**Fund Selector Asia House Awards
Singapore 2021**
Best Equity House

yuǎn jiàn | foresight, vision

For more information about the awards mentioned, please visit the award page of our website.

Important information

1. The Fund, UBS (Lux) Equity SICAV – All China (USD) (“**UBS All China Equity Fund**”), invests mainly in shares and other equity interests of companies domiciled in the People’s Republic of China (“PRC”) as well as in other companies that have close economic links with the PRC. These investments contain securities listed within the PRC (onshore) or outside of the PRC (offshore).
2. The Fund’s investments are concentrated in China. The value of the Fund may be more volatile than that of a fund having more diverse portfolio of investments. The Fund’s investments in emerging markets, e.g. PRC, may involve a greater risk than developed markets such as liquidity risks, currency risks/control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility.
3. The Fund may use financial derivative instruments for investment management and hedging purposes. The Sub-Fund’s net derivative exposure may be up to 50% of the Sub-Fund’s net asset value. It may involve additional risks, e.g. counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. Under extreme market conditions and circumstances, investment in the Fund may potentially result in total loss of investment.
4. Specifically for the share classes with “-mdist” in their name, the Fund may at the discretion of the Management Company make distributions out of capital or out of gross income while charging/ paying all or part of the Fund’s fees and expenses to/out of capital of the Fund, resulting in an increase in the payment of dividends by the Fund. Payment of dividends out of capital or on a gross-of-fee basis may result in an immediate reduction of the net asset value per share.
5. Any distributions from the income and/or involving the capital result in an immediate reduction of the net asset value per unit of the Fund. Payment of dividends out of Capital amounts to a return or withdrawal of part of an investor’s original investment or from any capital gains attributable to that original investment.
6. Investors should not invest in the Fund solely based on this document and should read the relevant offering document.

Why All China equity approach?

1. China is now the most active Initial Public Offering (IPO) market

An "All China equity" approach allows investors to tap into the attractive opportunities that the China onshore and offshore markets can offer.

Number of IPOs

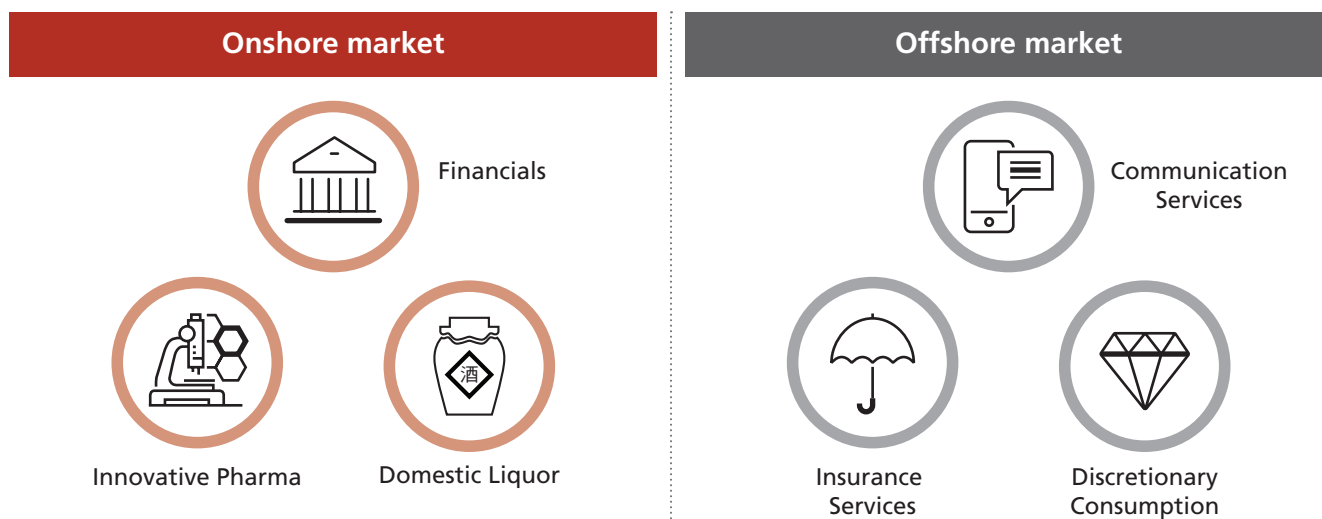

Source: WFE, Bloomberg, Goldman Sachs Research. Data as of July 2021.

Note: [^] based on latest available data updated by respective exchanges on WFE database.

2. Combine high-growth sectors

Onshore markets have more companies in fast-growing healthcare and consumer sectors, while offshore markets have a big selection of innovative tech and services companies.

Key opportunities

3. Diversify risk

China A-share markets have low correlation to other global markets. Adding China A-shares to your portfolio will help diversify your investments.

Why invest?

The **UBS All China Equity Fund** invests in companies that are listed in its onshore (domestic) market and offshore exchanges. It is a highly active fund with concentrated holdings.

1 All-in-one China equity solution that **flexibly allocates** across China onshore and offshore markets.

20-50
Best ideas

2 High conviction portfolio that invests in companies with the **best long-term potential** across both markets.

3 Managed by **award-winning** China equity team.
