

# *Third* quarter 2010 results

## Cautionary statement regarding forward-looking statements

This presentation contains statements that constitute "forward-looking statements," including but not limited to management's outlook for UBS's financial performance and statements relating to the anticipated effect of transactions and strategic initiatives on UBS's business and future development. While these forward-looking statements represent UBS's judgments and expectations concerning the matters described, a number of risks, uncertainties and other important factors could cause actual developments and results to differ materially from UBS's expectations. Additional information about those factors is set forth in documents furnished or filed by UBS with the US Securities and Exchange Commission, including UBS's financial report for third quarter 2010 and UBS's Annual Report on Form 20-F for the year ended 31 December 2009. UBS is not under any obligation to (and expressly disclaims any obligation to) update or alter its forward-looking statements, whether as a result of new information, future events or otherwise.

## 3Q10 overview

Net profit attributable to shareholders CHF 1.7 billion, diluted EPS CHF 0.43

Pre-tax profit CHF 0.8 billion

Results include a CHF 0.8 billion net income tax benefit

Year-to-date net profit attributable to shareholders CHF 5.9 billion

The Investment Bank's results were impacted by reduced client flows in equities and FX as well as an own credit<sup>1</sup> charge of CHF 0.4 billion

Wealth Management revenues decreased on lower client activity and the strenghtening of the Swiss franc against major currencies

Retail & Corporate and Global Asset Management produced relatively stable profits

Further improvement in net new money and stable invested asset base

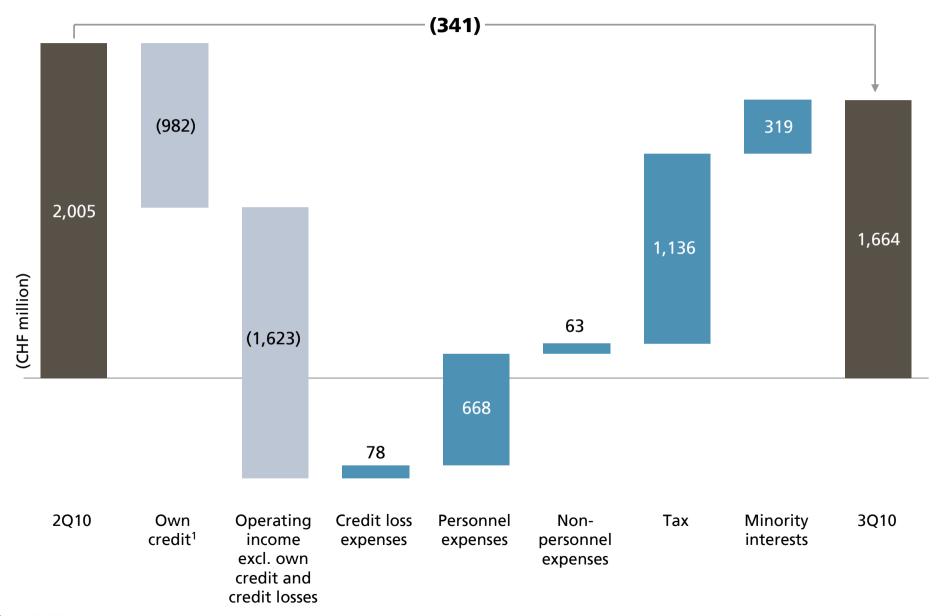

Tier 1 capital ratio 16.7% and core tier 1 capital ratio 14.2%

Stable balance sheet and risk-weighted assets broadly stable

We are confident that we can meet the Swiss Expert Commission's capital recommendations within the implementation timeframe

## Net profit attributable to shareholders 3Q10 vs. 2Q10

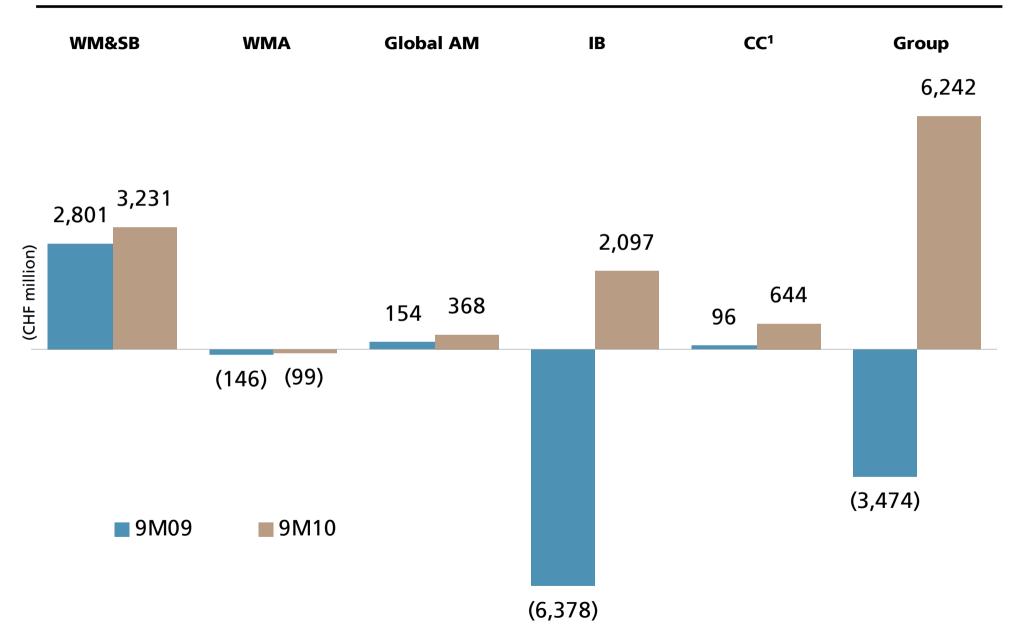

## 3Q10 – performance by business division

(CHF million)	WM&SB	WMA	Global AM	IB	CC <sup>1</sup>	UBS
Income	2,729	1,338	473	2,194	280	7,015
Credit loss (expense) / recovery	(4)			35		30
Own credit <sup>2</sup>				(387)		(387)
Total operating income	2,725	1,338	473	1,842	280	6,658
Personnel expenses	1,194	1,031	248	1,494	10	3,977
Non-personnel expenses	593	353	111	754	51	1,863
Total operating expenses	1,787	1,384	359	2,248	61	5,840
Pre-tax profit / (loss)	938	(47)	114	(406)	219	818
Tax expense						(825)
Minority interests						(21)
Discontinued operations						0
Net profit attributable to UBS shareholders						
Diluted EPS (CHF)						0.43

Headcount (FTE)	27,613	16,308	3,461	17,006	194	64,583

## Pre-tax profit from continuing operations – YTD

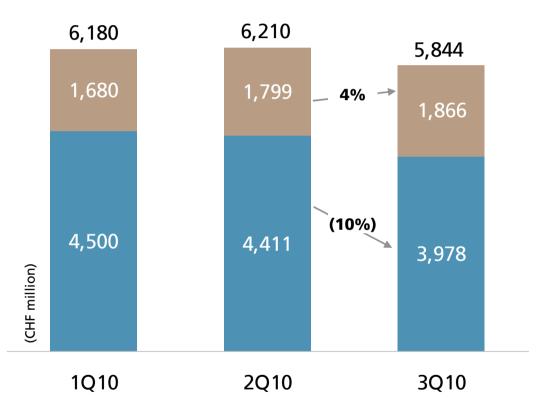

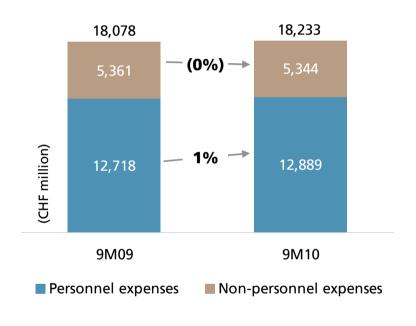

## Operating expenses

### Reduction reflects lower personnel expenses on lower revenues

#### Quarterly operating expenses (adjusted)<sup>1</sup>

#### YTD operating expenses (adjusted)<sup>1</sup>

■ Personnel expenses
■ Non-personnel expenses

On track to reach our full year fixed costs target of CHF 20 billion

<sup>1</sup> Adjustment items excluded from expenses as reported:

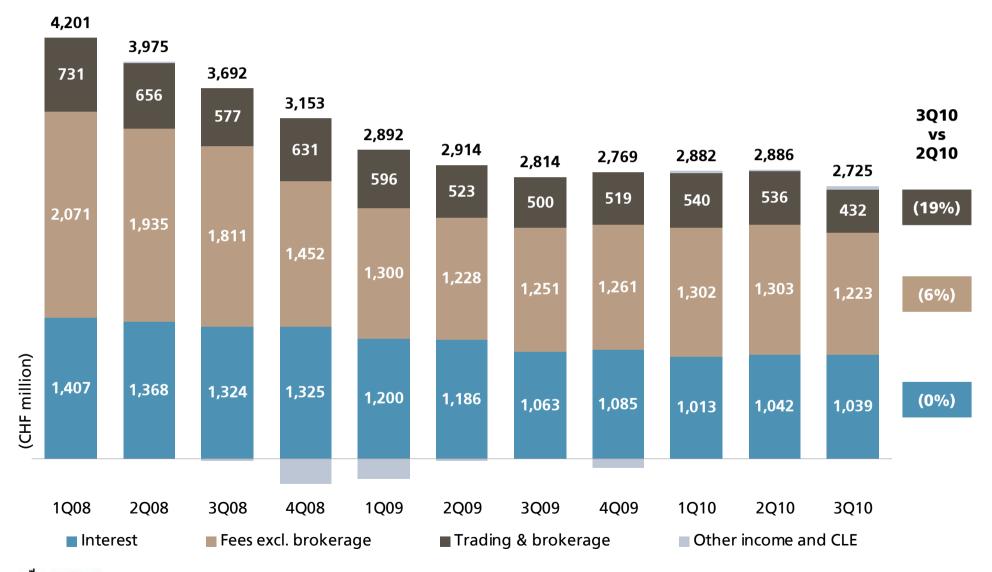

<sup>1</sup>Q10: personnel restructuring charges CHF 21 million

<sup>2</sup>Q10: personnel restructuring charges CHF 8 million credit, UK Bank Payroll Tax CHF 242 million, non-personnel restructuring charges CHF 127 million 3Q10: personnel restructuring charges CHF 1 million credit, non-personnel restructuring charges CHF 3 million credit

<sup>9</sup>M09: personnel restructuring charges CHF 502 million, non-personnel restructuring charges CHF 276 million, goodwill impairment charges CHF 1,123 million

### WM&SB – revenues

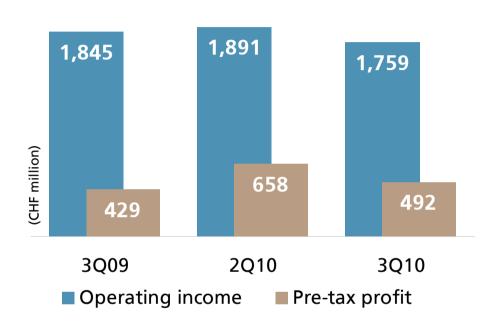

### Revenues down 6%, mainly due to lower trading & brokerage income

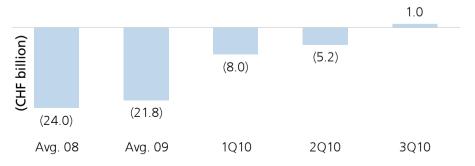

## Wealth Management

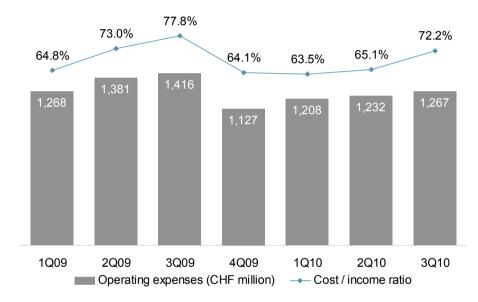

### Reduced client activity and strengthening of Swiss franc affected results

#### **Net new money**

 Cost increase mainly reflects real estate charges and higher marketing expenses

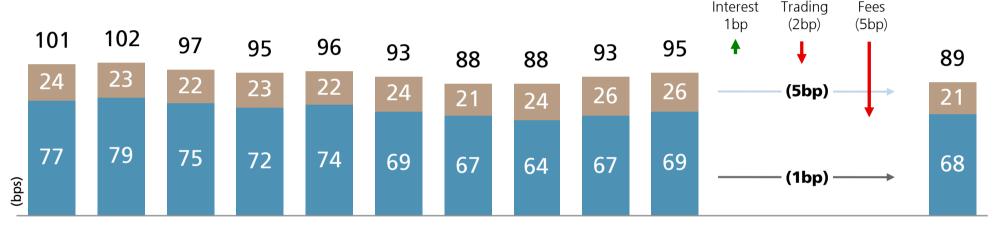

- Continued positive NNM from UHNW clients and Asia Pacific region
- Net inflows from Swiss Wealth Management were partly offset by net outflows from International Wealth Management
- Stable invested asset base as positive market movements offset negative currency effects

## Wealth Management – gross margins<sup>1</sup>

- Non-recurring
- Recurring

Asset-based fees declined as billings for a particular month are generally based on asset levels at the end of the prior month. Asset levels decreased sharply towards the end of the second quarter due to negative market performance and the strengthening of the Swiss franc, thereby adversely impacting revenues in the third quarter.

1Q08 2Q08 3Q08 4Q08 1Q09 2Q09 3Q09 4Q09 1Q10 2Q10

3Q10

### **Pricing**

Continued pricing discipline had a positive effect

### Lending

Slight increase in volumes during the quarter

#### **Brokerage**

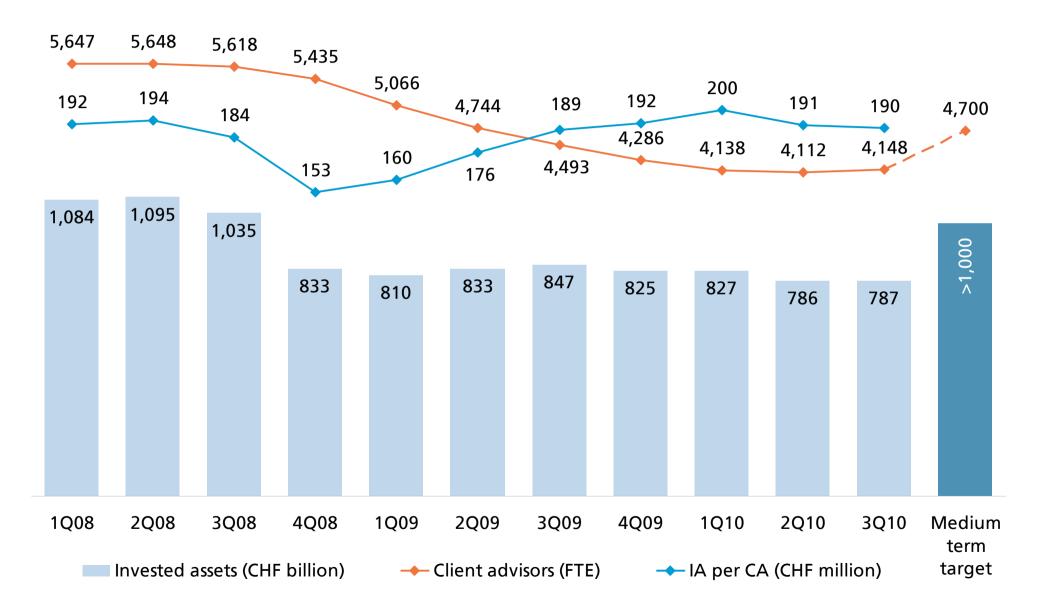

Brokerage revenues decreased significantly on lower client activity

#### **Mandates**

The proportion of assets invested in mandates remained stable

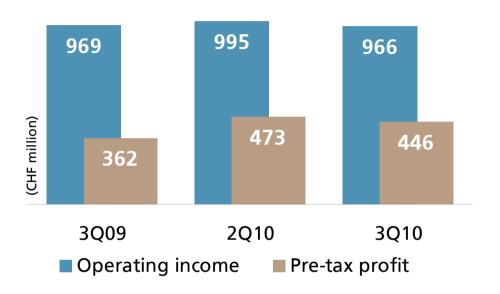

## Wealth Management – client advisors and invested assets

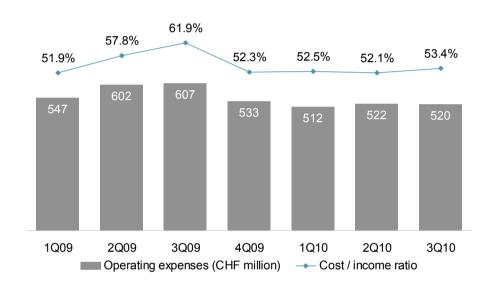

## Retail & Corporate

### **Relatively stable performance**

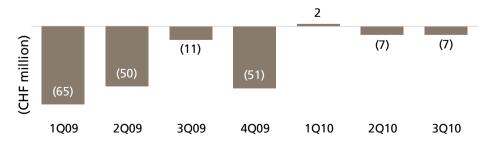

- Low interest rates continued to put pressure on deposit interest margin
- Decrease in fee and brokerage income
- Continued low levels of credit loss expenses
- Stable operating expenses

#### Operating expenses and C/I ratio

#### **Credit loss expenses**

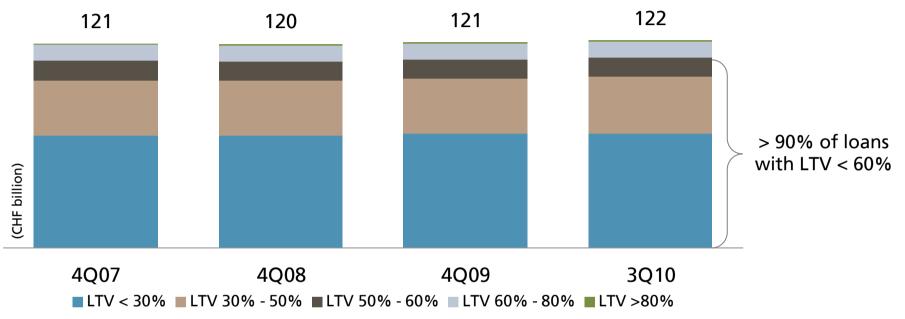

## Exposure to Swiss residential mortgage market

### Carefully managed residential mortgage book

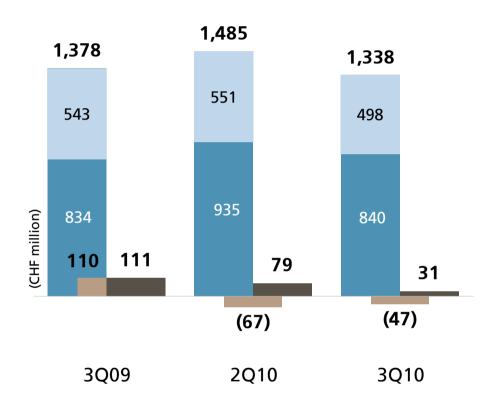

### **UBS's loans secured by residential property**<sup>1</sup>

- Over 90% of residential mortgages with loan to value (LTV) below 60%
- Maintained high underwriting standards
- LTV subject to regular assessment
  - Owner-occupied real estate is assessed at least annually, multi-family homes at least every three years
- On 30.9.10, less than 0.3% of UBS's total Swiss mortgage portfolio was impaired and less than 0.5% was past due > 90 days but not impaired

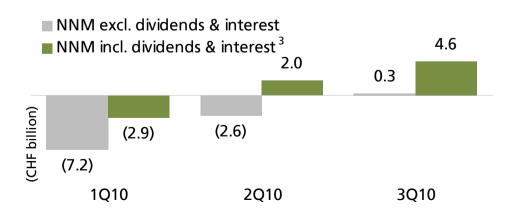

## Wealth Management Americas

- Non-recurring income
- Recurring income
- Pre-tax profit
- Pre-tax profit adjusted for restructuring and 3Q10 provision related to an arbitration matter <sup>1</sup>

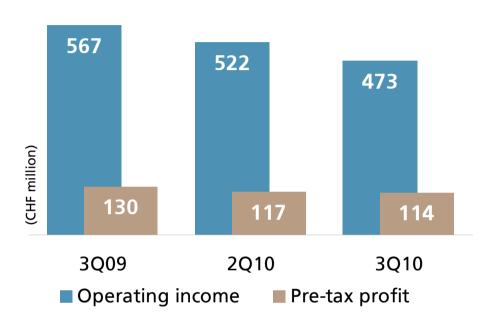

- CHF 31 million pre-tax profit adjusted for CHF 78 million provision related to an arbitration matter
  - Revenues down 10%, primarily due to FX movements
  - Operating expenses down 7% excluding 3Q10 provision related to an arbitration matter and restructuring charges<sup>1</sup>
- Financial advisors up 23 at 6,783
- CHF 0.3 billion net new money inflows
  - 'Same store'<sup>2</sup> NNM positive for third quarter in a row

## Global Asset Management

### **Stable earnings**

- Lower management fees due to adverse impact of the strengthening of the Swiss franc on invested assets
- Reduced costs due to the strengthening of the Swiss franc and lower personnel expenses
- Net new money:
  - CHF 1.5 billion net inflows from third parties were offset by CHF 1.4 billion net outflows from UBS WM channels
  - Excluding money market funds, NNM was positive CHF 3.9 billion as equities, fixed income and A&Q all recorded positive NNM

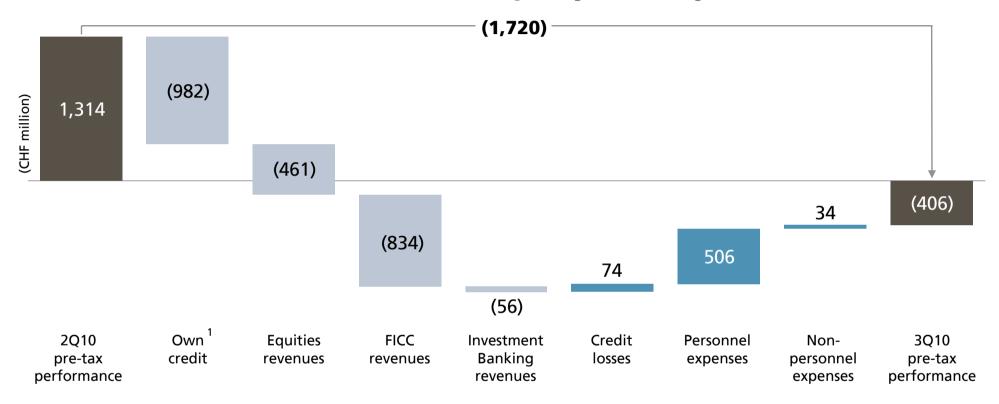

#### **Net new money YTD**

## Investment Bank – pre-tax performance 3Q10 vs. 2Q10

### Own credit<sup>1</sup> losses and lower revenues partly offset by lower costs

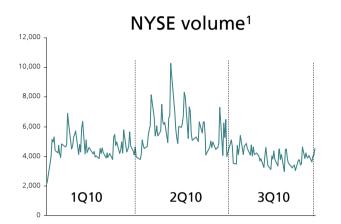

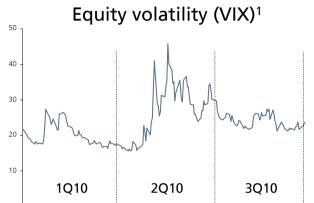

- Improved contributions from credit, emerging markets, advisory and DCM were more than offset by weaker performances in FX, rates, equity derivatives and cash equities
- Own credit<sup>1</sup> charge of CHF 387 million in 3Q10 vs. CHF 595 million gain in 2Q10 resulting in CHF 982 million movement
- Personnel costs reduced on lower revenues

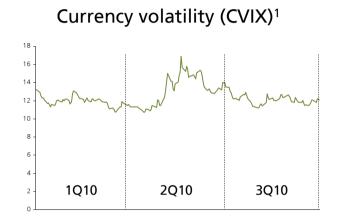

## Investment Bank – 3Q10 market environment & risk profile

#### 3Q10 was characterized by low client activity levels, particularly in equities and FX

#### Trading risk increased moderately, reverting to more normalized levels

- Average 1-day 95% management VaR increased to CHF 58 million in 3Q10, primarily due to an increase in credit spread and interest rate risk
  - Decrease in diversification effect also contributed to the increase in VaR
  - UBS's VaR model uses a five-year historical time series and therefore still factors in the impact of the crisis

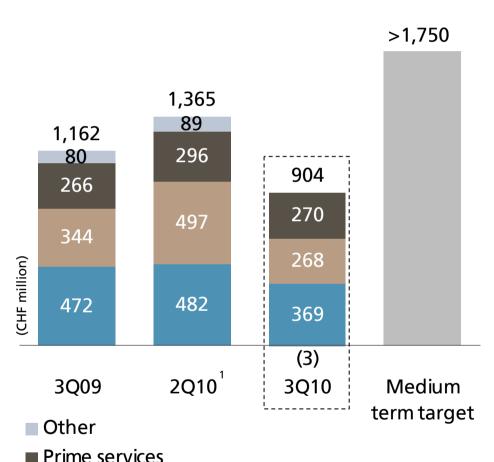

### We achieved further reductions in our residual risk positions

 Gross impaired lending portfolio further decreased, primarily due to the sale of a legacy restructured leveraged finance position without incurring incremental costs

## Equities revenues

### Reduced client activity and weak trading volumes

 Cash: decrease in investor activity and reduced market volumes resulted in lower commission income

#### Derivatives:

- Derivatives revenues declined due to lower volumes and limited client flow
- Equity linked revenues increased, reflecting improved valuations as market sentiment recovered

#### • Prime services:

- Prime brokerage revenues decreased due to reduced securities financing after a strong second quarter
- ETD revenues decreased due to lower commission income from a reduction in client volumes

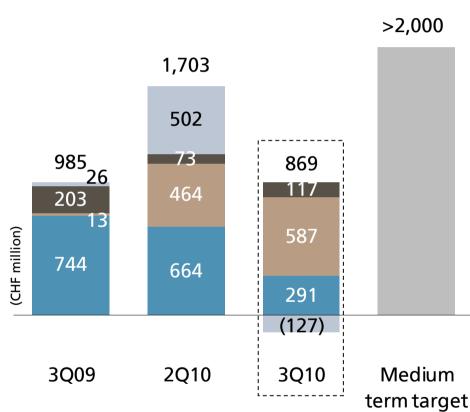

Cash

Derivatives

### FICC revenues

### Improvement in credit and emerging markets offset by weaker macro

- Other
- Emerging markets
- Credit
- Macro

 The combined revenues from credit, macro and emerging markets were CHF 996 million compared with CHF 1,200 million

#### • Macro:

- FX revenues were impacted by subdued market activity and tighter spreads
- Rates revenues decreased, partly due to markdowns of certain non-linear rates positions
- **Credit:** revenues increased due to strong performance in client solutions, improved client flow and higher spreads
- Emerging markets: gains were recorded across all regions as a result of greater client interest, particularly in local market debt

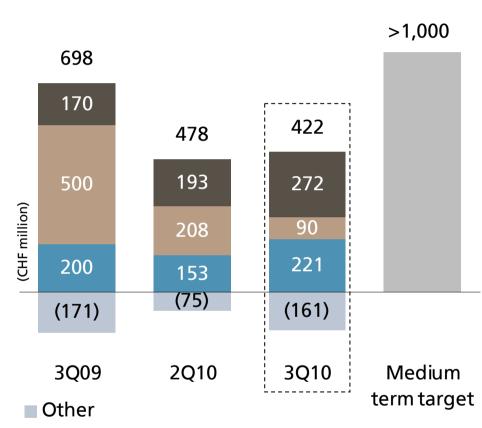

#### Other:

- Residual risk positions continued to be reduced and contributed gains of CHF ~ 0.1 billion
- Losses of CHF 0.2 billion due to debit valuation adjustments on derivatives<sup>1</sup>

### Investment banking revenues

### Stronger advisory and DCM performance offset by lower ECM revenues

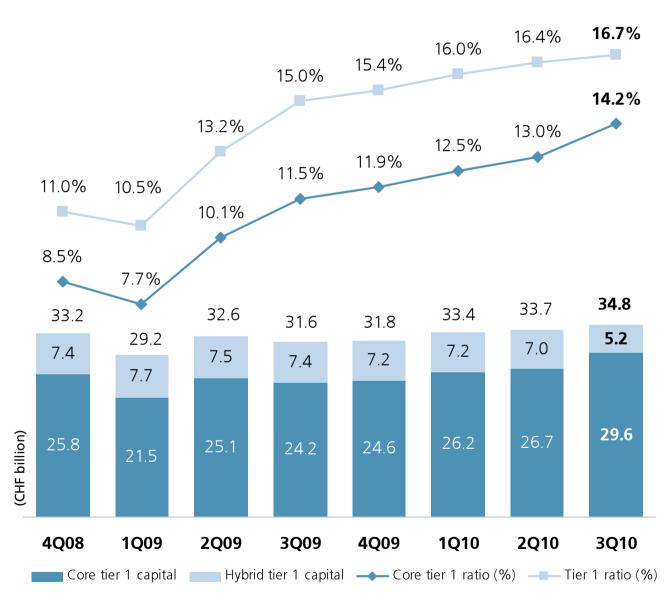

- Fixed income capital markets
- Equity capital markets
- Advisory

- Advisory: 44% increase in revenues on 9% reduced fee pool
- Capital markets: Fixed income revenues increased on the back of a pick-up in deal activity, offset by lower revenues from Equities
- Other: tightening of credit spreads led to mark-to-market losses on hedges against the loan book
- Global fee pool up 3% from 2Q10 and 4% from 3Q09
- Overall UBS fee based market share<sup>1</sup> increased compared with 2Q10 (3.8% from 3.5%)
  - M&A: 4.4% (3.9%)
  - ECM: 4.5% (3.9%)
  - DCM: 3.7% (3.5%)

## Capital position

- Tier 1 capital ratio increased to 16.7%
- Core tier 1 capital ratio improved to 14.2%
- Risk-weighted assets up CHF 3.5 billion to CHF 208.3 billion
- FINMA leverage ratio 4.4%
- USD 1.5 billion hybrid tier 1 instrument redeemed on 1 October 2010
  - Effect of redemption reflected in 3Q10 numbers

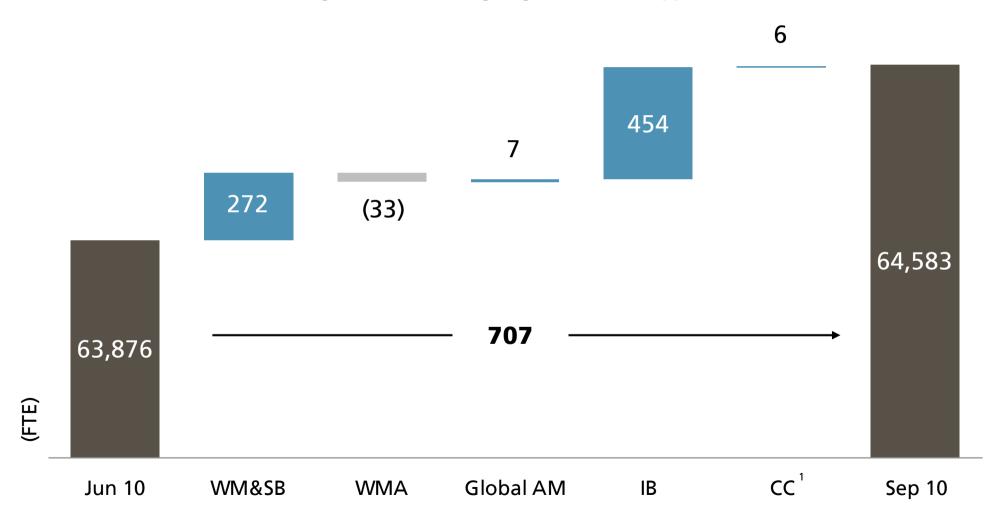

# Appendix

### Headcount

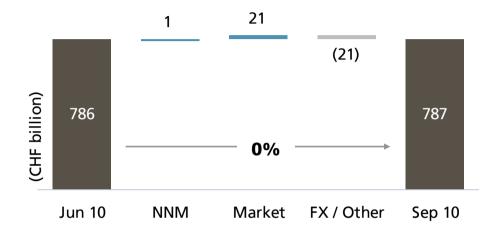

- Headcount up by 707 during 3Q10
  - Increase reflect selective hiring and annual hiring of graduates and apprentices

### Invested assets

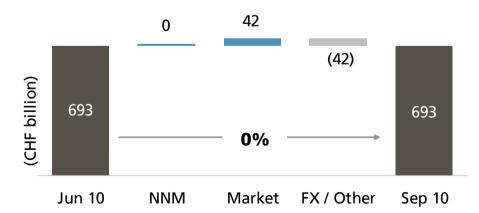

### **Wealth Management**

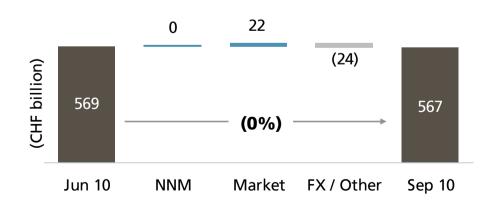

#### **Retail & Corporate**

### **Wealth Management Americas**<sup>1</sup>

#### **Global Asset Management**

# Movements in IFRS equity

## Exposure<sup>1</sup> to monoline insurers, by rating

USD billion	Notional amount <sup>3</sup>	Fair value of underlying assets	Fair value of CDSs <sup>4</sup> prior to CVA	Credit valuation adjustment as of 30.9.10	Fair value of CDSs after CVA
Credit protection on US sub-prime RMBS CDOs <sup>2</sup> of which: from monolines rated investment grade (BBB and above) of which: from monolines rated sub-investment grade (BB and below)	0.8 0.0 0.8	0.2 0.0 0.2	0.6 0.0 0.6	0.4 0.0 0.4	0.2 0.0 0.2
Credit protection on other assets <sup>2</sup> of which: from monolines rated investment grade (BBB and above) of which: from monolines rated sub-investment grade (BB and below)	11.3 2.3 9.0	8.8 1.9 6.9	2.5  0.4 2.1	0.9 0.1 0.8	1.6 0.3 1.3
Total 30.9.10	12.1	9.0	3.1	1.3	1.8
Total 30.6.10	12.0	8.7	3.3	1.6	1.7

- Based on fair values, 74% of the remaining assets were collateralized loan obligations, the vast majority of which were rated AA and above
- Continued improvement in the fair value of the underlying assets contributed to the reduction in CVA levels in combination with a general tightening of monoline credit spreads

<sup>5</sup> Includes USD 5.7 billion (CHF 5.6 billion) at fair value / USD 5.7 billion (CHF 5.6 billion) at carrying value of assets that were reclassified to "Loans and receivables" from "Held for trading" in fourth quarter 2008. Refer to "Note 12 Reclassification of financial assets" in the "Financial information" section of UBS's 3Q10 report for more information

<sup>1</sup> Excludes the benefit of credit protection purchased from unrelated third parties

<sup>2</sup> Categorization based on the lowest insurance financial strength rating assigned by external rating agencies

<sup>3</sup> Represents gross notional amount of credit default swaps (CDSs) purchased as credit protection

<sup>4</sup> Credit default swaps (CDSs)

### Student loan auction rate securities

 Over 95% of remaining client holdings subject to the repurchase commitment repurchased in 3Q10

USD million

US student loan auction rate securities

#### Inventory + buyback commitment 1Q09 - 3Q10

## Reclassified assets

30.9.10, CHF billion	Notional value	Fair value	Carrying value	Ratio of carrying to notional value

Total reclassified assets	15.0	13.1	13.3	

## Sovereign exposures to selected European countries

- Our gross sovereign exposures to Greece, Ireland, Portugal and Spain are immaterial, and our gross sovereign exposure to Italy, while larger, is commensurate with its rating and the size of its economy
- On a net basis, our sovereign exposures to these countries are insignificant individually and in aggregate
