

Sustainably pursuing your investment goals

UBS (Lux) Strategy SICAV – Income Sustainable (USD)

Important information

1. The Fund invests at least 5% and up to 35% of its net assets in equity securities and at least 60% and up to 95% of its net assets in bonds. The Fund may invest in high yield bonds, emerging markets bonds and commodities.
2. At least 70% of the net assets of the Fund are allocated to investment strategies (i.e. collective investment schemes and/or direct investments) that (a) either (i) promote environmental and/or social characteristics or deemed equivalent thereto; or (ii) have the reduction of carbon emissions as an objective, or deemed equivalent thereto; and (b) are subject to the portfolio manager's sustainability focus strategy.
3. The Fund's investments may be subject to risks associated with a sustainable investment focus, investing in other collective investment schemes/funds, asset allocation strategy, debt securities, equities, currency, Renminbi currency, emerging markets, investments in instruments with loss-absorption features, securities lending transactions, implementation of active currency position, distribution out of/effectively out of the Fund's capital, share classes with a fixed percentage in their names and hedged classes.
4. The Fund's sustainable investment focus carries the risk that the Fund may underperform funds that do not utilize a sustainable investment strategy. Further, the implementation of the sustainable investment strategy may result in foregoing opportunities to buy certain securities when it might otherwise be advantageous to do so, and/or selling securities when it might be disadvantageous to do so, which may adversely affect the Fund's investment performance.
5. In assessing the eligibility of an issuer, there is a dependence upon information and data from external research data providers and internal analyses, which may be subjective, incomplete, inaccurate or unavailable. As a result, there is a risk of incorrectly or subjectively assessing a security or issuer or there is a risk that the Fund could have exposure to issuers who do not meet the relevant criteria. In addition, there is a lack of standardized taxonomy of ESG investments.
6. The Fund's investments in debt securities may be subject to credit/counterparty risk, interest rate risk, volatility and liquidity risk, downgrading risk, valuation risk, credit rating risk and below investment grade or unrated risk.
7. The Fund may gain exposure to its investments through collective investment schemes in which case the Fund will not have control of the investments of the underlying funds and will be subject to the risks associated with the underlying funds, particularly where the Fund predominantly invests in underlying funds.
8. The Fund may use financial derivative instruments for investment management and hedging purposes. Subject to the net derivative exposure of the Fund, the Fund may use financial derivative instruments extensively for investment purposes. The Fund's net derivative exposure may be up to 50% of the Fund's net asset value.

9. In respect of share class with "-mdist" in their name, dividends may be paid out of or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction of the net asset value per share.
10. The distribution amount and net asset value of the hedged class of shares may be adversely affected by differences in the interest rates of the reference currency of the hedged class and the Fund's base currency, resulting in an increase in the amount of distribution that is paid out of or effectively out of capital and hence a greater erosion of capital than other non-hedged classes.
11. Share classes with a fixed percentage in their names do not distribute a fixed amount. The absolute distributions received by investors may vary from month to month depending on the net asset value of the Fund as of the end of the month.
12. This investment may involve risks that could result in loss of part or entire amount of investors' investment.
13. Investors should not invest in the Fund solely based on this document and should read the relevant offering documents for further details including risk factors.
14. Investors are responsible for their investment decisions and should seek independent financial and professional advice if required.

Our solution – UBS Strategy Income Sustainable[#]

Fund information	
Fund name	UBS (Lux) Strategy SICAV - Income Sustainable (USD)
Fund inception date	28 January 2014
Base currency	USD
Total fund assets	USD 75.22 million (as of 29 February 2024)
Management fee	1.04%
Dealing	Daily

Available share classes	ISIN
(HKD) P-6%-mdist ^{11, 12}	LU2536444511
P-6%-mdist ^{11, 12}	LU2536444438
P-acc	LU0994951548

11 The share classes with “-mdist” aim to pay dividends on a monthly basis. **Dividend is not guaranteed. Dividend may be paid out of capital.** Share classes with “-mdist” in their name may also make distributions out of capital and realized capital gains, at the discretion of the Management Company, or pay distributions out of gross income while charging/paying all or part of the fund’s fees and expenses to/out of the capital of the relevant fund, resulting in an increase in distributable income for the payment of distributions by the fund and therefore, the fund may effectively pay distributions out of capital. Any distributions involving payment of dividends out of the fund’s capital or payment of dividends effectively out of the fund’s capital (as the case may be) may result in an immediate reduction of the next asset value per share/unit.

12 A positive distribution yield does not imply a positive return. Distribution yield = (Dividend per unit on last record date x 12/Previous monthend NAV) x 100. The distribution yields shown here are for reference only. These share classes continue to distribute in periods that the Fund has negative return/is making losses which further reduces the NAV of the Fund. In extreme circumstances, investors may not be able to get back the original investment amount. Constant distributing share classes must not be seen as alternative to savings account or fixed-interest paying investment.
