Equities revenues

Cash and derivatives revenues up on increased client activity

 - Equity-linked revenues were broadly in line with the last quarter on slightly higher client activity
- **Prime services:**
 - Prime brokerage revenues were marginally down despite a slight increase in deposit balances
 - ETD revenues decreased slightly due to lower client volumes and spreads
- **Other:** negative revenues from a number of items including hedging costs

FICC revenues

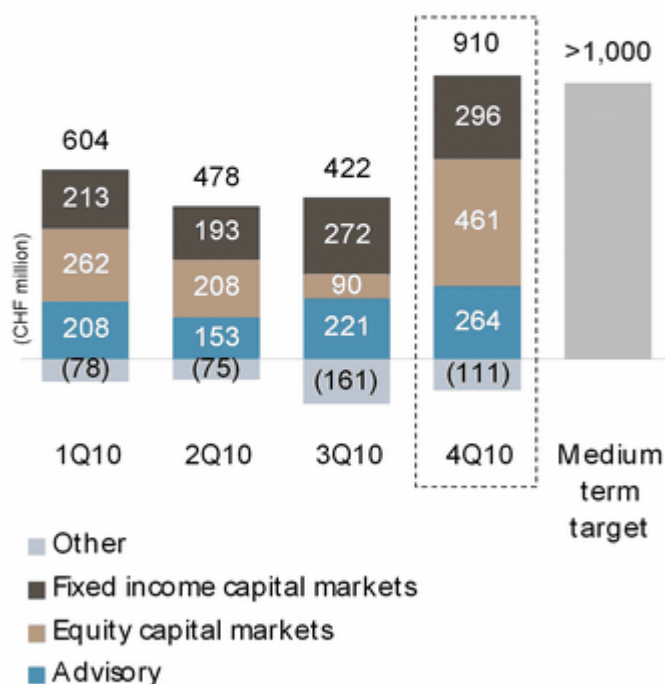

Improved revenues driven by FX; credit and emerging markets weaker in more challenging market conditions

- **Macro:**
 - FX revenues rose on improved customer activity
 - Rates revenues were largely in line with the prior quarter as gains in non-linear interest rates and unwinds of existing positions partially offset lower linear revenues
- **Credit:** revenues fell as continued good performance from flow credit trading was offset by reduced structured credit revenues
- **Emerging markets:** revenues decreased as all regions saw declines due to geopolitical and economic concerns and increased interest rate volatility
- **Other:**
 - Negative debit valuation adjustments on derivatives and other items including losses from counterparty exposure management
 - Residual risk positions continued to be reduced and contributed gains of CHF 98 million

Investment banking revenues

Stronger performance led by equity capital markets

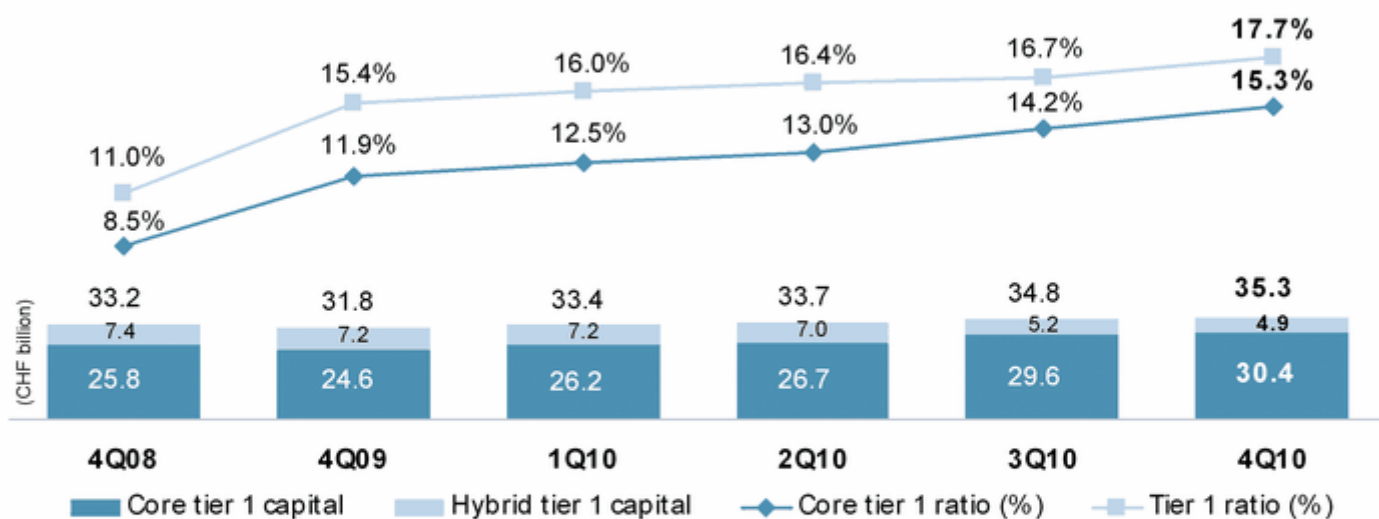

- **Advisory:** 19% increase in revenues as the quarter included several large transactions
- **Capital markets:**
 - **Equities:** revenues increased fivefold, reflecting stronger deal activity across all regions and improved market share¹
 - **FICC:** revenues increased slightly against a flat overall fee pool environment¹
- **Other:** tightening of credit spreads led to mark-to-market losses on hedges against the loan book
- Overall UBS fee based market share¹ increased compared with 3Q10 (4.4% from 3.7%)
 - M&A: 4.9% (4.1%)
 - ECM: 5.4% (3.9%)
