#### Scope of Basel III Pillar 3 disclosures

The Basel Committee on Banking Supervision (the BCBS) Basel III capital adequacy framework consists of three complementary pillars. Pillar 1 provides a framework for measuring the minimum capital requirements for the credit, market, operational and non-counterparty-related risks faced by banks. Pillar 2 addresses the principles of the supervisory review process, emphasizing the need for a qualitative approach to supervising banks. Pillar 3 requires banks to publish a range of disclosures, mainly covering risk, capital, leverage, liquidity and remuneration.

This report provides Pillar 3 disclosures for the UBS Group and prudential key figures and regulatory information for UBS AG standalone, UBS Switzerland AG standalone, UBS Europe SE consolidated and UBS Americas Holding LLC consolidated in the respective sections under "Significant regulated subsidiaries and sub-groups."

As UBS is considered a systemically relevant bank (an SRB) under Swiss banking law, UBS Group AG and UBS AG are required to comply with regulations based on the Basel III framework as applicable to Swiss SRBs on a consolidated basis. Capital and other regulatory information as of 30 September 2021 for UBS Group AG consolidated is provided in the "Capital management" section of our third quarter 2021 report, available under "Quarterly reporting" at *ubs.com/investors*, and for UBS AG consolidated in the "Capital management" section of the UBS AG third quarter 2021 report, which will be available as of 29 October 2021 under "Quarterly reporting" at *ubs.com/investors*.

Local regulators may also require the publication of Pillar 3 information at a subsidiary or sub-group level. Where applicable, these local disclosures are provided under "Holding company and significant regulated subsidiaries and sub-groups" at *ubs.com/investors*.

# Significant BCBS and FINMA capital adequacy, liquidity and funding, and related disclosure requirements

This Pillar 3 report has been prepared in accordance with Swiss Financial Market Supervisory Authority (FINMA) Pillar 3 disclosure requirements (FINMA Circular 2016/1 "Disclosure – banks"), as revised on 6 May 2021, the underlying BCBS guidance "Revised Pillar 3 disclosure requirements" issued in January 2015, the "Frequently asked questions on the revised Pillar 3 disclosure requirements" issued in August 2016, the "Pillar 3 disclosure requirements" issued in August 2016, the "Pillar 3 disclosure requirements – consolidated and enhanced framework" issued in March 2017 and the subsequent "Technical Amendment – Pillar 3 disclosure requirements – regulatory treatment of accounting provisions" issued in August 2018.

# Significant regulatory developments, and disclosure requirements and changes effective in this quarter

# Swiss Federal Council report on systemically important banks and revision of the Swiss Liquidity Ordinance

In June 2021, the Swiss Federal Council issued the results of its bi-annual review of the Swiss too-big-to-fail regulatory framework. The report concludes that no fundamental changes to the framework are needed. Potential areas for adjustment identified include the further tightening of the liquidity requirements for systemically important banks and the alignment of incentive systems to support a bank's resolvability.

Subsequently, the Swiss Federal Department of Finance launched a consultation on proposed revisions to the Swiss Liquidity Ordinance in September 2021, with the aim of strengthening the resilience of systemically important banks in Switzerland. As proposed, the revisions would increase the regulatory minimum liquidity requirements for systemically important banks, including UBS. The consultation period is scheduled to end on 13 January 2022. UBS is assessing the implications of the proposed revisions.

#### NSFR implementation

On 1 July 2021, the net stable funding ratio (the NSFR) regulation, which was adopted by the Swiss Federal Council in 2020, came into effect. It applies to UBS Group AG at the consolidated level and to UBS AG, UBS Switzerland AG and UBS Swiss Financial Advisers AG at the standalone level.

Based on the regulation, and as agreed with FINMA, UBS AG standalone is required to maintain a minimum NSFR of at least 80% without taking into account excess funding of UBS Switzerland AG and 100% after taking into account such excess funding.

) Refer to the "Key metrics," "UBS AG standalone" and "UBS Switzerland AG standalone" sections of this report

#### Registration under the US security-based swaps regulations

Under US Securities and Exchange Commission (SEC) regulations, UBS AG is required to register as a security-based swap dealer by 1 November 2021. On 8 October 2021, FINMA and the SEC finalized a memorandum of understanding relating to cooperation in oversight of Swiss entities registered under the SEC's security-based swaps regulations. The SEC also published a substituted compliance order modifying the application of certain of its regulations for Swiss security-based swap dealers.

#### Stress capital buffer in the US

Following the completion of the annual Dodd–Frank Act Stress Testing (DFAST) and the Comprehensive Capital Analysis and Review (CCAR), UBS Americas Holding LLC was assigned a stress capital buffer (SCB) of 7.1% (previously 6.7%) under the SCB rule as of 1 October 2021, resulting in a total common equity tier 1 (CET1) capital requirement of 11.6%. As of 30 September 2021, the CET1 ratio of UBS Americas Holding LLC was 20.7%.

#### Removal of ECB restrictions on dividend payments by banks

In July 2021, the European Central Bank (the ECB) announced its decision to remove the COVID-19-related restrictions on capital distributions and share buybacks by banks with effect from 1 October 2021.

#### FINMA's assessment of the recovery and resolution planning

In March 2021, FINMA published its annual assessment of the recovery and resolution plans of systemically important financial institutions in Switzerland. The report noted that FINMA had approved UBS's group recovery plan and assessed its Swiss Emergency Plan as effective. It also highlighted that UBS has made further progress in improving its global resolvability by building up the necessary capabilities and removing obstacles to the implementation of the resolution strategy, while pointing out areas for further improvement.

Based on the actions we completed by December 2020 to improve resolvability, FINMA granted an increase of the maximum rebate, from 47.5% to 55.0%, on the Swiss SRB gone concern capital requirements for UBS Group AG consolidated and UBS AG consolidated, effective from 1 July 2021.

> Refer to the "Going and gone concern requirements and eligible capital" section of this report

#### COVID-19 temporary regulatory measures

The temporary exemption from FINMA for banks to exclude central bank sight deposits from the leverage ratio denominator (LRD) for the purpose of calculating going concern ratios applied from 25 March 2020 until 1 January 2021 and was not extended thereafter.

#### Strategic partnership with Sumitomo Mitsui Trust Holdings

In 2019, UBS entered into a strategic wealth management partnership in Japan with Sumitomo Mitsui Trust Holdings, Inc. (SuMi Trust Holdings). In January 2020, the first phase was launched, with operations commencing in the joint venture that was established to promote our respective services. At the time, UBS and SuMi Trust Holdings also started offering each other's products and services to their respective clients.

In the third quarter of 2021, the second phase of the partnership was completed, with the launch of a new operational partnership entity, UBS SuMi TRUST Wealth Management Co., Ltd., which is 51% owned and controlled by UBS, requiring us to consolidate this entity. The new entity offers global securities and wealth management capabilities, together with the custody, real estate, inheritance and wealth transfer expertise of a Japanese trust banking group.

Upon completion of this transaction in the third quarter of 2021, UBS's CET1 capital increased by USD 189 million, with no effect on profit or loss.

#### Material model updates

Effective from the third quarter of 2020, we began to phase in risk-weighted asset (RWA) increases resulting from new probability of default (PD) and loss given default (LGD) models for the mortgage portfolio in the US. As agreed with FINMA, the

effect on RWA is being phased in over six quarters, through the end of 2021, resulting in an increase of USD 0.5 billion in the third quarter of 2021.

At the beginning of the second quarter of 2021, we also began to phase in an RWA increase related to a new model for structured margin loans and similar products in Global Wealth Management. This RWA increase is being phased in over five quarters and the model will be fully implemented by the second quarter of 2022. RWA increased by USD 0.7 billion in the third quarter of 2021 due to the aforementioned model introduction.

The third quarter of 2021 also included an RWA reduction of USD 0.3 billion related to the introduction of new models for the leasing of aircraft and industrial goods.

#### Material regulatory add-ons

The third quarter included a market risk RWA increase due to the introduction of a regulatory add-on of USD 5.5 billion, which considers profit or loss resulting from time decay in addition to the regulatory value-at-risk (VaR) and stressed VaR. The add-on reflects the outcome of discussions with FINMA regarding our regulatory VaR model, which started in late 2019. The integration of time decay into the regulatory VaR model, which would replace the add-on, is subject to further discussions between FINMA and UBS.

The third quarter of 2021 also included RWA increases related to regulatory add-ons in credit and counterparty credit risk of USD 1.2 billion for prime brokerage clients, as well as USD 0.4 billion for clients leasing aircraft and industrial goods. We expect further increases of around USD 2 billion related to prime brokerage clients in the fourth guarter of 2021.

#### Changes to capital add-on requirements

The applicable market share add-on requirements set by FINMA for UBS Group AG consolidated, UBS AG standalone and UBS Switzerland AG standalone as of 30 September 2021 were 0.72% for risk-weighted asset (RWA) and 0.25% for leverage ratio denominator (LRD) purposes. These add-ons were increased by 0.36% for RWA and 0.125% for LRD in the third quarter of 2021, reflecting an increase in UBS's market share in the Swiss credit business to more than 17%.

#### Frequency and comparability of Pillar 3 disclosures

FINMA has specified the reporting frequency for each disclosure, as outlined in the table on pages 7–9 of our 31 December 2020 Pillar 3 report, available under "Pillar 3 disclosures" at *ubs.com/investors*.

In line with the FINMA-specified disclosure frequency and requirements for disclosure with regard to comparative periods, we provide quantitative comparative information as of 30 June 2021 for disclosures required on a quarterly basis. Where specifically required by FINMA and / or the BCBS, we disclose comparative information for additional reporting dates.

> Refer to our 30 June 2021 Pillar 3 report, available under "Pillar 3 disclosures" at ubs.com/investors, for more information about previously published quarterly movement commentary

# UBS Group

#### Section 1 Key metrics

#### Key metrics of the third quarter of 2021

The KM1 and KM2 tables on the following pages are based on the Basel Committee on Banking Supervision (the BCBS) Basel III rules. The KM2 table includes a reference to the total lossabsorbing capacity (TLAC) term sheet, published by the Financial Stability Board (the FSB). The FSB provides this term sheet at *fsb.org/2015/11/total-loss-absorbing-capacity-tlac-principlesand-term-sheet*.

Our common equity tier 1 (CET1) and leverage ratios increased in the third quarter of 2021, primarily reflecting increases in capital. Our CET1 capital increased by USD 2.4 billion to USD 45.0 billion, mainly reflecting operating profit before tax of USD 2.9 billion, an increase of USD 0.2 billion related to the launch of our new operational partnership entity with Sumitomo Mitsui Trust Holdings, Inc. and USD 0.2 billion higher eligible deferred tax assets on temporary differences. These effects were partly offset by current tax expenses of USD 0.4 billion, accruals for capital returns to shareholders of USD 0.3 billion and negative foreign currency translation effects of USD 0.2 billion.

Our tier 1 capital increased by USD 1.2 billion to USD 60.4 billion, primarily reflecting the aforementioned increase in our CET1 capital, partly offset by the call of an additional tier 1 (AT1) capital instrument with a nominal amount of USD 1.1 billion.

The TLAC available as of 30 September 2021 included CET1 capital, AT1 and tier 2 capital instruments eligible under the TLAC framework, and non-regulatory capital elements of TLAC. Under the Swiss systemically relevant bank (SRB) framework, including transitional arrangements, TLAC excludes 45% of the gross unrealized gains on debt instruments measured at fair value through other comprehensive income for accounting purposes, which for regulatory capital purposes are measured at the lower of cost or market value. This amount was negligible as of 30 September 2021, but is included as available TLAC in the KM2 table in this section.

Our available TLAC decreased by USD 1.5 billion to USD 102.8 billion in the third quarter of 2021, reflecting the aforementioned USD 1.2 billion increase in our tier 1 capital and a USD 2.7 billion decrease in non-regulatory capital instruments, which mainly resulted from a USD 2 billion low-trigger loss-absorbing tier 2 capital instrument that ceased to be eligible as it had less than one year to maturity, the call of a EUR 1.75 billion TLAC-eligible senior unsecured debt, and effects from interest rate risk hedges and foreign currency translation, partly offset by a USD 2 billion issuance of TLAC-eligible senior unsecured debt.

Risk-weighted assets (RWA) increased by USD 9.1 billion to USD 302.4 billion, mainly due to increases in market risk RWA of USD 6.2 billion, counterparty credit risk RWA of USD 1.2 billion, and credit risk RWA of USD 1.0 billion. The increase in RWA more than offset the increases in tier 1 and total capital, resulting in decreases in the tier 1 and total capital ratios of 0.2 and 0.4 percentage points, respectively, during the third quarter of 2021.

The leverage ratio exposure increased by USD 5 billion to USD 1,045 billion, driven by on-balance sheet exposures (other than securities financing transactions (SFTs) and derivatives) and derivative exposures, partly offset by a decrease in SFTs.

Average high-quality liquid assets (HQLA) decreased by USD 1.1 billion to USD 230.9 billion, driven by an increase in assets subject to local transfer restrictions. Average total net cash outflows decreased by USD 2.4 billion to USD 146.8 billion, mainly due to decreases in outflows from secured financing transactions.

1 Resolution group level is defined as the UBS Group AG consolidated level. 2 The fully loaded ECL accounting model excludes the transitional relief of recognizing ECL allowances and provisions in CET1 capital in accordance with FINMA Circular 2013/1 "Eligible capital – banks." 3 Leverage ratio exposures and leverage ratios for the respective periods in 2020 do not reflect the effects of the temporary exemption that applied from 25 March 2020 until 1 January 2021 and was granted by FINMA in connection with COVID-19. Refer to the "Introduction and basis for preparation" section and to "Application of the temporary COVID-19-related FINMA exemption of central bank sight deposits" in the "Going and gone concern requirements and eligible capital" section of our 31 December 2020 Pillar 3 report, available under "Pillar 3 disclosures" at ubs.com/investors, for more information.

#### Our approach to measuring risk exposure and riskweighted assets

Exposures are measured for financial accounting purposes under International Financial Reporting Standards (IFRS), for deriving our regulatory capital requirements or for internal risk management and control purposes. Our Pillar 3 disclosures are generally based on measures of risk exposure used to derive the regulatory capital required under Pillar 1. Our risk-weighted assets (RWA) are calculated according to the Basel Committee on Banking Supervision (the BCBS) Basel III framework, as implemented by the Swiss Capital Adequacy Ordinance issued by the Swiss Federal Council and by the associated circulars issued by the Swiss Financial Market Supervisory Authority (FINMA).

For information about the measurement of risk exposures and RWA, refer to pages 13–15 of our 31 December 2020 Pillar 3 report, available under "Pillar 3 disclosures" at ubs.com/investors.

#### **Overview of RWA and capital requirements**

The OV1 table on the following page provides an overview of our RWA and the related minimum capital requirements by risk type. The table presented is based on the respective FINMA template and empty rows indicate current non-applicability to UBS.

During the third quarter of 2021, RWA increased by USD 9.1 billion to USD 302.4 billion, mainly due to increases in market risk RWA of USD 6.2 billion, counterparty credit risk RWA of USD 1.2 billion, and credit risk RWA of USD 1.0 billion. The increase of USD 9.1 billion included a decrease of USD 1.6 billion related to currency effects.

Market risk RWA increased by USD 6.2 billion to USD 14.0 billion in the third quarter of 2021, primarily due to the introduction of a regulatory add-on of USD 5.5 billion, which considers profit or loss resulting from time decay in addition to the regulatory value-at-risk (VaR) and stressed VaR. The add-on reflects the outcome of discussions with FINMA regarding our

regulatory VaR model, which started in late 2019. The integration of time decay into the regulatory VaR model, which would replace the add-on, is subject to further discussions between FINMA and UBS. The market risk RWA increase was also driven by a USD 1.0 billion increase from portfolio and market movements, primarily in the Investment Bank's Global Markets business.

Credit Risk RWA increased by USD 1.0 billion, primarily driven by model updates of USD 1.0 billion, mainly due to the quarterly phase-in impacts for structured margin loans and similar products in Global Wealth Management, as well as new probability of default (PD) and loss given default (LGD) models for the mortgage portfolio in the US, partly offset by a reduction related to the introduction of new models for the leasing of aircraft and industrial goods. Asset size and other movements increased by USD 0.7 billion, reflecting increases in Lombard and other loans in Global Wealth Management. Credit risk RWA in the third quarter of 2021 also included a regulatory add-on of USD 0.4 billion related to the aforementioned models for the leasing of aircraft and industrial goods. These increases were partly offset by a decrease related to currency effects of USD 1.0 billion.

Counterparty credit risk RWA increased by USD 1.2 billion, primarily due to a regulatory add-on of USD 1.2 billion related to prime brokerage clients. Asset size and other movements increased by USD 0.7 billion, mainly driven by increased RWA for derivatives in the Investment Bank. These increases were partly offset by decreases related to currency effects of USD 0.4 billion, model updates of USD 0.1 billion, and methodology and policy changes of USD 0.1 billion.

The flow tables for credit risk, counterparty credit risk and market risk RWA in this section provide further details regarding the movements in RWA in the third quarter of 2021.

More information about capital management and RWA, including details regarding movements in RWA during the third quarter of 2021, is provided on pages 42–43 in the "Capital management" section of our third quarter 2021 report, available under "Quarterly reporting" at *ubs.com/investors*.

| 27 Total   | 302,426                 | 293,277 | 24,194                    |

1 Calculated based on 8% of RWA. 2 Excludes settlement risk, which is separately reported in line 15 "Settlement risk." Includes RWA with central counterparties. The split between the sub-components of counterparty credit risk refers to the calculation of the exposure measure. 3 Not applicable until the implementation of the final rules on the minimum capital requirements for market risk (the Fundamental Review of the Trading Book). 4 Includes items subject to threshold deduction treatment that do not exceed their respective threshold and are risk-weighted at 250%. Items subject to threshold deduction treatment include significant investments in common shares of non-consolidated financial institutions (banks, insurance and other financial entities) and deferred tax assets arising from temporary differences. 5 No floor effect, as 80% of our Basel I RWA, including the RWA equivalent of the Basel I capital deductions.

#### RWA flow statements of credit risk exposures under IRB

The CR8 table below provides a breakdown of the credit risk RWA movements in the third quarter of 2021 across movement categories defined by the BCBS. These categories are described on page 48 of our 31 December 2020 Pillar 3 report, available under "Pillar 3 disclosures" at *ubs.com/investors*.

Credit risk RWA under the A-IRB approach increased by USD 0.9 billion to USD 112.2 billion during the third quarter of 2021.

The RWA increase from asset size movements of USD 2.0 billion was predominantly driven by increases in Lombard and other loans in Global Wealth Management and increases in loans and loan commitments to corporate clients in Personal &

Corporate Banking. The RWA related to asset quality decreased by USD 1.1 billion, mainly due to improvements in average risk profiles in Global Wealth Management and Personal & Corporate Banking. Model updates of USD 1.0 billion were mainly due to the quarterly phase-in impacts for structured margin loans and similar products in Global Wealth Management, as well as new probability of default (PD) and loss given default (LGD) models for the mortgage portfolio in the US, partly offset by a reduction related to the introduction of new models for the leasing of aircraft and industrial goods. Regulatory add-ons of USD 0.4 billion were primarily related to the aforementioned models for the leasing of aircraft and industrial goods. Foreign exchange movements led to an RWA decrease of USD 0.7 billion.

# RWA flow statements of counterparty credit risk exposures under the IMM and VaR

The CCR7 table below presents a flow statement explaining changes in counterparty credit risk (CCR) RWA determined under the internal model method (IMM) for derivatives and the VaR approach for securities financing transactions (SFTs).

CCR RWA on derivatives under the IMM increased by USD 1.3 billion to USD 18.6 billion during the third quarter of 2021, primarily due to asset size movements in the Investment Bank, mainly as a result of higher client activity levels. The increase was partly offset by a decrease related to currency effects of USD 0.2 billion, model updates of USD 0.1 billion, and methodology and policy changes of USD 0.1 billion.

CCR RWA on SFTs under the VaR approach increased by USD 1.0 billion to USD 8.9 billion during the third quarter of 2021, primarily driven by a regulatory add-on of USD 1.2 billion related to prime brokerage clients.

For definitions of CCR RWA movement table components, refer to "Definitions of credit risk and counterparty credit risk RWA movement table components for CR8 and CCR7" on page 48 of our 31 December 2020 Pillar 3 report, available under "Pillar 3 disclosures" at *ubs.com/investors*.

# RWA flow statements of market risk exposures under an internal models approach

The three main components that contribute to market risk RWA are VaR, stressed value-at-risk (SVaR) and the incremental risk charge (IRC). The VaR and SVaR components include the RWA charge for risks not in VaR (RniV).

The MR2 table below provides a breakdown of the movement in market risk RWA in the third quarter of 2021 under an internal models approach (IMA) across those components, pursuant to the movement categories defined by

the BCBS. These categories are described on page 78 of our 31 December 2020 Pillar 3 report, available under "Pillar 3 disclosures" at *ubs.com/investors*.

Market risk RWA under an IMA increased by USD 6.3 billion to USD 13.4 billion in the third quarter of 2021, primarily due to the introduction of a regulatory add-on of USD 5.5 billion. For further information, refer to the "Introduction and basis for preparation" section of this report.

The VaR multiplier was unchanged compared with the prior quarter, at 3.0.

1 Includes applicable add-ons of 1.44% for RWA and 0.50% for LRD. 2 Our minimum CET1 leverage ratio requirement of 3.5% consists of a 1.5% base requirement, a 1.5% base buffer capital requirement, a 0.25% LRD add-on requirement and a 0.25% market share add-on requirement based on our Swiss credit business. 3 Includes outstanding low-trigger loss-absorbing additional tier 1 (AT1) capital instruments, which are available under the Swiss SRB framework to meet the going concern requirements until their first call date. As of their first call date, these instruments are eligible to meet the goine concern requirements that have a remaining maturity of between one and two years. Once at least 75% of the minimum gone concern requirement has been met with instruments that have a remaining maturity of between one and two years. Once at least 75% of the minimum gone concern requirement has been met with instruments that have a remaining maturity of between one and two years. Once at least 75% of the minimum gone concern requirement concern capital. 5 The gone concern requirement after the application of the rebate for resolvability measures and the reduction for the use of higher quality capital instruments is floored at 8.6% and 3% for the RWA- and LRD-based requirement of 14.3% and 2.0 percentage points for the LRD-based requirement of 14.3% and 2.0 percentage points for the LRD-based requirement of 14.3% and 2.0 percentage points for the LRD-based requirement of 14.3% and 2.0 percentage points for the LRD-based requirement of 14.3% and 2.0 percentage points for the LRD-based requirement of 14.3% and 2.0 percentage points for the LRD-based requirement of 14.3% and 2.0% for LRD.

#### Section 4 Leverage ratio

#### **Basel III leverage ratio**

The Basel Committee on Banking Supervision (the BCBS) leverage ratio, as summarized in the "KM1: Key metrics" table in section 1 of this report, is calculated by dividing the period-end tier 1 capital by the period-end leverage ratio denominator (the LRD).

The LRD consists of International Financial Reporting Standards (IFRS) on-balance sheet assets and off-balance sheet items. Derivative exposures are adjusted for a number of items, including replacement values and eligible cash variation margin netting, the current exposure method add-on and net notional amounts for written credit derivatives. The LRD also includes an additional charge for counterparty credit risk related to securities financing transactions (SFTs).

The table below shows the difference between total IFRS assets per IFRS consolidation scope and the BCBS total onbalance sheet exposures. Those exposures are the starting point for calculating the BCBS LRD, as shown in the LR2 table in this section. The difference is due to the application of the regulatory scope of consolidation for the purpose of the BCBS calculation. In addition, carrying amounts for derivative financial instruments and SFTs are deducted from IFRS total assets. They are measured differently under BCBS leverage ratio rules and are therefore added back in separate exposure line items in the LR2 table.

#### Difference between the Swiss SRB and BCBS leverage ratio

The LRD is the same under Swiss systemically relevant bank (SRB) and BCBS rules. However, there is a difference in the capital numerator between the two frameworks. Under BCBS rules only common equity tier 1 and additional tier 1 capital are included in the numerator. Under Swiss SRB rules UBS is required to meet going and gone concern leverage ratio requirements. Therefore, depending on the requirement, the numerator includes tier 1 capital instruments, tier 2 capital instruments and / or total loss-absorbing capacity (TLAC)-eligible senior unsecured debt.

Reconciliation of IFRS total assets to BCBS Basel III total on-balance sheet exposures excluding derivatives and securities financing transactions

| 1 The summary ensuits of devices in the solution of each and each and each and each and each at a feature of the solution in the solution of t | and the second field of the second | 2 The surrow |

1 The exposures consist of derivative financial instruments and cash collateral receivables on derivative instruments, all of which are in accordance with the regulatory scope of consolidation. 2 The exposures consist of receivables from SFTs, margin loans, prime brokerage receivables and financial assets at fair value not held for trading, both related to SFTs, all of which are in accordance with the regulatory scope of consolidation.

During the third quarter of 2021, the LRD increased by USD 5 billion to USD 1,045 billion. On-balance sheet exposures (excluding derivatives and SFTs) increased by USD 13 billion, mainly driven by higher central bank balances and trading assets, partly offset by a reduction in high-quality liquid asset (HQLA) securities. Derivative exposures increased by USD 3 billion, mainly reflecting higher client volumes and market-driven movements in the Investment Bank. SFTs decreased by

USD 11 billion, mainly due to excess cash reinvestment trade roll-offs and a reduction in collateral sourcing requirements, as well as lower brokerage receivables and a decrease in borrowing activities.

#### Section 5 Liquidity coverage ratio

#### Liquidity coverage ratio

We monitor the liquidity coverage ratio (the LCR) in all significant currencies in order to manage any currency mismatch between high-quality liquid assets (HQLA) and the net expected cash outflows in times of stress.

| Pillar 3 disclosure requirement  | Third quarter 2021 report section   | Disclosure                          | Third quarter 2021 report page number |
|----------------------------------|-------------------------------------|-------------------------------------|---------------------------------------|
| Concentration of funding sources | Balance sheet and off-balance sheet | Liabilities by product and currency | 50                                    |

#### High-quality liquid assets

HQLA must be easily and immediately convertible into cash at little or no loss of value, especially during a period of stress. HQLA are assets that are of low risk and are unencumbered. Other characteristics of HQLA are ease and certainty of valuation, low correlation with risky assets, listing of the assets on a developed and recognized exchange, existence of an active and sizable market for the assets, and low volatility. Our HQLA predominantly consist of assets that qualify as Level 1 in the LCR framework, including cash, central bank reserves and government bonds.

#### High-quality liquid assets

1 Calculated based on an average of 65 data points in the third quarter of 2021 and 64 data points in the second quarter of 2021. 2 Calculated after the application of haircuts and, where applicable, caps on Level 2 assets. 3 Includes cash and balances with central banks and other eligible balances as prescribed by FINMA. 4 Calculated in accordance with FINMA requirements.

## LCR development during the third quarter of 2021

In the third quarter of 2021, the UBS Group quarterly average LCR increased 1 percentage point to 157%, remaining above the prudential requirement communicated by the Swiss Financial Market Supervisory Authority (FINMA).

The increase in average LCR was driven by a decrease in average total net cash outflows of USD 2 billion to USD 147 billion, mainly due to decreases in outflows from secured financing transactions. Average HQLA decreased by USD 1 billion to USD 231 billion, driven by an increase in assets subject to local transfer restrictions.

#### Section 1 Introduction

The sections on the following pages include capital and other regulatory information as of 30 September 2021 for UBS AG standalone, UBS Switzerland AG standalone, UBS Europe SE consolidated and UBS Americas Holding LLC consolidated. Capital information in the following sections is based on Pillar 1

#### Section 2 UBS AG standalone

#### Key metrics of the third quarter of 2021

The table on the next page is based on the Basel Committee on Banking Supervision (the BCBS) Basel III rules.

During the third quarter of 2021, common equity tier 1 (CET1) capital was largely unchanged at USD 51.2 billion, as the additional accruals for capital returns to UBS Group AG were almost entirely offset by operating profit before tax. Tier 1 capital decreased by USD 1.3 billion to USD 65.2 billion, primarily driven by the call of an additional tier 1 capital instrument with a nominal amount of USD 1.1 billion. Total capital decreased by USD 1.8 billion to USD 66.6 billion, reflecting the aforementioned decrease in tier 1 capital and a decrease in the remaining eligibility of a EUR 1.75 billion tier 2 capital instrument.

Risk-weighted assets (RWA) decreased by USD 0.4 billion to USD 318.8 billion during the third quarter of 2021, primarily

capital requirements. Entities may be subject to significant additional Pillar 2 requirements, which represent additional amounts of capital considered necessary and are agreed with regulators based on the risk profile of the respective entity.

driven by a decrease in credit and counterparty credit risk RWA and partly offset by an increase in market risk RWA. Leverage ratio exposure decreased by USD 9 billion to USD 598 billion, mainly driven by lower securities financing transactions and lending balances, partly offset by increases in cash and balances at central banks and derivative exposures.

Correspondingly, our CET1 capital ratio was stable at 16.1% whereas our tier 1 and total capital ratio decreased during the quarter, due to the aforementioned decreases in tier 1 and total capital. Our Basel III leverage ratio was largely unchanged at 10.9%, as the decrease in tier 1 capital was almost offset by the decrease in leverage ratio exposure.

Average high-quality liquid assets (HQLA) increased by USD 3.4 billion to USD 92.3 billion, driven by greater average cash balances due to a reduction of funding consumption in the business divisions. Average total net cash outflows increased by USD 0.2 billion to USD 50.7 billion.

1 The fully loaded ECL accounting model excludes the transitional relief of recognizing ECL allowances and provisions in CET1 capital in accordance with FINMA Circular 2013/1 "Eligible capital – banks." 2 Calculated as 8% of total RWA, based on total capital minimum requirements, excluding CET1 buffer requirements. 3 Swiss SRB going and gone concern requirements and information for UBS AG standalone are provided on the following pages in this section. 4 The temporary exemption that applied from 25 March 2020 until 1 January 2021 and was granted by FINMA in connection with COVID-19 had no net effect on UBS AG standalone in 2020. Refer to the "Introduction and basis for preparation" and "UBS AG standalone" sections of our 31 December 2020 Pillar 3 report, available under "Pillar 3 disclosures" at ubs.com/investors, for more information. 5 Calculated based on quarterly average. Refer to "Liquidity coverage ratio" in this section for more information. 6 In accordance with Art. 17h para. 3 and 4 of the Liquidity Ordinance, UBS AG standalone is required to maintain a minimum NSFR of at least 80% without taking into account excess funding of UBS Switzerland AG and 100% after taking into account such excess funding. Refer to the "Introduction and basis for preparation" section of this report for more information.

# Swiss SRB going and gone concern requirements and information

The tables below and on the next page provide details of the Swiss systemically relevant bank (SRB) RWA- and leverage ratio denominator (LRD)-based going and gone concern requirements and information as required by the Swiss Financial Market Supervisory Authority (FINMA); details regarding eligible gone concern instruments are provided on the next page.

More information about the going and gone concern requirements and information is provided on page 112 of our 31 December 2020 Pillar 3 report, available under "Pillar 3 disclosures" at *ubs.com/investors*.

The applicable market share add-on requirements as of 30 September 2021 were 0.72% for RWA and 0.25% for LRD purposes. These add-ons were increased by 0.36% for RWA and 0.125% for LRD in the third quarter of 2021, reflecting an increase in UBS's market share in the Swiss credit business to more than 17%. The applicable LRD add-on requirements remained unchanged at 0.72% for RWA and 0.25% for LRD purposes, as our Group LRD remained within the same add-on bucket.

1 Net exposure for direct and indirect investments including holding of regulatory capital instruments in Switzerland-domiciled subsidiaries (30 September 2021: USD 17,780 million; 30 June 2021: USD 17,787 million) and for direct and indirect investments including holding of regulatory capital instruments in foreign-domiciled subsidiaries (30 September 2021: USD 41,860 million; 30 June 2021: USD 41,767 million) are risk-weighted at 215% and 260%, respectively, for the current year. Risk weights will gradually increase by 5 percentage points per year for Swiss-domiciled investments and 20 percentage points per year for foreign-domiciled investments until the fully applied risk weights of 250% and 400%, respectively, are applied.

#### Leverage ratio information

#### Swiss SRB leverage ratio denominator

| USD billion   | 30.9.21 | 30.6.21 |
|---|---------|---------|
| Leverage ratio denominator  |         |         |
| Swiss GAAP total assets   | 508.8   | 512.0   |
| Difference between Swiss GAAP and IFRS total assets   | 121.5   | 120.8   |
| Less: derivative exposures and SFTs <sup>1</sup>  | (225.2) | (232.5) |
| Less: funding provided to significant regulated subsidiaries eligible as gone concern capital | (20.8)  | (20.8)  |
| On-balance sheet exposures (excluding derivative exposures and SFTs)                          | 384.2   | 379.5   |
| Derivative exposures  | 103.6   | 100.1   |
| Securities financing transactions   | 88.6    | 105.7   |
| Off-balance sheet items   | 22.5    | 22.7    |
| Items deducted from Swiss SRB tier 1 capital  | (1.4)   | (1.4)   |
| Total exposures (leverage ratio denominator)  | 597.5   | 606.5   |

1 The exposures consist of derivative financial instruments, cash collateral receivables on derivative instruments, receivables from SFTs, and margin loans, as well as prime brokerage receivables and financial assets at fair value not held for trading, both related to SFTs. These exposures are presented separately under Derivative exposures and Securities financing transactions in this table.

#### Liquidity coverage ratio

In the third quarter of 2021, the UBS AG liquidity coverage ratio (LCR) was 183%, remaining above the prudential requirements communicated by FINMA.

1 Calculated after the application of haircuts and inflow and outflow rates, as well as, where applicable, caps on Level 2 assets and cash inflows. 2 Calculated based on an average of 65 data points in the third quarter of 2021 and 64 data points in the second quarter of 2021.

#### Section 3 UBS Switzerland AG standalone

#### Key metrics of the third quarter of 2021

The table below is based on the Basel Committee on Banking Supervision (the BCBS) Basel III rules.

During the third quarter of 2021, common equity tier 1 (CET1) capital decreased slightly by CHF 0.1 billion to CHF 12.2 billion, mainly as additional accruals for dividends were almost entirely offset by operating profit. Risk-weighted assets (RWA) were largely stable at CHF 110.0 billion. Leverage ratio exposure

decreased by CHF 3 billion to CHF 339 billion, mainly driven by lower securities financing transactions and high-quality liquid asset (HQLA) securities, partly offset by an increase in lending balances.

Average HQLA decreased by CHF 5.4 billion to CHF 92.3 billion, driven by lower average cash balances mainly due to a net deposit decrease and higher lending activities. Average total net cash outflows decreased by CHF 0.7 billion to CHF 64.5 billion.

1 The fully loaded ECL accounting model excludes the transitional relief of recognizing ECL allowances and provisions in CET1 capital in accordance with FINMA Circular 2013/1 "Eligible capital – banks." 2 Calculated as 8% of total RWA, based on total capital minimum requirements, excluding CET1 buffer requirements. 3 Swiss SRB going and gone concern requirements and information for UBS Switzerland AG are provided on the next page. 4 Leverage ratio exposures and leverage ratios for the respective periods in 2020 do not reflect the effects of the temporary exemption that applied from 25 March 2020 until 1 January 2021 and was granted by FINMA in connection with COVID-19. Refer to the "Introduction and basis for preparation" and "UBS Switzerland AG standalone" sections of our 31 December 2020 Pillar 3 report, available under "Pillar 3 disclosures" at ubs.com/investors, for more information. 5 Calculated based on quarterly average. Refer to "Liquidity coverage ratio" in this section for more information. 6 UBS Switzerland AG is required to maintain a minimum NSR of at least 100% on an ongoing basis as defined by Art. 17h para. 1 of the Liquidity Ordinance. A portion of the excess funding is needed to fulfill the NSFR requirement of UBS AG. Refer to the "Introduction and basis for preparation" section of this report for more information.

# Swiss SRB going and gone concern requirements and information

UBS Switzerland AG is considered a systemically relevant bank (an SRB) under Swiss banking law and is subject to capital regulations on a standalone basis. As of 30 September 2021, the going concern capital and leverage ratio requirements for UBS Switzerland AG standalone were 14.32%, including a countercyclical buffer of 0.02%, and 5.00%, respectively. The gone concern requirements were 8.87% for the RWAbased requirement and 3.10% for the leverage ratio denominator (LRD)-based requirement.

The Swiss SRB framework and requirements applicable to UBS Switzerland AG standalone are the same as those applicable to UBS Group AG consolidated, with the exception of a lower gone concern requirement, corresponding to 62% of the Group's gone concern requirement (before applicable reductions).

| As of 30.9.21  | RWA                |               | LRD               |         |

1 Includes applicable add-ons of 1.44% for RWA and 0.50% for LRD. 2 A maximum of 25% of the gone concern requirements can be met with instruments that have a remaining maturity of between one and two years. Once at least 75% of the minimum gone concern requirement has been met with instruments that have a remaining maturity of greater than two years, all instruments that have a remaining maturity of between one and two years remain eligible to be included in the total gone concern capital. 3 A higher add-on requirement for market share was applied in the third quarter of 2021, of which 0.45% was applied for RWA and 0.16% for LRD.

### Leverage ratio information

#### Swiss SRB leverage ratio denominator

| CHF billion  | 30.9.21 | 30.6.21 |
|--|---------|---------|
| Leverage ratio denominator   |         |         |
| Swiss GAAP total assets  | 319.2   | 323.3   |
| Difference between Swiss GAAP and IFRS total assets                  | 3.3     | 3.6     |
| Less: derivative exposures and SFTs <sup>1</sup>                     | (11.1)  | (13.8)  |
| On-balance sheet exposures (excluding derivative exposures and SFTs) | 311.4   | 313.1   |
| Derivative exposures   | 4.8     | 5.2     |
| Securities financing transactions                                    | 6.2     | 8.4     |
| Off-balance sheet items  | 16.5    | 15.6    |
| Items deducted from Swiss SRB tier 1 capital                         | (0.3)   | (0.2)   |
| Total exposures (leverage ratio denominator)                         | 338.6   | 342.0   |

1 The exposures consist of derivative financial instruments, cash collateral receivables on derivative instruments, receivables from SFTs, and margin loans, as well as prime brokerage receivables and financial assets at fair value not held for trading, both related to SFTs. These exposures are presented separately under Derivative exposures and Securities financing transactions in this table.

#### Liquidity coverage ratio

In the third quarter of 2021, the liquidity coverage ratio (LCR) of UBS Switzerland AG, which is a Swiss SRB, was 143%, remaining above the prudential requirement communicated by the Swiss Financial Market Supervisory Authority (FINMA) in connection with the Swiss Emergency Plan.

#### Liquidity coverage ratio

|                                     | Weighted                  | value <sup>1</sup>        |  |
|-------------------------------------|---------------------------|---------------------------|--|
| CHF billion, except where indicated | Average 3Q21 <sup>2</sup> | Average 2Q21 <sup>2</sup> |  |
| High-quality liquid assets          | 92                        | 98                        |  |
| Total net cash outflows             | 64                        | 65                        |  |
| of which: cash outflows             | <i>89</i>                 | <i>93</i>                 |  |
| of which: cash inflows              | 25                        | 28                        |  |
| Liquidity coverage ratio (%)        | 143                       | 150                       |  |

1 Calculated after the application of haircuts and inflow and outflow rates, as well as, where applicable, caps on Level 2 assets and cash inflows. 2 Calculated based on an average of 65 data points in the third quarter of 2021 and 64 data points in the second quarter of 2021.

1 Based on Swiss SRB (including transitional arrangement) requirements. 2 Based on Swiss SRB requirements applicable as of 1 January 2020. 3 Loans granted by UBS AG, Switzerland. 4 As applied in UBS Switzerland AG's financial statements under Swiss GAAP.

#### Section 4 UBS Europe SE consolidated

The table below provides information about the regulatory capital components, capital ratios, leverage ratio and liquidity of UBS Europe SE consolidated based on the Pillar 1 requirements.

During the third quarter of 2021, common equity tier 1 (CET1) remained stable. Risk-weighted assets increased by EUR 0.3 billion to EUR 13.5 billion, mainly driven by increases in credit risk related to derivative transactions. Leverage ratio

exposure remained largely stable and amounted to EUR 47.2 billion. The average liquidity coverage ratio remained stable, with a EUR 0.3 billion decrease in total net cash outflows.

Entities may also be subject to significant Pillar 2 requirements, which represent additional amounts of capital considered necessary and are agreed with regulators based on the risk profile of the respective entity.

1 Based on applicable EU regulatory rules. 2 Comparative figures have been restated to align with the regulatory reports as submitted to the European Central Bank (the ECB). 3 Calculated as 8% of total RWA, based on total capital minimum requirements, excluding CET1 buffer requirements. 4 This represents the CET1 ratio that is available for meeting buffer requirements. It is calculated as the CET1 ratio minus 4.5% and after considering, where applicable, CET1 capital that has been used to meet tier 1 and / or total capital ratio requirements under Pillar 1. 5 Comparative figures have been adjusted following the initial CRRII go-live to align with the regulatory reports as submitted to the European Central Bank (the ECB). 6 On the basis of tier 1 capital. 7 Figures are calculated on a twelve-month average. 8 The local disclosure requirement for the net stable funding ratio came into force in June 2021.

#### Section 5 UBS Americas Holding LLC consolidated

The table below provides information about the regulatory capital components, capital ratios, leverage ratio and liquidity of UBS Americas Holding LLC consolidated, based on the Pillar 1 requirements and in accordance with US Basel III rules.

Effective 1 October 2021, UBS Americas Holding LLC is subject to a stress capital buffer (SCB) of 7.1%, in addition to the minimum capital requirements. The SCB was determined by the Federal Reserve Board following the completion of the annual Dodd–Frank Act Stress Testing (DFAST) and the Comprehensive Capital Analysis and Review (CCAR) (and based on DFAST results and planned future dividends). The SCB, which replaces the static capital conservation buffer of 2.5%, is subject

to change on an annual basis or as otherwise determined by the Federal Reserve Board.

During the third quarter of 2021, common equity tier 1 (CET1) remained stable. Risk-weighted assets (RWA) increased by USD 2.4 billion to USD 71.6 billion, mainly driven by an increase in credit risk RWA. Leverage ratio exposure, calculated on an average basis, increased by USD 4.5 billion to USD 175.5 billion due to increased lending exposure.

Entities may also be subject to significant Pillar 2 requirements, which represent additional amounts of capital considered necessary and are agreed with regulators based on the risk profile of the respective entity.

1 The liquidity coverage ratio (LCR) requirement became effective as of 1 January 2021 and the related disclosure requirement in the second quarter of 2021. The net stable funding ratio (NSFR) requirement became effective as of 1 July 2021 and related disclosures will come into effect in the second quarter of 2023. 2 Calculated as 8% of total RWA, based on total capital minimum requirements, excluding CET1 buffer requirements. 3 This represents the CET1 ratio that is available for meeting buffer requirements. It is calculated as the CET1 ratio minus 4.5%. 4 On the basis of tier 1 capital. 5 US Regulatory authorities temporarily eased the requirements for the SLR, permitting the exclusion of US Treasury securities and deposits with the Federal Reserve Banks from the SLR denominator through March 2021. This exclusion resulted in an increase in the SLR of 187 bps on 31 December 2020 and 136 bps on 30 September 2020. 6 Figures are calculated on a quarterly average.

This is a general list of the abbreviations frequently used in our financial reporting. Not all of the listed abbreviations may appear in this particular report.

**Cautionary Statement I** This report and the information contained herein are provided solely for information purposes, and are not to be construed as solicitation of an offer to buy or sell any securities or other financial instruments in Switzerland, the United States or any other jurisdiction. No investment decision relating to securities of or relating to UBS Group AG, UBS AG or their affiliates should be made on the basis of this report. Refer to UBS's Annual Report 2020 on Form 20-F, quarterly reports and other information furnished to or filed with the US Securities and Exchange Commission on Form 6-K, available at *ubs.com/investors*, for additional information.

**Rounding I** Numbers presented throughout this report may not add up precisely to the totals provided in the tables and text. Percentages and percent changes disclosed in text and tables are calculated on the basis of unrounded figures. Absolute changes between reporting periods disclosed in the text, which can be derived from numbers presented in related tables, are calculated on a rounded basis.

**Tables I** Within tables, blank fields generally indicate non-applicability or that presentation of any content would not be meaningful, or that information is not available as of the relevant date or for the relevant period. Zero values generally indicate that the respective figure is zero on an actual or rounded basis. Values that are zero on a rounded basis can be either negative or positive on an actual basis.
