Climate change impacts ecosystems, societies, and economies worldwide, and we support clients achieving their goals in support of the transition to a low-carbon economy. We focus our climate change strategy on risk management, investments, financing, research and our own operations.

We are committed to respecting and promoting human rights in all our business activities. We believe this is a responsible approach underlining our desire to reduce as far as possible potentially negative impacts on society.

We recognize the risks associated with deforestation and forest degradation. We are a member of the Roundtable on Sustainable Palm Oil and have endorsed the “Soft Commodities Compact”.
