Introduction and basis for preparation

Introduction and basis for preparation

Scope and location of Basel III Pillar 3 disclosures

The Basel Committee on Banking Supervision (BCBS) Basel III capital adequacy framework consists of three complementary pillars. Pillar 1 provides a framework for measuring minimum capital requirements for the credit, market, operational and non-counterparty-related risks faced by banks. Pillar 2 addresses the principles of the supervisory review process, emphasizing the need for a qualitative approach to supervising banks. Pillar 3 requires banks to publish a range of disclosures, mainly covering risk, capital, leverage, liquidity and remuneration.

This report provides Pillar 3 disclosures for UBS Group and prudential key figures and regulatory information for UBS AG standalone, UBS Switzerland AG standalone, UBS Europe SE consolidated and UBS Americas Holding LLC consolidated in the respective sections under “Significant regulated subsidiaries and sub-groups.”

As UBS is considered a systemically relevant bank (SRB) under Swiss banking law, UBS Group AG and UBS AG are required to comply with regulations based on the Basel III framework as applicable to Swiss SRBs on a consolidated basis. Capital and other regulatory information as of 30 September 2019 for UBS Group AG consolidated is provided in the “Capital management” section of our third quarter 2019 report and for UBS AG consolidated in the “Capital management” section of the UBS AG third quarter 2019 report available under “Quarterly reporting” at www.ubs.com/investors.

Local regulators may also require the publication of Pillar 3 information at a subsidiary or sub-group level. Where applicable, these local disclosures are provided under “Holding company and significant regulated subsidiaries and sub-groups” at www.ubs.com/investors.

Significant BCBS and FINMA capital adequacy, liquidity and funding, and related disclosure requirements

This Pillar 3 report has been prepared in accordance with FINMA Pillar 3 disclosure requirements (FINMA Circular 2016/1, “Disclosure – banks”) as revised on 16 July 2018, the underlying BCBS guidance “Revised Pillar 3 disclosure requirements” issued in January 2015, the “Frequently asked questions on the revised Pillar 3 disclosure requirements” issued in August 2016, the “Pillar 3 disclosure requirements – consolidated and enhanced framework” issued in March 2017 and the subsequent “Technical Amendment – Pillar 3 disclosure requirements – regulatory treatment of accounting provisions” issued in August 2018.

Frequency and comparability of Pillar 3 disclosures

FINMA has specified the reporting frequency for each disclosure, as outlined in the table on pages 5 and 6 of our 31 December 2018 Pillar 3 report available under “Pillar 3 disclosures” at www.ubs.com/investors.

In line with the FINMA-specified disclosure frequency and requirements for disclosure with regard to comparative periods, we provide quantitative comparative information as of 30 June 2019 for disclosures required on a quarterly basis. Where specifically required by FINMA and / or BCBS, we disclose comparative information for additional reporting dates.

UBS Group AG

Section 1 Key metrics

Key metrics of the third quarter of 2019

The KM1 and KM2 tables below are based on Basel Committee on Banking Supervision (BCBS) Basel III phase-in rules. The KM2 table includes a reference to the total loss-absorbing capacity (TLAC) term sheet, published by the Financial Stability Board (FSB). The website of the FSB provides this term sheet, at www.fsb.org/2015/11/total-loss-absorbing-capacity-tlac-principles-and-term-sheet.

During the third quarter of 2019, our common equity tier 1 (CET1) capital decreased by USD 0.3 billion to USD 34.7 billion, mainly as a result of accruals for capital returns to shareholders, share repurchases under our share repurchase program, foreign currency translation effects, current tax expense and increases in pension liabilities of non-Swiss pension plans, partly offset by operating profit before tax. Our tier 1 capital increased by USD 0.7 billion to USD 50.7 billion, primarily reflecting two separate issuances of high-trigger loss-absorbing AT1 instruments of AUD 700 million and SGD 750 million, respectively.

→ Refer to “UBS shares” in the “Capital management” section of our third quarter 2019 report for more information about the share repurchase program

The TLAC available as of 30 September 2019 included CET1 capital, additional tier 1 and tier 2 capital instruments eligible under the TLAC framework, and non-regulatory capital elements of TLAC. Under the Swiss systemically relevant bank (SRB) framework, including transitional arrangements, TLAC excludes 45% of the gross unrealized gains on debt instruments measured at fair value through other comprehensive income for accounting purposes, which for regulatory capital purposes is measured at the lower of cost or market value. This amount was negligible as of 30 September 2019, but is included as available TLAC in the KM2 table below.

Risk-weighted assets (RWA) increased by USD 2.5 billion to USD 264.6 billion, mainly due to an increase in credit risk RWA, partly offset by a decrease in market risk RWA. Leverage ratio exposure decreased by USD 9 billion during the quarter, predominantly driven by on-balance sheet exposures. High-quality liquid assets decreased by USD 8.3 billion, primarily driven by a reduction of cash at central banks reflecting higher average funding consumption by the business divisions and reductions in the level of issued debt.

6c If the capped subordination exemption applies, the amount of funding issued that ranks pari passu with excluded liabilities and that is recognized as external TLAC, divided by funding issued that ranks pari passu with excluded liabilities and that would be recognized as external TLAC if no cap was applied (%)			N/A – Refer to our response to 6b.		

¹ Resolution group level is defined as the UBS Group AG consolidated level. ² In line with the change of the presentation currency of UBS Group AG's and UBS AG's consolidated and standalone financial statements from Swiss francs to US dollars in October 2018, prior-period disclosures were translated to US dollars at the respective spot rates prevailing on the relevant reporting dates.

Section 2 Risk-weighted assets

Our approach to measuring risk exposure and risk-weighted assets

Depending on the purpose, the measurement of risk exposure that we apply may differ. Exposures may be measured for financial accounting purposes under International Financial Reporting Standards (IFRS), for deriving our regulatory capital requirements or for internal risk management and control purposes. Our Pillar 3 disclosures are generally based on measures of risk exposure used to derive the regulatory capital required under Pillar 1. Our risk-weighted assets (RWA) are calculated according to the Basel Committee on Banking Supervision (BCBS) Basel III framework, as implemented by the Swiss Capital Adequacy Ordinance issued by the Swiss Federal Council and by the associated circulars issued by the Swiss Financial Market Supervisory Authority (FINMA).

For information about the measurement of risk exposures and RWA, refer to pages 9–12 of our 31 December 2018 Pillar 3 report available under “Pillar 3 disclosures” at www.ubs.com/investors.

RWA development in the third quarter of 2019

The OV1 table below provides an overview of our risk-weighted assets (RWA) and the related minimum capital requirements by risk type. The FINMA template includes rows that are currently not applicable to UBS and therefore have been left empty.

During the third quarter of 2019, RWA increased by USD 2.5 billion to USD 264.6 billion, mainly due to an increase of USD 5.0 billion in credit risk RWA, partly offset by a decrease of USD 1.8 billion in market risk RWA.

The flow tables for credit risk, counterparty credit risk and market risk RWA in the respective sections of this report provide further details regarding the movements in RWA in the third quarter of 2019. More information about capital management and RWA, including details of movements in RWA during the third quarter of 2019, is provided on pages 55–56 of our third quarter 2019 report, available under “Quarterly reporting” at www.ubs.com/investors.

26 Floor adjustment⁸	0	0	0
27 Total	264,626	262,135	21,170

¹ Calculated based on 8% of RWA. ² Includes non-counterparty-related risk not subject to the threshold deduction treatment (30 September 2019: RWA USD 12,678 million; 30 June 2019: RWA USD 12,912 million). Non-counterparty-related risk (30 September 2019: RWA USD 8,699 million; 30 June 2019: RWA USD 8,853 million) which is subject to the threshold deduction treatment is reported in line 25 "Amounts below thresholds for deduction (250% risk weight)." ³ Excludes settlement risk, which is separately reported in line 15 "Settlement risk." Includes RWA with central counterparties. A new regulation for the calculation of RWA for exposure to central counterparties will be implemented by 1 January 2020. The split between the subcomponents of counterparty credit risk refers to the calculation of the exposure measure. ⁴ Calculated in accordance with the current exposure method (CEM) until SA-CCR is implemented by 1 January 2020. ⁵ Includes investments in funds. Items subject to threshold deduction treatments that do not exceed their respective threshold are risk weighted at 250% (30 September 2019: RWA USD 2,439 million; 30 June 2019: RWA USD 2,548 million) and are separately included in line 25 "Amounts below thresholds for deduction (250% risk weight)." ⁶ A new regulation for the calculation of RWA for investments in funds will be implemented by 1 January 2020. ⁷ Includes items subject to threshold deduction treatments that do not exceed their respective threshold and risk weighted at 250%. Items subject to threshold deduction treatments are significant investments in common shares of non-consolidated financial institutions (banks, insurance and other financial entities) and deferred tax assets arising from temporary differences, both of which are measured against their respective threshold. ⁸ No floor effect, as 80% of our Basel I RWA including the RWA equivalent of the Basel I capital deductions does not exceed our Basel III RWA including the RWA equivalent of the Basel III capital deductions. For the status of the finalization of the Basel III capital framework, refer to the "Regulatory and legal developments" section of our Annual Report 2018, available under "Annual reporting" at www.ubs.com/investors, which outlines how the proposed floor calculation would differ in significant aspects from the current approach.

The CR8 table below provides a breakdown of the credit risk RWA movements in the third quarter of 2019 across movement categories defined by the Basel Committee on Banking Supervision (BCBS). These categories are described on page 45 of our 31 December 2018 Pillar 3 report available under "Pillar 3 disclosures" at www.ubs.com/investors.

Credit risk RWA development in the third quarter of 2019

Credit risk RWA under the advanced internal ratings-based (A-IRB) approach increased by USD 5.5 billion to USD 92.2 billion as of 30 September 2019.

The RWA increase from asset size movements of USD 5.8 billion was predominantly driven by increases in traded loans, term loans exposures and unutilized credit facilities in the Investment Bank's Corporate Client Solutions business.

The increase in RWA from model updates of USD 0.9 billion was mainly driven by the continued phasing-in of RWA increases related to probability of default (PD) and loss given default (LGD) changes from the implementation of revised models for Swiss residential mortgages, which resulted in RWA increases of USD 0.4 billion in Personal & Corporate Banking and USD 0.1 billion in Global Wealth Management. In addition, a change of the credit conversion factor from 5% to 10% for zero-balance securities-backed lending and margin loans exposures increased RWA in Global Wealth Management by USD 0.4 billion.

The aforementioned increases were partly offset by a USD 1.3 billion decrease in RWA due to currency effects. ▲

CR8: RWA flow statements of credit risk exposures under IRB

<i>USD million</i>		<i>RWA</i>
1	RWA as of 30.6.19	86,703
2	Asset size	5,830
3	Asset quality	472
4	Model updates	861

6	Acquisitions and disposals	0
7	Foreign exchange movements	(1,313)
8	Other	(370)
9	RWA as of 30.9.19	92,183

Counterparty credit risk RWA development in the third quarter of 2019

Counterparty credit risk RWA under the internal model method (IMM) decreased by USD 0.8 billion to USD 19.3 billion during the third quarter of 2019, primarily due to lower notional amounts in the Investment Bank's Foreign Exchange, Rates and Credit business and trade expiries in its Equities business. ▲

CCR7: RWA flow statements of CCR exposures under internal model method (IMM) and value-at-risk (VaR)

9	RWA as of 30.9.19	19,309	5,426	24,736

Market risk RWA development in the third quarter of 2019

The three main components that contribute to market risk RWA are Value-at-risk (VaR), stressed value-at-risk (SVaR) and incremental risk charge (IRC). VaR and SVaR components include the RWA charge for risks-not-in-VaR.

The MR2 table below provides a breakdown of the market risk RWA under an internal models approach movement in the third quarter of 2019 across these components, according to the movement categories defined by the Basel Committee on Banking Supervision. These categories are described on page 81 of our 31 December 2018 Pillar 3 report available under "Pillar 3 disclosures" at www.ubs.com/investors.

Market risk RWA decreased by USD 1.8 billion to USD 8.7 billion in the third quarter of 2019, mainly driven by model updates reflecting changes to the VaR model parameters following our periodic review of VaR model parameters and, to a lesser extent, by regulatory add-ons which reflect updates from the monthly risks-not-in-VaR assessment.

From 30 June 2019 onward, the comprehensive risk measure (CRM)-based capital requirement has no longer been applicable to us, as we no longer hold eligible correlation trading positions.

The VaR multiplier remained unchanged, at 3.0, compared with the second quarter of 2019.

Section 3 Going and gone concern requirements and eligible capital

The table below provides details of the Swiss systemically relevant bank (SRB) going and gone concern capital requirements as required by FINMA. More information about capital management is provided on pages 49–58 of our third quarter 2019 report available under “Quarterly reporting” at www.ubs.com/investors.

Leverage ratio denominator	901,914				901,914			

¹ Includes applicable add-ons of 1.44% for RWA and 0.5% for LRD. ² Includes outstanding low-trigger loss-absorbing additional tier 1 (AT1) capital instruments, which are available under the transitional rules of the Swiss SRB framework to meet the going concern requirements until their first call date, even if the first call date is after 31 December 2019. As of their first call date, these instruments are eligible to meet the gone concern requirements. ³ Includes outstanding low-trigger loss-absorbing tier 2 capital instruments, which are available under the transitional rules of the Swiss SRB framework to meet the going concern requirements until the earlier of (i) their maturity or first call date or (ii) 31 December 2019, and to meet gone concern requirements thereafter. Outstanding low-trigger loss-absorbing tier 2 capital instruments are subject to amortization starting five years prior to their maturity, with the amortized portion qualifying as gone concern loss-absorbing capacity. Instruments available to meet gone concern requirements are eligible until one year before maturity, with a haircut of 50% applied in the last year of eligibility. ⁴ Based on the actions we completed up to December 2018 to improve resolvability, FINMA granted a rebate on the gone concern requirement of 42.5% of the maximum rebate in the third quarter of 2019 as compared with 40% in the previous quarter.

Section 4 Leverage ratio

BCBS Basel III leverage ratio

The Basel Committee on Banking Supervision (BCBS) leverage ratio is calculated by dividing the period-end tier 1 capital by the period-end leverage ratio denominator (LRD). The LRD consists of IFRS on-balance sheet assets and off-balance sheet items. Derivative exposures are adjusted for a number of items, including replacement value and eligible cash variation margin netting, the current exposure method add-on and net notional amounts for written credit derivatives. The LRD also includes an additional charge for counterparty credit risk related to securities financing transactions (SFTs).

The table on this page shows the difference between total IFRS assets per IFRS consolidation scope and the BCBS total on-balance sheet exposures. Those exposures are the starting point for calculating the BCBS LRD, as shown in the LR2 table below. The difference is due to the application of the regulatory scope of consolidation for the purpose of the BCBS calculation. In

addition, carrying values for derivative financial instruments and SFTs are deducted from IFRS total assets. They are measured differently under BCBS leverage ratio rules and are therefore added back in separate exposure line items in the LR2 table.

As of 30 September 2019, our BCBS Basel III leverage ratio was 5.6% and our BCBS Basel III LRD was USD 902 billion.

Difference between the Swiss SRB and BCBS leverage ratio

The LRD is the same under Swiss SRB and BCBS rules. However, there is a difference in the capital numerator between the two frameworks. Under BCBS rules only common equity tier 1 and additional tier 1 capital are included in the numerator. Under Swiss SRB rules we are required to meet going as well as gone concern leverage ratio requirements. Therefore, depending on the requirement, the numerator includes tier 1 capital instruments, tier 2 capital instruments and / or total loss-absorbing capacity (TLAC)-eligible senior unsecured debt.

Reconciliation of IFRS total assets to BCBS Basel III total on-balance sheet exposures excluding derivatives and securities financing transactions

<i>USD million</i>	30.9.19	30.6.19
On-balance sheet exposures		
IFRS total assets	973,118	968,727
Adjustment for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation	(25,850)	(25,625)
Adjustment for investments in banking, financial, insurance or commercial entities that are outside the scope of consolidation for accounting purposes but consolidated for regulatory purposes	0	0
Adjustment for fiduciary assets recognized on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure	0	0
Less carrying value of derivative financial instruments in IFRS total assets ¹	(159,917)	(145,470)
Less carrying value of securities financing transactions in IFRS total assets ²	(119,727)	(120,008)
Adjustments to accounting values	0	0
On-balance sheet items excluding derivatives and securities financing transactions, but including collateral	667,624	677,624
Asset amounts deducted in determining BCBS Basel III tier 1 capital	(15,562)	(13,461)
Total on-balance sheet exposures (excluding derivatives and securities financing transactions)	652,062	664,164

¹ Consists of derivative financial instruments and cash collateral receivables on derivative instruments in accordance with the regulatory scope of consolidation. ² Consists of receivables from securities financing transactions, margin loans, prime brokerage receivables and financial assets at fair value not held for trading related to securities financing transactions in accordance with the regulatory scope of consolidation.

Section 5 Liquidity coverage ratio

LIQ1: Liquidity risk management

We monitor the liquidity coverage ratio (LCR) in all significant currencies in order to manage any currency mismatch between high-quality liquid assets (HQLA) and the net expected cash outflows in times of stress. For information about the concentration of funding sources, refer to the "Funding by product and currency" table in the "Treasury management" section of our third quarter 2019 report.

High-quality liquid assets

HQLA must be easily and immediately convertible into cash at little or no loss of value, especially during a period of stress. HQLA are assets that are of low risk and are unencumbered. Other characteristics of HQLA are ease and certainty of valuation, low correlation with risky assets, listing on a developed and recognized exchange, existence of an active and sizeable market, and low volatility. Based on these characteristics, HQLA are categorized as Level 1 (primarily central bank reserves and government bonds) or Level 2 (primarily US and European agency bonds, as well as non-financial corporate covered bonds). Level 2 assets are subject to regulatory haircuts and caps.

High-quality liquid assets

	Average 3Q19 ¹			Average 2Q19 ¹		
	Level 1 weighted liquidity value ²	Level 2 weighted liquidity value ²	Total weighted liquidity value ²	Level 1 weighted liquidity value ²	Level 2 weighted liquidity value ²	Total weighted liquidity value ²
<i>USD billion</i>

Securities (on- and off-balance sheet)	53	16	69	53	15	68
Total high-quality liquid assets⁴	152	16	168	161	15	176

¹ Calculated based on an average of 66 data points in the third quarter of 2019 and 65 data points in the second quarter of 2019. ² Calculated after the application of haircuts. ³ Includes cash and balances with central banks and other eligible balances as prescribed by FINMA. ⁴ Calculated in accordance with FINMA requirements.

Liquidity coverage ratio

In the third quarter of 2019, the UBS Group liquidity coverage ratio (LCR) decreased 7 percentage points to 138%, remaining above the 110% Group LCR minimum communicated by the Swiss Financial Market Supervisory Authority (FINMA).

The LCR decrease was primarily driven by lower average high-quality liquid assets due to a reduction of cash at central banks reflecting higher average funding consumption by the business divisions and reductions in the level of issued debt.

subsidiaries and
sub-groups

Section 1 Introduction

The sections below include capital and other regulatory information for UBS AG standalone, UBS Switzerland AG standalone, UBS Europe SE consolidated and UBS Americas Holding LLC consolidated.

Capital information in this section is based on Pillar 1 requirements. Entities may be subject to significant additional Pillar 2 requirements, which represent additional amounts of capital considered necessary and agreed with regulators based on the risk profile of the entities.

Section 2 UBS AG standalone

Key metrics of the third quarter of 2019

The table below is based on Basel Committee on Banking Supervision (BCBS) Basel III phase-in rules. During the third quarter of 2019, common equity tier 1 (CET1) capital decreased by USD 0.8 billion to USD 50.5 billion, mainly due to accruals for capital returns and partly offset by operating profit. Risk-weighted assets (RWA) were stable during the quarter. Leverage ratio exposure decreased by USD 9 billion to USD 610 billion,

mainly due to a decrease in on-balance sheet exposures (excluding derivative exposures and securities financing transactions). High-quality liquid assets decreased by USD 5.9 billion as a result of lower average cash balances, reflecting higher average funding consumption by the business divisions and reductions in the level of issued debt. Net cash outflows decreased by USD 1.0 billion, reflecting higher inflows from secured lending.

¹ By FINMA decree, requirements exceed those based on the transitional arrangements of the Swiss Capital Adequacy Ordinance, i.e., a total going concern capital ratio requirement of 13.58% plus the effect of countercyclical buffer (CCyB) requirements of 0.08%, of which 9.68% plus the effect of CCyB requirements of 0.08% must be satisfied with CET1 capital, and a total going concern leverage ratio requirement of 4.5%, of which 3.2% must be satisfied with CET1 capital. ² Includes applicable add-ons of 1.44% for RWA and 0.5% for LRD. ³ Includes outstanding low-trigger loss-absorbing tier 2 capital instruments, which are available under the transitional rules of the Swiss SRB framework to meet the going concern requirements until the earlier of (i) their maturity or first call date or (ii) 31 December 2019. Outstanding low-trigger loss-absorbing tier 2 capital instruments are subject to amortization starting five years prior to their maturity.

Section 3 UBS Switzerland AG standalone

Key metrics of the third quarter of 2019

The table below is based on Basel Committee on Banking Supervision (BCBS) Basel III phase-in rules. During the third quarter of 2019, common equity tier 1 (CET1) capital increased by CHF 0.2 billion to CHF 10.9 billion, mainly as a result of

operating profit. Risk-weighted assets (RWA) increased by CHF 1.3 billion to CHF 97.9 billion, primarily due to an increase in the Basel I RWA floor. Leverage ratio exposure was stable during the quarter. High-quality liquid assets decreased by CHF 2.3 billion as a result of lower average cash balances, reflecting a decrease in average customer deposits.

¹ Based on BCBS Basel III phase-in rules. ² Calculated as 8% of total RWA, based on total capital minimum requirements, excluding CET1 buffer requirements. ³ As Annex 8 of Swiss Capital Adequacy Ordinance (CAO) does not apply to the systemically relevant banks, UBS can abstain from disclosing the information required in lines 12a–12e. In the event of a waiver, UBS nevertheless provides information about the Swiss sector-specific countercyclical buffer in row 9a pursuant to Art. 44 CAO. ⁴ Swiss SRB going concern requirements and information for UBS Switzerland AG are provided on the next page.

Swiss SRB going and gone concern requirements and information

UBS Switzerland AG is considered a systemically relevant bank (SRB) under Swiss banking law and is subject to capital regulations on a standalone basis. As of 30 September 2019, the

transitional going concern capital and leverage ratio requirements for UBS Switzerland AG standalone were 14.16% and 4.5%, respectively. The gone concern requirements under transitional arrangements were 9.63% for the RWA-based requirement and 3.32% for the LRD-based requirement.

¹ The total loss-absorbing capacity ratio requirement of 23.79% is the current requirement based on the transitional rules of the Swiss Capital Adequacy Ordinance including the aforementioned rebate on the gone concern requirements. In addition, FINMA has defined a total capital ratio requirement, which is the sum of 14.4% and the effect of countercyclical buffer (CCyB) requirements of 0.58%, of which 10% plus the effect of CCyB requirements must be satisfied with CET1 capital. These FINMA requirements will be effective until they are exceeded by the Swiss SRB requirements based on the transitional rules. ² Includes applicable add-ons of 1.44% for RWA and 0.5% for LRD. ³ Based on the actions we completed up to December 2018 to improve resolvability, FINMA granted a rebate on the gone concern requirement of 42.5% of the maximum rebate in the third quarter of 2019 as compared with 40% in the previous quarter.

Section 4 UBS Europe SE consolidated

The table below discloses information about the regulatory capital components, capital ratios, leverage ratio and liquidity of UBS Europe SE consolidated based on the Pillar 1 requirements.

During the third quarter of 2019, common equity tier 1 (CET1) capital was stable. Risk-weighted assets (RWA) increased by EUR 0.7 billion, mainly as a result of an increase in credit risk RWA. Leverage ratio exposure decreased by EUR 2.1 billion, reflecting a decrease in securities financing transactions, partly

offset by an increase in high-quality liquid asset (HQLA)-eligible bonds. Net cash outflows increased by EUR 0.9 billion, mainly due to clearing and treasury activities.

Entities may also be subject to significant Pillar 2 requirements, which represent additional amounts of capital considered necessary and agreed with regulators based on the risk profile of the entities.

¹ Based on applicable EU Basel III rules. ² As a result of the cross-border merger of UBS Limited into UBS Europe SE effective 1 March 2019, UBS Europe SE has become a significant regulated subsidiary of UBS Group AG. The size, scope and business model of the merged entity is now materially different. Comparatives for December 2018 have not been provided in the table because data produced on the same basis is not available. For more information about the cross-border merger of UBS Limited into UBS Europe SE, refer to the "Recent developments" section in our first quarter 2019 report. ³ There is no local disclosure requirement for the net stable funding ratio as at 30 September 2019. ⁴ Calculated as 8% of total RWA, based on total capital minimum requirements, excluding CET1 buffer requirements. ⁵ This represents the CET1 ratio which is available for meeting buffer requirements. It is calculated as the CET1 ratio minus 4.5% and after considering, where applicable, CET1 capital which has been used to meet tier 1 and / or total capital ratio requirements. Comparative figures have been adjusted to adhere to this presentation. ⁶ On the basis of tier 1 capital. ⁷ Figures as of 30 September 2019 are based on a seven-month average and as of 30 June 2019 on a four-month average, rather than a twelve-month average, as data produced on the same basis is only available for the period since the cross-border merger. For 31 March 2019, month-end reporting date values are disclosed.

Section 5 UBS Americas Holding LLC consolidated

The table below discloses information about the regulatory capital components and capital ratios, as well as the leverage ratio, of UBS Americas Holding LLC consolidated based on the Pillar 1 requirements (i.e., US Basel III standardized rules).

During the third quarter of 2019, common equity tier 1 (CET1) decreased by USD 1.0 billion to USD 11.9 billion, mainly as a result of purchases of common shares, partly offset by operating profit. Risk-weighted assets (RWA) decreased by

USD 0.9 billion to USD 52.9 billion, mainly driven by a decrease in credit risk RWA. Leverage ratio exposure was stable during the quarter.

Entities may also be subject to significant Pillar 2 requirements, which represent additional amounts of capital considered necessary and agreed with regulators based on the risk profile of the entities.

Cautionary Statement | This report and the information contained herein are provided solely for information purposes, and are not to be construed as solicitation of an offer to buy or sell any securities or other financial instruments in Switzerland, the United States or any other jurisdiction. No investment decision relating to securities of or relating to UBS Group AG, UBS AG or their affiliates should be made on the basis of this report. Refer to UBS's third quarter 2019 report and its Annual Report 2018, available at www.ubs.com/investors, for additional information.

Rounding | Numbers presented throughout this report may not add up precisely to the totals provided in the tables and text. Percentages, percent changes, and adjusted results are calculated on the basis of unrounded figures. Information about absolute changes between reporting periods, which is provided in text and that can be derived from figures displayed in the tables, is calculated on a rounded basis.

Tables | Within tables, blank fields generally indicate that the field is not applicable or not meaningful, or that information is not available as of the relevant date or for the relevant period. Zero values generally indicate that the respective figure is zero on an actual or rounded basis. Percentage changes are presented as a mathematical calculation of the change between periods.
