**The Swiss UBS asset management business was transferred from UBS AG to UBS Asset Management Switzerland AG, a member of UBS Group. The transfer became effective on 17 June 2019. UBS Asset Management Switzerland AG is a FINMA approved asset manager of collective investment schemes.

Shareholders may obtain the prospectus, the Key Investor Information Documents (KIIDs), the latest annual and semi-annual reports, the changes in the composition of the securities portfolio during the reporting period and copies of the Memorandum and Articles of Association free of charge from the registered office of the Investment Manager, the Manager, the Administrator, or the local representatives in the countries where the Company is registered and in Switzerland at UBS Switzerland AG, Bahnhofstrasse 45, 8098 Zurich, Switzerland.

Directors' Report

Report of the Directors

The Directors present herewith their report and audited financial statements for UBS (Irl) Investor Selection PLC (the "Company") for the year ended 30 September 2019.

Principal Activities

The Company is an open-ended investment company with segregated liability between its sub-funds and variable capital organised under the laws of Ireland.

The Directors have directed the affairs of the Company in accordance with the Companies Act 2014 (the "Act").

The Company comprises the following sub-funds:

UBS (Irl) Investor Selection - Currency Allocation Return Strategy

The investment objective of the sub-fund is to seek to achieve a return in excess of the reference index. The reference index is the sterling component of the Citigroup World Money Market Index Series - GBP 1 Month Euro Deposit.

UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund

The investment objective of the sub-fund is to seek to achieve risk-adjusted capital appreciation over a three year timeframe.

UBS (Irl) Investor Selection - Global Equity Long Short Fund

The investment objective of the sub-fund is to seek to deliver a positive return, over a three year timeframe, by exploiting mispriced stocks in equity markets around the world, including emerging markets. This sub-fund aims to demonstrate low correlation with, and less volatility than, equity markets.

UBS Global Emerging Markets Opportunity Fund

The investment objective of the sub-fund is to seek to achieve capital appreciation on a risk adjusted basis over the medium to long term.

There can be no guarantee that the sub-funds will be able to achieve their investment objectives or be profitable.

Business Review, Results, Activities and Future Developments

The results of operations are set out on page 13. A review of activities is contained in the Investment Manager's Reports for each of the four active sub-funds of the Company. Key Performance Indicators ("KPIs") monitored by the Directors are included in the Investment Manager's Reports for each of the sub-funds.

Structure

The Company is structured as an umbrella fund consisting of different sub-funds each comprising one or more share classes. Shares issued in each sub-fund will rank pari passu with each other in all respects except to the extent that they may differ in respect of certain matters including currency of denomination, hedging strategies, if any, applied to the currency of a particular class, dividend policy, voting rights, modifications on return of capital, the level of fees and expenses to be charged or the minimum subscription and minimum holding, if applicable. The assets of each sub-fund will be invested separately on behalf of each sub-fund in accordance with the investment objective and policies of each sub-fund. A separate portfolio of assets is not maintained for each class of share within a sub-fund.

As at 30 September 2019, the Company has established the sub-funds and classes which are set out in the supplements and the prospectus. Additional sub-funds in respect of which a supplement or supplements will be issued may be established by the Directors with the prior approval of the Central Bank of Ireland (the "Central Bank"). Additional classes in respect of which a supplement or supplements will be issued may be established by the Directors upon notification to, and clearance in advance by the Central Bank.

Directors' Report (continued)

Directors and Company Secretary

John Donohoe*

Eimear Cowhey*

Adrian Waters*

Claire Cawley (appointed 14 October 2018 and resigned 21 June 2019)

Gavin Byrnes (appointed 01 August 2019)

All Directors are non-executive.

* Non-executive Director independent of the Investment Manager.

Company Secretary details are disclosed on page 2.

In accordance with the Articles of Association, the Directors are not required to retire by rotation.

Directors' and Secretary's Interests in Shares

The Directors and Company Secretary who held office at 30 September 2019 had no interests in the shares of the Company during the year (30 September 2018: no interests in the shares of the Company).

Political Donations

The Company made no political donations during financial year ended 30 September 2019 (2018: Nil).

Dividend Policy

The Directors will have absolute discretion as to the payment of dividends. No dividends were paid or payable for the year ended 30 September 2019 and 30 September 2018.

Concentration of Investments

A sub-fund may at any one time be invested in a single industry or country and few issuers provided that such concentration complies with the UCITS Regulations. To the extent that a sub-fund's investments are concentrated in these ways, the overall adverse impact on a sub-fund could be considerably greater than if a sub-fund's investments were not concentrated to such an extent. A sub-fund is only concentrated in such a way if it is less risky to do so.

Accounting Records

The measures taken by the Directors to ensure compliance with the requirements of Section 281 to 285 of the Act, regarding adequate accounting records are through the appointment of the administrator, the implementation of necessary policies and procedures for recording transactions, the employment of appropriately qualified accounting personnel and the provision of adequate resources, including appropriate computerised accounting systems, to the financial function.

The accounting records of the Company are maintained at Ormonde House, 12-13 Lower Lesson Street, Dublin 2, Ireland.

Risk Management

The role of the Board of Directors is to identify, monitor and manage risk on behalf of the Company. The Company has adopted procedures to ensure that material risks relating to the Company and its sub-funds have been identified and are managed.

The Directors of the Company have agreed that this process is suitable for adoption as the risk management process of the Company. UBS Fund Management (Luxembourg) S.A. (the "Manager") is the Manager and is responsible for the risk management process.

The Directors of the Company have appointed J.P. Morgan Bank (Ireland) plc as depositary who provide the safe-keeping of all the assets of the Company and are subject to regulations of the Central Bank of Ireland.

Going Concern

The Directors have made an assessment of the Company and its sub-funds ability to continue as a going concern and are satisfied that the Company and its sub-funds have the resources to continue in business for the foreseeable future. Furthermore the management is not aware of any material uncertainties that may cast doubt upon the Company and its sub-funds ability to continue as a going concern. Therefore the financial statements continue to be prepared on a going concern basis.

Directors' Report (continued)

Risk & Uncertainties

The Company is exposed to principal risks such as market, credit and liquidity risk. The manner in which these risks have been dealt with are disclosed in note 9 of the financial statements.

Corporate Governance Code

Effective 1 January 2013, the Board of Directors voluntarily adopted the Corporate Governance Code (the "IF Code") for Irish Domiciled Collective Investment Schemes as published by Irish Funds ("IF"), as the Company's corporate governance code. The Board of Directors has assessed the measures included in the IF Code as being consistent with its corporate governance practices and processes for the financial year.

General Principles

The Company is subject to comply with the requirements of the Act, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 (as amended) (the "UCITS Regulations") and the Central Bank UCITS Regulations 2019 (the "Central Bank UCITS Regulations"), and with effect from 1 November 2015, the Central Bank (Supervision and Enforcement) Act 2013 as applicable. The European Communities (Directive 2006/46/EC) Regulations (S.I. 450 of 2009 and S.I. 83 of 2010) (the "Regulations") requires the inclusion of a corporate governance statement in the Directors' Report.

The Company was also subject to corporate governance practices imposed by:

1. The Act, which is available for inspection at the registered office of the Company; and may also be obtained at: <http://www.irishstatutebook.ie/home.html>;
2. The Articles of Association of the Company which are available for inspection at the registered office of the Company at Ormonde House, 12-13 Lower Leeson Street, Dublin 2, Ireland and at the Companies Registration Office in Ireland; and
3. The Central Bank in their UCITS Regulations which can be obtained from the Central Bank's website at :- <http://www.centralbank.ie/regulation/industrysectors/funds/Pages/default.aspx> and are available for inspection at the registered office of the Company.

Internal Control and Risk Management Systems in Relation to Financial Reporting

The Directors are responsible for establishing and maintaining adequate internal control and risk management systems of the Company in relation to the financial reporting process. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the Company's financial reporting objectives and can only provide reasonable, and not absolute, assurance against material misstatement or loss. The Directors have procedures in place to ensure that all relevant accounting records are properly maintained and are readily available including production of annual and half yearly financial statements.

The Directors have appointed the Administrator to maintain the books and records of the Company. The Administrator is authorised and regulated by the Central Bank and must comply with the rules imposed by the Central Bank. From time to time, the Directors examine and evaluate the Administrator's financial accounting and reporting routines. The annual financial statements of the Company are produced by the Administrator and reviewed by the Investment Manager. They are required to be approved by the Directors and the annual and half yearly financial statements of the Company are required to be filed with the Central Bank. During the period of these financial statements, the Directors were responsible for the review and approval of the annual financial statements as set out in the Statement of Directors' Responsibilities. The statutory financial statements are required to be audited by independent auditors who report annually to the Directors on their findings.

The Directors monitor and evaluate the independent auditor's performance, qualifications and independence. As part of its review procedures, the Directors receive presentations from relevant parties including consideration of applicable accounting standards and their impact on the annual financial statements, and presentations and reports on the audit process. The Directors evaluate and discuss significant accounting and reporting issues as the need arises.

Directors' Report (continued)

Derivative instruments and effective portfolio management techniques

The Investment Manager's reports contained in the Annual Report provide a general description of the use of financial derivative instruments and effective portfolio management techniques during the reporting period and the resulting amount of commitments. The Investment Manager's reports also detail the purposes behind the use of various instruments together with the attendant risks.

The Value-at-Risk (the "VaR") tables report the exposure obtained through effective portfolio management techniques and financial derivative instruments.

The identity of the counterparties relating to these effective portfolio management techniques and financial derivative instruments, the type and amount of collateral received by the Company to reduce counterparty exposure are noted in the market risk tables for each sub-fund (Note 9 to the financial statements).

Income and expenditure related to all effective portfolio management techniques and financial derivative instruments are reflected in the Statement of Comprehensive Income of each sub-fund.

Restrictions on transactions with Connected Persons

The Central Bank UCITS Regulations, paragraph 41(1) – 'Dealings by promoter, manager, trustee, investment adviser and group companies' states in paragraph one that any transaction carried out with a UCITS by a promoter, manager, trustee, investment adviser and/or associated or group companies of these ("connected parties") must be carried out as if negotiated at arm's length. Transactions must be in the best interests of the unit-holders of the UCITS.

The Board of Directors is satisfied that there are arrangements (evidenced by written procedures) in place, to ensure that the obligations set out in paragraph 41(1) are applied to all transactions with connected parties; and the Board is satisfied that transactions with connected parties entered into during the period complied with the obligations set out in this paragraph.

Significant events during the reporting period

Ms. Claire Cawley was appointed as a Director of the Company with effect from 14 October 2018 and resigned on 21 June 2019. Mr. Gavin Byrnes was appointed as a Director of the Company on 01 August 2019.

The following classes were launched and reopened on the fund UBS (Irl) Investor Selection-Currency Allocation Return Strategy:

Class IA-1 SEK share class was launched as at 13 December 2018.

Class I-A3 SEK share class was launched as at 30 April 2019.

Class P SEK share class was launched as at 30 April 2019.

Class I-A3 EUR share class was launched as at 24 June 2019.

Class I-A1 USD share class was launched as at 2 August 2019.

Class (USD) I-B-acc share class was reopened as at 27 February 2019.

Class I-B GBP share class was reopened as at 15 October 2018 and Class Q SGD share class was reopened as at 8 January 2019 in the UBS Global Emerging Markets Opportunity Fund.

A new prospectus was issued on 17 June 2019 in relation to updates of the distributor and Investment Manager for the funds UBS (Irl) Investor Selection-Currency Allocation Return Strategy and UBS Global Emerging Markets Opportunity Fund.

The Swiss UBS asset management business was transferred from UBS AG to UBS Asset Management Switzerland AG, a member of UBS Group. The transfer became effective on 17 June 2019. UBS Asset Management Switzerland AG is a FINMA approved asset manager of collective investment schemes.

Shane Keyes was appointed as Money laundering Reporting Officer through Carne Global Financial Services Ltd with effect from 20 September 2019.

There were no other events during the year that require adjustment to or disclosure in the financial statements.

Events after the reporting period

A new sub-fund, UBS (Irl) Investor Selection PLC - A&Q Fundamental US Equity Long Short UCITS was approved by the Central Bank of Ireland on 29 November 2019. This sub-fund seeks to deliver a positive relative return versus traditional U.S equity long short strategy benchmarks, over a three to five year time frame.

Directors' Report (continued)

Events after the reporting period (continued)

MUFG Alternative Fund Services (Ireland) Limited resigned as Company Secretary and was replaced by Maples Fiduciary Services (Ireland) Limited with effect from 25 October 2019.

Following the decision by the people of the United Kingdom to leave the European Union, there remains uncertainty about the relationship between the United Kingdom and the European Union post "Brexit". The impact of this uncertainty extends to the financial services market within which the Company operates. As at the date of these financial statements, the Directors of the Company continue to monitor the situation as it develops as well as the impact on the Company.

Directors' Compliance Statement

The Directors, in accordance with Section 225(2) of the Companies Act 2014, acknowledge that they are responsible for securing the Company's compliance with certain obligations specified in that section arising from the Companies Act 2014 and Tax laws ('relevant obligations'). The directors confirm that:

- A Compliance Policy Statement has been drawn up by the Directors which sets out the Company's policies for compliance with its relevant obligations under the Irish Companies Act;
- Appropriate procedures have been put in place, which have been designed to secure material compliance with the Company's relevant obligations; and
- A review process, the purpose of which to ensure that the aforementioned assurance measures regarding the Company's Compliance Policies are appropriate and operating effectively during each financial period.

Statement of Relevant Audit Information

- So far as each Director is aware, there is no relevant audit information of which the Company's statutory auditors are unaware; and
- Each Director has taken all steps (being that he/she has made such inquiries of his fellow Directors and of the Company's statutory auditors) that he/she ought to have taken as a Director in order to make himself/herself aware of any relevant audit information and to establish that the Company's statutory auditors are aware of that information.
- Section 167 (2) of the Companies Act 2014 requires the board of directors of a large company to establish an audit committee. The Directors have decided not to form an audit committee as the Board is formed of one non-executive Director with three independent non-executive Directors and the Company complies with the provisions of the Corporate Governance Code. The Company did not establish an audit committee due to the size, nature and complexity of the fund and the Directors do not believe it is required.

Statement of Establishment or otherwise of an Audit Committee

The directors have decided not to establish an audit committee pursuant to section 167(2) of the Act based on (a) the nature, scale and complexity of the Company's business and the range of services and activities undertaken in the course of that business; (b) the resources available to the Company and the resources and expertise of the various third parties engaged to support the Company and carry out certain functions on its behalf; and (c) the procedures in place for the review, approval and circulation of the audited financial accounts and statements which are appropriate for a self-managed investment company pursuant to the UCITS Regulations.

Independent Auditor

KPMG, Chartered Accountants, have expressed their willingness to continue in office in accordance with Section 383 (2) of the Act.

On behalf of the Board

Date: 27 January 2020

Statement of Directors' Responsibilities in respect of the Directors' Report and the financial statements

The Directors are responsible for preparing the Directors' report and the financial statements in accordance with applicable law and regulations.

Company law requires the Directors to prepare financial statements for each financial year. Under that law they have elected to prepare the financial statements in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union and applicable law.

Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of the Company and of its increase in net assets attributable to holders of redeemable participating shares for that year. In preparing the financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- state whether applicable Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- assess the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the assets, liabilities, financial position and profit or loss of the Company and enable them to ensure that its financial statements comply with the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019. They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Company. In this regard they have entrusted the assets of the Company to a trustee for safe-keeping. They are responsible for such internal controls as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, and to prevent and detect fraud and other irregularities. The directors are also responsible for preparing a Directors' Report that complies with the requirements of the Companies Act 2014.

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website. Legislation in the Republic of Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Depository's Report

Report of the Depository to the Shareholders

We have enquired into the conduct of UBS (Irl) Investor Selection PLC ('the Company') for the period 1 October 2018 to 30 September 2019 in our capacity as Depository to the Company.

This report including the opinion has been prepared for and solely for the shareholders in the Company as a body, in accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) UCITS Regulations, 2011, as amended (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations") and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depository

Our duties and responsibilities are outlined in the UCITS Regulations. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion the Company has been managed in that period, in accordance with the provisions of the Company's Memorandum and Articles of Association, the UCITS Regulations and the Central Bank UCITS Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not complied we, as Depository must state why this is the case and outline the steps which we have taken to ensure the situation is rectified.

Basis of Depository Opinion

The Depository conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in the UCITS Regulations and to ensure that, in all material respects, the Company has been managed;

(i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the provisions of its Memorandum and Articles of Association, the UCITS Regulations, the Central Bank UCITS Regulations; and

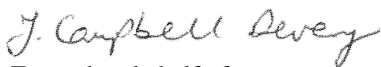

(ii) otherwise in accordance with the provisions of the Company's Memorandum and Articles of Association, the UCITS Regulations and the Central Bank UCITS Regulations.

Opinion

In our opinion, the Company has been managed during the year, in all material respects:

(i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Memorandum and Articles of Association, the UCITS Regulations, the Central Bank UCITS Regulations; and

(ii) otherwise in accordance with the provisions of the Memorandum and Articles of Association, the UCITS Regulations and the Central Bank UCITS Regulations.

Independent Auditor's Report

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF UBS (IRL) INVESTOR SELECTION PLC

1. Report on the audit of the financial statements

Opinion

We have audited the financial statements of UBS (Irl) Investor Selection PLC ('the Company') for the year ended 30 September 2019 (set out on pages 12 to 104), which comprise the Statement of Financial Position, the Statement of Comprehensive Income, the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares, the Statement of Cash Flows, the Schedule of Investments and related notes, including the summary of significant accounting policies set out in note 2. The financial reporting framework that has been applied in their preparation is Irish Law and International Financial Reporting Standards (IFRS) as adopted by the European Union (EU).

In our opinion, the accompanying financial statements:

- give a true and fair view of the assets, liabilities and financial position of the Company as at 30 September 2019 and of its decrease in net assets attributable to holders of redeemable participating shares for the year then ended;
- have been properly prepared in accordance with (IFRS) as adopted by the EU; and
- have been properly prepared in accordance with the requirements of the Companies Act 2014, the European Communities (Undertaking for Collective Investment in Transferable Securities) Regulation 2019 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertaking for Collective Investment in Transferable Securities) Regulations 2015.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with ethical requirements that are relevant to our audit of financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We have nothing to report on going concern

We are required to report to you if we have concluded that the use of the going concern basis of accounting is inappropriate or there is an undisclosed material uncertainty that may cast significant doubt over the use of that basis for a period of at least twelve months from the date of approval of the financial statements. We have nothing to report in these respects.

Other information

The Directors are responsible for the other information presented in the Annual Report together with the financial statements. The other information comprises the information included in the Directors' Report, Investment Manager's Report and the Supplemental Unaudited Information. The financial statements and our auditor's report thereon do not comprise part of the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except as explicitly stated below, any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether, based on our financial statements audit work, the information therein is materially misstated or inconsistent with the financial statements or our audit knowledge. Based solely on that work we have not identified material misstatements in the other information.

Based solely on our work on the other information we report that:

- we have not identified material misstatements in the Directors' Report;
- in our opinion, the information given in the Directors' Report is consistent with the financial statements;
- in our opinion, the Directors' Report has been prepared in accordance with the Companies Act 2014.

Independent Auditor's Report

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF UBS (IRL) INVESTOR SELECTION PLC

1. Report on the audit of the financial statements (continued)

Opinions on other matters prescribed by the Companies Act 2014

We have obtained all the information and explanations which we consider necessary for the purposes of our audit.

In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited and the financial statements are in agreement with the accounting records.

Matters on which we are required to report by exception

The Companies Act 2014 requires us to report to you if, in our opinion, the disclosures of Directors' remuneration and transactions required by Sections 305 to 312 of the Act are not made. We have nothing to report in this regard.

2. Respective responsibilities and restrictions on use

Responsibilities of directors for the financial statements

As explained more fully in the Directors' responsibilities statement set out on page 8, the Directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs Ireland will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A fuller description of our responsibilities is provided on IAASA's website at https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description_of_auditors_responsibilities_for_audit.pdf

The purpose of our audit work and to whom we owe our responsibilities

Our report is made solely to the Company's members, as a body, in accordance with Section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

Investment Manager's Report – Unaudited

1st October 2018 to 30th September 2019

Market environment

The year to end September 2019 saw sharp changes in market mood as the rate of acceleration in global economic growth moderated as financial conditions tighten and trade tensions impact business sentiment and overall demand. After inconsistent Fed rhetoric prompted fears of a US monetary policy mistake in late 2018, a clearer and unequivocally more accommodative global monetary policy narrative, led by the Fed, emerged. Elevated geopolitical risks and the impact of trade disputes have continued to weigh on business confidence and investment and hence economic conditions globally. Interest rate expectations have fallen as a result leading to a clear downward trend in benchmark government bond yields. A fall in financing costs has helped support equity market returns in spite of a clouded outlook. In this context the dispersion of growth between the US and the rest of the world, in addition to a geopolitical flare-ups has driven the US dollar (USD) higher. The UK government agreed a deal with the EU regarding Brexit which offered relief to UK sterling (GBP).

Performance

The Fund delivered a negative return of -1.1% over the reporting period to end September.¹

The key detractors from performance over the period were the Fund's short position in US dollar (USD) and Thai baht (THB) in addition to long positions in Swedish krona (SEK) and Norwegian krone (NOK). Key contributions to performance came from long positions in Japanese yen (JPY) and Mexican peso (MXN).

Outlook

Mid-way through September we added a new position, buying Brazilian real (BRL) out of Hungarian forint (HUF). This position is broadly neutral with respect to ongoing trade tensions; undervalued with positive carry; and should benefit from the evolving political landscape as Bolsonaro's government move to pass large-scale social security reform while Orban's regime becomes increasingly autocratic. Additionally mid-month, we increased the portfolio's long exposure to Norwegian krone (NOK), funded out of Canadian dollar (CAD).

THB continues to stand out as expensive relative to other emerging market currencies, with a growth rate and current account surplus that has been deteriorating over the past couple of years. This strategy change aims to capitalise on recent price action relative to JPY which we view as unwarranted by market fundamentals. Our outlook on USD remains somewhat nuanced. Viewed in relation to Antipodean currencies we see scope for US dollar (USD) to rise further towards its long-term equilibrium levels versus both New Zealand dollar (NZD) and Australian dollar (AUD). New Zealand and Australia are relatively indebted countries whose normal interest rate premium versus the USD is currently below its long-run average. Both economies are positively exposed to world commodities prices, albeit of different varieties, for which softer EM growth, especially in China, is expected to be a headwind: in China we think that government policy is designed more to stabilise the economy rather than engineer a new spurt in growth.

While USD has looked expensive versus a number of European and Asian trading partners for quite some time, it has until recently, been supported by a number of cyclical factors. We expect these to moderate further from here, also seeing scope for interest rate differentials to narrow and a tail risk that would benefit the position if the Trump administration sought to intervene in FX markets to improve US competitiveness. We remain of the view that too much pessimism is currently priced into European currencies. We see scope for EUR upside surprise particularly as Chinese stabilisation takes hold, offering support to external demand. This should be supportive for the currencies of more open economies in general, at the expense of US dollar (USD) as we enter Q4 2019. We continue to focus on those currencies with stronger valuation support such as SEK and NOK which we do not think is merited by the relative economic conditions. While Swedish real estate does pose a risk, this is largely hedged with the portfolio through short positions in other countries with frothy real estate markets such as Canada, New Zealand and Australia.

We estimate that near-term downside risks to the UK economy associated with Brexit and political risks are reflected in the current exchange rate. Most real exchange rate measures show GBP to be around the cheapest level of its long term trading range; the long GBP trade is expected to be profitable if the worst case Brexit scenarios (disorderly departure from the EU) are avoided. If the worst scenario does crystallise, we would expect an initial undershooting of sterling followed by recovery once order to UK-EU trade starts to be restored; we would look to manage the GBP position dynamically in these circumstances.

¹ Performance on a gross of management fees basis, in the base currency of the sub-Fund (GBP)

Investment Manager's Report – Unaudited (continued)

1st October 2018 to 30th September 2019

Outlook (continued)

We remain constructive on JPY, perceiving it to be the most attractively valued currency in G10 and this position to some extent offsets some of the risk-on emerging market positions we currently hold within CARS.

We retain conviction in the Mexican peso (MXN) as we expect it to benefit from tailwinds such as valuation and carry, while having also agreed a trade deal with the US. We believe the political risk in Mexico is being priced too cautiously by the market we see scope for this to reduce and retain conviction in the strength of Mexico's institutions and monetary policy independence against this backdrop.

Historical performance is no indicator of current or future performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming shares.

UBS (Irl) Investor Selection – Equity Opportunity Long Short Fund

Investment Manager's Report – Unaudited

1st October 2018 to 30th September 2019

Market environment

Global equity markets posted moderate gains of 2.4% (in USD terms) over the year starting 1 October 2018 and ending 30 September 2019. The period began with markets falling sharply, as sentiment became bearish due to a mix of tightening financial conditions, softer global growth, trade tensions and geopolitical risks. This led to the VIX spiking to five-year highs and caused a shift from cyclical to defensives. Following the sell-off at the end of 2018, markets rebounded strongly at the start of 2019, which saw a return of risk-on sentiment as investors became more optimistic over US-China trade talks and supportive signals from the Federal Reserve. Toward the later months, fears that trade tensions between the US and China would escalate into a currency war were reignited. Heightened geopolitical risks, likelihood of a no-deal Brexit, as well as global growth concerns gave rise to further central bank easing expectations. Central banks did not disappoint as both the Fed and the ECB delivered rate cuts, with the ECB delivering an additional stimulus package. We saw some risk appetite return soon after, coupled with a sharp mean reversion within the equity market.

Performance

The Q-PF share class of the Equity Opportunity Long Short fund returned positive absolute returns of 3.8% (net in EUR) during the one year ending 30 September 2019. Performance was most negatively impacted during the sell-off in the last quarter of 2018 and in September 2019, which saw an extreme factor rotation from positive momentum and growth into negative momentum and value. This resulted in many well established and crowded positions being sold, while positions with few supporters and significant short positions were strongly bought. Overall, however, both the long and short books contributed positively to performance. The long book was driven by communication services, where shares in Comcast rose on the back of a series of strong quarterly results, supported by above consensus EPS and a strong broadband subscriber base. This was followed by positive stock selection in health care, consumer staples, IT and utilities. The only notable detractor was the energy sector, where many of our holdings were impacted by the oil price decline. In the short book, energy was the largest contributing sector to performance, where we benefited from our short in an E&P company, followed by our shorts in the consumer discretionary, real estate, materials and utilities. Conversely, our shorts in the communication services, consumer staples and IT sectors weighed on performance.

Outlook

Looking ahead to the remainder of 2019, data shows a slowdown: US will slow down from a strong pace of development in 2018 due to the stimulus overhang; China will continue to slow down but in a controlled fashion due to its planned economy characteristics; while in Europe leading economic indicators point to further contraction. This appears to be acknowledged by central banks with most indicating a more accommodative stance relative to what the market expected.

Despite an uptick in political risks and uncertainty surrounding international trade and Brexit, we believe that there are no meaningful indications that the slowdown will lead to an economic or earnings recession. We are merely experiencing slower but still positive economic growth. In addition, while there has been much talk about inflation, realised core inflation in Europe remains muted and below forecasts and has come off in China and the US.

We expect further downgrades as expectations for 2019 still remain high. We are positive on the US equity market, which has recovered strongly but valuations remain average thanks to strong earnings growth in 2018. Similar to Japan, Europe is dependent on an improving global economy, which now faces more headwinds from trade disputes. We remain neutral on Europe due to valuation support. Overall, we expect companies that have experienced a correction in valuation but are still able to grow well to outperform.

We are bottom up stock pickers and using our "3-circle process" that combines fundamental, quantitative and qualitative sources of information, we continue to look for the best risk vs reward opportunities in the market, seeking investments with asymmetric payoffs where there is attractive upside and limited downside risk. We continue to like software and services companies, which are exposed to structural growth opportunities. The outlook for capital goods and industrials continues to be uncertain and valuations are still not attractive.

Historical performance is no indicator of current or future performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming shares.

UBS (Irl) Investor Selection – Global Equity Long Short Fund

Investment Manager’s Report – Unaudited

1st October 2018 to 30th September 2019

Market environment

Global markets had positive returns over the period 1 October 2018 to 30 September 2019 with the MSCI ACWI up +8.6% in EUR terms. It is worth noting that this was a story of two halves, as markets suffered negative returns in the last quarter of 2018 as investors were concerned about economic growth slowdown and trade wars between the US and China. On the other hand, markets strongly bounced back during the first three quarters of 2019 and have fully recovered from last year's losses. The trade optimism could be seen as well-founded, as there was agreement to resume the stalled trade talks between the two countries, as well as a delay on the introduction of further tariffs on Chinese imports into the US. Estimates of economic growth announced over the period gave further signs of softening in activity. Both the UK and German economies shrank in the second quarter, and growth in the US slowed to the lowest rate since early 2017. In China, growth in industrial output fell to a rate not seen in seventeen years. Investors positioned themselves for a turn towards easing from major central banks such as the US Federal Reserve and the European Central Bank, with debate focusing on the depth of forthcoming policy changes given continued mixed economic news.

Performance

The fund fared well over the period and returned absolute return of 2.3% (gross, EUR), driven mainly by the Health Care sector where stock selection for both long and short book was significantly positive, especially the short book. Health care's sharp drop in H1 2019 came as investors worried that the U.S. policy such as universal health coverage is gaining support, which could hinder corporate profits for companies in the space. IT was the other sector which contributed the most to the performance. Technology stocks have reclaimed record highs in 2019, making them one of the first groups to put last year's losses behind them. The Communication Services, Financials and Industrials sector sleeves also added to performance. Conversely, Energy and Materials sectors were the biggest detractors from performance, especially the long book of Energy has dragged on the portfolio significantly. Slowing economy is denting demand for crude oil at a time when the world is awash in oil.

Outlook

The rate of acceleration in global economic growth has moderated but we believe that recent concerns about a sharper deceleration in global growth and the potential for an imminent global recession are overdone. We see both accommodative monetary policy and fiscal stimulus come through and will likely continue in to next year. Meanwhile, developed world consumption growth and investment remains healthy and is supported by robust labour markets and continued wage growth. Stimulus from China and a well-timed Fed pause form the basis for stabilisation in global growth around trend. Moreover, resolution in trade conflicts will also reduce uncertainty and support global growth.

In broad terms we expect volatility to remain above post-crisis averages for much of 2019 as geopolitical risks remain elevated. The broader array of outturns for key macroeconomic variables as the US cycle matures and a more volatile oil price are also likely to sustain a higher volatility regime in traditional asset classes.

At current valuations we find global equities attractive. US equities remain supported by solid corporate earnings growth and increasing capital returns to shareholders. But while we are positive on the outlook for equities in 2019/2020, we believe that the path is likely to be bumpy.

Historical performance is no indicator of current or future performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming shares.

UBS Global Emerging Markets Opportunity Fund

Investment Manager's Report - Unaudited

1st October 2018 to 30th September 2019

Market environment

Emerging markets (MSCI EM) equities returned (-2.0%) in USD terms over the 12 month-period ending September 28, 2018. After peaking in April, EM assets declined amid growing concerns over global slow down and escalation of trade conflict between US and China. Argentina was among the worst markets. It declined following Macri's defeat in primary elections in August. In contrast, Brazil and Russia belonged to the best performing markets. The progress on the social security reforms in Brazil helped sentiment. In Russia, risks of sanctions declined slightly following the Muller report in Q1 2019.

Performance

The strategy outperformed its benchmark, the MSCI Emerging Marketing Index (r), over the 12 month period ending September 30, 2019 (1.74% versus -2.03%). Stock selection in Financials and Health Care contributed most, driven by holdings in Banco Bradesco and Jiangsu Hengrui among others. Bradesco was buoyed by strong earnings results with positive guidance on loan growth. Jiangsu Hengrui rose as the government announced rules for the next rounds of bidding for the centralised procurement scheme that would allow for multiple winners which might reduce the extent of price cuts for generic drugs. What is more, Kweichow Moutai contributed too as it remained relatively insulated from macro uncertainties as consumption upgrade continues. In contrast, Brilliance China Auto and Mahindra & Mahindra detracted most. Mahindra & Mahindra fell as the broad based demand slowdown has seen weak demand for tractors and passenger vehicles. Brilliance declined as the opening of the auto sector to foreign competition weighed on the shares given the uncertainty about the future of the JV with BMW.

Outlook

Global growth slowdown has induced easing bias in central banks and sentiment towards the 13th round of China-US trade talks has improved slightly. Still, we do not expect a quick solution and predicting an exact timing is pure reading of tea leaves. Against this backdrop, the trade conflict continues to cloud the near-term outlook for EM, including corporate confidence and capex decisions.

We continue to focus on countries and companies with domestic growth drivers that would then be better able to weather any uncertainties ahead. It is worth noting that EM is increasingly more domestically driven. As for MSCI EM valuation, at ~1.6x P/B per end of September 2019, it is below its long term average of 1.8x, providing the basis for higher expected returns in the long run. EM currencies also remain inexpensive.

In summary, while we are cautious about being over-optimistic, we continue to believe in a meaningful active allocation to this asset class from a long-term return perspective. EM's valuation and long term trends remain positive, providing strong selected investment opportunities on the back of, among other things, growing share of discretionary spending, increased spending on R&D and innovation and the under-penetration of credit across many EM countries.

Historical performance is no indicator of current or future performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming shares.

UBS Global Emerging Markets Opportunity Fund
Annual report as of 30 September 2019

The notes are an integral part of the financial statements.

Notes to the Financial Statements

1. Organisation

UBS (Irl) Investor Selection PLC (the "Company") was incorporated on 1 December 2009 as an open-ended investment company with variable capital organised under the laws of Ireland under the registration number 478169 and has been authorised in Ireland by the Central Bank of Ireland (the "Central Bank") pursuant to the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended and the Central Bank of Ireland UCITS Regulations, and with effect from 1 November 2015, the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"). The Company is structured as an umbrella fund consisting of different sub-funds, each comprising one or more share classes.

UBS Fund Management (Luxembourg) S.A. acts as Management Company for the Company. As at 31 September 2019, the Company had no employees. The investment activities of the Company are managed by UBS Asset Management (UK) Ltd. (the "Investment Manager"). The registered office of the Company is situated at Ormonde House, 12-13 Lower Lesson Street, Dublin 2, Ireland.

The sub-funds which were active at 30 September 2019 and approved by the Central Bank of Ireland are as follows:

Sub-Fund	Launched on	Commencement of operations
UBS (Irl) Investor Selection - Currency Allocation Return Strategy	30 June 2014	30 June 2014
UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund	29 October 2010	29 October 2010
UBS (Irl) Investor Selection - Global Equity Long Short Fund	28 August 2012	28 August 2012
UBS Global Emerging Markets Opportunity Fund	1 January 2010	1 January 2010

2. Significant accounting policies

(a) Statement of compliance

The financial statements are prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the EU, interpretations adopted by the International Accounting Standards Board (IASB) and Irish Statute comprising the UCITS Regulations, Central Bank UCITS Regulations and Companies Act 2014. This is the first set of the Company's financial statements in which IFRS 9, Financial Instruments have been applied. Changes to significant accounting policies are described on Note 2(d). The financial statements were authorised for issue on 27 January 2020.

(b) Basis of preparation

The financial statements of the Company are presented in United States Dollars (USD) and rounded to the nearest USD. They are prepared on a fair value basis for financial assets and financial liabilities at fair value through profit or loss and derivative financial instruments. Other financial assets and financial liabilities are stated at amortised cost of redemption amount (redeemable participating shares). The Company's comparative Cash Flow Statement has been restated in these financial statements due to a reclassification of foreign exchange movements on cashflows.

Going concern

The Directors have made an assessment of the Company and each sub-fund's ability to continue as a going concern and are satisfied that the Company and sub-funds have the resources to continue in business for the foreseeable future. Furthermore management is not aware of any material uncertainties that may cast doubt upon the Company and any sub-fund's ability to continue as a going concern. Therefore the financial statements continue to be prepared on a going concern basis.

Use of judgments and estimates

The preparation of financial statements, in conformity with IFRS as adopted by the EU, requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of income, expenses, assets and liabilities. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

Notes to the Financial Statements

2. Significant accounting policies (continued)

(b) Basis of preparation (continued)

Use of judgments and estimates (continued)

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period and future periods if the revision affects both current and future periods. Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year, as well as critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements are included in notes 6 and 9.

(c) Foreign currency translation

Functional currency is the currency of the primary economic environment in which the Company operates. If indicators of the primary economic environment are mixed, then management uses its judgement to determine the functional currency that most faithfully represents the economic effect of the underlying transactions, events and conditions. The majority of the Company's investments and transactions are denominated in USD. Investor subscriptions and redemptions are determined based on net asset value, and received and paid in USD. The expenses (including management fees, depositary fees and administration fees) are denominated and paid in USD. Accordingly, management has determined that the functional currency of the Company is USD.

Transactions in foreign currencies are translated into the reporting currency at exchange rates at the dates of the transactions. For practical reasons, a rate that approximates the actual rate at the date of the transaction is often used, for example, an average rate might be used for all transactions in each foreign currency occurring during the year. However, if exchange rates fluctuate significantly, the use of the average rate for the year will be inappropriate. Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency at the exchange rate at that date. Foreign currency exchange differences arising on translation and realised gains and losses on disposals or settlements of monetary assets and liabilities are recognised in the Statement of Comprehensive Income. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are translated to USD at the exchange rate at the date that the fair value was determined. For income and expenses that are recognised in the Statement of Comprehensive Income, the use of average exchange rate is permitted under IFRS if they are a reasonable approximation of the actual. Foreign currency exchange differences relating to investments at fair value through profit and loss and derivative financial instruments are included in the net gains on foreign exchange.

The Company operates a number of sub-funds, each with its separately determined functional currency as stated below.

	Functional Currency	Reporting Currency
UBS (Irl) Investor Selection PLC	USD	USD
UBS (Irl) Investor Selection - Currency Allocation Return Strategy	GBP	GBP
UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund	EUR	EUR
UBS (Irl) Investor Selection - Global Equity Long Short Fund	EUR	EUR
UBS Global Emerging Markets Opportunity Fund	USD	USD

The financial statements of each sub-fund are presented in the currency that it is primarily exposed to with the Company financial statements being presented in USD ("United States Dollars"). The difference arising from translation of the primary statements at different exchange rates, for the purpose of producing the financial statements of the Company, is included as a foreign currency translation adjustment in other comprehensive income in the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares.

The following exchange rates were used for the conversion of the consolidated financial statements into USD as at 30 September 2019 and 2018:

	Closing Rates		Average Rates	
	30 September 2019	30 September 2018	30 September 2019	30 September 2018
GBP	1.2323	1.3041	1.2766	1.3484
EUR	1.0902	1.1615	1.1279	1.1908

Notes to the Financial Statements

2. Significant accounting policies (continued)

(d) New Standards, amendments and interpretations

The following standard has become effective and the Company adopted this standard from 1 October 2018 and did not restate the comparative period.

IFRS 9, 'Financial instruments - classification and measurement' (effective 1 January 2018)

IFRS 9 replaced IAS 39 Financial Instruments: Recognition and Measurement. It includes revised guidance on the classification and measurement of financial instruments, a new expected credit loss model for calculating impairment on financial assets and new general hedge accounting requirements. It also carries forward the guidance on recognition and derecognition of financial instruments from IAS 39.

Classification and measurement of financial assets and financial liabilities

IFRS 9 contains a new classification and measurement approach for financial assets that reflects the business model in which assets are managed and their cash flow characteristics. The standard includes three principal classification categories for financial assets: measured at amortised cost, fair value through other comprehensive income (FVOCI) and fair value through profit or loss (FVTPL). It eliminates the existing IAS 39 categories of held to maturity, loans and receivables and available for sale.

IFRS 9 largely retains the existing requirements in IAS 39 for the classification of financial liabilities. However, although under IAS 39 all fair value changes of liabilities designated as at FVTPL are recognised in profit or loss, under IFRS 9 these fair value changes are generally presented as follows:

- the amount of change in the fair value that is attributable to changes in the credit risk of the liability is presented in OCI; and
- the remaining amount of change in the fair value is presented in profit or loss.

Based on the company's assessment, this standard does not have a material impact on the classification and measurement of financial assets and financial liabilities of the company. This is because:

- the financial instruments classified as held-for-trading under IAS 39 (derivatives) are classified as such under IFRS 9;
- financial instruments currently measured at FVTPL under IAS 39 are designated into this category because they are managed on a fair value basis in accordance with a documented investment strategy. Accordingly, these financial instruments are measured at FVTPL under IFRS 9; and
- financial instruments currently measured at amortised cost are: cash balances and other receivables. These instruments meet the solely payments of principal and interest (SPPI) criterion and are held in a held-to-collect business model. Accordingly, they are continued to be measured at amortised cost under IFRS 9.

IFRS 9 replaced the 'incurred loss' model in IAS 39 with a forward-looking 'expected credit loss' (ECL) model. This requires considerable judgement about how changes in economic factors affect ECLs, which will be determined on a probability-weighted basis.

The new impairment model applies to financial assets measured at amortised cost or FVOCI, except for investments in equity instruments.

Under IFRS 9, loss allowances will be measured on either of the following bases:

- 12-month ECLs: these are ECLs that result from possible default events within the 12 months after the reporting date; and
- lifetime ECLs: these are ECLs that result from all possible default events over the expected life of a financial instrument.

Based on the company's assessment, changes to the impairment model did not have a material impact on the financial assets of the company. This is because:

- the majority of the financial assets are measured at FVTPL and the impairment requirements do not apply to such instruments; and
- the financial assets at amortised cost are short-term (i.e. no longer than 12 months) of high credit quality and/or highly collateralised. Accordingly, the ECLs on such assets are expected to be small.

Notes to the Financial Statements

2. Significant accounting policies (continued)

(d) New standards, amendments and interpretations (continued)

The following table and the accompanying notes below explain the original measurement categories under IAS 39 and the new measurement categories under IFRS 9 for each of the Company's financial assets and financial liabilities as at 1 October 2018.

	Original classification under IAS 39	New classification Under IFRS 9	Original Carrying amount under IAS 39 USD	New Carrying amount under IFRS 9 USD
Financial assets				
Bonds	Designated at FVTPL	FVTPL	169,738,008	169,738,008
Cash and cash equivalents	Loans and receivables	Amortised cost	103,626,749	103,626,749
Equities	Designated at FVTPL	FVTPL	1,897,739,920	1,897,739,920
Equity Swaps	Designated at FVTPL	FVTPL	7,878,775	7,878,775
Forwards	Designated at FVTPL	FVTPL	5,357,374	5,357,374
Funds	Designated at FVTPL	FVTPL	23,637,830	23,637,830
Warrants	Designated at FVTPL	FVTPL	97,049,782	97,049,782
Total financial assets			2,305,028,438	2,305,028,438
Financial liabilities				
Bank overdraft	Amortised cost	Amortised cost	(4,644,962)	(4,644,962)
Equity Swaps	Designated at FVTPL	FVTPL	(7,610,744)	(7,610,744)
Forwards	Designated at FVTPL	FVTPL	(6,403,454)	(6,403,454)
Futures	Designated at FVTPL	FVTPL	(126,233)	(126,233)
Total financial liabilities			(18,785,393)	(18,785,393)

The effect of adopting IFRS 9 has no impact on the carrying value of financial assets as there was deemed to be no material impairment on assets classified at amortised cost.

Under IAS 39, the investments were designated as at FVTPL because they were managed on a fair value basis and their performance was monitored on this basis. These assets have been classified as measured at FVTPL under IFRS 9.

New standards issued but not yet adopted

IFRIC 23 "Uncertainty over Income Tax Treatments" (effective 1 January 2019)

IFRIC 23 "Uncertainty over Income Tax Treatments" was issued by the IASB on 7 June 2017 and will become effective for periods beginning on or after 1 January 2019, with earlier adoption permitted. IFRIC 23 is an interpretation which clarifies how to apply the recognition and measurement requirements in IAS 12 when there is uncertainty over tax treatments.

IFRIC 23 was developed as an interpretation of IAS 12 and so it relates only to income taxes within the scope of that standard. The Company is currently evaluating the impact, if any, that this update will have on its financial statements.

There are no other standards, amendments and interpretations to existing standards that are effective that would be expected to have a significant impact on the Company and its sub-funds.

(e) Financial instruments

(i) Classification

On initial recognition, the Company classifies financial assets as measured at amortised cost or fair value through profit or loss (FVTPL). A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI).

All other financial assets and liabilities of the Company are measured at FVTPL including transferable securities, derivative financial assets and derivative liabilities.

Notes to the Financial Statements

2. Significant accounting policies (continued)

(e) Financial instruments (continued)

(i) Classification (continued)

Business model assessment

In making an assessment of the objective of the business model in which a financial asset is held the Company considers all of the relevant information about how the business is managed, including:

- The documented investment strategy and the execution of this strategy in practice. This includes whether the investment strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- How the performance of the portfolio is evaluated and reported to the Company's management;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- How the Investment Manager is compensated: e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- The frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

The Company has determined that it has two business models.

- Held-to-collect business model: this includes interest, dividend receivables, due from brokers, deposits with credit institutions and receivables. These financial assets are held to collect contractual cash flow.
- Other business model: this includes transferable securities and derivatives. These financial assets are managed and their performance is evaluated, on a fair value basis, with frequent sales taking place.

Assessment whether contractual cash flows are SPPI

For the purpose of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition.

'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are SPPI, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:

- Contingent events that would change the amount or timing of cash flows;
- Leverage features;
- Prepayment and extension features;
- Terms that limit the Company's claim to cash flows from specified assets (e.g. non-recourse features; and
- Features that modify consideration of the time value of money (e.g. periodical reset of interest rates).

The company has determined that the only financial assets classified at amortised cost are cash and cash equivalents due to the related contractual cashflows being solely payments of principal and interest.

Reclassifications

Financial assets are not reclassified subsequent to their initial recognition unless the Company were to change its business model for managing financial assets, in which case all affected financial assets would be reclassified on the first day of the first reporting period following the change in the business model.

The Company is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions. The contractual cash flows of the Company's debt securities are solely principle and interest, however, these securities are neither held for the purpose of collecting contractual cash flows nor held

Notes to the Financial Statements

2. Significant accounting policies (continued)

(e) Financial instruments (continued)

(i) Classification (continued)

both for collecting contractual cash flows and for sale. Consequently, all investments are measured at fair value through profit or loss.

Derivative contracts that have a negative fair value are presented as liabilities at fair value through profit or loss.

The Company's policy requires the Investment Manager and the Board of Directors to evaluate the information about these financial assets and liabilities on a fair value basis with other related financial information.

(ii) Recognition

The Company recognises financial assets and financial liabilities on the date it becomes a party to the contractual provisions of the instruments. Transactions are recognised using trade date accounting. From this date any gains and losses arising from changes in fair value of the financial assets or liabilities are recorded.

(iii) Measurement

Financial instruments are measured initially at fair value (transaction price). Transaction costs on financial assets and financial liabilities at fair value through profit and loss are expensed immediately to the Statement of Comprehensive Income.

Subsequent to initial recognition, all instruments classified at fair value through profit or loss are measured at fair value with changes in their fair value recognised in the Statement of Comprehensive Income. Financial assets classified as receivables are carried at amortised cost using the effective interest rate method, less impairment losses, if any. Financial liabilities, other than those at fair value through profit or loss, are measured at amortised cost using the effective interest rate method. Financial liabilities arising from the redeemable shares issued by the Company are carried at the redemption amount representing the investors' right to a residual interest in the Company's assets.

The fair value of financial assets and liabilities that are not traded in an active market is determined by using valuation techniques. The Company uses a variety of methods and makes assumptions that are based on market conditions existing at each reporting date.

Valuation techniques used for non-standardised financial instruments such as OTC options and forward currency contracts, include the use of comparable recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants making the maximum use of market inputs and relying as little as possible on entity-specific inputs.

(iv) Fair value measurement principles

IFRS 13 establishes a single framework for measuring fair value and making disclosures about fair value measurements when such measurements are required or permitted by other IFRSs. It unifies the definition of fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It replaces and expands the disclosure requirements about fair value measurements in other IFRSs, including IFRS 7.

The fair value of financial instruments is based on their quoted market prices at the reporting date without any deduction for estimated future selling costs. Financial assets and financial liabilities are priced at current mid-price.

The Company's financial instruments are measured at fair value in the Statement of Financial Position and it is usually possible to determine their fair values within a reasonable range of estimates. For the majority of the Company's financial instruments, quoted market prices are readily available.

Notes to the Financial Statements

2. Significant accounting policies (continued)

(e) Financial instruments (continued)

(iv) Fair value measurement principles (continued)

For certain other financial instruments, including amounts due from/to brokers, accounts payable and accrued expenses, the carrying amounts approximate fair value due to the immediate or short-term nature of these financial instruments.

The carrying amounts of the financial assets and liabilities not classified as FVTPL at the reporting date approximated their fair values.

(v) Derecognition

The Company derecognises a financial asset when the contractual rights to the flows from the financial asset expire or are extinguished or it transfers the financial asset and the transfer qualifies for derecognition in accordance with IFRS 9.

The Company uses the first in first out (the “FIFO”) method to determine realised gains and losses on derecognition.

A financial liability is derecognised when the Company’s obligation specified in the contract is discharged, cancelled or the obligation expires.

(vi) Specific instruments

Cash and cash equivalents

Cash comprises current deposits with banks. Cash equivalents are short-term highly liquid investments that are readily convertible to known amounts of cash, are subject to an insignificant risk of changes in value, and are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes. Cash and cash equivalents are valued at face value plus any accrued interest, where applicable.

Forward contracts

Forward contracts, (“Forwards”) are commitments either to purchase or sell a designated financial instrument or currency amount at a specified future date for a specified price. Forward contracts may be settled in cash or in another financial asset. Forwards are individually traded over-the-counter contracts. Forward contracts result in credit exposure to the counterparty to the extent that the counterparty does not meet its obligations under the contract.

Forwards result in exposure to market risk based on changes in market prices relative to contracted amounts. Market risks arise due to the possible movement in foreign currency exchange rates and securities’ values underlying these instruments. In addition, due to the low margin deposits normally required in relation to nominal contract sizes, a high degree of leverage may be typical of a forward trading account. As a result, a relatively small price/rate movement in the underlying security/currency of a forward may result in substantial losses to the Company.

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The Company’s principal liability is its obligation to redeem shares at fair value on any dealing day at the request of a shareholder. Nominal amounts are the underlying reference amounts to foreign currencies upon which the fair value of the forward contracts traded by the Company are based.

While nominal amounts do not represent the current fair value and are not necessarily indicative of the future cash flows of the forward contracts, the underlying price changes in relation to the variables specified by the nominal amounts affect the fair value of these derivative financial instruments.

Notes to the Financial Statements

2. Significant accounting policies (continued)

(e) Financial instruments (continued)

(vi) Specific instruments (continued)

Equity swaps

Equity swaps allow a direct exposure to the market, to a sector or to an individual security. Unlike a forward contract, the contract has no final maturity, the position being closed out at the discretion of the position taker. Equity swaps are used to gain exposure to share price movements without buying the shares themselves. An equity swap on a company's shares will specify the price of the shares when the contract commences. The swap contract is an agreement to pay out cash on the difference between the starting share price and when the swap contract is closed.

Daily fluctuations in the value of a swap contract are recorded for financial reporting purposes as unrealised gains or losses and are recorded as a realised gain or loss when the position is closed.

Futures

Futures are commitments either to purchase or to sell a designated financial instrument or currency at a specified future date for a specified price and may be settled in cash or another financial asset. Futures are standardised exchange-traded contracts. Initial margin requirements for futures are met in cash or other instruments, and changes in the futures contract values are settled daily. Futures contracts have little credit risk as counterparties are futures exchanges.

Futures result in exposure to market risk based on market prices relative to contracted amounts. Market risks arise due to the possible movement in foreign currency exchange rates. In addition, due to the low margin deposits normally required in relation to nominal contract sizes, a high degree of leverage may be typical of a futures trading account. As result, a relatively small price movement in the underlying security of a futures contract may result in substantial losses to the Company. Certain futures exchanges do not permit trading in particular futures contracts at prices that represent a fluctuation in price during a single day's trading beyond certain set limits. If prices fluctuate during a single day's trading beyond those limits, the Company could be prevented from promptly liquidating unfavourable positions and thus could be subject to substantial losses.

The changes in value of open future contracts are recognised as unrealised gains or losses by marking-to-market the value of the contract at the reporting date. When the contract is closed, the difference between the proceeds from (or cost of) the closing transactions and the original transaction is recorded in the Statement of Comprehensive Income.

Swap contracts

Credit default swaps are contracts in which the Company pays or receives premium flows in return for the counterparty accepting or selling all or part of the risk of default or failure to pay off a reference entity for which the swap is written, where the Company has bought protection the maximum potential loss is the value of the premium flows the Company is contracted to pay until maturity of the contract.

Where the Company has sold protection the maximum potential loss is the nominal value of the protection sold.

Interest rate swaps are contracts in which the Company exchanges interest rate cash flows for cash flows based on the return of an equity of a fixed income instrument, a securities index or another stream of cash flows.

These contracts allow the Company to manage its interest rate exposures. Interest rate swap returns are based on the movement of interest rates relative to a specified alternative as per the contract.

All swap contracts are stated at market value. The net income or expense in the swap agreements entered into by the Company is reflected in the Statement of Comprehensive Income. The unrealised gain or loss is reported as an asset or liability and changes in the market value are reflected in the Statement of Comprehensive Income in the year in which they occur.

Notes to the Financial Statements

2. Significant accounting policies (continued)

(e) Financial instruments (continued)

(vi) Specific instruments (continued)

Warrants

Warrant contracts are options to purchase additional securities from the issuer at a specified price during a specified year. Warrants are sometimes used to gain exposure to emerging market equities where custody, liquidity, or other issues make ownership of local shares sub-optimal. Risks associated with the use of warrants are generally similar to risks associated with the use of purchased options. However, warrants do not have standardised terms, and may have longer maturities and may be less liquid than exchange-traded options. In addition, the terms of warrants may limit the Company's ability to exercise the warrants at such times and in such quantities as the Company would otherwise wish. Warrants are measured at fair value through profit or loss and are designated as financial assets or financial liabilities at fair value through profit or loss.

(f) Interest income

Interest income and expense, including interest income from non-derivative financial assets at fair value through profit or loss, are recognised in the Statement of Comprehensive Income using the effective interest method. The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or liability (or, where appropriate, a shorter year) to the carrying amount of the financial asset or liability. When calculating the effective interest rate, the Company estimates future cash flows considering all contractual terms of the financial asset, future credit losses are not considered.

The calculation of the effective interest rate includes all fees and points paid or received that are an integral part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or liability.

(g) Gains and losses on financial assets and financial liabilities at fair value through profit or loss

Gains and losses from financial instruments at fair value through profit or loss include all realised gains/(losses) on transferable securities and financial derivative instruments, unrealised gains/(losses) from fair value changes and foreign exchange differences recognised in the Statement of Comprehensive Income. Realised gains and losses are based on the FIFO method.

(h) Transaction Costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or a financial liability.

An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, the sub-fund shall measure the instrument at its fair value through profit or loss plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Transaction costs on the purchase and sale of bonds, forwards and swaps are included in the purchase and sale price of the investment. Transaction costs cannot be practically or reliably estimated as they are embedded in the price of the investment and cannot be separately verified or disclosed.

Transaction costs on purchases and sales of equities, options and futures are included in net gains/(losses) on investments in the Statement of Comprehensive Income for each sub-fund.

Custody transaction costs are separately identifiable transaction costs and the total costs incurred by each sub-fund during the year are disclosed in Note 16.

Notes to the Financial Statements

2. Significant accounting policies (continued)

(i) Expenses

All expenses, including management fees, depositary fees, interest expenses, bank charges, tax expenses and general and operating fee expenses are recognised in the Statement of Comprehensive Income on an accruals basis. Other fees include general and operating fee expenses, bank charges, miscellaneous expenses, commission expenses, depositary fees and tax expenses.

(j) Net asset value per share (“NAV per share”)

NAV per share at year end is calculated by dividing the net asset value of the relevant sub-fund at year end by the number of redeemable participating shares of the relevant class in issue as at the year end.

(k) Balance due from/(to) brokers

In accordance with the Company policy of trade date accounting for regular way sale and purchase transactions, sales/purchases awaiting settlement represent amounts receivable/payable for securities sold/purchased but not yet settled as at the Statement of Financial Position date. Due from/(to) broker accounts include all of the collateral amounts.

(l) Foreign exchange gains and losses

Foreign exchange gains and losses on financial assets and financial liabilities at fair value through profit or loss are recognised together with other changes in the fair value in the Statement of Comprehensive Income. Included in the net gains/(losses) on foreign exchange are net foreign exchange gains and losses on monetary financial assets and financial liabilities other than those classified at fair value through profit or loss. Foreign exchange differences arising on translation of the sub-funds financial statements into the Company’s financial statements are recognised in Other Comprehensive Income.

(m) Dividend policy

Dividend income and dividend expense are recorded on the ex-dividend date. Dividend income is recognised on a gross basis, before withholding tax. Shares of a sub-fund may be issued as accumulating shares or distributing shares. The dividend policy and information on the declaration and payment of dividends for each sub-fund will be specified in the relevant supplement of the prospectus. The Articles of Association of the Company empower the Directors to declare dividends in respect of any Shares in the Company out of the net income of the relevant sub-fund (whether in the form of dividends, interests or otherwise) and/or net realised gains (i.e. realised gains net of realised and unrealised losses) or net realised and unrealised gains (i.e. realised and unrealised gains net of all realised and unrealised losses) subject to certain adjustments.

(n) Redeemable participating shares

All redeemable participating shares issued by the Company provide the investors with the right to require redemption for cash at the value proportionate to the investor’s share in the Company’s net assets at the redemption date. In accordance with IAS 32 Financial Instruments: Presentation such instruments give rise to a financial liability for the present value of the redemption amount.

Applications for Shares may be made through the Administrator on behalf of the Company. Applications received and accepted by the Administrator prior to the subscription deadline for the relevant subscription day will be processed on that subscription day. Shareholders may redeem their shares on and with effect from any Redemption Day at the Net Asset Value per Share calculated on or with respect to the relevant Redemption Day as described in the Prospectus. Subject to certain exceptions in relation to certain switches of shares from one class to another class in the same Sub-Fund, switching will generally amount to a disposal of the original shares for tax purposes and accordingly, a chargeable gain or an allowable loss may be realised.

Notes to the Financial Statements

2. Significant accounting policies (continued)

(o) Offsetting

Financial assets and liabilities are offset and the net amount presented in the Statement of Financial Position when and only when, the Company has legal right to offset the amounts and it intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis only when permitted under IFRS as adopted by the EU, e.g. for gains and losses arising from a group of similar transactions, such as gains and losses from financial instruments at fair value through profit or loss.

(p) Taxation

The Company is an investment undertaking as defined in section 739B of the Taxes Consolidation Act, 1997. Therefore the Company is not liable to tax in respect of its income and gains, other than on the occurrence of a chargeable event.

Generally a chargeable event arises on redemption, repurchase, cancellation, transfer of shares or on the ending of a 'Relevant Period'. A 'Relevant Period' is an eight year period beginning with the acquisition of the shares by the Shareholder and each subsequent period of eight years beginning immediately after the preceding Relevant Period.

A gain on a chargeable event does not arise in respect of:

- An exchange by a shareholder, effected by way of an arm's length bargain where no payment is made to the shareholder, of shares in the Company for other shares in the Company;
- Any transactions (which might otherwise be considered a chargeable event) in relation to shares held in a recognised clearing system as designated by order of the Irish Revenue Commissioners;
- A transfer by a shareholder of the entitlement to shares where the transfer is between spouses and former spouses, subject to certain conditions; or
- An exchange of shares arising on a qualifying amalgamation or reconstruction (within the meaning of Section 739H of the Taxes Act) of the Company with another investment undertaking.

In the absence of an appropriate declaration, the Company will be liable to Irish tax on the occurrence of a chargeable event.

Capital gains, dividends and interest received may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the Company or its shareholders.

3. Interest income and expense

The following table details the interest income earned and expense incurred by the Company during the year:

	30 September 2019				
	UBS (Irl) Investor Selection-Currency Allocation Return Strategy GBP	UBS (Irl) Investor Selection-Equity Opportunity Long Short Fund EUR	UBS (Irl) Investor Selection-Global Equity Long Short Fund EUR	UBS Global Emerging Market Opportunity Fund USD	UBS (Irl) Investor Selection PLC USD

Notes to the Financial Statements

6. Fair value estimation (continued)

All other assets and liabilities included in the Statement of Financial Position are carried at values that reflect a reasonable approximation of their fair value and are classified as level 2.

The fair value hierarchy is as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices);
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs). The level in the fair value hierarchy within which the fair value measurement of an instrument is categorised in its entirety is determined on the basis of the lowest level input, 1 being the highest level that is significant to the fair value measurement of that instrument in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Company. The Company considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Investments, whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities, exchange traded derivatives, options, US government treasury bills and certain non-US sovereign obligations. Quoted market prices are primarily sourced from market leading financial data vendors. The Company does not adjust the quoted price for these instruments.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These include, fund of funds investments, investment-grade corporate bonds and certain non-US sovereign obligations, and over-the counter derivatives. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

The Company's level 2 investments primarily include forward foreign currency derivatives and equity swaps which are easily valued based on observable market data.

At year end the Company held no assets classified as level 3 investments. There were no level 3 investments held at the end of the last period 30 September 2018. No investments have been transferred between levels.

Notes to the Financial Statements

7. Share capital

The authorised share capital of the Company is 500,000,000,000 shares of no par value and 300,000 redeemable non-participating shares of no par value each. The minimum issued share capital of the Company is 2 redeemable non-participating shares of no par value each. The 2 redeemable non-participating shares of no par value each are held by the Investment Manager. Non-participating shares do not entitle the holders to any dividends and on a winding up entitle the holders to receive the amount paid up thereon but do not otherwise entitle them to participate in the net assets of the Company.

The Company is a daily dealing fund therefore an investor can subscribe and/or redeem as they wish. Both the fund and the investor have an option to redeem shares. No premium is payable on the redemption of shares.

The Directors reserve the right to impose “an anti-dilution levy” representing a provision for market spreads (the difference between the prices at which assets are valued and/or bought or sold) and other dealing costs relating to the acquisition or disposal of assets and top reserve the value of the underlying assets of the sub-fund.

Authorised share capital

All amounts stated in USD

	Number of shares:
Redeemable participating shares of no par value	500,000,000,000
Redeemable non-participating shares of no par value	300,000

The rights attaching to the redeemable participating shares issued in the Company or any class may, whether or not the Company is being wound up, be varied or abrogated with the consent in writing of the shareholders of three-quarters of the issued shares of the Company or the relevant class, or with the sanction of an ordinary resolution passed at a general meeting of the Shareholders of the Company or the relevant class.

The rights attaching to the shares shall not be deemed to be varied by the creation, allotment or issue of any further shares ranking pari passu with shares already in issue.

Redeemable participating shares may be redeemed on redemption days as set out in the prospectus and will be redeemed at the net asset value per share quoted on that day, calculated in accordance with the prospectus.

When cash is pledged as collateral, it is derecognised from cash and cash equivalents and subsequently recognised in the balances due from broker account. Cash is held with J.P. Morgan Bank, UBS AG, Bank of America Merrill Lynch and Morgan Stanley.

The credit ratings of the banks as classified by Moody's are as follows:

J.P. Morgan (Aa1), UBS AG (Baa1), Morgan Stanley (A3), Bank of America Merrill Lynch (Baa1). There are no restrictions on the cash and cash equivalents amounts held with these brokers.

9. Financial instruments and associated risks

The Company maintains positions in a variety of derivative and non-derivative financial instruments as dictated by its investment management strategy.

The Company's investing activities expose it to various types of risk that are associated with the financial instruments and markets in which it invests. The most significant types of financial risk to which the Company is exposed are market risk, credit risk, liquidity risk and operational risk.

The Company employs financial derivative techniques and instruments for the purposes of investment and/or efficient portfolio management subject to the limits laid down by the Central Bank of Ireland and subject to the terms of the supplement for the relevant sub-fund. These financial derivative techniques and instruments may include, but are not limited to, warrants, exchange traded futures and options, forward currency contracts and swap agreements.

The Manager uses a risk management process to measure, monitor and manage risks attached to the financial derivative positions and details of this process have been provided to the Central Bank of Ireland.

The Manager employs a risk management process which enables it to measure, monitor and manage the risks within the sub-funds. The Company must calculate its global exposure on at least a daily basis. Global exposure is calculated using VaR for UBS (Irl) Investor Selection – Currency Allocation Return Strategy, UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund and UBS (Irl) Investor Selection – Global Equity Long Short Fund. Global exposure is calculated using the commitment approach for the UBS Global Emerging Markets Opportunity Fund. Any techniques or instruments including repurchase agreements which are used by the sub-funds to generate additional leverage or exposure to market risk are taken into account when calculating the global exposure of the sub-fund. Leverage is calculated using the sum of the notionals of the derivatives used by the sub-fund. Through regular monitoring and review of risks related to the specific sub-funds, the Manager aims to quantify and analyse the current risk against the expected risk profile of the portfolio and performance targets of the sub-funds. Methods of measuring risk include, but are not limited to, VaR analysis, stress testing, sensitivity measures, leverage and relative risk. An ex-ante tracking error model is also used by the Manager to control risk. All sub-funds remain within the allotted parameters.

The Board of Directors issues a risk management statement (Financial Derivative Instrument Report) to the Central Bank of Ireland on an annual basis.

Asset allocation is determined by the Company's Investment Manager who manages the distribution of the assets to achieve the investment objectives. Divergence from target asset allocations and the composition of the portfolio is monitored by the Company's Investment Manager. The nature and extent of the financial instruments outstanding at the reporting date and the risk management policies employed by the Company are discussed below. However these are not all the risks involved. Investors should refer to the prospectus to see the full list of risks.

Notes to the Financial Statements

9. Financial instruments and associated risks (continued)

(a) Market risk

Market risk is the risk that changes in currency risk, price risk and interest rates risk will affect the positions held by the Company.

The Company is exposed to market risk on investments in that the Company may not be able to readily dispose of its holdings when it chooses and also that the price obtained on disposal is below that at which the investment is included in the Company's financial statements. All trading financial instruments are recognised at fair value through profit or loss and all changes in market conditions directly affect net income.

The Investment Manager uses financial derivative instruments which may give rise to leverage within the portfolio, subject to the limits set out in the prospectus, to increase the potential overall return on capital. Leverage may be created through the use of financial derivative instruments, subject to UCITS Regulations. The leverage created through the use of financial derivative instruments will be measured using either the commitment approach or VaR depending on the risk profile of the strategies pursued by each sub-fund.

The commitment approach calculates leverage by measuring the market value of the underlying exposures of financial derivative instruments. An overall risk monitoring structure is in place which sets risk and leverage limits for the Company, and prescribes action to be taken upon these limits being breached.

In pursuing each sub-fund's investment objectives, the Investment Manager seeks to allocate risk capital in the most appropriate way, given prevailing market opportunities, in order to achieve the desired compensation for the risk capital being expended.

Risk management is therefore at the forefront in setting investment strategy. Before entering into an investment, a decision maker will always take note of the investment's market price. Price is a required data point in assessing attractiveness. Similarly, the attractiveness of an investment cannot be estimated without a thorough analysis of the investment's potential risk.

Efficient risk capital allocation involves expending appropriate amounts of a Company's risk budget when it is desirable to do so in response to conditions in the market environment. It also involves separating and diversifying the decision dimensions available to the Investment Manager. The output of the Company's risk capital allocation system parallels investment decision-making by embodying and visually representing these characteristics.

The Investment Manager is able to use the risk capital allocation system to test and evaluate potential changes to investment strategy.

Currency risk

The Company may invest in financial instruments and enter into transactions denominated in currencies other than its functional currency. Consequently, the Company is exposed to risks that the exchange rate of its currency relative to other foreign currencies may change in a manner that has an adverse affect on the value of that portion of the Company's assets or liabilities denominated in currencies other than the functional currency.

The Company's foreign currency exchange rate risk is managed on a daily basis by the Investment Manager.

The Company may employ strategies aimed at hedging against currency risk at the class level. When the Company enters into such currency transactions as part of the sub-fund's investment policy, the hedging transactions at the share class level will be considered distinct from the tactical currency transactions of the relevant sub-fund.

The Investment Manager may utilise hedging strategies in order to hedge the exposure of classes that are denominated in currencies other than the base currency of the relevant sub-fund. The hedging will typically be undertaken by means of forward contracts but may also include currency options.

Notes to the Financial Statements

9. Financial instruments and associated risks (continued)

The following table sets out the Company's total exposure to foreign currency risk and the net exposure to foreign currencies of monetary assets and monetary liabilities.

Sensitivity analysis

At 30 September 2019, had the base currency strengthened by 5% in relation to all currencies, with all other variables held constant, net assets attributable to holders of redeemable participating shares and the change in net assets attributable to holders of redeemable participating shares per the Statement of Comprehensive Income would have decreased by the amounts shown below. Had the base currency weakened by 5% in relation to all other currencies it would have resulted in an equal but opposite effect. The analysis is performed on the same basis for 2018.

UBS (Irl) Investor Selection PLC

Annual report as of 30 September 2019

Notes to the Financial Statements

9. Financial instruments and associated risks (continued)

(a) Market risk (continued)

Global Exposure

Risk management

Global exposure in accordance with the applicable laws and regulatory provisions, is calculated using either the commitment approach or the VaR approach. The VaR of each sub-fund's portfolio is the estimated loss that may arise on the portfolio over a specified period of time (holding period) from an adverse market movement within a specified probability (confidence level).

Leverage

Leverage is defined pursuant to the applicable ESMA directives as the total of the notional values of the derivatives used by the respective sub-fund. According to this definition, leverage may result in artificially increased leverage amounts, as some derivatives that can be used for hedging purposes may be included in the calculation. Consequently, this information does not necessarily reflect the precise actual leverage risk that the investor is exposed to.

Sub-fund	Global risk calculation method	Model used	Min VaR Consumption (%)	Max VaR Consumption (%)	Median VaR Consumption (%)	Leverage median over the year 30.9.2019 (%)
UBS (Irl) Investor Selection - Currency Allocation Return Strategy	Absolute VaR	Monte Carlo VaR	13.50%	50.35%	27.00%	421.49%
UBS (Irl) Investor Selection - Equity Opportunity Long Short	Absolute VaR	Monte Carlo VaR	7.00%	94.80%	58.10%	105.57%
UBS (Irl) Investor Selection - Global Equity Long Short	Absolute VaR	Historical VaR	27.20%	49.80%	39.20%	230.06%
UBS (Irl) Investor Selection - Global Emerging markets	Commitment approach	-	-	-	-	-

VaR models

When global exposure is monitored using a VaR model, the following inputs are used for the models:

VaR model	Confidence level	Time horizon	Length of data history
Monte Carlo VaR	99%	20 days	2 years
Historical VaR	99%	20 days	2 years

Although VaR is an important tool for measuring market risk, the assumptions on which the model is based give rise to some limitations, including the following:

- A 20-day holding period assumes that it is possible to hedge or dispose of positions within that period. This may not be the case for certain highly illiquid assets or in situations in which there is severe general market illiquidity.
- A 99% confidence level does not reflect losses that may occur beyond this level, meaning that within the model used there is a 1% probability that losses could exceed the VaR.
- VaR is calculated on an end-of-day basis and does not reflect exposures that may arise on positions during the trading day.
- The use of historical data as a basis for determining the possible range of future outcomes may not always cover all possible scenarios, especially those of an exceptional nature.
- The VaR measure is dependent on the sub-fund's position and the volatility of market prices.

Notes to the Financial Statements

9. Financial instruments and associated risks (continued)

(a) Market risk (continued)

Global Exposure (continued)

Risk management (continued)

-The VaR of an unchanged position reduces if market price volatility declines, and vice versa.

The overall structure of VaR limits is subject to review and approval by the board of directors. VaR is measured daily.

Price risk

Price risk is the risk that value of an instrument will fluctuate as a result of changes in market prices, whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market.

Price risk is mitigated by the Company's Investment Manager by constructing a diversified portfolio of instruments traded on various markets.

The following tables detail the breakdown of the investment assets and liabilities held as a percentage of the net assets of the sub-funds.

	30 September 2019				
	UBS (Irl) Investor Selection- Currency Allocation Return Strategy GBP	UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund EUR	UBS (Irl) Investor Selection - Global Equity Long Short Fund EUR	UBS Global Emerging Market Opportunity Fund USD	UBS (Irl) Investor Selection PLC USD
Investment assets:					
Investments in Transferable securities and financial derivative instruments	88.72%	83.09%	80.71%	98.12%	94.56%
Total investment assets	88.72%	83.09%	80.71%	98.12%	94.56%

	30 September 2018				
	UBS (Irl) Investor Selection- Currency Allocation Return Strategy GBP	UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund EUR	UBS (Irl) Investor Selection - Global Equity Long Short Fund EUR	UBS Global Emerging Market Opportunity Fund USD	UBS (Irl) Investor Selection PLC USD
Investment assets:					
Investments in Transferable securities and financial derivative instruments	89.72%	88.66%	93.33%	97.79%	95.93%
Total investment assets	89.72%	88.66%	93.33%	97.79%	95.93%

Sensitivity analysis

A 5% increase in prices of the financial assets and liabilities at fair value through profit or loss at 30 September 2019 would have increased the net assets attributable to holders of redeemable participating shares and the change in net assets attributable to holders of redeemable participating shares in the following funds by:

UBS (Irl) Investor Selection - Currency Allocation Return Strategy by GBP17,184,784 (2018: GBP6,516,013).

UBS (Irl) Investor Selection - Equity Opportunity Long Short by EUR7,844,248 (2018: EUR9,710,883).

UBS (Irl) Investor Selection - Global Equity Long Short by EUR2,809,786 (2018: EUR3,406,584).

UBS Global Emerging Markets Opportunity Fund by USD85,149,367 (2018: USD85,629,593).

UBS (Irl) Investor Selection PLC by USD117,941,205 (2018: USD109,363,063).

An equal change in the opposite direction would have decreased the net assets attributable to holders of redeemable participating shares and the change in net assets attributable to holders of redeemable participating shares by an equal but opposite amount.

Notes to the Financial Statements

9. Financial instruments and associated risks (continued)

(a) Market risk (continued)

Interest rate risk

Interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates. The Company holds cash and cash equivalents and financial instruments that are interest earning and as a result the Company is subject to risk due to fluctuations in the prevailing levels of market interest rates in relation to this financial instrument.

The Company's hedging transactions using derivative instruments also involve the risk that unanticipated and significant changes in interest rates will cause a significant loss of basis in the contract. The counterparties to the Company's derivatives are financial institutions carefully selected by the Investment Manager.

The Company's interest rate risk is managed on a daily basis by the Investment Manager.

The following table details the Company's exposure to interest rate risks. It includes the Company's assets and trading liabilities at fair values, categorised by the earlier of contractual re-pricing or maturity date measured by the carrying value of the assets and liabilities:

Sensitivity analysis

An increase of 100 basis points in interest rates as at the reporting date would have increased the net assets attributable to holders of redeemable participating shares and changes in net assets attributable to holders of redeemable participating shares by UBS (Irl) Investor Selection - Currency Allocation Return Strategy GBP4,014,581 (2018: GBP1,447,442), UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund EUR298,187 (2018: EUR254,377), UBS (Irl) Investor Selection - Global Equity Long Short Fund EUR134,475 (2018: EUR 49,653), UBS Global Emerging Markets Opportunity Fund USD352,334 (2018: USD449,147). A decrease of 100 basis points would have had an equal but opposite effect.

Notes to the Financial Statements

9. Financial instruments and associated risks (continued)

(b) Credit risk

Credit risk is the risk that the counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Company. Credit risk associated with trading and investing activities is managed through the Company's market risk management process discussed above.

The amount of credit exposure is represented by the carrying amounts of the assets on the Statement of Financial Position. Substantially all financial instruments are cleared through and/or held in custody by J.P. Morgan Bank (Ireland) plc, the Depository. The Company is therefore subject to credit risk to the extent that the Depository may be unable to fulfill its obligations either to return the Company's securities or repay amounts owed. Details of credit risk exposure and concentration are contained in the Schedule of Investments.

At the reporting date, the Company's financial assets exposed to credit risk amounted to the following:

	30 September 2019				
	UBS (Irl) Investor Selection - Currency Allocation Return Strategy GBP	UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund EUR	UBS (Irl) Investor Selection - Global Equity Long Short Fund EUR	UBS Global Emerging Markets Opportunity Fund USD	UBS (Irl) Investor Selection PLC USD

Transferable securities in the above tables contain equities which are not directly subject to credit risk which include UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund EUR159,977,392 (2018: EUR194,679,687), UBS (Irl) Investor Selection - Global Equity Long Short Fund EUR57,665,526 (2018: EUR 68,631,265), and UBS Global Emerging Markets Opportunity Fund USD1,666,688,649 (2018: USD1,615,542,080).

Substantially all of the assets held by the Company are held by J.P. Morgan Bank (Ireland) plc, the Depository (the parent company J.P. Morgan Chase Bank N.A has a Credit rating of Aa1 at Moody's). Bankruptcy or insolvency by J.P. Morgan Bank (Ireland) plc may cause the Company's rights with respect to the assets held by the J.P. Morgan Bank (Ireland) plc to be delayed or limited. The Company monitors its risk by monitoring the credit ratings of J.P. Morgan Chase Bank N.A on a monthly basis, as reported by Standard and Poor's, Moody's or Fitch.

The Company will be exposed to the credit risk of the depository or any depository used by the Depository regarding the cash balances held in unsegregated accounts with same. In the event of insolvency or bankruptcy of the Depository or any depository used by the Depository, the Company will be treated as a general creditor.

The risk that counterparties to both derivative and other instruments might default on their obligations is monitored on an ongoing basis. To manage the level of credit risk, the Company deals with counterparties of good credit standing as per credit rating agencies such as Moody's.

Notes to the Financial Statements

9. Financial instruments and associated risks (continued)

(b) Credit risk (continued)

The below table states the counterparties used by the Company and also states the collateral and collateral type held by counterparty for the sub-funds in relation to out of the money positions.

30 September 2019

Counterparties	Ratings	Collateral Type	Base Value
Morgan Stanley (cost 26,412)	A3	USD	27,518
JP Morgan (cost 2,377,912)	Aa1	USD	2,432,312
Total Collateral			<u>2,459,830</u>

30 September 2018

Counterparties	Ratings	Collateral Type	Base Value
Morgan Stanley (cost 69,664)	A3	USD	69,737
JP Morgan (cost 2,471,735)	Aa1	USD	2,473,403
Total Collateral			<u>2,543,140</u>

Offsetting and amounts subject to master netting agreements

None of the financial assets and liabilities are offset in the Statement of Financial Position. The disclosures set out in the table below include the financial assets and liabilities that are subject to master netting arrangements.

The ISDA does not meet the criteria for offsetting in the Statement of Financial Position. This is because the Company and its counterparties do not intend to settle on a net basis or to realise the assets and settle the liabilities simultaneously.

The Financial assets and liabilities in the below table are subject to offsetting, enforceable master netting arrangements and similar agreements:

	A	B	C = A-B	D		E = C+D
	Gross amounts of recognised financial assets/(liabilities)	Gross amounts of recognised financial (liabilities)/ assets	Net amounts of financial assets/(liabilities) presented in the statement	Related amounts not set-off in the statement of financial position		Net amount

(c) Liquidity risk

The Company's liquidity and cash flows are related to its market risks. Liquidity and cash flow risk may result from a significant decline in the market value of investments. The performance of the Company will therefore depend in part on the ability of the Investment Manager to anticipate and respond to such fluctuations in market interest rates and to utilise appropriate strategies to maximise returns while attempting to minimise the associated risks. The Company's constitution provides for daily creation and cancellation of shares and it is therefore exposed to the liquidity risk associated with meeting shareholder redemptions at any time.

The Company invests in futures, options, and in a number of financial derivative instruments including but not limited to: credit default swaps, interest rate swaps, swaptions, currency swaps and total return swaps which are not exchange traded. Full details of these instruments can be found in the Risk Management Document, under the section titled "Types and Uses of Derivatives to be employed by the Fund".

Financial liabilities of the Company comprise of investments in financial derivative instruments, redemptions payable, amounts due to broker, accounts payable and accrued expenses and net assets attributable to holders of redeemable participating shares. Investments in financial derivative instruments, redemptions payable, amounts due to broker, accounts payable and accrued expenses are typically settled within 30 days to 1 year from the transaction date.

The total net asset value (NAV) of the Company is considered to be a liability of the Company as investors may choose to redeem part or all of their outstanding shares at any time.

The total net asset value (NAV) of the Company is considered to be a liability of the Company as investors may choose to redeem part or all of their outstanding shares at any time. The carrying value of liabilities is the same as the contractual cash flow being short term in nature (except for the liabilities at FVTPL).

(d) Operational risk

The primary responsibility for the development and implementation of controls over operational risk rests with the Board of Directors. This responsibility is supported by the development of overall standards for the management of operational risk, which encompasses the controls and processes at the service providers and the establishment of service levels with the service providers, in the following areas:

- requirements for appropriate segregation of duties between various functions, roles and responsibilities;
- requirements for the reconciliation and monitoring of transactions;
- compliance with regulatory and other legal requirements;
- documentation of controls and procedures;
- requirements for the periodic assessment of operational risk faced, and the adequacy of controls and procedures to address the risks identified;
- contingency plans;
- ethical and business standards; and
- risk mitigation, including insurance if this is effective.

The Directors' assessment over the adequacy of the controls and processes in place at the service providers with respect to operational risk is carried out via regular discussions with the service providers and a review of the service providers' SOC 1/ISAE 3402 reports on the internal controls, if available.

Substantially all of the assets of the Company are held by J.P. Morgan Bank (Ireland) plc. Bankruptcy or insolvency of the Company's depository may cause the Company's rights with respect to the securities held by the depository to be delayed or limited.

Notes to the Financial Statements

9. Financial instruments and associated risks (continued)

(d) Operational risk (continued)

The Manager monitors credit ratings and the capital adequacy of its depositary and reviews the findings documented in the SOC 1/ ISAE 3402 report on the internal controls annually.

The Company has provided the depositary a general lien over the financial assets held in custody for the purpose of covering the exposure from providing depositary services. The general lien is part of the standard contractual terms of the custody agreement.

(e) Capital management

The Company is required to maintain a minimum capital requirement of EUR 300,000, or its foreign currency equivalent. If redemptions or decreases in the value of the Company's investment portfolio cause the value of the share capital to fall below the equivalent of EUR 300,000, the Board of Directors will make a decision to seek the termination of the Company, the return of assets to shareholders and the revocation of the Company's authorisation.

The Administrator will notify the Board of Directors if during any particular month, the net asset value of the Company falls below this level. As soon as the Board of Directors becomes aware that the capital of the Company is below the required level, the Board will inform the depositary and the Central Bank.

(f) Leverage

The Company may be leveraged. The use of leverage creates special risks and may significantly increase the Company's investment risk. Leverage creates an opportunity for greater yield and total return but, at the same time, will increase the Company's exposure to capital risk and interest costs.

Any investment income and gains earned on investments made through the use of leverage that are in excess of the interest costs associated therewith may cause the net asset value of the shares to increase more rapidly than would otherwise be the case. Conversely, where the associated interest costs are greater than such income and gains, the net asset value of the shares may decrease more rapidly than would otherwise be the case.

(g) Depositary

The Company has appointed J.P. Morgan Bank (Ireland) plc as depositary of all of its assets pursuant to the custodian agreement.

In accordance with and subject to the depositary agreement, the depositary provides safe custody for all the assets of the Company under the control of its custodial network. The depositary will be obliged, inter alia, to ensure that the issue and repurchase of shares in the Company is carried out in accordance with the relevant legislation and the Articles of Association. The depositary will carry out the instructions of the Company unless they conflict with the UCITS Regulations or the Articles of Association. The depositary is also obliged to enquire into the conduct of the Company in each financial year and report thereon to the shareholders.

(h) Use of derivative instruments

Each sub-fund may invest in derivative instruments. The types and degrees of risk vary depending upon the characteristics of the particular instrument and the assets of a Company as a whole. Use of these instruments may entail investment exposures that are greater than their cost would suggest, meaning that a small investment in derivatives could have a large impact on a Company's performance.

(i) Involvement with unconsolidated structured entities

The Company has concluded that listed open-ended investment funds in which it invests, but that it does not consolidate, meet the definition of structured entities because of contractual cash flows being short term in nature. The following funds hold investments in open ended money market funds.

	Strategy	Market Value (EUR)	Total Assets of Holding (millions)	% of Total Assets
UBS (Irl) Investor Selection-Equity Opportunity Long Short Fund Investment in UBS Select Money Market Eur-M	Currency focused	17,978,119	439	4.10%
UBS (Irl) Investor Selection-Global Equity Long Short Fund Investment in UBS Lux Money Market Eur-Uxa	Currency focused	3,221	1,440	0.00%

Notes to the Financial Statements

10. Taxation

The Company is an investment undertaking as defined in section 739B of the Taxes Consolidation Act, 1997. Therefore, the Company is not liable to tax in respect of its income and gains, other than on the occurrence of a chargeable event.

Generally a chargeable event arises on redemption, repurchase, cancellation, transfer of shares or the ending of a 'Relevant Period'. A 'Relevant Period' is an eight year period beginning with the acquisition of the shares by the Shareholder and each subsequent period of eight years beginning immediately after the preceding Relevant Period.

A gain on a chargeable event does not arise in respect of:

- (i) any transactions in relation to shares held in a recognised clearing system as designated by order of the Revenue Commissioners of Ireland; or
- (ii) an exchange of shares arising on a qualifying amalgamation or reconstruction of the Company with another Company; or
- (iii) certain exchanges of shares between spouses and former spouses; or
- (iv) an exchange of shares representing one Fund for another Fund of the Company; or
- (v) shareholders who are neither Irish resident nor Irish ordinarily resident for tax purposes at the time of the chargeable event and who have provided the Company with a relevant declaration to that effect; or
- (vi) certain exempted Irish tax resident Shareholders who have provided the Company with the necessary signed statutory declarations.

In the absence of an appropriate declaration, the Company will be liable to Irish tax on the occurrence of a chargeable event.

There were no chargeable events for the year under review.

Capital gains, dividends and interest received may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the Company or its Shareholders.

11. Hedge classes

For the benefit of holders of classes of shares that are denominated in a currency other than the base currency, the Investment Manager may, but is not obliged to, seek, through the use of forward foreign exchange contracts and/or currency futures contracts, to hedge the foreign exchange exposure arising as a result of fluctuations between the denominated currency of the class and the base currency. Hedged positions will be kept under review to ensure that over hedged positions do not exceed 105% of the net asset value of the class. This review will also incorporate a procedure to ensure that positions in excess of 100% will not be carried forward from month to month.

Any financial instruments used to implement such strategies with respect to one or more classes shall be assets/liabilities of a sub-fund as a whole but will be attributable to the relevant class(es) and the gains/(losses) on the relevant financial instrument and the costs of the relevant financial instruments will accrue solely to the relevant class. Where a class of shares is to be hedged this will be disclosed in the supplement for the sub-fund in which such class is issued. Any currency exposure of a class may not be combined with or offset against that of any other class of a sub-fund. The currency exposure of the assets attributable to a class may not be allocated to other classes. Hedge classes are currently operational on the funds UBS (Irl) Investor Selection-Currency Allocation Return Strategy and UBS (Irl) Investor Selection-Equity Opportunity Long Short Fund.

Investors should also note that, to the extent that hedging is successful, the performance of the class is likely to move in line with the performance of the underlying assets and that investors in a hedged class will not benefit if the class currency falls against the base currency and/or the currency in which the assets of the Company are denominated and that this hedging strategy may substantially limit holders of these shares from benefiting if the base currency falls against the denominated currency of the class. Each sub-fund's currency hedging policy is set out in the relevant supplement of the prospectus.

Notes to the Financial Statements

12. Segregation of liabilities between sub-funds

As a matter of Irish law, the assets of one sub-fund will not be available to meet the liabilities of another. However, the Company is a single legal entity which may operate or have assets held on behalf of or be subject to claims in other jurisdictions (such as the United Kingdom) which may not necessarily recognise such ring-fencing and, in such circumstances, the assets of one sub-fund may be exposed to the liabilities of another.

Shareholders who choose or are obliged under local regulations to pay or receive subscription or redemption monies or dividends via an intermediate entity rather than directly to or from the Administrator (e.g. a Paying Agent in a local jurisdiction) bear a credit risk against that intermediate entity with respect to (a) subscription monies prior to the transmission of such monies to the Administrator for the account of the Company and (b) redemption monies payable by such intermediate entity to the relevant Shareholder.

13. Cross investments

There were no cross investments made by the sub-funds during the year.

14. Fees and expenses

Investment Manager's fees

The Company has appointed UBS Asset Management (UK) Ltd. as an Investment Manager for the funds UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund and UBS (Irl) Investor Selection - Global Equity Long Short Fund. The Company has appointed UBS Asset Management Switzerland AG and UBS Asset Management (Singapore) Ltd. for the funds UBS (Irl) Investor Selection-Currency Allocation Return Strategy and UBS Global Emerging Markets Opportunity Fund respectively. All appointments are in accordance with the relevant Investment Manager Agreement. The fees will be accrued daily and payable monthly in arrears out of the assets of the Company with properly vouched expenses. UBS Fund Management (Luxembourg) S.A. was appointed as Manager of the Company on 1 September 2017. The Manager is paid out of the aggregate fee rates listed below. The fees charged per sub-fund are as follows:

Performance fees

The Investment Manager may be entitled to receive a Performance fee payable out of the individual sub-fund's assets in respect of individual Classes as disclosed in the relevant supplement of the prospectus.

Notes to the Financial Statements

14. Fees and expenses (continued)

Performance fees (continued)

The below shows the sub-funds from which Performance fees were earned for during the year. The method of calculation and accrual is also stated.

30 September 2019

	UBS (Irl) Investor Selection - Currency Allocation Return Strategy GBP	UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund EUR	UBS (Irl) Investor Selection - Global Equity Long Short Fund EUR	UBS Global Emerging Markets Opportunity Fund USD	UBS (Irl) Investor Selection PLC USD
Performance fee	-	1,548	-	-	1,688
Performance fee payable	-	1,548	-	-	1,688

30 September 2018

	UBS (Irl) Investor Selection - Currency Allocation Return Strategy GBP	UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund EUR	UBS (Irl) Investor Selection - Global Equity Long Short Fund EUR	UBS Global Emerging Markets Opportunity Fund USD	UBS (Irl) Investor Selection PLC USD
Performance fee	-	-	27,300	-	32,509
Performance fee payable	-	-	54,934	-	63,805

The Performance fees will be calculated and accrued as at each Valuation Point. The Performance fees will be calculated in respect of each financial year (a "Calculation Period"). However, the first Calculation Period in respect of any Class of Shares will be the period commencing on the Business Day immediately following the close of the Initial Offer Period for that Class and ending on 31 December in that same year. The first value used in determining the first Performance fees shall be the Initial Price.

For each Calculation Period, the Performance fees payable will be equal to 20% of the Net Outperformance of the Net Asset Value per Share over the High Water Mark. The "Net Outperformance" is defined as the return on the Net Asset Value per Share in excess of the Hurdle Rate, accumulated from the start of the Calculation Period. The Hurdle Rate is the appropriate Cash Rate, an appropriate measure of the short term cash returns (EONIA or BBA LIBOR Overnight Index or SORA) of the respective currencies (i.e. SORA for SGD, EONIA for EUR, BBA LIBOR for all other currencies) and will be reset at the end of every Calculation Period.

The High Water Mark shall be the previous highest Net Asset Value per Share of the relevant Class at the end of any previous Calculation Period for the relevant Class on which the Performance fees were paid. For the purposes of the first calculation of the Performance fees, the starting point for the relevant Net Asset Value per Share is the Initial Price. No Performance fees will be paid until the Net Asset Value per Share exceeds the High Water Mark or the Initial Price, as appropriate and such fee is only payable on the Net Outperformance of the Net Asset Value per Share over the High Water Mark as described above.

Administration fees

The Company shall pay to the Administrator out of the assets of the Company an annual fee, accrued at each Valuation Point and payable quarterly in arrears at a rate of 0.075% of Net Asset Value of each sub-fund (before calculation of the Investment Manager's management fee or the Administration Fee) subject to a minimum annual fee of EUR 60,000 (plus VAT, if any thereon) per sub-fund and to a fee of EUR 3,000 plus VAT, if any, in respect of the preparation by the Administrator of each set of financial statements required to be prepared in respect of the Company and EUR 3,000 per annum plus VAT, if any, for acting as Company Secretary of the Company.

Notes to the Financial Statements

14. Fees and expenses (continued)

Administration fees (continued)

The Administrator shall also be entitled to be repaid out of the assets of the Company all of such government or similar fees (including but not limited to filing fees and annual return fees to the extent payable by the Administrator), charges, taxes, duties and imposts whatsoever levied on or in respect of the Company or business of the Company as it may properly pay. The fees and charges of the Administrator are subject to variation and renegotiation from time to time provided that any increase in the Administrator's fee is subject to prior notification to Shareholders.

Directors' fees

The Articles of Association authorise the Directors to charge a fee for their services at a rate determined by the Directors. All Directors other than Adrian Waters, Eimear Cowhey and John Donohoe receive zero fees. The fees of any Director in any accounting period shall not in any event exceed EUR 50,000 (plus VAT, if any) without the approval of the Board. Any increase in Directors' remuneration above that figure will be notified in advance to Shareholders and Shareholders will be given sufficient time to redeem their Shares prior to the implementation of any such increase. All Directors will be entitled to reimbursement by the Company of expenses properly incurred in connection with the business of the Company or the discharge of their duties.

During the year ended 30 September 2019, the Directors charged fees of EUR 77,000 (2018: EUR 81,500) for UBS (Irl) Investor Selection PLC. At 30 September 2019, EUR 77,000 (2018: EUR 57,750) was payable.

Auditor fees

During the year ended 30 September 2019, the auditor's charged statutory audit fees of EUR 67,625 (2018: EUR 77,500) to the Company. At 30 September 2019, EUR 67,625 (2018: EUR 65,655) was payable. During the year ended 30 September 2019, the auditor's charged other non-audit services fees of EUR Nil (2018: EUR Nil) to the Company. At 30 September 2019, EUR Nil (2018: EUR Nil) was payable.

15. Accounting estimates and judgments

As indicated in note 2(e) many of the Company's financial instruments are measured at fair value on the Statement of Financial Position and it is usually possible to determine their fair values within a reasonable range of estimates. For the majority of the Company's financial instruments, quoted market prices are readily available.

Fair value estimates are made at a specific point in time, based on market conditions and information about the financial instrument. These estimates are subjective in nature and involve uncertainties and matters of significant judgement (e.g., interest rates, volatility, estimated cash flows etc.) and therefore, cannot be determined with precision.

16. Transaction Costs

The below table shows the transaction costs incurred by the sub-funds during the year. The equity costs comprise trade commissions and miscellaneous trade fees required at a country level and are charged separately from the trade price. The derivative transaction costs comprise of future and option commissions that are charged separately from the trade price and also swap trade fees that are included in the trade price.

	Equities	Derivatives	Total

UBS (Irl) Investor Selection PLC - USD	3,104,069	342,615	3,446,684

17. Distributions

No distributions were made during the year ended 30 September 2019 (2018: Nil).

18. Stock lending

The Company did not engage in any agreement to lend securities in its portfolio in exchange for a fixed rate of interest.

19. Related parties

- Claire Cawley who was part of the UBS Asset Management Alternatives Structuring Team and employed by Lantern Structured Asset Management Limited, an entity within the UBS group was appointed as a Director of the Company on 14 October 2018 and resigned on 21 June 2019.
- Gavin Byrnes is an Executive Director and Head of Alternative Products for UBS Asset Management, an entity within the UBS Group. He was appointed as a Director of the Company on 1 August 2019.
- No present Director or any connected person has any interests beneficial or non-beneficial in the share capital of the Company. Fees paid to the Directors are disclosed in Note 14.

Notes to the Financial Statements

19. Related parties (continued)

(d) Other parties considered to be related to the Company are the Investment Manager (Note 14) and the following Shareholders who have significant holdings in the sub-funds:

- 1 Mitsubishi UFJ Global Custody S.A., Ref UBS Switzerland
- 2 Mitsubishi UFJ Investor Services and Banking (Luxembourg) S.A
- 3 MFEX Mutual Funds Exchange AB
- 4 UBS Europe SE, Luxembourg Branch
- 5 JP Morgan Plc Ireland

20. Connected party

The Central Bank of Ireland UCITS Notices, 14.5 – ‘Dealings by promoter, manager, trustee, investment adviser and group companies’ states in paragraph one that any transaction carries out with a UCITS by a promoter, manager, trustee, investment adviser and/or associated or group companies of these (“connected parties”) must be carried out as if negotiated at arm’s length. Transactions must be in the best interests of the shareholders.

The Board of Directors are satisfied that there are arrangements (evidenced by written procedures) in place, to ensure that the obligations set out in paragraph one of the UCITS 14.5 are applied to all transactions with connected parties; and the Board is satisfied that transactions with connected parties entered into during the period complied with the obligations set out in this paragraph.

21. Commitments and Contingent liabilities

As at 30 September 2019, the Company did not have any significant commitments or contingent liabilities (2018: Nil).

Following the decision by the people of the United Kingdom to leave the European Union, there remains uncertainty about the relationship between the United Kingdom and the European Union post “Brexit”. The impact of this uncertainty extends to the financial services market within which the Company operates. As at the date of these financial statements, the Directors of the Company continue to monitor the situation as it develops as well as the impact on the Company.

22. Statement of portfolio changes

A statement of changes in the composition of the portfolio during the period is available to shareholders free of charge, on request.

23. Significant events during the reporting period

Ms. Claire Cawley was appointed as a Director of the Company with effect from 14 October 2018 and resigned on 21 June 2019. Mr. Gavin Byrnes was appointed as a Director of the Company on 01 August 2019.

A new prospectus was issued on 17 June 2019 in relation to updates of the distributor and Investment Manager for the funds UBS (Irl) Investor Selection-Currency Allocation Return Strategy and UBS Global Emerging Markets Opportunity Fund.

The Swiss UBS asset management business was transferred from UBS AG to UBS Asset Management Switzerland AG, a member of UBS Group. The transfer became effective on 17 June 2019. UBS Asset Management Switzerland AG is a FINMA approved asset manager of collective investment schemes.

Shane Keyes was appointed as Money laundering Reporting Officer through Carne Global Financial Services Ltd with effect from 20 September 2019.

There were no other events during the year that require adjustment to or disclosure in the financial statements.

Notes to the Financial Statements

24. Subsequent Events

A new sub-fund, UBS (Irl) Investor Selection PLC - A&Q Fundamental US Equity Long Short UCITS was approved by the Central Bank of Ireland on 29 November 2019. This sub-fund seeks to deliver a positive relative return versus traditional U.S equity long short strategy benchmarks, over a three to five year time frame.

24. Subsequent Events (continued)

MUFG Alternative Fund Services (Ireland) Limited resigned as Company Secretary and was replaced by Maples Fiduciary Services (Ireland) Limited with effect from 25 October 2019.

Following the decision by the people of the United Kingdom to leave the European Union, there remains uncertainty about the relationship between the United Kingdom and the European Union post “Brexit”. The impact of this uncertainty extends to the financial services market within which the Company operates. As at the date of these financial statements, the Directors of the Company continue to monitor the situation as it develops as well as the impact on the Company.

24. Approval of financial statements

The accounts were approved by the board on 27 January 2020.

Supplemental Unaudited Information

Soft commissions

The Investment Manager may make use of arrangements to enable it to obtain execution and research services which are beneficial to the sub-funds, both from counterparties and third parties. All transactions undertaken and the services provided under these arrangements in respect of the sub-funds will be subject to Financial Conduct Authority rules and to the fundamental rule of providing best execution to the sub-funds, being the best price available in the market, exclusive of any charges, but taking into account any exceptional circumstances such as counterparty risk, order size or client instructions.

There were no soft commissions arrangements during the year ended 30 September 2019.

Supplemental Unaudited Information

Total expense ratio (“TER”)

This ratio was calculated in accordance with the Swiss Funds & Asset Management Association (SFAMA) “Guidelines on the calculation and disclosure of the TER” in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

The TER for classes of units which were active less than a 12 month period are annualised.

Remuneration Disclosure

The Board of Directors of UBS Fund Management (Luxembourg) S.A. has updated the remuneration policy (the “Policy”) on 7 December 2018, whose objectives are on one hand; to ensure that the remuneration framework is in line with the applicable laws and regulations, and more specifically with provisions defined under (i) the Articles 111bis and 111ter of the Luxembourg Law of 17 December 2010 on Undertakings for Collective Investment in Transferable Securities as amended from time to time (the UCITS Law) transposing the UCITS Directive 2014/91/EU (the UCITS V Directive), (ii) the Alternative Investment Fund Managers (AIFM) Directive 2011/61/EU, transposed into the Luxembourg AIFM Law dated from 12 July 2013, as amended from time to time, (iii) the ESMA’s guidelines on sound remuneration policies under the UCITS Directive - ESMA/2016/575 published on 14 October 2016 and ESMA’s guidelines on sound remuneration policies under the AIFMD - ESMA/2016/579 published on 14 October 2016 amending the ESMA’s guidelines on sound remuneration policies under the UCITS Directive and AIFMD published on 31 March 2016 - ESMA/2016/411 (the ESMA Guidelines) and (iv) the CSSF Circular 10/437 on Guidelines concerning the remuneration policies in the financial sector issued on 1 February 2010; (v) the Directive 2014/65/EU on markets in financial instruments (MiFID II); (vi) the Commission Delegated Regulation 2017/565/EC of 25 April 2016 supplementing Directive 2014/65/EU (MiFID II Level 2); (vii) the CSSF Circular 14/585, transposing the ESMA Guidelines 2013/606 on remuneration policies and practices (MiFID ESMA Guidelines); and on the other hand, to comply with the UBS AG Remuneration policy framework. The Policy is meant not to encourage excessive risk taking, to contain measures to avoid conflicts of interest, to be consistent with, and promote, sound and effective risk management and to be consistent with the UBS Group business strategy, objectives and values.

Further information in relation to UBS AG Remuneration Policy is available in the UBS Group AG Annual Report and in the Compensation report. More details about the remuneration policy of the Management Company, which describes, but not limited to, how remuneration and benefits are determined, are available at http://www.ubs.com/lu/en/asset_management/investor_information.html

Application of the requirements and remuneration disclosure

In accordance with the Article 151 of the UCITS Law, the Management Company is required to disclose at least annually certain information concerning its remuneration policy and the practices for its identified staff.

The Management Company complies with the aforementioned regulatory provisions in a way and to the extent that is appropriate to its size, internal organisation and the nature, scope and complexity of its activities.

Considering the total size of funds under management, both UCITS and AIFs although a significant portion is not complex or risky investment, UBS Fund Management (Luxembourg) S.A. judges that the proportionality principle may not be applicable at the level of the company but at the level of the Identified staff.

By application of the proportionality principle for the Identified staff, the following requirements on pay-out processes for Identified staff are not applied:

- The payment of variable remuneration in instruments related mainly to the funds in relation to which they perform their activities;
- Deferral requirements;
- Retention periods;
- Incorporation of ex-post risk factors (i.e. malus or clawback arrangements);

The deferral requirements remain however applicable when the employee's total annual compensation is exceeding the threshold defined under the UBS Group Compensation Framework; the variable compensation will be treated in line with the plan rules defined under the UBS Group Compensation Framework.

There is no remuneration paid to identified staff of delegates from the Management Company.

Remuneration disclosure

For the fiscal year ending 31 December 2018, the aggregate total remuneration paid by UBS Fund Management (Luxembourg) S.A. to all its staff amounted to EUR62,666, of which EUR4,264 represented the variable remuneration. The Manager employed an average of 34.7 staff (full time equivalent) during this period.

Supplemental Unaudited Information

Remuneration disclosure (continued)

The aggregate total remuneration paid by the Manager to its Identified Staff amounted to EUR12,052.

Please further note that due to the roles of Management Company staff, this remuneration was calculated in proportion of the net assets of the Fund out of the net assets of all the funds under the governance of UBS Fund Management (Luxembourg) S.A. (including both AIF and UCITS funds).

Information for the financial year ending 30 September 2019 was not available at the date of signing of the financial statements hence the inclusion of the above remuneration information for the fiscal year 2018.

Supplemental Unaudited Information

Securities financing transactions regulation

Article 13 of Regulation (EU) 2015/2365 on transparency of securities financing transactions (SFTs) and of reuse and amending Regulation (EU) No 648/2012, requires UCITS investment companies to provide the following information on the use made of SFTs.

Securities Financing Transactions Regulation (Regulation (EU) 2015/2365) (“SFTR”) came into force on 12 January 2016 and, amongst other requirements, introduces new disclosure requirements in the Company’s financial statements published after 13 January 2017 detailing the Sub-Fund’s use of securities financing transactions and total return swaps. As a result, additional disclosures have been included in this appendix.

Below is the market value of assets engaged in securities financing transactions as at 30 September 2019. The assets which are engaged in securities financing transactions at this date are total return swaps, in the form of Contracts for Difference (“CFDs”). The Funds do not engage in securities lending, or repo transactions.

Below is the market value of assets engaged in securities financing transactions as at 30 September 2019 based on a commitment amount of €6,942,304 in absolute terms.

Fund Name	Amount EUR	% of net assets as at 30 September 2019
UBS (Irl) Investor Selection – Equity Opportunity Long Short Fund	(3,189,546)	(1.69%)

The following table details the Counterparty for the Contracts for Difference held by UBS (Irl) Investor Selection – Equity Opportunity Long Short Fund

Counterparty Name / Financial Institutions	Country of Counterparty	Contracts for Difference Market Value as at 30 September 2019	Transaction cost for the year ended 30 September 2019
Bank of America Merrill Lynch	United States of America	(3,163,686)	835,686
Morgan Stanley	United States of America	(25,860)	55,400

The Contracts for Difference are settled bi-laterally.
