Credit Suisse (Schweiz) AG

2 Report of the Statutory Auditor

7 Financial statements

10 Notes to the financial statements

43 Proposed appropriation of retained earnings

44 List of abbreviations

For purposes of this report, unless the context otherwise requires, the terms “Credit Suisse” and “the Group” mean Credit Suisse Group AG and its consolidated subsidiaries.

Capital adequacy disclosures for the Group and Credit Suisse (Schweiz) AG are presented in the publications “Pillar 3 and regulatory disclosures – Credit Suisse Group AG” and “Regulatory disclosures – Subsidiaries”, respectively, which are available on Credit Suisse Group’s website [credit-suisse.com/regulatorydisclosures](https://www.credit-suisse.com/regulatorydisclosures).

Climate-related financial risk disclosures for the Group and Credit Suisse (Schweiz) AG are presented in the publication “Sustainability Report 2022”, which is available on Credit Suisse Group’s website [credit-suisse.com/sustainabilityreport](https://www.credit-suisse.com/sustainabilityreport).

Publications referenced in this report, whether via website links or otherwise, are not incorporated into this report.

In various tables, the use of “–” indicates not meaningful or not applicable.

Report of the Statutory Auditor

Report of the statutory auditor to the General Meeting of Credit Suisse (Schweiz) AG, Zurich

Report on the audit of the financial statements

Opinion

We have audited the financial statements of Credit Suisse (Schweiz) AG (the Company), which comprise the statement of income, balance sheet, statement of changes in equity and notes for the year then ended December 31, 2022, including a summary of significant accounting policies.

In our opinion, the financial statements (pages 7 to 42) comply with Swiss law and the Company's articles of association.

Basis for opinion

We conducted our audit in accordance with Swiss law and Swiss Standards on Auditing (SA-CH). Our responsibilities under those provisions and standards are further described in the "Auditor's responsibilities for the audit of the financial statements" section of our report. We are independent of the Company in accordance with the provisions of Swiss law, together with the requirements of the Swiss audit profession, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our audit approach

Overview

Overall materiality: CHF 117 million

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the financial statements as a whole, taking into account the structure of the Company, the accounting processes and controls, and the industry in which the Company operates.

As key audit matter the following area of focus has been identified:

Valuation of allowance for loan losses

Materiality

The scope of our audit was influenced by our application of materiality. Our audit opinion aims to provide reasonable assurance that the financial statements are free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

PricewaterhouseCoopers AG, Birchstrasse 160, Postfach, CH-8050 Zurich, Switzerland
Telephone: +41 58 792 44 00, www.pwc.ch

PricewaterhouseCoopers AG is a member of the global PricewaterhouseCoopers network of firms, each of which is a separate and independent legal entity.

Based on our professional judgment, we determined certain quantitative thresholds for materiality, including the overall materiality for the financial statements as a whole as set out in the table below. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements, both individually and in aggregate, on the financial statements as a whole.

Overall materiality	CHF 117 million
Benchmark applied	Common Equity Tier 1 (CET1)
Rationale for the materiality benchmark applied	We chose CET1 as the benchmark because, in our view, it is the benchmark that best represents the solvency and stability of Credit Suisse (Schweiz) AG, which is of major relevance for economic decisions made by management and the Board of Directors and in line with targets that are set by Credit Suisse Group AG and the external regulator.

Audit scope

We designed our audit by determining materiality and assessing the risks of material misstatement in the financial statements. In particular, we considered where subjective judgements were made; for example, in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all of our audits, we also addressed the risk of management override of internal controls, including among other matters consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Valuation of allowance for loan losses

Key audit matter	How our audit addressed the key audit matter
<p>As described in Note 11 to the financial statements, Credit Suisse (Schweiz) AG recorded gross loans held at amortized cost of CHF 170,349 million and an allowance for credit losses of CHF 365 million.</p> <p>Current expected credit losses ("CECL") are estimated using a forward-looking methodology over the lifetime of the exposure. CECL models use forecasts of future economic conditions across multiple scenarios to estimate expected credit losses. Expected credit losses are not solely derived from macroeconomic factors. Model overlays based on expert judgment are also applied, considering historical loss experience and industry and counterparty reviews.</p> <p>Expected credit losses for individually impaired credit exposures are measured by performing an in-depth review and analysis of these exposures, considering factors such as recovery and exit options as well as collateral and the risk profile of the borrower.</p> <p>We identified the assessment of the allowance for loan losses as a key audit matter. The principal consideration for our determination are (i) the significant judgment by management in evaluating model results and assessing the need for overlays to the CECL model output, (ii) the signifi-</p>	<p>The primary procedures we performed to address the key audit matter included the following:</p> <ul style="list-style-type: none"> • Testing the effectiveness of controls relating to management's expected credit loss process. • Testing management's process for estimating expected credit losses, including (i) evaluating the appropriateness of the methodologies used to determine the allowance for credit losses, (ii) testing the completeness and accuracy of data used in the estimate, and (iii) evaluating the reasonableness of management's model overlays. The procedures included the use of professionals with specialized skill and knowledge to assist in evaluating the appropriateness of model methodologies and assist in evaluating the audit evidence. • For individually impaired loans we tested controls over the individual impairment process, including management's quality control over the process. • We tested individually impaired loans on a sample basis. This included obtaining audit evidence

cant judgment and estimation by management in determining an appropriate methodology for the overlays applied, which both in turn led to a high degree of auditor judgment, subjectivity and effort in performing procedures and in evaluating audit evidence obtained relating to the model results and the appropriateness of overlays to the CECL model output, (iii) the audit effort involved the use of professionals with specialized skill and knowledge and (iv) judgment by management to estimate the recoverable amount and the collateral value for loans that are individually evaluated for impairment.

for key assumptions such as future cash flow estimates and valuation of underlying collateral.

Other information

The Board of Directors is responsible for the other information. The other information comprises the information included in the annual report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Board of Directors' responsibilities for the financial statements

The Board of Directors is responsible for the preparation of the financial statements in accordance with the provisions of Swiss law and the Company's articles of association, and for such internal control as the Board of Directors determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Swiss law and SA-CH will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Swiss law and SA-CH, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made.
- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

We communicate with the Board of Directors or its relevant committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Board of Directors or its relevant committee with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Board of Directors or its relevant committee, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other legal and regulatory requirements

During our audit, performed in accordance with article 728a paragraph 1 item 3 CO and PS-CH 890, we noted that an internal control system has been designed by management for the preparation of the financial statements according to the instructions of the Board of Directors. However, we noted that management did not design and maintain an effective risk assessment process to identify and analyze the risk of material misstatements in its financial statements within this system as described in note 1 to the accompanying financial statements.

In our opinion, except for the matter described in the preceding paragraph, an internal control system exists which has been designed for the preparation of financial statements according to the instructions of the Board of Directors.

We further confirm that the proposed appropriation of available earnings complies with Swiss law and the Company's articles of association.

We recommend that the financial statements submitted to you be approved.

CHF million		
Contingent liabilities	13,580	15,016
Irrevocable commitments	15,963	15,347
Obligations for calls on shares and additional payments	111	101

Off-balance sheet transactions

Contingent liabilities include guarantees for obligations, performance-related guarantees and letters of comfort issued to third parties. Contingencies with a stated amount are included in the off-balance sheet section of the financial statements. In some instances, the exposure of Credit Suisse (Schweiz) AG is not defined as an amount but relates to specific circumstances, such as the solvency of subsidiaries or the performance of a service.

Joint and several liability

Credit Suisse (Schweiz) AG holds assets at a carrying value of CHF 1,196 million and CHF 950 million as of December 31, 2022 and 2021, respectively, which are pledged under the international covered bond program of Credit Suisse AG and for which the related liabilities of CHF 565 million and CHF 627 million as of December 31, 2022 and 2021 are reported by Credit Suisse AG. As of December 31, 2022 and 2021, the contingent liabilities of Credit Suisse (Schweiz) AG under this covered bond program of Credit Suisse AG are CHF 565 million and CHF 627 million, respectively. Credit Suisse (Schweiz) AG also entered into a contractual arrangement under which it assumed joint and several liability in connection with Credit Suisse (Schweiz) AG's roles under the international covered bond program.

Credit Suisse (Schweiz) AG is a member of Credit Suisse Group AG's Swiss value added tax (VAT) group and therefore subject to joint and several liability according to the Swiss VAT Act.

Deposit insurance guarantee program

Deposit-taking banks and securities dealers in Switzerland are required to ensure the payout of protected deposits in case of specified restrictions or compulsory liquidation of a deposit-taking

bank, and they jointly guarantee an amount of up to CHF 6 billion under the regulation applicable until December 31, 2022. Upon occurrence of a payout event triggered by a specified restriction of business imposed by the Swiss Financial Market Supervisory Authority FINMA (FINMA) or by the compulsory liquidation of another deposit-taking bank, the participating bank's contribution will be calculated based on its share of protected deposits in proportion to total protected deposits. Based on FINMA's estimate, Credit Suisse (Schweiz) AG's share in the deposit insurance guarantee program for the period July 1, 2022 to December 31, 2022 was CHF 423 million. This deposit insurance guarantee is reflected in irrevocable commitments.

On January 1, 2023, a partial revision of the Swiss Federal Law on Banks and Savings Banks (Bank Law) became effective, which included changes to the Swiss deposit insurance guarantee program. Under the revised program, among other changes, the jointly guaranteed amount is now determined as the higher of CHF 6 billion or 1.6% of all protected deposits. Credit Suisse (Schweiz) AG's respective share will be approximately CHF 566 million for the period January 1 to June 30, 2023, as per a notification received from the administrator of the Swiss deposit insurance program. With a transition period until November 30, 2023, banks will have to provide half of the maximum payment obligation as collateral to the administrator of the Swiss deposit insurance program, while the other half will remain subject to the bank's liquidity requirements and will be reflected in irrevocable commitments. Collateral will have to be provided to the Swiss National Bank (SNB) or the SIX Swiss Exchange in the form of high quality liquid securities or Swiss franc cash deposits or to the administrator of the Swiss deposit insurance program in the form of a loan.

Notes to the financial statements

1 Company details, business developments and subsequent events

Company details

Credit Suisse (Schweiz) AG is a Swiss bank incorporated as a joint stock corporation (public limited company), with its registered office in Zurich, Switzerland.

Credit Suisse (Schweiz) AG is a wholly-owned subsidiary of Credit Suisse AG and Credit Suisse AG is a wholly-owned subsidiary of Credit Suisse Group AG (the Group), both domiciled in Switzerland.

Number of employees

end of	2022	2021
Full-time equivalents		
Switzerland	7,280	7,280
Total	7,280	7,280

Business developments

Credit Suisse Group strategic review

On October 27, 2022, Credit Suisse announced a series of decisive actions following a strategic review conducted by its board of directors and executive board, focused on a restructuring of the Investment Bank, an accelerated cost transformation, and strengthened and reallocated capital. The transformation is intended to be funded through divestments, exits, the announced capital actions and existing resources. As the Group implements these actions, restructuring costs, including from asset impairments and liability valuations, are expected to arise in connection with business activities the Group plans to exit or transfer and their related infrastructure, which may also impact Credit Suisse (Schweiz) AG.

Internal control over financial reporting

Credit Suisse (Schweiz) AG's Board of Directors is responsible for establishing and maintaining adequate internal control over financial reporting which is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with Swiss law. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Credit Suisse Group's management has made an evaluation and assessment of the internal control over financial reporting as of December 31, 2022. Based upon its review and evaluation, the Group's management has concluded that, as of December 31, 2022, the Group's internal control over financial reporting was not effective as it did not design and maintain an effective risk assessment process to identify and analyze the risk of material misstatements in its financial statements. As Credit Suisse

(Schweiz) AG relies on the Group's internal control framework designed for the preparation of the financial statements, the Board of Directors of Credit Suisse (Schweiz) AG concluded that this material weakness could result in misstatements of account balances or disclosures that would result in a material misstatement to the annual financial statements of Credit Suisse (Schweiz) AG that potentially would not be prevented or detected. As a consequence, the statutory auditor PricewaterhouseCoopers AG (PwC) has noted that Credit Suisse (Schweiz) AG did not design and maintain an effective risk assessment process to identify and analyze the risk of material misstatements in its financial statements within this system.

Notwithstanding the existence of this material weakness in internal control over financial reporting, Credit Suisse (Schweiz) AG confirms that its financial statements as at December 31, 2022 comply with Swiss law as reflected in PwC's report on those financial statements.

Credit Suisse Group's Board of Directors and Executive Board have worked continuously in recent years to improve the control environment surrounding financial reporting with increased investment and additional resources and are committed to maintaining a strong internal control environment and implementing measures designed to help ensure that the material weaknesses are remediated with the highest priority. Credit Suisse Group's Board of Directors and Executive Board are developing a remediation plan to address the material weakness referred to above, including strengthening the risk and control framework, and which will build on the significant attention that management has devoted to controls to date. The Board of Directors of Credit Suisse (Schweiz) AG is closely monitoring the implementation and effectiveness of the remediation.

Other than as described above, there were no changes in Credit Suisse (Schweiz) AG's internal control over financial reporting during the period covered by this report that have materially affected, or are reasonably likely to materially affect, the Credit Suisse (Schweiz) AG's internal controls over financial reporting.

Liquidity issues in the fourth quarter of 2022

During early fourth quarter of 2022, Credit Suisse began experiencing significantly higher withdrawals of cash deposits as well as non-renewal of maturing time deposits. However, as the quarter progressed, these outflows stabilized to much lower levels but had not yet reversed by year end. As is normal practice, the Group also limited its access to the capital markets in the period immediately preceding the strategy announcements the Group made on October 27, 2022. These developments also adversely impacted Credit Suisse (Schweiz) AG.

Outflows in assets under management in the fourth quarter of 2022

As disclosed for the Group, Credit Suisse began experiencing deposit and net asset outflows in early fourth quarter of 2022 at levels that substantially exceeded the rates incurred in the third

quarter of 2022. At the Group level, approximately two-thirds of these net asset outflows in the quarter were concentrated in October 2022. Credit Suisse (Schweiz) AG was affected by net asset outflows. Net asset outflows for the year represented approximately 2% of assets under management reported as of the end of 2021.

→ Refer to "Note 26 – Assets under management" for further information.

Russia's invasion of Ukraine

In response to Russia's invasion of Ukraine, many countries across the world imposed severe sanctions against Russia's financial system and on Russian government officials and business leaders, and these sanctions have been expanded several times. Credit Suisse (Schweiz) AG continues to assess the impact of the sanctions already imposed, and potential future escalations, on its exposures and client relationships. Credit Suisse (Schweiz) AG reduced Russia-related exposures in 2022 as the market and counterparty situation evolved. As of December 31, 2022, Credit Suisse (Schweiz) AG's net credit exposure to Russia, after specific allowances and provisions for credit losses and

valuation adjustments, was insignificant, compared to CHF 242 million as of December 31, 2021.

Supply chain finance fund matter

As previously reported, in early March 2021, the boards of four supply chain finance funds (SCFF) managed by certain Group subsidiaries decided to suspend redemptions and subscriptions of those funds to protect the interests of the funds' investors, to terminate the SCFF and to proceed to their liquidation. Credit Suisse (Schweiz) AG continues to analyze this matter, including with the assistance of external counsel and other experts. Certain clients have threatened litigation and, as this matter develops, Credit Suisse (Schweiz) AG may become subject to litigation, disputes or other actions. In 2022, the SCFF matter did not have a material impact on the financial results of Credit Suisse (Schweiz) AG.

Subsequent events

There were no subsequent events from the balance sheet date until March 14, 2023, the publishing date of these financial statements.

2 Accounting and valuation principles

Summary of significant accounting and valuation principles

Basis for accounting

The Credit Suisse (Schweiz) AG standalone financial statements are prepared in accordance with the accounting rules of the Swiss Federal Law on Banks and Savings Banks (Bank Law), the corresponding Implementing Ordinance (Banking Ordinance), the Swiss Financial Market Supervisory Authority's Accounting Ordinance (FINMA Accounting Ordinance) and FINMA circular 2020/1, "Accounting – banks" (Swiss GAAP statutory) as applicable for the preparation of reliable assessment statutory single-entity financial statements (*Statutarischer Einzelabschluss mit zuverlässiger Darstellung*). The financial year for Credit Suisse (Schweiz) AG ends on December 31.

Credit Suisse (Schweiz) AG is included in the scope of the published annual report of Credit Suisse Group AG and Credit Suisse AG, which includes a Group management report and consolidated financial statements prepared in accordance with accounting principles generally accepted in the US (US GAAP). Credit Suisse (Schweiz) AG has no listed shares outstanding. Accordingly, Credit Suisse (Schweiz) AG is exempt from providing certain disclosures in its standalone annual report, such as a management report, a statement of cash flows and certain notes to the financial statements.

Certain reclassifications were made to the prior year's financial statements to conform to the current year's presentation and had no impact on net profit/(loss) or total shareholders' equity.

Recording of transactions

Transactions are generally recognized on a trade date basis at the point in time when they become legally binding unless specific guidance is provided for settlement date accounting, such as for issuances of debt and structured notes.

Foreign currency translations

The functional currency of Credit Suisse (Schweiz) AG is Swiss francs (CHF). Transactions denominated in currencies other than the functional currency are recorded using the foreign exchange rates at the date of the transaction.

Receivables and payables denominated in foreign currency are translated to Swiss francs using spot rates as of the balance sheet date. Gains and losses from foreign exchange rate differences are recorded in the statement of income in net income/(loss) from trading activities and fair value option. Participations, tangible fixed assets and intangible assets denominated in foreign currency are translated to Swiss francs using the historical exchange rates.

The following table provides the foreign exchange rates applied for the preparation of the Credit Suisse (Schweiz) AG standalone financial statements.

Foreign exchange rates

end of	2022	2021
1 USD / 1 CHF	0.92	0.91
1 EUR / 1 CHF	0.99	1.03
1 GBP / 1 CHF	1.12	1.24
100 JPY / 1 CHF	0.70	0.79

Cash and other liquid assets

Cash and other liquid assets are recognized at their nominal value less any necessary allowance for credit losses.

Due from banks

Amounts due from banks, including interest due but not paid, are recognized at their nominal value less any necessary allowance for credit losses.

Securities lending and borrowing, repurchase and reverse repurchase agreements

Securities lending and borrowing as well as repurchase and reverse repurchase agreements are recorded at the nominal value of the cash amounts exchanged less any necessary allowance for credit losses.

Due from customers and mortgage loans

Amounts due from customers and mortgage loans, including interest due but not paid, are recognized at their nominal value less any necessary allowance for credit losses.

Allowance for credit losses and non-accrual financial assets

The current expected credit loss (CECL) requirements in accordance with US GAAP as allowed under the Swiss GAAP statutory accounting rules for banks apply to all financial assets and off-balance sheet exposures measured at amortized cost or nominal value less allowance for credit losses. The expected credit loss amounts are based on a forward-looking, lifetime CECL model by incorporating reasonable and supportable forecasts of future economic conditions available at the reporting date. The expected credit loss amounts are estimated over the contractual term of the financial assets, taking into account the effect of prepayments. This requires considerable judgment over how changes in macroeconomic factors (MEFs) as well as changes in forward-looking borrower-specific characteristics will affect the expected credit loss amounts.

Credit Suisse (Schweiz) AG measures expected credit losses of financial assets on a collective (pool) basis when similar risk characteristics exist. For financial assets which do not share similar risk characteristics, expected credit losses are evaluated on an individual basis. Expected credit loss amounts are probability-weighted estimates of potential credit losses based on historical frequency, current trends and conditions as well as forecasted MEFs, such as gross domestic product (GDP), unemployment rates and interest rates.

For financial assets that are performing at the reporting date, the allowance for credit losses is generally measured using a probability of default (PD)/loss given default (LGD) approach under which PD, LGD and exposure at default (EAD) are estimated. For financial assets that are credit-impaired at the reporting date, Credit Suisse (Schweiz) AG generally applies a discounted cash flow approach to determine the difference between the gross carrying amount and the present value of estimated future cash flows.

An allowance for credit losses is deducted from the amortized cost base or nominal value, respectively, of the financial asset. Changes in the allowance for credit losses are recorded in the statement of income in (increase)/release of allowance for default risks and losses from interest activities, or, if related to provisions for off-balance sheet credit exposures, in increase/(release) of provisions and other valuation adjustments, and losses.

Accrued interest from financial assets is recognized in the balance sheet in accrued income and prepaid expenses. Current expected credit losses are calculated on accrued interest receivables and any uncollectible accrued interest receivables are written off by reversing the related interest income.

Write-off of a financial asset occurs when it is considered certain that there is no possibility of recovering the outstanding principal. If the amount of loss on write-off is greater than the accumulated allowance for credit losses, the difference results in an additional credit loss. The additional credit loss is first recognized as an addition to the allowance; the allowance is then applied against the gross carrying amount. Any repossessed collateral is initially measured at fair value. The subsequent measurement depends on the nature of the collateral.

Expected recoveries on financial assets previously written off have to be reflected in the allowance for credit losses; for this purpose, the amount of expected recoveries cannot exceed the aggregate amounts previously written off. Accordingly, expected recoveries from financial assets previously written off may result in an overall negative allowance for credit loss balance.

Credit Suisse (Schweiz) AG's loan portfolios are reflected in the balance sheet in due from customers, due from banks and mortgage loans. A loan is classified as non-performing and thus considered credit impaired no later than when the contractual payments of principal and/or interest are more than 90 days past due. However, management may determine that a loan should be classified as non-performing notwithstanding that contractual payments of principal and/or interest are less than 90 days past due. Credit Suisse (Schweiz) AG continues to add accrued interest receivable to the loan's unpaid principal balance for collection purposes; however, a credit provision is recorded, resulting in no interest income recognition. A loan can be further downgraded to non-interest-earning when the collection of interest is considered so doubtful that further accrual of interest is deemed inappropriate. Generally, non-performing loans and non-interest-earning loans may be restored to performing status only when delinquent principal and interest are brought up to date in accordance with the terms of the loan agreement and when certain performance criteria are met. Interest collected on non-performing loans and non-interest-earning loans is accounted for using the cash basis or the cost recovery method or a combination of both.

Trading assets and liabilities

In order to qualify as trading activity, positions (assets and liabilities) have to be actively managed with the objective of realizing gains from fluctuations in market prices, which includes an

ongoing willingness to increase, decrease, close or hedge risk positions. The designation as trading position has to be made, and documented accordingly, upon conclusion of the transaction.

Trading securities are carried at fair value with changes in fair value recorded in the statement of income in net income/(loss) from trading activities and fair value option. The fair value is determined using either the price set on a price-efficient and liquid market or a price calculated using a valuation model.

Interest and dividend income resulting from trading positions is recorded in gross income from interest activities. Refinancing costs are not charged to net income from trading activities and fair value option.

Reclassifications between trading assets, financial investments and participations are allowed. Reclassifications between financial investments and participations are recorded at the carrying value. Reclassifications between trading assets and financial investments or participations, respectively, are recorded at the fair value valid at the time when the decision to reclassify is made. Resulting gains or losses are recognized applying the same accounting principles as for the recognition of results from the disposal of such assets.

Derivative financial instruments and hedge accounting

Derivative financial instruments consist of trading and hedging instruments.

Positive and negative replacement values of outstanding derivative financial instruments arising from transactions for Credit Suisse (Schweiz) AG's own account are disclosed as separate line items in the balance sheet, with related fair value changes recorded in net income from trading activities and fair value option.

Replacement values of derivative financial instruments arising from transactions for the account of customers are recognized only if a risk exists that a customer or other counterparty (e.g., exchange, exchange member, issuer of the instrument or broker) of a transaction is no longer able to meet its obligations, resulting in an exposure to loss for Credit Suisse (Schweiz) AG during the remaining term of the contract.

Hedge accounting is determined, tested for effectiveness and disclosed in accordance with US GAAP as allowed under the Swiss GAAP statutory accounting rules for banks. Derivative financial instruments used as hedging instruments in hedging relationships are always recorded at fair value. The effectiveness of hedging relationships is assessed both prospectively and retrospectively. The prospective assessment is performed both at the inception of a hedging relationship and on an ongoing basis, and requires the justification that the relationship will be highly effective over future periods. The retrospective assessment is performed on an ongoing basis and requires the confirmation whether or not the hedging relationship has actually been effective.

For fair value hedges, gains and losses resulting from the valuation of the hedging instruments are recorded in the same statement of income line items in which gains and losses from the hedged items are recognized. Valuation impacts resulting from fair valuing the risk being hedged of the hedged items are not recorded as an adjustment to the carrying value of the hedged items but are recorded in the compensation account included in other assets or other liabilities.

For cash flow hedges, gains and losses resulting from the valuation of the hedging instruments are deferred and recorded in the compensation account included in other assets or other liabilities. The deferred amounts are released and recorded in the statement of income in the same period when the cash flows from the hedged transactions or hedged items are recognized in earnings.

Other financial instruments held at fair value and liabilities from other financial instruments held at fair value

Financial instruments which are not part of the trading portfolio may be measured at fair value and classified in other financial instruments held at fair value or liabilities from other financial instruments held at fair value if all of the following conditions are met:

- The financial instruments are valued at fair value and are subject to risk management corresponding to that for trading positions including a documented risk management and investment strategy which ensures appropriate recognition, measurement and limitation of the miscellaneous risks.
- An economic hedging relationship between the financial instruments on the asset side and the financial instruments on the liability side exists and gains and losses from the fair valuation of these financial instruments are largely offset (avoidance of an accounting mismatch).
- Impacts of changes in own credit spreads on the fair value of an issued debt instrument following initial recognition cannot be reflected in the statement of income. Impacts of changes in own credit spreads are recognized in the compensation account.

Changes in fair value are recorded in net income from trading activities and fair value option.

Financial investments

Equity securities which do not qualify as trading securities are included in financial investments and measured at the lower of cost or market value (LOCOM). Valuation adjustments are recorded in other ordinary income or other ordinary expenses.

Debt securities which do not qualify as trading securities are included in financial investments and further classified into debt securities held-to-maturity, which Credit Suisse (Schweiz) AG intends to hold until maturity, and debt securities available-for-sale, which Credit Suisse (Schweiz) AG does not intend to hold until maturity.

Debt securities held-to-maturity are measured at amortized cost less allowance for credit losses. An allowance for credit losses related to default risk is reported in the statement of income

in increase/(release) of allowance for default risks and losses from interest activities. If debt securities held-to-maturity are sold or repaid before original maturity, the interest component of any realized gains or losses is deferred and amortized over the remaining original life of the debt security.

Debt securities available-for-sale are measured at the lower of amortized cost or market value (LOACOM). Valuation adjustments for credit- and market-related adjustments are recorded in other ordinary income or other ordinary expenses.

Participations

Equity securities in a company which are owned by Credit Suisse (Schweiz) AG qualify as a participation if these securities are held for the purpose of permanent investment, irrespective of the percentage of voting shares held, or, if these equity securities are in a banking and financial market infrastructure enterprise, in particular participations in joint organizations.

Participations are measured at acquisition cost less any impairments. Goodwill and intangible assets related to the acquisition of a participation are part of the participation's historical cost under Swiss GAAP statutory and not separately identified and recorded. Impairment is assessed individually for each participation at each balance sheet date or at any point in time when facts and circumstances would indicate that an event has occurred which triggers an impairment review. An impairment is recorded if the carrying value exceeds the fair value of a participation. If the fair value of a participation recovers significantly and is considered sustainable, a prior period impairment can be reversed up to the historical cost value of the participation.

Other assets and other liabilities

Other assets and other liabilities are generally recorded at cost or nominal value. Other assets and other liabilities include the net balance of the compensation accounts. The compensation account assets and liabilities include changes in the book values of assets and liabilities that are not recognized in the statement of income of a reporting period. In particular, the compensation accounts are used to record the hedge effectiveness, impacts from changes in own credit spreads and deferred gains or losses from the sale of debt securities held-to-maturity. The gross amounts of compensation account assets and liabilities are offset and reported net on the balance sheet either in other assets or in other liabilities.

Due to banks

Amounts due to banks are recognized at their nominal value.

Customer deposits

Amounts due in respect of customer deposits are recognized at their nominal value.

Bonds and mortgage-backed bonds

Bonds and mortgage-backed bonds are carried at amortized cost. Debt issuance costs are recorded in accrued income and prepaid expenses.

Provisions

Provisions are recorded to cover specific risks related to a past event prior to the balance sheet date. Further, provisions for probable obligations and for expected credit losses on off-balance sheet credit exposures are recorded. Provisions represent a probable obligation for which the amount and/or due date are uncertain but can be reasonably estimated. Where the time factor has a material impact, the amount of the provision is discounted.

Provisions which are no longer economically necessary and which are not used in the same reporting period to cover probable obligations of the same nature are released to income:

- tax provisions through line item taxes;
- provisions for pension benefit obligations through personnel expenses; and
- provisions for current and expected credit losses related to off-balance sheet credit exposures and other provisions including litigation provisions through line item increase/(release) of provisions and other value adjustments, and losses.

Commission income

Commission income is recognized when arrangements exist, services have been rendered, the revenue is fixed or determinable and collectability is reasonably assured. As applicable, commissions and fees are recognized ratably over the service period and either accrued or deferred in the balance sheet in the line items accrued income and prepaid expenses and accrued expenses and deferred income, respectively.

Commission income and commission expense are generally recorded on a gross basis in the statement of income.

Income tax accounting

Income taxes are based on the tax laws of each tax jurisdiction and are expensed in the period in which the taxable profits are made.

Tax provisions are recognized in the statement of income in the line item taxes and included in provisions on the balance sheet.

In line with the accounting rules for single-entity statutory financial statements, deferred tax assets on net operating losses are not recognized. Deferred taxation items for temporary differences between the carrying value of an asset or a liability under Swiss GAAP statutory and the respective value for tax reporting, i.e., its tax base, are also not recognized.

Extraordinary income and expense

The recognition of extraordinary income or expense is limited to transactions which are non-recurring and non-operating, such as the disposal of fixed assets or participations, the reversal of prior-period impairment on participations, or income and expense related to other reporting periods if they account for the correction of errors with regard to non-operating transactions of prior periods.

Contingent liabilities and irrevocable commitments

Contingent liabilities are recorded as off-balance sheet transactions at their maximum potential payment amounts. Irrevocable commitments are recorded as off-balance sheet transactions at their nominal values, except for irrevocable loan commitments that are cancellable with a notice period of six weeks or less. As necessary, related provisions are recorded on the balance sheet in line item provisions.

For undrawn irrevocable loan commitments, the expected credit loss amount is calculated based on the difference between the contractual cash flows that are due to Credit Suisse (Schweiz) AG if the commitment is drawn and the cash flows that Credit Suisse (Schweiz) AG expects to receive, in order to estimate the provision for expected credit losses. For credit guarantees, expected credit losses are recognized for the contingency of the credit guarantee. Provisions for off-balance sheet credit exposures are recognized on the balance sheet in provisions.

Capital adequacy disclosures

Capital adequacy disclosures for the Group and Credit Suisse (Schweiz) AG are presented in the publications "Pillar 3 and regulatory disclosures – Credit Suisse Group AG" and "Regulatory disclosures – Subsidiaries", respectively.

→ Refer to credit-suisse.com/regulatorydisclosures for additional information.

Prior period information

For 2021, the balance of amounts receivable from members of governing bodies has been revised from CHF 102 million to CHF 86 million and the balance of amounts payable to members of governing bodies has been revised from CHF 56 million to CHF 75 million.

→ Refer to "Note 23 – Amounts receivable from and amounts payable to related parties" for further information.

3 Risk management, derivatives and hedging activities

Risk management

Risk governance

Risk management of Credit Suisse (Schweiz) AG is aligned to the overall risk management governance of the Group. Credit Suisse (Schweiz) AG's risk governance includes a committee structure and a comprehensive set of corporate policies which are developed, reviewed and approved by the Board of Directors (Board), the Executive Board, their respective committees, the Chief Risk Officer (CRO), the Chief Financial Officer (CFO) and the Chief Compliance Officer (CCO), in accordance with their respective responsibilities and levels of authority.

The risk governance framework of Credit Suisse (Schweiz) AG is based on a "three lines of defense" governance model, where each line has a specific role with defined responsibilities and works in close collaboration to identify, assess and mitigate risks.

The first line of defense represents the business area or function that allows the risk to enter Credit Suisse (Schweiz) AG from clients, employees or other third parties or events and is responsible for identifying, measuring, managing and reporting risks on a front-to-back basis in line with the Board's risk appetite. The first line of defense is fully accountable for managing risks inherent in its activities.

The second line of defense consists of independent risk management, compliance and control functions which are responsible for establishing a risk management framework and associated control standards, and providing independent challenge to the activities, processes and controls carried out by the first line of defense. In this context, the CRO function (Risk), for example, is responsible for articulating and designing the risk appetite

framework across Credit Suisse (Schweiz) AG. The second line of defense can perform and complement the responsibility of identification, measurement, management and reporting of risks, while the first line of defense retains the overall accountability for risk management related to its activities. Independent risk management in the second line of defense is not limited to the Risk function.

The third line of defense is the Internal Audit function, which monitors the effectiveness of controls across various functions and operations, including risk management, compliance and governance practices.

Board of Directors

The Board is responsible for the overall strategic direction, supervision and control of Credit Suisse (Schweiz) AG, and for defining its overall risk tolerance. In particular, the Board approves the risk management framework and sets overall risk appetite in consultation with its Risk Committee, among other responsibilities and authorities defined in the Organizational Guidelines and Regulations (OGR).

The Risk Committee is responsible for assisting the Board in fulfilling its risk management responsibilities. These responsibilities include the oversight of risk management and risk practices, the promotion of a sound risk culture with clear accountability and ownership, the review of key risks and resources and the assessment of the effectiveness and efficiency of Credit Suisse (Schweiz) AG.

The Audit Committee is responsible for assisting the Board in fulfilling its oversight duties by monitoring management's approach with respect to financial reporting, accounting as well as legal and regulatory compliance. Additionally, the Audit Committee monitors

the qualifications, independence and performance of external auditors and Internal Audit. Jointly with the Risk Committee, it reviews and assesses the internal control environment.

Executive Board

The Executive Board is responsible for developing and implementing the strategic business plans of Credit Suisse (Schweiz) AG, subject to approval by the Board. It further reviews and coordinates significant initiatives and approves the bank-wide policies. The CRO of Credit Suisse (Schweiz) AG is a member of the Executive Board and represents the risk management function with a primary reporting line to the Group Chief Risk Officer (Group CRO) and an additional reporting line to the Chief Executive Officer (CEO) of Credit Suisse (Schweiz) AG.

Executive Board and other risk governance committees

The Capital Allocation & Risk Management Committee (CARMC) of Credit Suisse (Schweiz) AG is responsible for overseeing and directing the risk profile, recommending risk limits to the Risk Committee and the Board, establishing and allocating risk appetite among the various businesses, reviewing new significant business strategies or changes in business strategies, including business migrations, making risk-related decisions on escalations, and for applying measures, methodologies and tools to monitor and manage the risk portfolio. CARMC of Credit Suisse (Schweiz) AG operates in two committees: the Risk Management Committee (RMC) and the Asset Liability Management Committee (ALMC). The RMC is the main governance and decision-making body with respect to market, liquidity, credit and position risk-related matters as well as with respect to non-financial risks (e.g., operational risk, technology risk, cyber risk, compliance risk, regulatory risk, legal risk and conduct risk) and internal control matters. The RMC is responsible for the supervision and control of the risk profile, its future development and its adequacy with the risk strategy of Credit Suisse (Schweiz) AG. The RMC is also responsible for assessing the allocation of risk capital and making recommendations to the Board as well as establishing and allocating risk limits. The ALMC is responsible for capital, liquidity and funding-related matters, including interest rate risk management, foreign exchange risk and balance sheet development within defined limits.

The Risk Processes & Standards Committee (RPSC) reviews major risk management processes, issues general instructions, standards and processes concerning risk management, approves material changes in market (including IRRBB), credit, liquidity, reputation and non-financial risk management standards, policies and related methodologies, and approves the standards of Credit Suisse (Schweiz) AG's internal models used for calculating regulatory capital requirements.

The governing bodies responsible for the oversight and active discussion of reputational and sustainability risks also at a single name client level are the Reputational Risk Committee (RRC) and its related committee, the Divisional Client Risk Committee (DCRC). The RRC is responsible for robust governance and comprehensive risk mitigation and oversight relating to reputational risks and sustainability issues. It also ensures adherence to Credit

Suisse (Schweiz) AG's reputational and sustainability policies and oversees their implementation. The DCRC decides on individual, significant cases (client relationships, actions or transactions) that are escalated to the DCRC based on the established escalation criteria.

Risk appetite framework

Credit Suisse (Schweiz) AG maintains an integrated and cohesive risk appetite framework, which is governed by a policy and provides a robust foundation for risk appetite setting and management. The framework also encompasses the processes and methodologies for calibrating and allocating the appropriate level of risk appetite required to constrain the overall risk profile of Credit Suisse (Schweiz) AG. The Credit Suisse (Schweiz) AG risk appetite framework is aligned to and reflected as a distinct part of the Group risk appetite framework, which is governed by an overarching global policy that encompasses the suite of specific policies, processes and systems with which the risk constraints are calibrated and the risk profile is managed.

Credit Suisse (Schweiz) AG's risk appetite is derived from strategic risk objectives (SROs). The SROs are reviewed and approved by the Board on at least an annual basis, to ensure they remain current, adequate and aligned with the Group's SROs. For 2023, the following SROs have been defined for Credit Suisse (Schweiz) AG:

- promoting stability of earnings to support performance in line with financial objectives;
- ensuring sound management of funding and liquidity risk in normal and stressed conditions;
- maintaining capital adequacy under both normal and stressed conditions;
- maintaining the integrity of Credit Suisse (Schweiz) AG's business and operations;
- controlling concentrations within position risk or revenues which may pose a material risk to the bank;
- managing environmental, social and governance risks as well as impacts related to the provision of financial services in line with the bank's sustainability principles and commitments; and
- managing intercompany risks.

The risk appetite of Credit Suisse (Schweiz) AG is determined in partnership with the strategic and financial planning process. Scenario-based stress testing of financial, liquidity and capital plans is an essential element in the risk appetite calibration process through which the strategic risk objectives, financial resources and business plans are aligned.

A key element of the framework is a detailed risk appetite statement that is embedded across the organization through a suite of different types of risk constraints as part of Credit Suisse (Schweiz) AG's efforts to ensure it operates within the boundaries defined by the Board. The risk constraints may be both quantitative and qualitative, and restrict the maximum amount of a specific risk that Credit Suisse (Schweiz) AG is allowed to take either at a portfolio, product or single client level. Risk constraints are

classified according to type and authority, with the principal constraint types consisting of limits, flags and tolerances.

The risk appetite is reviewed and approved on at least an annual basis through a number of internal governance forums, including joint approval by both the CRO and the CFO, the Risk Appetite Committee of Credit Suisse (Schweiz) AG, the RMC of Credit Suisse (Schweiz) AG, the Board's Risk Committee and subsequently by the Board of Credit Suisse (Schweiz) AG. Ad hoc risk appetite reviews may be triggered by changes in either the external environment (e.g., regulatory landscape and macroeconomic or business developments) or by internal factors (e.g., strategic shifts and material loss events).

Risk coverage and management

Credit Suisse (Schweiz) AG uses a wide range of risk management practices to address the variety of risks that arise from its business activities. Policies, processes, standards, risk assessment and measurement methodologies, risk constraints and risk monitoring and reporting are key components of Credit Suisse (Schweiz) AG's risk management practices. The risk management practices of Credit Suisse (Schweiz) AG complement each other in the analysis of potential loss, support the identification of interdependencies and interactions of risks across the organization and provide a comprehensive overview of its exposures. Credit Suisse (Schweiz) AG regularly reviews and updates its risk management practices to promote consistency with its business activities and relevance to its business and financial strategies. The main risk types of Credit Suisse (Schweiz) AG include the following:

- Capital risk;
- Credit risk;
- Market risk (including non-traded market risk);
- Liquidity and intercompany/funding risk;
- Non-financial risk (e.g., operational risk, technology risk, cyber risk, compliance risk, regulatory risk, legal risk and conduct risk);
- Model risk;
- Reputational risk;
- Climate-related risks; and
- Business risk.

Capital risk

Capital risk is the risk that Credit Suisse (Schweiz) AG does not have adequate capital to support its activities and maintain the minimum capital requirements.

Capital risk results from Credit Suisse (Schweiz) AG's risk exposures, available capital resources, regulatory requirements and accounting standards.

Credit Suisse (Schweiz) AG maintains a robust and comprehensive framework for assessing capital adequacy, defining internal capital targets and ensuring that these capital targets are consistent with Credit Suisse (Schweiz) AG's overall risk profile and the current operating environment.

Tools used by Credit Suisse (Schweiz) AG to evaluate and manage capital risk include for example stress testing and economic risk capital. The capital management framework is designed to ensure that Credit Suisse (Schweiz) AG meets all regulatory capital requirements for Credit Suisse (Schweiz) AG and its regulated subsidiaries.

Stress testing framework

Stress testing (or scenario analysis) represents a risk management approach that assesses financial impacts from a potential historical or hypothetical scenario.

Stress testing is a fundamental element of Credit Suisse (Schweiz) AG's risk management framework included in overall risk management to ensure that Credit Suisse (Schweiz) AG's financial position and risk profile provide sufficient resilience to withstand the impact of severe adverse macroeconomic conditions. Stress scenario analysis is also used to support Credit Suisse (Schweiz) AG in assessing capital adequacy in stress. Additionally, specific stress testing constraints are defined in the risk appetite statement, in particular for post-stress capital ratios and position stress loss amounts. These constraints are monitored on periodic basis.

Credit risk

Credit risk is the risk of financial loss arising as a result of a borrower or counterparty failing to meet its financial obligations or as a result of deterioration in the credit quality of the borrower or counterparty.

The majority of the credit risk of Credit Suisse (Schweiz) AG is concentrated in the Swiss retail and private banking, corporate and institutional businesses. Credit risk arises from lending products, irrevocable loan commitments, credit guarantees and letters of credit, and results from counterparty exposure arising from mortgages, loans, other financing transactions and, to a limited extent for Credit Suisse (Schweiz) AG, also from derivatives and foreign exchange transactions.

Credit Suisse (Schweiz) AG uses a credit risk management framework which provides for the consistent evaluation, measurement and management of credit risk across Credit Suisse (Schweiz) AG. Assessment of credit risk exposures for internal risk estimates and risk-weighted assets are calculated based on PD, LGD and EAD models. The credit risk framework incorporates the following core elements:

- counterparty and transaction assessments: application of internal credit ratings (using PD), assignment of LGD and EAD values in relation to counterparties and transactions;
- credit limits: establishment of credit limits, including limits based on notional exposure, potential future exposure and stress exposure, subject to approval by delegated authority holders, to serve as primary risk controls on exposures and to prevent undue risk concentrations;
- credit monitoring, impairments and provisions: processes to support the ongoing monitoring and management of credit exposures, supporting the early identification of deterioration and any subsequent impact; and

- risk mitigation: active management of credit exposures through the use of cash sales, participations, collateral, guarantees, insurance or hedging instruments.

In addition to traditional credit exposure measurement, monitoring and management using current and potential future exposure metrics, Credit Risk performs counterparty and portfolio credit risk assessments of the impact of various internal stress test scenarios. Credit Risk assesses the impact to credit risk exposures arising from market movements in accordance with the scenario narrative, which can further support the identification of concentration or tail risks. Its scenario suite includes historical scenarios as well as forward-looking scenarios which are used across the CRO function.

Counterparty and transaction assessments

Credit Suisse (Schweiz) AG evaluates and assesses counterparties and clients to whom it has credit exposures. For the majority of counterparties and clients, Credit Suisse (Schweiz) AG uses internally developed statistical rating models to determine internal credit ratings, which are intended to reflect the risk of default of each counterparty.

→ Refer to "Credit quality information" in Note 19 – Expected credit losses and credit quality for further information on counterparty transaction assessments.

Credit limits

Credit exposures are managed at the counterparty and ultimate parent level in accordance with credit limits which apply in relation to notional exposure, potential future exposure and stress exposure where appropriate. Credit limits are established to constrain the lending business where exposure is typically related to committed loan amounts, and similarly in relation to the trading business where exposure is typically subject to model-based estimation of future exposure amounts. Credit limits to counterparties and groups of connected companies are subject to formal approval under delegated authority, and, where significant in terms of size or risk profile, subject to further escalation to the Group Chief Credit Officer or the CRO.

In addition to counterparty and ultimate parent exposures, credit limits and flags are also applied at the portfolio level to monitor and manage risk concentrations such as to specific industries, countries or products. In addition, credit risk concentration is regularly supervised by credit and risk management committees. Breaches of credit limits and other risk constraints, including stress scenario impacts, are monitored on an ongoing basis with formal escalation procedures in place.

Credit monitoring, impairments and provisions

A credit quality monitoring process is performed to provide for early identification of possible changes in the creditworthiness of clients, and includes regular asset and collateral quality reviews, business and financial statement analysis, and relevant economic and industry studies. Credit Risk maintains regularly updated watch lists and holds review meetings to re-assess counterparties that could be subject to adverse changes in creditworthiness. The

review of the credit quality of clients and counterparties does not depend on the accounting treatment of the asset or commitment.

In the event that a deterioration in creditworthiness is likely to result in a default, credit exposures are transferred to the recovery management function within Credit Risk. The determination of any allowance for credit losses in relation to such exposures is based on an assessment of the exposure profile and expectations for recovery. The recoverability of loans in recovery management is regularly reviewed. The frequency of reviews depends on the individual risk profile of the respective positions.

Credit Suisse (Schweiz) AG has an impairment process for loans valued at amortized cost which are specifically classified as potential problem loans, non-performing loans, non-interest-earning loans or restructured loans. Credit Suisse (Schweiz) AG maintains specific allowances for credit losses, which Credit Suisse (Schweiz) AG considers to be a reasonable estimate of losses identified in the existing credit portfolio, and provides for credit losses based on a regular and detailed analysis of all counterparties, taking collateral value into consideration, where applicable. If uncertainty exists as to the repayment of either principal or interest, a specific allowance for credit losses is either created or adjusted accordingly. The specific allowance for credit losses is regularly revalued by the recovery management function depending on the risk profile of the borrower or credit-relevant events.

→ Refer to "Estimating expected credit losses" in Note 19 – Expected credit losses and credit quality for further information on expected credit losses under the CECL accounting guidance.

Risk mitigation

Drawn and undrawn credit exposures are managed by taking financial and non-financial collateral supported by enforceable legal documentation, as well as by utilizing credit hedging techniques. Financial collateral in the form of cash, marketable securities (e.g., equities, bonds or funds) and guarantees serves to mitigate the inherent risk of credit loss and to improve recoveries in the event of a default. Financial collateral received in the form of securities is subject to controls on eligibility and is supported by frequent market valuation depending on the asset class to ensure exposures remain adequately collateralized. Depending on the quality of the collateral, appropriate haircuts are applied for risk management purposes. Collateral monitoring, management and margining are applied to credit exposures resulting from both on balance sheet financing of securities and synthetic financing of positions for clients through derivative contracts.

For the mortgage lending portfolio in the private banking, corporate and institutional businesses, real estate property is valued at the time of credit approval and periodically thereafter, according to internal policies and controls of Credit Suisse (Schweiz) AG, depending on the type of loan (e.g., residential or commercial loan), characteristics of the property, current developments in the relevant real estate market and the current level of credit exposure to the borrower (loan-to-value ratio). If the credit exposure to a borrower has changed significantly, in volatile markets or in times of increasing general market risk, collateral values may be

appraised more frequently. Management judgment is applied in assessing whether markets are volatile or general market risk has increased to a degree that warrants a more frequent update of collateral values. Movements in monitored risk metrics that are statistically different compared to historical experience are considered in addition to analysis of externally-provided forecasts, scenario techniques and macroeconomic research.

Other non-financial collateral such as tangible assets (e.g., ships or aircraft), inventories and commodities are valued at the time of credit approval and periodically thereafter depending on the type of credit exposure and collateral coverage ratio.

In addition to collateral, Credit Suisse (Schweiz) AG also utilizes credit hedging in the form of protection provided by single-name and index credit default swaps as well as structured hedging and insurance products. Credit hedging is used to mitigate risks arising from the loan portfolio, loan underwriting exposures and counterparty credit risk. Hedging is intended to reduce the risk of loss from a specific counterparty default or broader downturn in markets that impacts the overall credit risk portfolio. Credit hedging contracts are typically bilateral or centrally cleared derivative transactions and are subject to collateralized trading arrangements. Credit Suisse (Schweiz) AG evaluates hedging risk mitigation so that basis or tenor risk can be appropriately identified and managed.

In addition to collateral and hedging strategies, Credit Suisse (Schweiz) AG also actively manages its loan portfolio and may sell or sub-participate positions in the loan portfolio as a further form of risk mitigation.

Market risk

Market risk is the risk of financial loss arising from movements in market risk factors. The movements in market risk factors that generate financial losses are considered to be adverse changes in interest rates, credit spreads, foreign exchange rates, equity and commodity prices and other factors such as market volatility and the correlation of market prices across asset classes. A typical transaction or position in financial instruments may be exposed to a number of different market risk factors. Market risks of Credit Suisse (Schweiz) AG arise from both trading and non-trading activities.

Traded market risk primarily relates to trading activities of Credit Suisse (Schweiz) AG to support and provide market access to its Swiss clients. Trading book activities of Credit Suisse (Schweiz) AG carry no significant market risk. In line with the requirements of its banking license, Credit Suisse (Schweiz) AG hedges its market risk related to trading activities with other Group entities or external counterparties.

Non-traded market risk primarily relates to asset and liability mismatch exposures in the banking book. The bank's businesses and Treasury have non-traded portfolios that carry market risks, mainly related to changes in interest rates, but also to changes in foreign exchange rates. Interest rate risks are assumed through lending and deposit-taking as well as money market and funding

activities. Non-maturing products, such as savings accounts, have no contractual maturity date or direct market-linked interest rate and are risk-managed on a pooled basis using replication portfolios on behalf of the business divisions. Replication portfolios transform non-maturing products into a series of fixed-term products that approximate the re-pricing and volume behavior of the pooled client transactions.

Credit Suisse (Schweiz) AG uses market risk measurement and management methods capable of calculating comparable exposures across its many activities and employs focused tools that can model specific characteristics of certain instruments or portfolios. The tools are used for internal market risk management, internal market risk reporting and external disclosure purposes. Credit Suisse (Schweiz) AG's principal market risk measures for traded market risk are value-at-risk (VaR), scenario analysis, as included in the stress testing framework, and sensitivity analysis. These measures complement each other in the bank's market risk assessment and are used to measure traded market risk at the bank level.

Credit Suisse (Schweiz) AG measures risk from non-traded portfolios mainly by estimating the impact of changes in interest rates both in terms of risk to earnings as well as risk to the economic value of the bank's asset and liability position.

Liquidity and funding risk

Liquidity and funding risk is the risk that Credit Suisse (Schweiz) AG, although solvent, either does not have sufficient financial resources to enable it to meet its obligations as they fall due, or can secure such resources only at excessive cost. The liquidity and funding profile of Credit Suisse (Schweiz) AG reflects its strategy and risk appetite and is driven by business activity levels and the overall market and operating environment. The liquidity and funding strategy is approved by the ALMC and overseen by the Board. The implementation and execution of the funding and liquidity strategy is managed within Credit Suisse (Schweiz) AG's CFO function (Finance) by Treasury and the global liquidity group. The global liquidity group centralizes control of liability and collateral management with the aim of optimizing liquidity sourcing, funding costs and the high-quality liquid assets (HQLA) portfolio on behalf of Treasury. Treasury ensures adherence to the funding policies and the global liquidity group is focused on the efficient coordination of the short-term unsecured and secured funding desks. This approach enhances the ability of Credit Suisse (Schweiz) AG to manage potential liquidity and funding risks and to promptly adjust its liquidity and funding levels to meet potential stress situations.

The RMC and the Board's Risk Committee of Credit Suisse (Schweiz) AG define at least annually a liquidity and funding risk appetite framework, which ensures that the liquidity buffer and funding flows of Credit Suisse (Schweiz) AG are sized and managed in order to comply with all liquidity regulatory requirements and in addition to withstand a series of defined market- and liquidity-specific stress situations. The liquidity and funding profile of Credit Suisse (Schweiz) AG is regularly reported to the

ALMC, the RMC and the Board, including a set of risk metrics and parameters for the balance sheet and funding usage of its businesses.

Non-financial risk

Non-financial risk is the risk of an adverse direct or indirect impact originating from sources outside the financial markets, including but not limited to operational risk, technology risk, cyber risk, compliance risk, regulatory risk, legal risk and conduct risk. Non-financial risk is inherent in most aspects of Credit Suisse (Schweiz) AG's business, including the systems and processes that support its activities. It comprises a large number of disparate risks that can manifest in a variety of ways. Examples include the risk of damage to physical assets, business disruption, failures relating to data integrity and trade processing, cyber attacks, internal or external fraudulent or unauthorized transactions, inappropriate cross-border activities, money laundering, improper handling of confidential information, conflicts of interest, improper gifts and entertainment and failure in duties to clients. Non-financial risk can arise from a wide variety of internal and external forces, including human error, inappropriate conduct, failures in systems, processes and controls, pandemic, deliberate attack or natural and man-made disasters. Outsourcing and external third parties may also create risks around maintaining business processes, system stability, data loss, data management, reputation and regulatory compliance.

Each business area and function within Credit Suisse (Schweiz) AG is responsible for its non-financial risks and the provision of adequate resources and procedures for the management of those risks. They are supported by the designated second line of defense functions responsible for independent risk and compliance oversight, methodologies, tools and reporting within their areas as well as working with management on non-financial risk issues that arise. Relevant first and second line of defense control functions meet regularly to discuss risk issues and identify required actions to mitigate risks.

The non-financial risk function oversees the established non-financial risk framework (NFRF), providing a consistent and unified approach to evaluating and monitoring all relevant non-financial risks. Non-financial risk appetites are established and monitored under the bank-wide risk appetite framework, aligned with the NFRF, which sets common minimum standards across the bank for non-financial risk and control processes and review and challenge activities. Risk and control assessments are in place and consist of the risk and control self-assessment, compliance risk assessment and legal risk assessment. Key non-financial risks are identified annually and represent the most significant risks requiring senior management attention. Where appropriate, remediation plans are put in place with ownership by senior management and ongoing Executive Board level oversight.

Technology risk is the risk that technology-related failures, such as service outages or information security incidents, may disrupt business. Technology risk is inherent not only in information technology (IT) assets of Credit Suisse (Schweiz) AG, but also in the people

and processes that interact with them including through dependency on third-party suppliers and the worldwide telecommunications infrastructure. Credit Suisse (Schweiz) AG seeks to ensure that the data used to support key business processes and reporting is secure, complete, accurate, available, timely and meets appropriate quality and integrity standards. Credit Suisse (Schweiz) AG requires its critical IT systems to be identified, secure, resilient and available and support ongoing operations, decision-making, communications and reporting. Credit Suisse (Schweiz) AG's systems must also have the capability, capacity, scalability and adaptability to meet current and future business objectives, the needs of customers and regulatory and legal expectations.

Cyber risk, which is part of technology risk, is the risk that Credit Suisse (Schweiz) AG will be compromised as a result of cyber attacks, security breaches, unauthorized access, loss or destruction of data, unavailability of service, malware or other events that could have an adverse security or resilience impact.

Activities to manage non-financial risk capital include scenario analysis and non-financial risk regulatory capital measurement. In certain instances, where appropriate, Credit Suisse (Schweiz) AG transfers the risk of potential losses from non-financial risks to third-party insurance companies.

Credit Suisse (Schweiz) AG uses internally validated and approved models under the advanced measurement approach (AMA) to calculate its regulatory capital requirements for non-financial risks (also referred to as "operational risk capital").

Model risk

Model risk is the risk of adverse consequences from decisions made based on model results that may be incorrect, misinterpreted or used inappropriately. All models and qualitative estimation approaches are imperfect approximations and assumptions that are subject to varying degrees of uncertainty in their output depending on, among other factors, the model's complexity and its intended application. As a result, modeling and estimation errors may result in inappropriate business decisions, financial loss, regulatory and reputational risk and incorrect or inadequate capital reporting. Model errors, intrinsic uncertainty and inappropriate use are the primary contributors to aggregate bank-wide model risk. This framework is owned by the Model Risk Management function, which is structured as a second line of defense independent from the first line of defense, i.e., the model users, developers and supervisors who own, develop, implement and maintain models.

Through the global model risk management and governance framework, Credit Suisse (Schweiz) AG seeks to identify, measure and mitigate significant risks arising from the use of models embedded within its global model ecosystem. Model risks can be managed through a well-designed and robust model risk management framework, encompassing model governance policies and procedures, model validation best practices and actionable model risk reporting.

The Model Risk Management function is responsible for overseeing model risk at the bank and ensuring compliance with model governance policies and standards. The Model Risk Management function reviews models, reports model limitations to key stakeholders, tracks remediation plans for validation findings and reports on model risk tolerances and metrics to senior management. The Model Risk Management function additionally oversees controls to facilitate a complete and accurate bank-wide model inventory and coordinates semi-annual attestations by the first line of defense with the aim of achieving completeness and accuracy of the bank's model inventory.

Reputational risk

Reputational risk is the risk that negative perception by stakeholders of Credit Suisse (Schweiz) AG, including clients, counterparties, employees, shareholders, regulators and the general public, may adversely impact client acquisition and damage the business relationships of Credit Suisse (Schweiz) AG with clients and counterparties, affecting staff morale and reducing access to funding sources.

Reputational risk may arise from a variety of sources, including, but not limited to, the nature or purpose of a proposed transaction or service, the identity or activity of a potential client, the regulatory or political climate in which the business will be transacted, significant public attention surrounding the transaction itself or the potential sustainability risks of a transaction. Sustainability risks have potentially adverse impacts on the environment, on people or society, which may be caused by, contributed to or directly linked to financial service providers, usually through the activities of their clients. These may manifest themselves as reputational risks, but potentially also other risk types such as credit or non-financial risks. Reputational risk may also arise from reputational damage in the aftermath of a non-financial risk incident, such as cyber crime or the failure by employees to meet expected conduct and ethical standards.

Reputational risk is included in the risk appetite framework to ensure that risk-taking is aligned with the approved risk appetite. Credit Suisse (Schweiz) AG highly values its reputation and is fully committed to protecting it through a prudent approach to risk-taking and a responsible approach to business. This is achieved through a culture of risk awareness as well as dedicated processes, resources and policies focused on identifying, evaluating, managing and reporting potential reputational risks. This is also achieved by applying the highest standards of personal accountability and ethical conduct as set out in the Code of Conduct of Credit Suisse Group and Credit Suisse (Schweiz) AG's approach to cultural values and behaviors. Reputational risk potentially arising from proposed business transactions, client activity, certain initiatives or affiliations is assessed in the reputational risk review process. The Group's global policy on reputational risk requires employees to be conservative when assessing potential reputational impact and, where certain indicators give rise to potential reputational risk, the relevant business proposal or service must be submitted through the reputational risk review process.

The RRC, on a divisional or legal entity level, is the governing body responsible for the oversight and active discussion of client, transaction and affiliation risks.

Climate-related risks

Climate-related risks are the potentially adverse direct and indirect impacts on Credit Suisse (Schweiz) AG's financial metrics, operations or reputation due to transitional or physical effects of climate change. Climate-related risks are a core element of sustainability risks.

Credit Suisse publishes its climate-related disclosures following the structure provided by the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD). These are included in Credit Suisse's Sustainability Report as well as in the TCFD Report. The disclosures include quantitative metrics alongside explanations of the frameworks relied upon, and Credit Suisse's overall climate strategy.

→ Refer to credit-suisse.com/sustainabilityreport for the Group's Sustainability Report 2022 and to credit-suisse.com/tcfid for an extract of disclosures in accordance with TCFD.

Business risk

Business risk is the risk of not achieving the financial goals and ambitions in connection with the strategy of Credit Suisse (Schweiz) AG and how the business is managed in response to the external operating environment. External factors include both market and economic conditions, as well as shifts in the regulatory environment. Internally, Credit Suisse (Schweiz) AG faces risks arising from inappropriate strategic decisions, ineffective implementation of business strategies or an inability to adapt business strategies in response to changes in the operating environment, including in relation to client and competitor behavior.

The Credit Suisse (Schweiz) AG financial plan serves as the basis for the financial goals and ambitions against which the businesses are assessed regularly throughout the year. These regular reviews include evaluations of financial performance, key business risks, overall operating environment and business strategy. This enables management to identify and execute changes to Credit Suisse (Schweiz) AG's operations and strategy where needed.

Use of derivative financial instruments and hedge accounting

Business policy for use of derivative financial instruments

Derivatives are generally either privately negotiated over-the-counter (OTC) contracts or standard contracts transacted through regulated exchanges. Credit Suisse (Schweiz) AG's most frequently used freestanding derivative products, entered into for trading and risk management purposes, include interest rate, credit default and cross-currency swaps, interest rate and foreign exchange options, foreign exchange forward contracts and foreign exchange and interest rate futures.

On the date a derivative contract is entered into, Credit Suisse (Schweiz) AG designates it as belonging to one of the following categories: trading activities; a risk management transaction that does not qualify as a hedge under accounting standards (referred to as an economic hedge); a hedge of the fair value of a recognized asset or liability; or a hedge of the variability of cash flows to be received or paid relating to a recognized asset or liability or a forecasted transaction.

Economic hedges

Economic hedges arise when Credit Suisse (Schweiz) AG enters into derivative contracts for its own risk management purposes, but the economic relationships do not qualify for hedge accounting. These economic hedges include the following types:

- interest rate derivatives to manage net interest rate risk on certain core banking business assets and liabilities;
- foreign exchange derivatives to manage foreign exchange risk on certain core banking business revenue and expense items as well as core banking business assets and liabilities against adverse movements in foreign exchange rates;
- credit derivatives to manage credit risk on certain loan portfolios; and
- futures to manage risk on equity positions including convertible bonds.

Derivatives used in economic hedges are included as trading assets or trading liabilities in the balance sheet and the respective gains and losses included in net income/(loss) from trading activities and fair value option.

→ Refer to "Note 5 – Net income/(loss) from trading activities and fair value option" for further information on economic hedging of foreign exchange risk by the Treasury function.

Hedge accounting

Hedge accounting for Credit Suisse (Schweiz) AG is determined, recorded and disclosed in accordance with US GAAP as allowed under Swiss GAAP statutory accounting rules for banks.

Credit Suisse (Schweiz) AG designates fair value hedges for individual mortgages, loans and mortgage-backed bonds as part of an overall interest rate risk management strategy that incorporates the use of derivative instruments to minimize fluctuations in earnings that are caused by interest rate volatility.

Credit Suisse (Schweiz) AG designates cash flow hedges as part of its strategy to mitigate its risk to interest rate variability in relation to pools of identified future interest-related cash flows with the same underlying risks on mortgages and loans by using interest rate swaps to convert variable rate assets to fixed rates.

→ Refer to "Derivative financial instruments and hedge accounting" in Note 2 – Accounting and valuation principles and "Note 13 – Derivative financial instruments" for further information on hedge accounting.

4 Net income from interest activities

Net income from interest activities for 2021 includes an increase of allowance for default risks of CHF 4 million from the adoption of the CECL accounting guidance on January 1, 2021.

Negative interest income and expense

in	2022	2021
CHF million		
Negative interest income debited to interest income	(39)	(73)
Negative interest expenses credited to interest expense	237	366

Negative interest income is debited to interest income and negative interest expense is credited to interest expense.

5 Net income/(loss) from trading activities and fair value option

		2022		2021	
in		Interest and discount income	Interest expense	Interest and discount income	Interest expense
Interest rate products (CHF million)					
Hedged items		(2,034)	124	(465)	91
Derivatives designated as hedging instruments		1,982	(124)	452	(86)

Gains/(losses) on interest rate risk hedges, both from the hedged items and the derivatives designated as hedging instruments, are included in interest and discount income and interest expense. The accrued interest on fair value hedges is recorded in interest and discount income and interest expense and is excluded from this table.

Hedged items in fair value hedges

		2022			2021		
end of		Hedged items			Hedged items		
		Carrying value	Hedging adjustments ¹	Discontinued hedges ²	Carrying value	Hedging adjustments ¹	Discontinued hedges ²
Assets (CHF million)							
Due from customers		64	(66)	(23)	53	(4)	18
Mortgage loans		30,197	(1,277)	(637)	16,565	(159)	198
Liabilities							
Bonds and mortgage-backed bonds		2,146	(55)	30	1,167	(8)	123

¹ Relates to the cumulative amount of fair value hedging adjustments included in the compensation account within other assets or other liabilities.

² Relates to the cumulative amount of fair value hedging adjustments remaining for any hedged items for which hedge accounting has been discontinued and which is included in the compensation account within other assets or other liabilities.

Cash flow hedges

in	2022	2021
Deferred gains and losses on derivative financial instruments related to cash flow hedges (CHF million) ¹		
Deferred gains/(losses) at beginning of period	(1)	19
Interest rate products		
Gains/(losses) on derivatives deferred in the compensation account	(76)	(26)
Interest and discount income	(52)	6
(Gains)/losses reclassified from the compensation account into income or expense	(52)	6
Deferred gains/(losses) at end of period	(129)	(1)

¹ Included in the compensation account within other assets or other liabilities.

As of December 31, 2022, the net loss associated with cash flow hedges expected to be reclassified from other assets and other liabilities to the statement of income within the next 12 months was CHF 43 million.

As of December 31, 2022, Credit Suisse (Schweiz) AG had no cash flow hedges that hedged any exposure to the variability in

future cash flows for forecasted transactions, excluding those forecasted transactions related to the payment of variable interest on existing financial instruments.

→ Refer to "Use of derivative financial instruments and hedge accounting" in Note 3 – Risk management, derivatives and hedging activities for further information.

Assets pledged	28,791	18,453	23,430	16,697

Excludes assets pledged in connection with securities lending and borrowing, repurchase agreements and reverse repurchase agreements.

¹ Includes a portfolio of mortgage loans with a carrying value of CHF 1,196 million and CHF 950 million as of December 31, 2022 and 2021, respectively, which is pledged to Credit Suisse Hypotheken AG under the international covered bond program of Credit Suisse AG. The related actual liabilities of CHF 565 million and CHF 627 million as of December 31, 2022 and 2021, respectively, are recorded in the financial statements of Credit Suisse AG and recognized as a contingent liability by Credit Suisse (Schweiz) AG. Refer to "Joint and several liability" in Off-balance sheet transactions for further information.

17 Pension plans

Liabilities due to own pension plans of Credit Suisse (Schweiz) AG as of December 31, 2022 and 2021 of CHF 254 million and CHF 331 million, respectively, are reflected in various liability accounts in the balance sheet of Credit Suisse (Schweiz) AG.

Swiss pension plans

The employees of Credit Suisse (Schweiz) AG are covered by the pension plan of the "Pensionskasse der Credit Suisse Group (Schweiz)" and "Pensionskasse 2 der Credit Suisse Group (Schweiz)" (the Swiss pension plans). Most of the Group's Swiss subsidiaries and a few companies that have close business and financial ties with the Group participate in both plans. The Swiss

pension plans are independent self-insured pension plans set up as trusts and qualify as defined contribution plans (savings plans) under Swiss law.

The Swiss pension plans' annual financial statements are prepared in accordance with Swiss GAAP FER 26 based on the full population of covered employees. Individual annual financial statements for each participating company are not prepared. As multi-employer plans with unrestricted joint liability for all participating companies, the economic interest in the Swiss pension plans' over- or underfunding is allocated to each participating company based on allocation keys determined by the plans.

Provisions for other business risks	8	(5)	0	1	3	(1)	6 ³
Restructuring provisions	0	(3)	0	0	7	0	4 ³
Other provisions	26	(7)	(2)	0	4	(2)	19 ⁴
Provisions	96	(15)	(3)	1	21	(20)	80

¹ Provisions are mainly related to irrevocable loan commitments and guarantees. Partially discounted at rates between 0.01% and 12.00%.

² Changes in provisions for off-balance sheet default risks on non-impaired financial instruments are reflected as a net charge or a net release.

³ Provisions are not discounted due to their short-term nature.

⁴ Includes litigation provisions of CHF 3 million and CHF 7 million as of December 31, 2022 and 2021, respectively. Partially discounted at rates between 1.80% and 4.31%.

Allowance for credit losses

	Balance at beginning of period	Utilized for purpose ¹	Reclassifications	Foreign exchange translation differences	Recoveries, interest past due ²	New charges to income statement ³	Releases to income statement ³	Balance at end of period
2022 (CHF million)								
Due from banks	42	(15)	0	(1)	0	25	(10)	41
Due from customers	287	(41)	0	(2)	4	68	(23)	293

Allowance for credit losses	405	(66)	1	(2)	4	98	(34)	406
of which allowance for credit losses from impaired receivables	289	(66)	0	(2)	4	82	(24)	283
of which allowance for expected credit losses	116	0	1	0	0	16	(10)	123

¹ Reflects write-offs.

² Includes increases and releases of allowances for interest on non-accrual loans and receivables.

³ Changes in allowance for expected credit losses on non-impaired financial assets are recorded as a net charge or a net release per balance sheet position.

Write-offs

In Credit Suisse (Schweiz) AG's recovery management function, write-offs are made based on an individual counterparty assessment. An evaluation is performed on the need for write-offs on impaired loans individually and on an ongoing basis, if it is likely that parts of a loan or the entire loan will not be recoverable. Write-offs of residual loan balances are executed once available debt enforcement procedures are exhausted or, in certain cases, upon a restructuring.

Gross write-offs on loans included in the allowance for credit losses year-on-year movements are reflected in the column

"Utilized for purpose". Gross write-offs of CHF 66 million in 2022 compared to gross write-offs of CHF 140 million in 2021. In 2022, gross write-offs mainly included an exposure to a financial institution impacted by sanctions imposed in connection with Russia's invasion of Ukraine, individual positions in small and medium-sized enterprises and large Swiss corporates. In 2021, gross write-offs were primarily related to commodity trade finance and small and medium-sized enterprises.

Uncollectible accrued interest receivables are written off by reversing net interest income from interest activities.

19 Expected credit losses and credit quality

This disclosure provides an overview of Credit Suisse (Schweiz) AG's balance sheet positions that include financial assets subject to the CECL accounting guidance. It includes the following main subjects:

- A tabular overview of financial assets subject to the expected credit loss approach and related purchases and sales with counterparties that are not part of Credit Suisse Group;
- A description of the main classes of financial assets subject to the expected credit loss approach, including the main risk characteristics (including the methodology for estimating expected credit losses on non-impaired and impaired financial assets and current-period estimates);
- A description of the methodology for estimating expected credit losses, including disclosures relevant for Credit Suisse

(Schweiz) AG's current-period estimate of expected credit losses;

- Credit quality information (including monitoring of credit quality and internal ratings); and
- Past due financial assets.

As of December 31, 2022, Credit Suisse (Schweiz) AG had no purchased financial assets with more than insignificant credit deterioration since origination.

Financial receivables and debt securities held with entities under common control are not subject to the CECL accounting guidance and related disclosures.

Financial assets subject to the expected credit loss approach

end of	2022			2021		
	Gross amount ¹	Allowance for credit losses ²	Net carrying value	Gross amount ¹	Allowance for credit losses ²	Net carrying value

¹ Excludes balances with entities under common control which are not subject to the CECL accounting guidance and related disclosures. Reflects the nominal value except where indicated.

² Includes allowances for credit losses on impaired receivables (specific allowances for credit losses) and allowances for expected credit losses (non-specific allowances for credit losses).

³ Excludes accrued interest before allowance for credit losses in the total amount of CHF 75 million and CHF 37 million as of December 31, 2022 and 2021, respectively, with CHF 1 million and CHF 0 million related allowance for credit losses as of December 31, 2022 and 2021, respectively. These accrued interest balances are reported in the balance sheet in accrued income and prepaid expenses in accordance with Swiss GAAP statutory guidance.

⁴ The gross amount reflects the nominal value or cost base.

In 2022 and 2021, the following purchases and sales of financial assets subject to the CECL accounting guidance were carried out by Credit Suisse (Schweiz) AG and affected the asset base subject to the estimate of the allowances for expected credit losses.

Purchases and sales

in	2022		2021	
	Purchases ¹	Sales ²	Purchases ¹	Sales ²
CHF million				
Due from banks	0	0	244 ²	2
Due from customers	4,480	485	3,752 ²	146
Mortgage loans	140	529	119 ²	454

¹ Includes drawdowns under purchased loan commitments.

² Excludes the sub-participation of loans in syndication-like financings where Credit Suisse (Schweiz) AG is the originator of the loan.

Main classes of financial assets subject to expected credit loss measurement and risk characteristics

Loans

Credit Suisse (Schweiz) AG's loan portfolios, the main class of financial assets subject to the CECL accounting guidance, are reflected in the balance sheet in due from customers, due from banks and mortgage loans. For the US GAAP CECL accounting guidance applied by the Group and its subsidiaries, loans, which include sales-type and direct financing leases, are classified into two broad categories, consumer loans and corporate & institutional loans. Consumer loans include mortgages, loans collateralized by securities and consumer finance. Corporate & institutional loans include real estate loans, commercial and industrial loans, loans to financial institutions and loans to governments and public institutions. The main risk characteristics of each of these sub-categories and the line items of Credit Suisse (Schweiz) AG's

balance sheet, which include these portfolios, are described below:

- Mortgages includes lending instruments secured by residential real estate; such credit exposure is sensitive to the level of interest rates and unemployment as well as real estate valuation. Mortgages are reported in mortgage loans, except for building loans, which are reported in due from customers.
- Loans collateralized by securities primarily includes lending secured by marketable financial collateral (e.g., equities, bonds, investment funds and precious metals); such credit exposure is sensitive to market prices for securities which impact the value of financial collateral. All loans collateralized by securities are reported in due from customers.
- Consumer finance includes lending to private individuals such as personal loans; such credit exposure is sensitive to MEFs including economic growth, unemployment and interest rates. All consumer finance loans are reported in due from customers.
- Real estate includes lending backed by commercial or income-producing real estate; such credit exposure is sensitive to MEFs including economic growth, unemployment, interest rates and industrial production as well as real estate valuation. Most of the real estate loans are reported in mortgage loans, with the remaining balance in due from customers.
- Commercial and industrial loans includes lending to corporate clients including small and medium-sized enterprises, large corporates and multinational clients; such credit exposure is sensitive to MEFs including economic growth, unemployment and industrial production. A majority of commercial and industrial loans is reported in due from customers, with the remaining balance in mortgage loans.
- Financial institutions includes lending to financial institutions such as banks and insurance companies; such credit exposure is sensitive to MEFs including economic growth. A majority of loans to financial institutions is reported in due from customers, with the remaining balances in mortgage loans and due from banks.
- Governments and public institutions includes lending to central government and state-owned enterprises; such credit exposure is sensitive to MEFs including economic growth. A majority of loans to governments and public institutions is reported in due from customers, with the remaining balance in mortgage loans.

As of December 31, 2022, mortgages, commercial and industrial loans and real estate loans were the largest sub-categories within the loan portfolio of Credit Suisse (Schweiz) AG.

Other classes of financial assets

Other classes of financial assets subject to the CECL accounting guidance, which are not reported as loans described above, include mainly the following balance sheet positions and related risk characteristics:

- Cash and other liquid assets includes cash balances held with the SNB; such credit exposure is sensitive to the credit rating and profile of the SNB.

- Due from banks includes balances held with banks. In addition to certain loans to financial institutions described further above, due from banks includes primarily nostro accounts as well as settlement accounts and margin accounts with broker banks; such credit exposure is sensitive to the credit rating and profile of the counterparty bank.
- Due from customers includes balances held with customers. In addition to the non-mortgage loans described further above, due from customers includes primarily settlement accounts and margin accounts with non-bank brokers; such credit exposure is sensitive to the credit rating and profile of the related counterparty.
- Securities borrowing and reverse repurchase agreements includes lending and borrowing of securities against cash or other financial collateral; such credit exposure is sensitive to the credit rating and profile of the counterparty and relative changes in the valuation of securities and financial collateral.

Estimating expected credit losses

The following key elements and processes of estimating expected credit losses apply to Credit Suisse (Schweiz) AG's major classes of financial assets that are subject to the CECL accounting guidance.

Expected credit losses on non-impaired credit exposures

Expected credit loss models for non-impaired credit exposures have three main inputs: (i) PD, (ii) LGD and (iii) EAD. These parameters are derived from internally developed statistical models which are based on historical data and leverage regulatory models under the advanced internal ratings-based (A-IRB) approach. Expected credit loss models use forward-looking information to derive point-in-time estimates of forward-looking term structures.

PD estimates are based on statistical rating models and tailored to various categories of counterparties and exposures. These statistical rating models are based on internally and externally compiled data comprising both quantitative and qualitative factors. A migration of a counterparty or exposure between rating classes generally leads to a change in the estimate of the associated PD. Lifetime PDs are estimated considering the expected macroeconomic environment and the contractual maturities of exposures, adjusted for estimated prepayment rates where applicable. Internal credit ratings form a significant input to the model derived CECL PDs. For the majority of counterparties, internal credit ratings are determined via statistical rating models, which are developed under the A-IRB approach of the Basel framework. The models are tailored to the specific business of the respective obligor and are intended to reflect the risk of default over a one-year period of each counterparty. Credit Suisse (Schweiz) AG has received approval from its regulator to use, and has fully implemented, the A-IRB approach.

LGD estimates the size of the expected loss that may arise on a credit exposure in the event of a default. Credit Suisse (Schweiz)

AG estimates LGD based on the history of recovery rates of claims against defaulted counterparties, considering, as appropriate, factors such as differences in product structure, collateral type, seniority of the claim, counterparty industry and recovery costs of any collateral that is integral to the financial asset. Certain LGD values are also calibrated to reflect the expected macroeconomic environment.

EAD represents the expected amount of credit exposure in the event of a default. It reflects the current drawn exposure with a counterparty and an expectation regarding the future evolution of the credit exposure under the contract or facility, including amortization and prepayments. The EAD of a financial asset is the gross carrying amount at default, which is modeled based on historical data by applying a term structure and considering portfolio-specific factors such as the drawn amount as of the reporting date, the facility limit, amortization schedules, financial collateral and product type. For certain financial assets, Credit Suisse (Schweiz) AG determines EAD by modeling the range of possible exposure outcomes at various points in time using scenario and statistical techniques.

Where a relationship to macroeconomic indicators is statistically sound and in line with economic expectations, the parameters are modeled accordingly, incorporating Credit Suisse (Schweiz) AG's forward-looking forecasts and applying regional segmentations where appropriate.

The ability to forecast credit losses over the reasonable and supportable period is based on the ability to forecast economic activity over a reasonable and supportable time window. Credit Suisse (Schweiz) AG's macroeconomic and market variable forecasts for the CECL scenarios cover a five-year time horizon. For periods beyond that reasonable and supportable forecast period, Credit Suisse (Schweiz) AG immediately reverts to average economic environment variables as model input factors. In the downside and upside scenarios, mean reversion to the base case projected paths will commence in year three, with full convergence occurring in years four and five for certain macroeconomic factors.

Alternative qualitative estimation approaches are used for certain products. For lombard loans (including share-backed loans), the PD/LGD approach used does not consider Credit Suisse (Schweiz) AG's forward-looking forecasts as these are not meaningful for the estimate of expected credit losses in light of the short time-frame considered for closing out positions under daily margining arrangements.

Credit Suisse (Schweiz) AG measures expected credit losses considering the risk of default over the maximum contractual period (including any borrower's extension options) during which it is exposed to credit risk, even if Credit Suisse (Schweiz) AG considers a longer period for risk management purposes. The maximum contractual period extends to the date at which Credit Suisse (Schweiz) AG has the right to require repayment of an advance or terminate an irrevocable loan commitment or a credit guarantee.

For off-balance sheet credit exposures, methodology, scenarios and MEFs used to estimate the provision for expected credit losses are the same as those used to estimate the allowance for credit losses for financial assets held at amortized cost. For the EAD models, a credit conversion factor or similar methodology is applied to off-balance sheet credit exposures in order to project the additional drawn amount between current utilization and the committed facility amount.

Expected credit losses on impaired credit exposures

Expected credit losses for individually impaired credit exposures are measured by performing an in-depth review and analysis of these exposures, considering factors such as recovery and exit options as well as collateral and the risk profile of the borrower. The individual measurement of expected credit losses for impaired financial assets also considers reasonable and supportable forward-looking information that is relevant to the individual counterparty (idiosyncratic information) and reflective of the macroeconomic environment that the borrower is exposed to, apart from any historical loss information and current conditions. If there are different scenarios relevant for the individual expected credit loss measurement, they are considered on a probability-weighted basis. The related allowance for credit losses is revalued by the recovery management function, at least annually or more frequently, depending on the risk profile of the borrower or credit-relevant events.

For credit-impaired financial assets, the expected credit loss is measured using (i) the present value of estimated future cash flows discounted at the contractual interest rate of the loan or (ii) the fair market value of collateral where the loan is collateral-dependent. The impaired credit exposures and related allowance are revalued to reflect the passage of time.

For all classes of financial assets, the trigger to detect an impaired credit exposure is non-payment of interest, principal amounts or other contractual payment obligations, or when, for example, Credit Suisse (Schweiz) AG may become aware of specific adverse information relating to a counterparty's ability to meet its contractual obligations, despite the current repayment status of its particular credit facility. For credit exposures where repayment is dependent on collateral, a decrease in collateral values can be an additional trigger to detect an impairment.

Restructured loans are considered impaired credit exposures in line with the bank's policies and subject to individual assessment and provisioning for expected credit losses by the recovery management function.

In addition, loans are reviewed depending on event-driven developments. All corporate and institutional loans are reviewed at least annually based on the borrower's financial statements and any indications of difficulties they may experience. Loans that are not impaired, but which are of special concern due to changes in covenants, downgrades, negative financial news and other adverse developments, are either transferred to recovery management or included on a watch list. All loans on the watch list

are reviewed at least quarterly to determine whether they should be released, remain on the watch list or be moved to recovery management. For loans in recovery management, larger positions are reviewed on a quarterly basis for any event-driven changes. Otherwise, these loans are reviewed at least annually.

Macroeconomic scenarios

The estimation and application of forward-looking information requires quantitative analysis and significant expert judgment. Credit Suisse (Schweiz) AG's estimation of expected credit losses is based on a discounted probability-weighted estimate that considers three future macroeconomic scenarios: a baseline scenario, an upside scenario and a downside scenario. The baseline scenario represents the most likely outcome. The two other scenarios represent more optimistic and more pessimistic outcomes, with the downside scenario being more severe than the upside scenario. The scenarios are probability-weighted according to Credit Suisse (Schweiz) AG's best estimate of their relative likelihood based on historical frequency, an assessment of the current business and credit cycles as well as the macroeconomic factor trends.

The scenario design team within the Group's Enterprise Risk Management (ERM) function determines the MEFs and market projections that are relevant for Credit Suisse (Schweiz) AG's three scenarios across the overall credit portfolio subject to the CECL accounting guidance. The scenario design team formulates the baseline scenario projections used for the calculation of expected credit losses from the Group's global chief investment office in-house economic research forecasts and, where deemed appropriate, from external sources such as the Bloomberg consensus of economist forecasts (covering the views of other investment banks and external economic consultancies), forecasts from nonpartisan think tanks, major central banks and multilateral institutions, such as the International Monetary Fund (IMF), the Organisation for Economic Co-operation and Development (OECD) and the World Bank. For factors where no in-house or credible external forecasts are available, an internal model is used to calibrate the baseline scenario projections. The downside and upside scenarios are derived from these baseline scenario projections. These three scenario projections are subject to a review and challenge process and any feedback from this process is incorporated into the scenario projections by the ERM scenario design team. The CECL scenario design working group is the governance forum. The working group performs an additional review and challenge and subsequently recommends approval of the MEFs and related market projections as well as

the occurrence probability weights that are allocated to the baseline, downside and upside scenarios. MEFs and related market projections as well as the scenario occurrence probability weights used for the calculation of expected credit losses are approved by the Senior Management Approval Committee.

Current-period estimate of expected credit losses on non-impaired credit exposures

One of the most significant judgments involved in estimating Credit Suisse (Schweiz) AG's allowance for credit losses relates to the macroeconomic forecasts used to estimate credit losses over the forecast period, with modeled credit losses being driven primarily by a set of 29 MEFs. The key MEFs used in each of the macroeconomic scenarios for the calculation of the expected credit losses include, but are not limited to, GDP growth rates. These MEFs are used in the portfolio- and region-specific CECL models and have been selected based on statistical criteria and expert judgment to explain expected credit losses. The table "Selected macroeconomic factors" includes Credit Suisse (Schweiz) AG's forecast of selected MEFs for 2023 and 2024, as estimated as of December 31, 2022.

As of December 31, 2022, the forecast macroeconomic scenarios were weighted 50% for the baseline, 40% for the downside and 10% for the upside scenario, unchanged compared to the scenario weightings applicable as of December 31, 2021. The MEFs included in the table represent the four-quarter average forecasts for 2023 and 2024 at the end of each reporting period. These MEFs forecasts are recalibrated on a monthly basis and certain CECL models consume data with a time lag or are influenced by statistical base effects from an earlier period. The quarterly series for Swiss nominal GDP and EU nominal GDP returned to pre-pandemic levels (i.e., the fourth quarter of 2019) in the second quarter of 2021, based on the latest published statistical data available. The macroeconomic and market variable projections incorporate adjustments to reflect the impact of accelerated monetary policy tightening by the world's major central banks in response to high inflation rates, the impact of Russia's invasion of Ukraine on energy and food prices as well as the macroeconomic impact of the property sector slowdown in China. While GDP growth rates are significant inputs to the forecast models, a range of other inputs are also incorporated for all three scenarios to provide projections for future economic and market conditions. Given the complex nature of the forecasting process, no single economic variable is viewed in isolation or independently of other inputs.

Selected macroeconomic factors

Baseline	6.6	3.8
Upside	7.3	4.4

Forecasts represent the four-quarter average estimate of the respective macroeconomic factor as determined at the end of each reporting period.

Expected credit losses are not solely derived from MEF projections. Model overlays based on expert judgment are also applied, considering historical loss experience and industry and counterparty reviews, and primarily impacting certain corporate and institutional loans portfolios. Such overlays are designed to address circumstances where in management's judgment the CECL model outputs are overly sensitive to the effect of economic inputs that exhibit significant deviation from their long-term historical averages. Overlays may also be used to capture judgment on the economic uncertainty from global or regional developments with severe impacts on economies. Credit Suisse (Schweiz) AG's non-specific allowance for expected credit losses on balance sheet and off-balance sheet credit exposures as of December 31, 2022 decreased compared to December 31, 2021, driven by the recalibration of overlays during the year to take into account updated input elements based on expert judgment. Overlays continued to be closely aligned with the macroeconomic forecasts and associated scenario weightings.

Interest income attributable to passage of time

For financial assets held at amortized cost, for which Credit Suisse (Schweiz) AG measures expected credit losses based on the discounted cash flow methodology, the entire change in present value is reported in the statement of income in (increase)/release of allowance for default risks and losses from interest activities.

Credit quality information

Credit Suisse (Schweiz) AG monitors the credit quality of financial assets held at amortized cost with the application of the Group

credit risk management framework, which provides for the consistent evaluation, measurement and management of credit risk across the bank. Evaluation, measurement and management of credit exposures recorded in Credit Suisse (Schweiz) AG follows the same approach as for the Group and reflects the specific exposure profile of the legal entity. Assessments of credit risk exposures for internal risk estimates and risk-weighted assets are calculated based on PD, LGD and EAD models.

→ Refer to "Expected credit losses on non-impaired credit exposures" for further information on PD, LGD and EAD.

The credit risk management framework incorporates the following core elements:

- Counterparty and transaction assessments: application of internal credit ratings (using PD), assignment of LGD and EAD values in relation to counterparties and transactions;
- Credit limits: establishment of credit limits, including limits based on notional exposure, potential future exposure and stress exposure, subject to approval by delegated authority holders, to serve as primary risk controls on exposures and to prevent undue risk concentrations;
- Credit monitoring, impairments and provisions: processes to support the ongoing monitoring and management of credit exposures, supporting the early identification of deterioration and any subsequent impact; and
- Risk mitigation: active management of risk mitigation provided in relation to credit exposures, including through the use of cash sales, participations, collateral or guarantees or hedging instruments.

In addition to traditional credit exposure measurement, monitoring and management using current and potential future exposure metrics, Credit Risk performs counterparty and portfolio credit risk assessments of the impact of various internal stress test scenarios. Credit Risk assesses the impact to credit risk exposures arising from market movements in accordance with the scenario narrative, which can further support the identification of concentration or tail risks. The scenario suite includes historical scenarios as well as forward-looking scenarios which are used across the Risk function.

Credit Risk evaluates and assesses counterparties and clients to whom Credit Suisse (Schweiz) AG has credit exposures, primarily using internal rating models. Credit Risk uses these models to determine internal credit ratings which are intended to reflect the PD of each counterparty.

For a majority of counterparties and clients, internal ratings are based on internally developed statistical models that have been backtested against internal experience and validated by a function independent of model development. Findings from backtesting serve as a key input for any future rating model developments. Credit Suisse (Schweiz) AG's internally developed statistical rating models are based on a combination of quantitative factors (e.g., financial fundamentals, such as balance sheet information for corporates and loan-to-value (LTV) ratio and the borrower's income

level for mortgage lending, and market data) and qualitative factors (e.g., credit histories from credit reporting bureaus and economic trends).

For the remaining counterparties where statistical rating models are not used, internal credit ratings are assigned on the basis of a structured expert approach using a variety of inputs, such as peer analyses, industry comparisons, external ratings and research as well as the judgment of senior credit officers.

In addition to counterparty ratings, Credit Risk also assesses the risk profile of individual transactions and assigns transaction ratings which reflect specific contractual terms such as seniority, security and collateral.

Internal credit ratings may differ from external credit ratings, where available, and are subject to periodic review depending on exposure type, client segment, collateral or event-driven developments. Credit Suisse (Schweiz) AG's internal ratings are mapped to a PD band associated with each rating which is calibrated to historical default experience using internal data and external data sources. Credit Suisse (Schweiz) AG's internal rating bands are reviewed on an annual basis with reference to extended historical default data and are therefore based on stable long-run averages. Adjustments to PD bands are only made where significant deviations to existing values are detected. The last update was made

in 2012 and since then no significant changes to the robust long-run averages have been detected.

Credit Suisse (Schweiz) AG uses internal rating methodologies consistently for the purposes of approval, establishment and monitoring of credit limits and credit portfolio management, credit policy, management reporting, risk-adjusted performance measurement, economic risk capital measurement and allocation and financial accounting.

A credit quality monitoring process is performed to provide for early identification of possible changes in the creditworthiness of clients and includes regular asset and collateral quality reviews, business and financial statement analysis and relevant economic and industry studies. Credit Risk maintains regularly updated watch lists and holds review meetings to re-assess counterparties that could be subject to adverse changes in creditworthiness. The review of the credit quality of clients and counterparties does not depend on the accounting treatment of the asset or commitment.

→ Refer to "Expected credit losses on impaired credit exposures" for further information on credit monitoring.

Past due financial assets

Generally, a financial asset is deemed past due if the principal and/or interest payment has not been received on its due date.

Past due financial assets

end of	Current				Past due		Total	Total
	Up to 30 days	31-60 days	61-90 days	More than 90 days	Total			
2022 (CHF million)								
Due from banks	74	0	0	0	49	49		123

Total	169,204	272	100	33	419	824		170,028
2021 (CHF million)								
Due from banks	297	0	0	0	0	0		297
Due from customers	33,284	199	9	22	216	446		33,730 ¹
Mortgage loans	138,248	22	23	20	233	298		138,546 ¹
Total	171,829	221	32	42	449	744		172,573

Reflects gross amounts before allowance for credit losses. Excludes balances with entities under common control which are not subject to the CECL accounting guidance and related disclosures. Excludes financing receivables with an original maturity of less than one year which are not subject to disclosure of past due amounts under the CECL accounting guidance.

¹ Excludes accrued interest in the total amount of CHF 75 million and CHF 37 million as of December 31, 2022 and 2021, respectively.

As of December 31, 2022 and 2021, Credit Suisse (Schweiz) AG did not have any financial assets subject to the CECL accounting

guidance that were more than 90 days past due and still accruing interest.

20 Composition of share capital, conversion and reserve capital

end of	2022		2021	
	Quantity	Total nominal value (CHF million)	Quantity	Total nominal value (CHF million)
Share capital				
Registered shares (at CHF 1 par value per share)	100,000,000	100 ¹	100,000,000	100 ¹
Total share capital		100		100
Conversion and reserve capital				
Unlimited conversion capital (at CHF 1 par value per share) ²	unlimited	unlimited	unlimited	unlimited
Reserve capital (at CHF 1 par value per share) ³	200,000,000	200	200,000,000	200
of which used for capital increases	0	0	0	0
of which reserved for planned capital increases	0	0	0	0

¹ The dividend eligible capital equals the total nominal value. As of December 31, 2022 and 2021, the total nominal value of registered shares was CHF 100,000,000 and fully paid.

² For information on principal characteristics of unlimited conversion capital, refer to Article 5a in the Articles of Association of Credit Suisse (Schweiz) AG.

³ For information on principal characteristics of reserve capital, refer to Article 5b in the Articles of Association of Credit Suisse (Schweiz) AG.

Non-distributable reserves

As of December 31, 2022, the amount of non-distributable reserves in accordance with the Swiss Code of Obligations and the Articles of Association of Credit Suisse (Schweiz) AG was CHF 50 million. Not reflected in this amount are reserves which Credit Suisse (Schweiz) AG is required to retain in order to meet the regulatory capital requirements as a going concern.

Transactions with shareholders

→ Refer to "Joint and several liability" in Off-balance sheet transactions for further information on transactions with shareholders.

21 Significant shareholders and groups of shareholders

end of	2022			2021

Nortrust Nominees Ltd. ⁴	5	5	5.43	7	7	7.42
The Bank of New York Mellon ⁴	5	5	5.31	5	5	5.25

¹ All shares with voting rights.

² Based on the percentage interest held in shares of Credit Suisse AG as per the share register of Credit Suisse AG on December 31 of the reporting period.

³ Pro-forma numbers calculated based on the percentage interest held in Group shares as per the share register of the Group on December 31 of the reporting period. Includes shareholders registered as nominees.

⁴ Nominee holdings in Group shares exceeding 2% are registered with a right to vote only if the nominee confirms that no individual shareholder holds more than 0.5% of the outstanding share capital or if the nominee discloses the identity of any beneficial owner holding more than 0.5% of the outstanding capital.

Information received from shareholders of the Group not registered in the share register

In addition to the shareholdings registered in the share register of the Group, the Group has obtained and reported to the SIX Swiss Exchange information from its shareholders in accordance with the notification requirements of the Swiss Federal Act on Financial Market Infrastructures and Market Conduct in Securities and Derivatives Trading. These shareholders may hold their shareholdings in Group shares through a nominee. The following shareholder notifications relate to registered voting rights exceeding 5% of all voting rights, which are subject to disclosure in the notes to the financial statements in accordance with Swiss GAAP statutory. The percentage shareholdings below are presented with two decimal places.

In a disclosure report that the Group published on November 17, 2021, the Group was notified that as of November 12, 2021, Qatar Holding LLC, a wholly-owned subsidiary of Qatar Investment Authority, held 133.2 million shares, or 5.03% of the voting

rights, of the registered Group shares issued as of the date of the notified transaction.

In a disclosure report that the Group published on December 10, 2022, the Group was notified that as of December 9, 2022, the Saudi National Bank held 395.5 million shares, or 9.88% of the voting rights, of the registered Group shares issued as of the date of the notified transaction.

In a disclosure report that the Group published on December 8, 2022, the Group was notified that as of November 29, 2022, Harris Associates L.P.'s holdings of registered Group shares had fallen below the 5% reporting threshold.

Shareholders with a qualified participation

As of December 31, 2022, Credit Suisse AG as direct shareholder of Credit Suisse (Schweiz) AG and Credit Suisse Group AG as direct shareholder of Credit Suisse AG are the only shareholders with a qualified participation in accordance with Bank Law.

→ Refer to "Note 23 – Amounts receivable from and amounts payable to related parties" for further information on shareholders with a qualified participation.

22 Shareholdings of the Board of Directors, Executive Board and employees and information on compensation plans

Certain members of the Board also serve on the board of directors or executive board of the Group and Credit Suisse AG. Compensation to such members of the Board is determined by the Group on the basis of their overall function and responsibilities in the Group and paid by different legal entities of the Group depending on work location, local contracts, laws and regulations. Board members who also serve as member of the board of directors or executive board of the Group and Credit Suisse AG receive an annual subsidiary board fee paid in cash, except for the Group CEO, who does not receive any additional fees from Credit Suisse (Schweiz) AG. Board members who are neither on the board of directors nor the executive board of the Group or Credit Suisse AG receive an annual base fee, committee fees and chair fees paid in cash. In 2022 and 2021, no Group shares were awarded to these Board members for services provided in relation to Credit Suisse (Schweiz) AG.

Share-based awards outstanding

	2022		2021	
	Number of share-based awards outstanding in million	Fair value in CHF million	Number of share-based awards outstanding in million	Fair value in CHF million
end of				
Share-based awards¹				
Members of the Executive Board ²	2.5	7	3.3	29
Employees ²	10.2	28	6.8	61
Share-based awards outstanding	12.7	35	10.1	90

¹ All share-based compensation plans of Credit Suisse (Schweiz) AG are plans which are either settled in Group shares or in cash on the basis of the fair value of the Group shares.

² Includes share-based awards of members of the Board of Directors that they earned in their previous roles as a member of the Executive Board or an employee of Credit Suisse (Schweiz) AG.

Compensation plans

In 2022, Credit Suisse (Schweiz) AG granted 0.9 million share awards with a total value of CHF 7.6 million, 0.7 million performance share awards with a total value of CHF 6.2 million, 5.6 million Strategic Delivery Plan (SDP) awards with a total value of CHF 48.4 million and CHF 3.5 million of Contingent Capital Awards (CCA) as deferred variable incentive compensation on February 11, 2022. The fair value of each share award, performance share award and SDP award was CHF 8.61, the Group share price on the grant date.

Deferred compensation is awarded to employees with total compensation greater than or equal to CHF 250,000. Employees with total compensation below CHF 250,000 received variable incentive compensation in the form of an immediate cash award. Performance share awards were granted to managing directors and material risk takers and controllers; CCA were granted to managing directors and directors.

In 2022 and 2021, Credit Suisse (Schweiz) AG's total expenses related to deferred compensation plans were CHF 39 million and CHF 31 million, respectively.

For 2022 and 2021, all share-based compensation plans of Credit Suisse (Schweiz) AG were either settled in shares of the Group (Group shares) or in cash on the basis of the fair value of the Group shares.

Share awards

Share awards granted in February 2022 are similar to those granted in February 2021. Each share award granted entitles the holder of the award to receive one Group share, subject to service conditions. Share awards vest over three years with one third of the share awards vesting on each of the three anniversaries of the grant date (ratable vesting). Share awards are expensed over the service period of the awards. The value of the share awards is solely dependent on the Group share price at the time of delivery. The majority of share awards granted include the right to receive dividend equivalents on vested shares.

The share awards include other awards, such as special awards, which may be granted to new employees. These awards entitle the holder to receive one Group share and are generally subject to continued employment with Credit Suisse (Schweiz) AG, contain restrictive covenants and cancellation provisions and generally vest between zero and five years.

Performance share awards

Certain employees received a portion of their deferred variable compensation in the form of performance share awards. Performance share awards are similar to share awards, except that the full balance of outstanding performance share awards, including those awarded in prior years, are subject to performance-based malus provisions. The majority of performance share awards granted include the right to receive dividend equivalents on vested shares.

Outstanding performance share awards are subject to a downward adjustment in the event of a divisional loss by the division in which the employees worked as of December 31, 2022, or a negative return on equity (ROE) of the Group, whichever results in a larger adjustment. For employees in corporate functions, the downward adjustment only applies in the event of a negative ROE of the Group and is not linked to the performance of the divisions. The basis for the ROE calculation may vary from year to year, depending on the Compensation Committee's determination for the year in which the performance shares are granted.

A downward adjustment has been applied to outstanding performance share awards, reflecting the negative RoE of the Group and the divisional loss of the Investment Bank for the year 2022.

Strategic Delivery Plan

SDP awards were one-off share-based awards granted in February 2022 to certain employees to incentivize the longer-term delivery of the Group's strategic plan. The SDP awards are subject to service conditions and performance-based metrics over the course of 2022-2024. SDP awards are scheduled to vest on the third anniversary of the grant date. Prior to settlement, the principal amount of the SDP awards will be written down to zero and forfeited if any of the following triggering events exist at the end of 2023, 2024 or 2025:

- The Group's reported common equity tier 1 (CET1) capital ratio below the FINMA-prescribed minimum + 50 basis points; or
- The Group's reported CET1 leverage ratio falls below 3.7%.

In addition, the Group's Compensation Committee will review and assess the overall success of the delivery of the strategic plan at a Group level over the three-year period (2022-2024) and may increase the SDP awards up to a maximum of 50% of the initial award amount. Half of the potential uplift would be granted if a pre-determined average Group return on tangible equity threshold is achieved, measured over the key strategic implementation years 2023 and 2024. The other half of the uplift may be awarded based on the Compensation Committee's assessment of risk management and other strategic non-financial achievements.

The majority of SDP awards granted include the right to receive dividend equivalents on vested shares.

Contingent Capital Awards

CCA were granted in February 2022 and 2021 to certain employees as part of the 2021 and 2020 deferred variable compensation and have rights and risks similar to those of certain contingent capital instruments issued by the Group in the market. CCA are scheduled to vest on the third anniversary of the grant date. CCA will be expensed over the vesting period. CCA generally provide a conditional right to receive semi-annual cash payments of interest equivalents until settled, with rates being dependent upon the vesting period and currency of denomination. CCA granted to certain regulated employees that vest over three years are not eligible for semi-annual cash payments of interest equivalents.

- CCA granted in 2021 that are denominated in US dollars and vest three years from the date of grant receive interest equivalents at a rate of 3.60%, per annum plus the daily compounded (spread exclusive) US dollar Secured Overnight Financing Rate (SOFR); and
- CCA granted in 2022 and 2021 that are denominated in Swiss francs and vest three years from the date of grant receive interest equivalents at a rate of 3.44% and 3.06%, respectively, per annum plus the daily compounded (spread exclusive) Swiss franc Swiss Average Rate Overnight (SARON).

The rates were set in line with market conditions at the time of the grant and existing high-trigger and low-trigger contingent capital instruments that the Group has issued.

At settlement, employees will receive either a contingent capital instrument or a cash payment based on the fair value of the CCA. The fair value will be determined by the Group. In the case of a cash settlement, the CCA award will be converted into the local currency of each respective employee.

CCA have loss-absorbing features such that prior to settlement, the principal amount of the CCA would be written down to zero and forfeited if any of the following trigger events were to occur:

- the Group's CET1 ratio falls below 7%; or
- FINMA determines that cancellation of the CCA and other similar contingent capital instruments is necessary, or that the Group requires public sector capital support, in either case to prevent it from becoming insolvent or otherwise failing.

Deferred fixed cash awards

In 2022, Credit Suisse (Schweiz) AG granted CHF 4.1 million of deferred fixed cash compensation to certain employees. This compensation is expensed over a three-year vesting period from the grant date.

Upfront cash awards

In February 2022, Credit Suisse (Schweiz) AG granted CHF 81 million of upfront cash awards to certain employees as part of the cash component of their 2021 variable compensation. These awards are subject to repayment (clawback) by the employee in the event of voluntary resignation, termination for cause or in connection with other specified events or conditions within three years of the award grant. The amount subject to repayment is reduced in equal monthly instalments during the three-year period following the grant date.

Other cash awards

Other cash awards include special awards as well as certain share and performance share awards settled in cash.

23 Amounts receivable from and amounts payable to related parties

end of	2022		2021	
	Amounts receivable	Amounts payable	Amounts receivable	Amounts payable
CHF million

Members of governing bodies ^{1, 2}	70	38	86	75

¹ Includes both the governing bodies of Credit Suisse (Schweiz) AG and the governing bodies of its direct and indirect holding companies Credit Suisse AG and Credit Suisse Group AG.

Governing bodies include members of the Board of Directors, the Executive Board and the statutory auditors and companies controlled by members of each of these bodies.

² Prior period has been revised. Refer to "Prior period information" in Note 2 – Accounting and valuation principles for further information.

Significant off-balance sheet transactions

As part of the normal course of business, Credit Suisse (Schweiz) AG issues guarantees and loan commitments and enters into other agreements with group companies which are recorded as off-balance sheet transactions by Credit Suisse (Schweiz) AG. As of December 31, 2022 and 2021, Credit Suisse (Schweiz) AG had off-balance sheet transactions with related parties of CHF 589 million and CHF 629 million, respectively, primarily related to contingent liabilities in connection with the international covered bond program of Credit Suisse AG.

Additional information on related party transactions

For loans and other banking services, members of the Executive Board, employees and former employees may benefit from preferential terms available to all employees as part of Credit Suisse (Schweiz) AG's employee benefit plan. Transactions with related parties are entered into at prevailing market conditions.

→ Refer to "Off-balance sheet transactions" for further information on related party transactions.

26 Assets under management

Assets under management

Assets under management include assets for which Credit Suisse (Schweiz) AG provides investment advisory or discretionary asset management services. The classification of assets under management is conditional upon the nature of the services provided by Credit Suisse (Schweiz) AG and the clients' intentions. Assets are individually assessed on the basis of each client's intentions and objectives and the nature of the banking services provided to that client. In order to be classified as assets under management, Credit Suisse (Schweiz) AG must currently or in the foreseeable future expect to provide a service where the involvement of Credit Suisse (Schweiz) AG's banking or investment expertise (e.g., as asset manager or investment advisor) is not purely executional or custodial in nature.

Assets under custody are client assets held mainly for execution-related or safekeeping/custody purposes only and therefore are not considered assets under management since Credit Suisse (Schweiz) AG does not generally provide asset allocation or financial advice.

Assets of corporate clients and public institutions that are used primarily for cash management or transaction executional purposes for which no investment advice is provided are classified as commercial assets or assets under custody and therefore do not qualify as assets under management.

For the purpose of classifying assets under management, clients with multiple accounts are assessed from an overall relationship perspective. Accounts that are clearly separate from the remainder of the client relationship and represent assets held for custody purposes only are not included as assets under management.

The initial classification of the assets may not be permanent as the nature of the client relationship is reassessed on an on-going basis. If changes in client intent or activity warrant reclassification between client asset categories, the required reclassification adjustments are made immediately when the change in intent or activity occurs.

Reclassifications between assets under management and assets held for transaction-related or custodial purposes result in corresponding net asset inflows or outflows.

Other effects	(1.2)	(1.4)
Balance at end of period	633.1	731.0

¹ Net of commissions and other expenses and net of interest expenses charged.

Net new assets

Net new assets measure the degree of success in acquiring assets under management or changes in assets under management through warranted reclassifications. The calculation is based on the direct method, taking into account individual cash payments, security deliveries and cash flows resulting from loan increases or repayments. Interest and dividend income credited to clients and commissions, interest and fees charged for banking services are not taken into account when calculating net new assets, as such charges are not directly related to the success of Credit Suisse (Schweiz) AG in acquiring assets under management. Similarly, changes in assets under management due to currency and market volatility as well as asset inflows and outflows due to the acquisition or divestiture of businesses are not part of net new assets.

→ Refer to "Business developments" in Note 1 – Company details, business developments and subsequent events for further information.
