant payment transaction.

5 Single Euro Payments Area – the euro payment operations standard. For payment orders that in addition to being transacted in EUR are required to fulfill the following: beneficiary's IBAN, BIC of beneficiary's bank, cost code SHA (for shared costs), no instructions and beneficiary's financial institution takes part in SEPA.

6 Payment orders in currency CNY are subject to special conditions in accordance with the CNY factsheet.

7 Friday is not a value date.

8 In addition to the Mexican public holidays, UBS also applies USD clearing holidays to payments in MXN.
