

# UBS Mobile Banking app

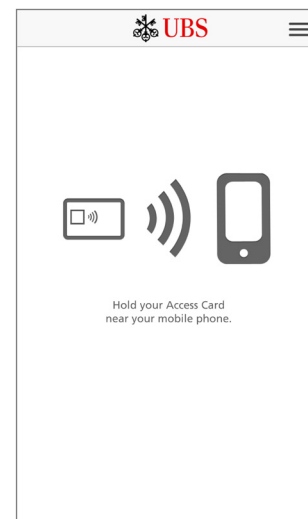

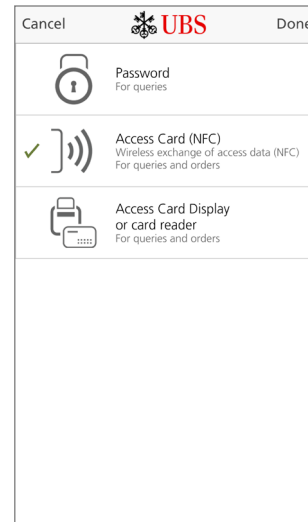

Login with the **Access Card and NFC**

**The Access Card supports the wireless exchange of access data (NFC). If your smartphone has NFC, you can log in directly (self-authorization) to the UBS Mobile Banking app using your Access Card and the associated PIN.**

- Launch the UBS Mobile Banking app
- Select "Access Card" as the login method
- Enter the contract number and PIN and then click on "Login"
- With the Access Card, search for the smartphone's NFC antenna (follow the instructions displayed)
- Wait until the login process is completed

If your smartphone does not support NFC, the "Access Card Display" is available to you for logging into the UBS Mobile Banking app. To order the card please contact Support.

Additional information about UBS Mobile Banking can be found on the Internet: [ubs.com/de-mobile](https://ubs.com/de-mobile)
