# Independent auditors' report

To the Shareholder and Board of Directors of OOO UBS Bank

We have audited the accompanying financial statements of OOO UBS Bank (hereinafter, the "Bank"), which comprise the statement of financial position as of 31 December 2011, and the statement of comprehensive income, of changes in net assets attributable to the shareholder and of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes.

Management's responsibility for the financial statements

Ernst & Soung LLC

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditors' responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. These standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

# Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of OOO UBS Bank as of 31 December 2011, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards.

# 1. Principal activities

OOO UBS Bank (hereinafter, the "Bank") was formed on 22 July 2005 as Limited Liability Company under the laws of the Russian Federation.

The Bank operates under banking license No. 3463 issued by the Central Bank of Russia ("CBR") on 6 June 2006.

The Bank holds license No. 3463 issued by the Bank of Russia on 4 August 2010 for accepting public deposits denominated in Russian Rubles and foreign currency.

The Bank also possesses licenses of a professional shareholder of the securities market issued by the Federal Service for the Securities Market:

- ▶ for custody services No. 177-12414-000100 dated 30 July 2009 unlimited;
- ▶ for brokerage services No. 177-12405-100000 dated 30 July 2009 unlimited;
- ▶ for dealing services No. 177-12408-010000 dated 30 July 2009 unlimited.

In 2011, the Bank continued providing services to its corporate customers, such as accepting deposits from corporate customers, opening and maintaining accounts, making settlements on behalf of the corporate customers, including correspondent banks.

In 2011, the Bank continued providing brokerage services to its individual and corporate customers and entering into transactions in its own name and for its own account. Such transactions included foreign exchange and lending and deposit transactions in the interbank market and with the CBR as well as purchase/sale of corporate and government bonds.

In 2011, the Bank continued developing its investment banking business having provided significant additional staff resources to its Consulting Services Department and Private Capital Management Department. Within this business line the Bank provides M&A, debt restructuring and other consulting services across the capital market.

Since August 2010, the Bank has been a member of the obligatory individual deposit insurance system applied to individual deposits with Russian banks and is included in the register of the banks participating in this system under registration number 982.

As of 31 December 2011 and 2010, the Bank did not have its own credit ratings.

The Bank is located in Moscow and it has no branches and affiliates. As of 31 December 2011, the actual headcount of the Bank was 105 employees (2010: 80 employees).

The Bank's registered address and principal place of business is 2/2 Paveletskaya Square, Moscow, Russia.

As of 31 December 2011 and 2010, UBS AG, the sole shareholder of the Bank, owned 100% of the Bank's share capital.

UBS AG is the ultimate parent of the Bank, incorporated and operating under the Swiss laws. The Bank conducts its activities and determines range of transactions, pricing policy and risk assessment techniques in compliance with the parent's requirements.

# 2. Basis of preparation

## General

These financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS").

The Bank is required to maintain its records and prepare its financial statements for regulatory purposes in Russian Rubles in accordance with the Russian accounting and banking legislation and related instructions ("RAL"). These financial statements are based on the Bank's RAL books and records, as adjusted and reclassified in order to comply with IFRS.

Presentation currency. These financial statements are presented in thousands of Russian Rubles ("RUB"), unless otherwise indicated.

# 2. Basis of preparation (continued)

# Reconciliation of RAL and IFRS equity and profit (loss) for the year

Equity and profit/(loss) for the year are reconciled between RAL and IFRS as follows:

	20	011	2010		
- -	Equity	Profit (loss) for the year	Equity	Profit (loss) for the year	
Russian Accounting Legislation	4,533,885	207,428	2,126,457	254,907	
Bonuses accrued	(254,143)	(121,263)	(132,880)	41,140	
Pecuniary aid	_	(189,380)	_	(296,309)	
Audit fees accrued	(3,285)	(568)	(2,717)	243

# 3. Summary of accounting policies

# Changes in accounting policies

The Bank has adopted the following amended IFRS and new IFRIC Interpretations during the year. The principal effects of these changes are as follows:

# IAS 24 Related Party Disclosures (Revised)

The revised IAS 24, issued in November 2009 and effective for annual periods beginning on or after 1 January 2011, simplifies the disclosure requirements for government-related entities and clarifies the definition of a related party. Previously, an entity controlled or significantly influenced by a government was required to disclose information about all transactions with other entities controlled or significantly influenced by the same government. The revised standard requires disclosure about these transactions only if they are individually or collectively significant. The revised IAS 24 had no impact on the Bank's financial statements since the Bank is not a government-related entity.

## Amendment to IAS 32 Financial instruments: Presentation - Classification of Rights Issues

The amendment was issued by the IASB in October 2009 and is effective for annual periods beginning on or after 1 February 2010. The amendment alters the definition of a financial liability to classify rights issues as equity instruments. This is applicable if the rights are given pro rata to all of the existing owners of the same class of an entity's non-derivative equity instruments, in order to acquire a fixed number of the entity's own equity instruments for a fixed amount in any currency. This amendment had no impact on the Bank's financial statements.

# IFRIC 19 Extinguishing Financial Liabilities with Equity Instruments

IFRIC Interpretation 19 was issued in November 2009 and is effective for annual periods beginning on or after 1 July 2010. The Interpretation clarifies the accounting when the terms of a financial liability are renegotiated and result in the entity issuing equity instruments to a creditor to extinguish all or part of the financial liability. This Interpretation had no impact on the Bank's financial statements.

# Improvements to IFRS

In May 2010, the IASB issued the third omnibus of amendments to its standards, primarily with a view to removing inconsistencies and clarifying wording. Most of the amendments are effective for annual periods beginning on or after 1 January 2011. There are separate transitional provisions for each standard. Amendments included in these Improvements to IFRS had an impact on the accounting policies, financial position or performance of the Bank as described below:

▶ IFRS 7 Financial Instruments: Disclosures: introduces the amendments to quantitative and credit risk disclosures. The additional requirements had minor impact as the required information was readily available.

# 3. Summary of accounting policies (continued)

## Changes in accounting policies (continued)

The following amended standards and interpretations had no impact on accounting policies, financial position or performance of the Bank:

- ► IFRS 1 First-time Adoption of International Financial Reporting Standards Limited Exemption from Comparative IFRS 7 Disclosures for First-time Adopters
- Other amendments to IFRS 1, IFRS 3, IAS 1, IAS 27, IAS 34 and IFRIC 13
- ▶ IFRIC 14 Prepayments of a Minimum Funding Requirement

#### Financial assets

#### Initial recognition

Financial assets in the scope of IAS 39 are classified as either financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments, or available-for-sale financial assets, as appropriate. When financial assets are recognised initially, they are measured at fair value, plus, in the case of investments not at fair value through profit or loss, directly attributable transaction costs. The Bank determines the classification of its financial assets upon initial recognition.

#### Date of recognition

All regular way purchases and sales of financial assets are recognised on the trade date, i.e. the date that the Bank commits to purchase the asset. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace.

### 'Day 1' profit

Where the transaction price in a non-active market is different to the fair value from other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable markets, the Bank immediately recognizes the difference between the transaction price and fair value (a 'Day 1' profit) in the statement of comprehensive income. In cases where use is made of data which is not observable, the difference between the transaction price and model value is only recognized in the statement of comprehensive income when the inputs become observable, or when the instrument is derecognized.

#### Financial assets at fair value through profit or loss

Financial assets classified as held for trading are included in the category "financial assets at fair value through profit or loss". Financial assets are classified as held for trading if they are acquired for the purpose of selling in the near term. Derivatives are also classified as held for trading unless they are designated as and are effective hedging instruments. Gains or losses on financial assets held for trading are recognized in the statement of comprehensive income.

#### Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are not entered into with the intention of immediate or short-term resale and are not classified as trading securities or designated as investment securities available for sale. Such assets are carried at amortized cost using the effective interest method. Gains and losses are recognized in the statement of comprehensive income when the loans and receivables are derecognized or impaired, as well as through the amortization process.

#### Determination of fair value

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Fair value is the current bid price for financial assets and current ask price for financial liabilities which are quoted in an active market. "Quoted in an active market" means that quoted prices are readily and regularly available from an exchange or another organization, and that those prices represent actual and regularly occurring market transactions on an arm's length basis.

The fair value for financial instruments traded in active market at the reporting date is based on their quoted market price or dealer price quotations (bid price for long positions and ask price for short positions), without any deduction for transaction costs.

For all other financial instruments not listed in an active market, the fair value is determined by using appropriate valuation techniques. Valuation techniques include net present value techniques, comparison to similar instruments for which market observable prices exist, options pricing models and other relevant valuation models.

# 3. Summary of accounting policies (continued)

### Financial assets (continued)

#### Offsetting

Financial assets and liabilities are offset and the net amount is reported in the statement of financial position when there is a legally enforceable right to set off the recognized amounts, and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. This is not generally the case with master netting agreements, and the related assets and liabilities are presented gross in the statement of financial position.

# Cash and cash equivalents

Cash and cash equivalents are items which are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

Cash and cash equivalents include cash on hand, amounts due from the CBR (net of obligatory reserves), interbank deposits, accounts in trade systems and repurchase agreements with original maturity up to 30 days. Amounts relating to funds that are of restricted nature are excluded from cash and cash equivalents.

#### Repurchase and reverse repurchase agreements and securities lending

Sale and repurchase agreements ("reverse repos") are treated as secured financing transactions. Securities purchased under agreements to resell ("reverse repos") are recorded as cash and cash equivalents, amounts due from other banks or loans and advances to customers, depending on counterparty and agreement term.

The difference between sale and repurchase price is treated as interest and accrued over the life of repo agreements using the effective yield method.

#### **Derivative financial instruments**

In the normal course of business, the Bank enters into various derivative financial instruments including futures, forwards and swaps in the foreign exchange markets. Such financial instruments are held for trading and are initially recognized at fair value. The fair values are estimated based on quoted market prices or pricing models that take into account the current market and contractual prices of the underlying instruments and other factors. Derivatives are carried as assets when their fair value is positive and as liabilities when it is negative. Gains and losses resulting from these instruments are included in the statement of comprehensive income as net gains/(losses) from foreign currencies dealing.

# **Borrowings**

Financial instruments are classified as liabilities, where the substance of the contractual arrangement results in the Bank having an obligation either to deliver cash or another financial asset to the holder, or to satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity instruments. Such instruments include amounts due to credit institutions and amounts due to customers. After initial recognition, borrowings are measured at amortized cost using the effective interest method. Gains and losses are recognized in the statement of comprehensive income when the borrowings are derecognized as well as through the amortization process.

#### Leases

#### Operating - Bank as lessee

Leases of assets under which the risks and rewards of ownership are effectively retained with the lessor are classified as operating leases. Lease payments under an operating lease are recognized as expenses on a straight-line basis over the lease term and included into other operating expenses.

#### Impairment of financial assets

The Bank assesses at each reporting date whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred "loss event") and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated.

# 3. Summary of accounting policies (continued)

# Impairment of financial assets (continued)

Amounts due from credit institutions

For amounts due from credit institutions carried at amortized cost, the Bank assesses individually whether objective evidence of impairment exists.

If there is an objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the assets' carrying amount and the present value of estimated future cash flows. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognized in the statement of comprehensive income. Interest income continues to be accrued on the reduced carrying amount based on the original effective interest rate of the asset. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is increased or reduced by adjusting the allowance account. If a future write-off is later recovered, the recovery is credited to the statement of comprehensive income.

The present value of the estimated future cash flows is discounted at the financial asset's original effective interest rate. If amounts due from credit institutions have a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate.

# Derecognition of financial assets and liabilities

#### Financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognized in the statement of financial position where:

- the rights to receive cash flows from the asset have expired;
- the Bank has transferred its rights to receive cash flows from the asset, or retained the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass-through' arrangement; and
- the Bank either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Where the Bank has transferred its rights to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Bank's continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Bank could be required to repay.

#### Financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires.

Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the statement of comprehensive income.

# **Taxation**

The current income tax expense is calculated in accordance with the regulations of the Russian Federation.

Current tax is calculated based on the amounts expected to be paid to or recovered from the taxation authorities in respect of the taxable profits or lossed for the current and prior periods. Tax expenses, other than income tax, are recorded within operating expenses.

Deferred tax assets and liabilities are calculated in respect of temporary differences using the liability method. Deferred income taxes are provided for all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

# 3. Summary of accounting policies (continued)

#### **Taxation (continued)**

A deferred tax asset is recorded only to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilized. Deferred tax assets and liabilities are measured at tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates that have been enacted or substantively enacted at the reporting date.

Russia also has various operating taxes that are assessed on the Bank's activities. These taxes are included as a component of other operating expenses.

#### Property and equipment and intangible assets

Property and equipment are carried at cost, excluding the costs of day-to-day servicing, less accumulated depreciation and any accumulated impairment. Such cost includes the cost of replacing part of equipment recognized when that cost is incurred if the recognition criteria are met.

The carrying values of property and equipment are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable.

Depreciation of an asset begins when it is available for use. Depreciation is calculated on a straight-line basis over the following estimated useful lives:

	Years
Office equipment	2-6
Computers and office appliances	3-4
Telecommunication equipment	3-4
Computer software	3-4
Motor vehicles	3-4

The asset's residual values, useful lives and depreciation methods are reviewed, and adjusted as appropriate, at each financial year-end.

Costs related to repairs and renewals are charged when incurred and included in other operating expenses, unless they qualify for capitalization.

Expenditures incurred in developing or upgrading computer software are recognized as an asset when the related software meets the identifiability criterion and it is probable that the expected future economic benefits that are attributable to the asset will flow to the entity and the cost of the asset can be measured reliably. Internally developed software that meets the above criteria, and acquired software is classified into the "Computer Software" category.

## **Provisions**

Provisions are recognized when the Bank has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the obligation can be made.

# Retirement and other employee benefit obligations

The Bank does not have any pension arrangements separate from the State pension system of the Russian Federation, which requires current contributions by the employer calculated as a percentage of current gross salary payments; such expense is charged in the period the related salaries are earned. Apart from the above, the Bank has no significant post-retirement benefits.

# Contingencies

Contingent liabilities are not recognized in the statement of financial position but are disclosed unless the possibility of any outflow in settlement is remote. A contingent asset is not recognized in the statement of financial position but disclosed when an inflow of economic benefits is probable.

# 3. Summary of accounting policies (continued)

# Recognition of income and expenses

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Bank and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognized:

Interest and similar income and expense

For all financial instruments measured at amortized cost and interest bearing securities classified as trading, interest income or expense is recorded at the effective interest rate, which is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset or financial liability. The carrying amount of the financial asset or financial liability is adjusted if the Bank revises its estimates of payments or receipts. The adjusted carrying amount is calculated based on the original effective interest rate and the change in carrying amount is recorded as interest income or expense.

Once the recorded value of a financial asset or a group of similar financial assets has been reduced due to an impairment loss, interest income continues to be recognized using the original effective interest rate applied to the new carrying amount.

Fee and commission income and expenses

Fees and commission income and expenses are recognized on an accrual basis in the moment the service is provided.

# Foreign currency translation

The financial statements are presented in Russian Rubles, which is the Bank's functional and presentation currency. Transactions in foreign currencies are initially recorded in the functional currency, converted at the rate of exchange ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange ruling at the reporting date. Gains and losses resulting from the translation of foreign currency transactions are recognized in the statement of comprehensive income as gains less losses from foreign currencies – translation differences. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Differences between the contractual exchange rate of transactions in a foreign currency and the Central Bank exchange rate on the date of the transactions are included in gains less losses from dealing in foreign currencies.

The official CBR exchange rates as of 31 December 2011 and 2010 were RUB 32.196 and RUB 30.477 to 1 USD, respectively.

# Future changes in accounting policies

Standards and interpretations issued but not yet effective

IFRS 9 Financial Instruments (first phase)

In November 2009 and 2010 the IASB issued the first phase of IFRS 9 Financial Instruments. This standard will eventually replace IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 becomes effective for annual periods beginning on or after 1 January 2015. The first phase of IFRS 9 introduces new requirements for classification and measurement of financial instruments. In particular, for subsequent measurement all financial assets are to be classified at amortized cost or at fair value through profit or loss with the irrevocable option for equity instruments not held for trading to be measured at fair value through other comprehensive income. There is a new requirement for financial liabilities recognized through profit or loss using a fair value option that the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability shall be presented in other comprehensive income. The Bank now evaluates the impact of the adoption of new standard and considers the initial application date.

# 3. Summary of accounting policies (continued)

# Future changes in accounting policies (continued)

#### IFRS 10 Consolidated Financial Statements

IFRS 10 Consolidated Financial Statements establishes a single control model that applies to all entities including special purpose entities. The changes introduced by IFRS 10 will require management to exercise significant judgment to determine which entities are controlled, and therefore, are required to be consolidated by a parent, compared with the requirements that were in IAS 27. In addition, IFRS 10 introduces specific application guidance for agency relationships. The standard also contains accounting requirements and consolidation procedures, which are carried over unchanged from IAS 27. IFRS 10 replaces the consolidation requirements in SIC-12 Consolidation — Special Purpose Entities and IAS 27 Consolidated and Separate Financial Statements and is effective for annual periods beginning on or after 1 January 2013. Early application is permitted. The Bank has no investments in equity instruments, therefore, this standard will have no impact on the Bank's financial statements.

#### IFRS 11 Joint Arrangements

IFRS 11 removes the option to account for jointly controlled entities using proportionate consolidation. Instead, jointly controlled entities that meet the definition of a joint venture must be accounted for using the equity method. IFRS 11 supersedes IAS 31 *Interests in Joint Ventures* and SIC-13 *Jointly Controlled Entities – Non-monetary Contributions by Ventures* and becomes effective for annual periods beginning on or after 1 January 2013. Early application is permitted. The Bank has no investments in equity instruments, therefore, this standard will have no impact on the Bank's financial statements.

#### IFRS 12 Disclosure of Interests in Other Entities

IFRS 12 contains all disclosure requirements that were previously included in IAS 27 related to consolidated financial statements, as well as all disclosure requirements that were previously included in IAS 31 and IAS 28. These disclosures relate to an entity's interests in subsidiaries, joint arrangements, associates and structured entities. A number of new disclosures are also required for such entities. This standard becomes effective for annual periods beginning on or after 1 January 2013. Early application is permitted. The Bank does not prepare consolidated financial statements, therefore, this standard will have no impact on the Bank's financial statements.

#### IFRS 13 Fair Value Measurement

IFRS 13 establishes a single source of guidance under IFRS for all fair value measurements. IFRS 13 does not change when an entity is required to use fair value, but rather provides guidance on how to measure fair value under IFRS when fair value is required or permitted. This standard becomes effective for annual periods beginning on or after 1 January 2013. Early application is permitted. The adoption of IFRS 13 may have effect on the measurement of the Bank's assets and liabilities accounted for at fair value. The Bank now evaluates the possible impact of IFRS 13 on its financial position and performance.

### IAS 27 Separate Financial Statements (revised in 2011)

As a consequence of the new IFRS 10 and IFRS 12, what remains of IAS 27 is limited to accounting for subsidiaries, jointly controlled entities, and associates in separate financial statements. The amendment becomes effective for annual periods beginning on or after 1 January 2013. The Bank has no investments in subsidiaries, jointly controlled entities and associates, therefore, this amendment will have no impact on the Bank's financial statements.

# IAS 28 Investments in Associates and Joint Ventures (revised in 2011)

As a consequence of the new IFRS 11 and IFRS 12, IAS 28 has been renamed IAS 28 *Investments in Associates and Joint Ventures* and describes the application of the equity method to investments in joint ventures in addition to associates. The amendment becomes effective for annual periods beginning on or after 1 January 2013. The Bank has no investments in joint ventures and associates, therefore, this amendment will have no impact on the Bank's financial statements.

#### Amendments to IFRS 7 Financial Instruments: Disclosures

The amendments were issued in October 2010 by the IASB and are effective for annual periods beginning on or after 1 July 2011. The amendment introduces additional disclosure requirements for transferred financial assets that are not derecognized to enable the user of the Bank's financial statements to understand the relationship with those assets that have not been derecognized and their associated liabilities. In addition, the amendment requires disclosures about continuing involvement in derecognized assets to enable the users to evaluate the nature of, and risks associated with, the entity's continuing involvement in those derecognized assets. The amendment affects disclosure only and has no impact on the Bank's financial position or performance.

# 3. Summary of accounting policies (continued)

#### Future changes in accounting policies (continued)

Amendments to IAS 12 Income Taxes - Deferred Taxes: Recovery of Underlying Assets

In December 2010 the IASB issued amendments to IAS 12 effective for annual periods beginning on or after 1 January 2012. The amendment clarifies the determination of deferred tax on investment property measured at fair value. The amendment introduces a rebuttable presumption that deferred tax on investment property measured using the fair value model in IAS 40 should be determined on the basis that its carrying amount will be recovered through sale. Furthermore, it introduces the requirement that deferred tax on non-depreciable assets that are measured using the revaluation model in IAS 16 should always be measured on a sale basis. The Bank has no investments in investment property and non-depreciable assets, therefore, this amendment will have no impact on the Bank's financial position or performance.

#### Amendment to IAS 19 Employee Benefits

The amendment to IAS 19 becomes effective for annual periods beginning on or after 1 January 2013. The amendment introduces significant changes to the method of accounting for employee benefits, including the removal of the option for deferred recognition of changes in pension plan assets and liabilities (known as the "corridor approach"). In addition, the amendment limits changes in net pension assets (liabilities) recognized in profit and loss to net interest income (expense) and cost of services. The amendment will have no impact on the Bank's financial position or performance.

Amendment to IAS 1 Presentation of Financial Statements – Presentation of Other Comprehensive Income
The amendment to IAS 1 becomes effective for annual periods beginning on or after 1 July 2012. The amendment changes the grouping of items presented in other comprehensive income. Items that could be reclassified to profit or loss at a future point in time (for example, upon derecognition or settlement) would be presented separately from items that will never be reclassified. The amendment will have no impact on the Bank's financial position or performance.

Amendment to IFRS 1 First-time Adoption of International Financial Reporting Standards – Severe Hyperinflation and Removal of Fixed Dates for First-time Adopters

The amendment becomes effective for annual periods beginning on or after 1 July 2011. The amendment introduces a new deemed cost exemption for entities that have been subject to severe hyperinflation. The amendment will have no impact on the Bank's financial position or performance.

Amendments to IAS 32 Financial Instruments: Presentation (guidance on offsetting financial assets and liabilities), and amendments to IFRS 7 Financial Instruments: Disclosures (disclosures on offsetting financial assets and liabilities). In December 2011, the IASB issued amendments to its current guidance in IAS 32 on offsetting financial assets and liabilities and has introduced new disclosure requirements in IFRS 7. The amendments to IFRS 7 are to be applied retrospectively for annual periods beginning on or after 1 January 2013 and the amendments to IAS 32 are to be applied retrospectively for annual periods beginning on or after 1 January 2014. Early application is permitted. The amendments to IAS 32 clarify that rights to set-off must not only be legally enforceable in the normal course of business, but must also be enforceable in the event of default, bankruptcy or insolvency of all the counterparties to the contract. The amendments to IAS 32 also clarify that rights of set-off must not be contingent on a future event. The amendments to IAS 32 also clarify the offsetting criteria that the reporting entity is required to intend either to settle on a net basis, or to realize the asset and settle the liability simultaneously. The amendments to IFRS 7 require the reporting entity to disclose information about rights to set-off and related arrangements for all recognized financial instruments that are set off in accordance with IAS 32. The Bank now evaluates the impact of the adoption of new amendments and considers the initial application date.

# 4. Significant accounting judgments and estimates

# **Estimation uncertainty**

In the process of applying the Bank's accounting policies, management has used its judgments and made estimates in determining the amounts recognized in the financial statements. The most significant use of judgments and estimates are as follows:

#### **Taxation**

Russian tax, currency and customs legislation is subject to varying interpretations and changes, which can occur frequently. Management's interpretation of such legislation as applied to the transactions and activity of the Bank' companies may be challenged by the relevant regional and federal authorities. Recent events within the Russian Federation suggest that the tax authorities may take a more assertive position in their interpretation of the legislation and assessments and, as a result, it is possible that transactions and activities that have not been challenged in the past may be challenged. As such, significant additional taxes, penalties and interest may be assessed. Fiscal periods remain open to review by the authorities in respect of taxes for three calendar years preceding the year of review. Under certain circumstances reviews may cover longer periods.

# 4. Significant accounting judgments and estimates (continued)

#### **Taxation (continued)**

Transfer pricing legislation in Russia allows the tax authorities to make transfer pricing adjustments and impose additional tax liabilities in respect of all "controlled" transactions (except for those conducted at state regulated prices and tariffs), if the transaction price differs upwards or downwards from the market price by more than 20 percent. Under current transfer pricing legislation "controlled" transactions include transactions with related parties, barter transactions, foreign trade transactions and transactions with unrelated parties characterized by significant price fluctuations (i.e. if the price applied under these transactions differs from the price applied under similar transactions by more than 20 percent within a short period of time). Special transfer pricing rules apply to transactions with securities and derivatives. Transfer pricing rules as currently in effect are vaguely drafted, generally leaving wide scope for their interpretation by the tax authorities and courts in practice.

As of 31 December 2011, management believes that its interpretation of the relevant legislation is appropriate and that the Bank's tax, currency and customs positions will be sustained.

# 5. Cash and cash equivalents

Cash and cash equivalents comprise:

	2011	2010
Cash on hand	154	_
Current accounts with the CBR (other than obligatory reserves)	331	318,815
Current accounts with other banks		
- Russian Federation	7,433	23,083
- other countries	11,700	20,873
Settlement accounts with trading systems	837,452	794,640
Time deposits with credit institutions up to 30 days in other countries	1,461,703	_
Reverse repo agreements up to 30 days		
- with credit institutions	675,351	2,088,089
- with commercial entities	_	842,434
	2,994,124	4,087,934
Interest receivable on time deposits with credit institutions up to 30 days in other		
countries	4	_
Interest receivable on reverse repo agreements up to 30 days	610	1,098
Total cash and cash equivalents	2,994,738	4,089,032

Current accounts with the CBR include deposits with the CBR placed to effectuate current settlements and other operations.

As of 31 December 2011, balances on current accounts with banks in other countries comprise balances on current accounts with the parent bank in the amount of RUB 11,366 (2010: RUB 20,873).

As of 31 December 2011, RUB 1,461,703 denominated in US dollars were placed as a short-tem deposit with the parent bank (2010: RUB 0). As of 31 December 2011, interest receivable on time deposit with the parent bank amounted to RUB 4 (2010: RUB 0).

The Group entered into reverse repurchase agreements with several credit institutions. The subject of these agreements are bonds issued by Russian companies with a fair value of RUB 801,921 (2010: RUB 3,329,670).

# 6. Obligatory reserves with the Central Bank of the Russian Federation

Obligatory reserves with the Central Bank of the Russian Federation are the deposits with the CBR which may not be withdrawn by the Bank to finance its day-to-day operations. Credit institutions are required to maintain a non-interest earning deposit (as contributions to the obligatory reserve) with the CBR, the amount of which depends on the level of funds attracted by the credit institution. Those contributions are not included in cash and cash equivalents as such deposit withdrawal is significantly restricted by the statutory legislation.

As of 31 December 2011, obligatory reserves with the Central Bank of the Russian Federation amounted to RUB 91,839 (2010: RUB 128,480).

# 7. Trading securities

Trading securities owned by the Bank comprise:

	2011	2010
Corporate bonds	1,153,660	2,160,011
Bonds of credit institutions	1,008,199	512,699
Russian State bonds (OFZ)	206,350	729,997
Bonds of the Finance Department of Krasnoyarsk Region Administration	203,102	
Trading securities	2,571,311	3,402,707

All trading securities owned by the Bank are denominated in Russian Rubles.

OFZs are state securities issued by the Russian Ministry of Finance.

Bonds of credit institutions comprise debt securities issued by major Russian banks.

Corporate bonds are debt securities issued by major Russian ferrous and non-ferrous, oil, mining and machine building companies.

Nominal interest rates and maturities of these securities are as follows:

	2011		2010		
	% Matur		%	Maturity	
Corporate bonds	8.25%-10.4%	2014-2021	7.15%-13.5%	2011-2019	
Bonds of credit institutions	8.25%-11%	2014-2021	7.2%-9%	2011-2013	
Russian State bonds (OFZ)	6.85%	2012	6.85%-10%	2011-2016	
Bonds of Krasnoyarsk Region Administration	9.5%	2016	_	_	

# 8. Amounts due from other banks

The balance of RUB 41,808 representing a time deposit placed with the parent bank in euro is recognized in Amounts due from other banks (2010: RUB 0). The above amount includes interest receivable totaling RUB 137 as of 31 December 2011 (2010: RUB 0).

### 9. Derivative financial instruments

The Bank enters into derivative financial instruments for trading purposes. The table below shows the fair values of derivative financial instruments, recorded as assets or liabilities, together with their notional amounts. The notional amount, recorded gross, is the amount of a derivative's underlying asset and is the basis upon which changes in the value of derivatives are measured. The notional amounts indicate the volume of transactions outstanding at the year end and are not indicative of the credit risk.

	2011			2010			
	Notional	Fair v	alue	Notional	Fair v	alue	
	amount	Asset	Liability	amount	Asset	Liability	
Foreign exchange contracts							
Swaps – foreign	1,325,000		8,017	7,139,589	20,927	4,969	
Swaps – domestic	1,670,539	760	6,997	12,130,579	40,350	49,801	
Forwards – foreign	116,247	-	209	-	_	-	
Forwards – domestic	-			922,238	8,500		
Total derivative assets/ liabilities		760	15,223		69,777	54,770	

Foreign and domestic in the table above stand for counterparties where foreign means non-Russian entities and domestic means Russian entities.

Foreign exchange derivative financial instruments are generally traded in an over-the-counter market with professional market counterparties on standardized contractual terms and conditions. Derivative financial instruments are either assets or liabilities depending on the foreign exchange fluctuations which can have either favorable or unfavorable effect on the underlying asset. The aggregate fair value of derivative financial instruments can change significantly over time.

# 9. Derivative financial instruments (continued)

As of 31 December 2011, the Bank had positions in the following types of derivatives:

#### **Forwards**

Forwards are contractual agreements to buy or sell a specified financial instrument at a specific price and date in the future. Forwards are customized contracts transacted in the over-the-counter market.

#### **Swaps**

Swaps are contractual agreements to simultaneously buy and sell (or vice versa) a specified financial instrument. Swaps are settled on various dates. Swaps can be either spot/forward swaps or forward/forward swaps combining forward contracts entered for different maturities.

Derivative financial instruments held or issued for trading purposes

Most of the Bank's derivative trading activities relate to deals with customers which are normally laid off with counterparties. The Bank may also take positions with the expectation of profiting from favorable movements in prices, rates on indices. Included under this heading are derivatives which do not meet IAS 39 hedging requirements.

# 10. Property and equipment and intangible assets

The movements in property and equipment and intangible assets were as follows:

	Office equipment	Computers and office appliances	Telecommuni- cation equipment	Computer software	Vehicles	Total
Cost		• •				
31 December 2009	16,066	7,709	710	21,669	4,762	50,916
Additions	444	1,283	_	_	3,054	4,781
31 December 2010	16,510	8,992	710	21,669	7,816	55,697
Additions	359	3,119	_	· -	4,288	7,766
Disposals	-	-	-	-	(2,949)	(2,949)
31 December 2011	16,869	12,111	710	21,669	9,155	60,514
Accumulated depreciation						
31 December 2009	(6,841)	(4,321)	(418)	(6,800)	(2,689)	(21,069)

31 December 2010	(10,078)	(6,206)	(595)	(14,023)	(4,419)	(35,321)
Depreciation charge	(3,264)	(1,379)	(115)	(7,168)	(2,400)	(14,326)
Disposals	-	-	-	-	2,949	2,949
31 December 2011	(13,342)	(7,585)	(710)	(21,191)	(3,870)	(46,698)
Net book value:						
31 December 2009	9,225	3,388	292	14,869	2,073	29,847
31 December 2010	6,432	2,786	115	7,646	3,397	20,376
31 December 2011	3,527	4,526	0	478	5,285	13,816

# 11. Taxation

The corporate income tax expense comprises:

	2011	2010
Current tax (expense)  Deferred tax benefit (charge) – origination and reversal of temporary differences	(18,538) 28,621	(12,593) (3,983)
Income tax benefit/(expense)	10,083	(16,576)

Russian legal entities must file individual tax declarations. The tax rate for banks for profits other than on state/municipal securities was 20% for 2011 and 2010. The tax rate for interest income on state/municipal securities was 15% for federal taxes in 2011 and 2010.

As of 31 December 2011, income tax overpayment amounted to RUB 92,028 (2010: RUB 103,760). Income tax on coupon interest earned on state securities payable as of 31 December 2011 amounted to RUB 307 (2010: RUB 689). On 6 April 2012, the Bank submitted an amended income tax declaration for 2010 to the tax authorities. The declaration recorded the year 2010 tax benefit and expense, identified in 2011. According to the amended declaration, income tax for 2010 amounted to RUB 6,303. Thus, upon submission of the tax declaration, income tax overpayment as of 31 December 2011 amounted to RUB 92,028.

# 11. Taxation (continued)

The effective income tax rate differs from the statutory income tax rates. A reconciliation of the income tax expense based on statutory rates with actual is as follows:

	2011	2010
Profit/(loss) before tax	(126,811)	26,137
Statutory tax rate	20%	20%
Theoretical income tax benefit/(expense) at the statutory rate	25,362	(5,227)
Adjustments to financial results from securities	(2,629)	(3,220)
Interest (coupon) income on state securities taxed at different rates	2,272	2,167
Non-deductible expenditures	(18,842)	(9,159)
Utilised tax losses carried forward, not recognised previously	7,567	
Other permanent differences	(3,647)	(1,137)
Income tax benefit/(expense)	10,083	(16,576)

Differences between IFRS and Russian tax legislation give rise to temporary and permanent differences between accounting and tax values of certain assets and liabilities.

Deferred tax assets and liabilities as of 31 December and their movements for the respective year comprise:

	2009	Origination and reversal of temporary differences in the statement of comprehensive income	2010	Origination and reversal of temporary differences in the statement of comprehensive income	2011
Tax effect of deductible temporary differences:					
Accrued employee bonuses Fair value measurement of	34,804	(8,228)	26,576	24,253	50,829
securities	_	3,854	3,854	(2,089)	1,765
Fair value measurement of derivative financial assets	_	_	_	2,893	2,893
Other temporary differences	805	(31)	774	260	1,034
Deferred tax assets	35,609	(4,405)	31,204	25,317	56,521
Tax effect of taxable temporary differences: Fair value measurement of					
securities	(3,382)	3,382	_	_	_
Property and equipment	(2,775)	1,995	(780)	303	(477)
Fair value measurement of derivative financial assets	1,954	(4,955)	(3,001)	3,001	_
Deferred tax liability	(4,203)	422	(3,781)	3,304	(477)
Deferred tax asset	31,406	(3,983)	27,423	28,621	56,044

Based on the Bank's operating results for 2006 and 2007, the Bank had tax losses of RUB 52,045 that can be carried forward within 10 years following the tax period where the losses were incurred. As of 31 December 2010, the Bank did not report a deduction of these losses. In 2011, the income tax base was reduced by the amount of the loss of RUB 37,835. As of 31 December 2011, the Bank did not recognize a tax asset for unused tax losses in the amount of RUB 14,210.

#### 12. Other assets and liabilities

$\sim$ $\sim$			
()thar	assets	comr	rica.

Total other liabilities	311,862	206,950

# 13. Amounts due to credit institutions

Amounts due to credit institutions comprise:

	2011	2010
Current accounts	177	190
Time deposits and loans	1,111,441	4,129,594
Amounts due to credit institutions	1,111,618	4,129,784

Included in current accounts is a balance of RUB 177 placed in Russian rubles on the current account with the parent bank (2010 – RUB 190).

As of 31 December 2011, the Bank received equivalent of RUB 51,434 in Swiss francs (2010 – RUB 42,136 in Swiss francs), RUB 1,498 in British pounds (2010 – RUB 1,323 in British pounds), RUB 0 in USD (2010 – RUB 3,977,236 in USD), and RUB 758,473 in EUR (2010 – RUB 108,899 in EUR) from the parent bank.

As of 31 December 2011, the estimated fair value of amounts due to credit institutions was RUB 1,111,618 (2010 - RUB 4,129,784).

# 14. Amounts due to customers

Amounts due to customers include the following:

2011	2010
197,285	937,582 500,069
724 6,840	
204,849	1,437,651
	197,285 - 724 6,840

As of 31 December 2011, included in current accounts of corporate customers are amounts due to companies related to the Bank of RUB 197,285 (96.3% of total amounts due to customers) (2010 – RUB 937,582 (65.2% of total amounts due to customers)) (see Note 21).

As of 31 December 2011, the estimated fair value of amounts due to customers was RUB 204,849 (2010 - RUB 1,437,651).

#### 15. Net assets attributable to the shareholder

The Bank was founded as a limited liability company with a sole shareholder. As of 31 December 2011, the share capital of the Bank amounted to RUB 3,450,000 (2010 – RUB 1,250,000) comprising one share contributed by UBS AG. In November 2011, the Bank increased its share capital by RUB 2,200,000, contributed by the Bank's sole shareholder UBS AG that owns 100% of the share capital. All changes to the charter documents were duly registered.

To strengthen the Bank's financial stability, in 2011 the Bank received pecuniary aid from the parent bank in the amount of RUB 189,380 (2010 – RUB 296,309). This amount was not registered as an increase in the share capital.

In accordance with the Bank's charter, shareholders of limited liability companies may unilaterally withdraw from the company. In such cases the Bank shall pay the withdrawing shareholder the actual amount of its interest in the Bank's share capital as reported in the statutory accounting reports of the Bank for the year of withdrawal, or, subject to the withdrawing shareholder's consent, transfer the equivalent in kind. The payment should be made within six months following the end of the financial year of the withdrawal notice.

# 16. Commitments and contingencies

#### **Operating environment**

Russia continues economic reforms and development of its legal, tax and regulatory frameworks as required by a market economy. The future stability of the Russian economy is largely dependent upon these reforms and developments and the effectiveness of economic, financial and monetary measures undertaken by the government.

The global financial crisis had an impact on the Russian economy. Despite certain signs of recovery, there continues to be uncertainty regarding further economic growth, access to capital sources and cost of capital, which could affect the Bank's financial position, results of operations and business prospects.

Also, factors including increased unemployment in Russia, reduced corporate liquidity and profitability, and increased corporate and personal insolvencies, have affected the Bank's borrowers' ability to repay the amounts due to the Bank. In addition, changes in economic environment have resulted in deterioration of the value of collateral held against loans and other liabilities. To the extent that information is available, the Bank has reflected revised estimates of expected future cash flows in its impairment assessment.

While management believes it is taking appropriate measures to support the sustainability of the Bank's business in the current circumstances, unexpected further deterioration in the areas described above could negatively affect the Bank's results and financial position in a manner not currently determinable.

# Legal

In the ordinary course of business, the Bank is subject to legal actions and complaints. Management believes that the ultimate liability, if any, arising from such actions or complaints will not have a material adverse effect on the financial condition or the results of future operations of the Bank.

#### Lease commitments

In 2006, the Bank entered into an office sublease agreement with a related party. The agreement had a term of one year renewable upon mutual consent of the parties. The agreement was renewed for one year in November 2007 and in the subsequent years including November 2011. Annual lease payments under the lease agreement, including maintenance fees, are as follows:

90,319	77,799
90,319	77,799

2010

2011

# 17. Net fee and commission income and expense

Net fee and commission income and expense comprise:

	2011	2010

Other	12,249	6,630
Other operating expenses	275,085	197,610

# 20. Risk management

#### Introduction

Risk is inherent in the Bank's activities but it is managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls. This process of risk management is critical to the Bank's continuing profitability and each individual within the Bank is accountable for the risk exposures relating to his or her responsibilities. The Bank is exposed to credit risk, liquidity risk and market risk, the latter being subdivided into trading and non-trading risks. It is also subject to operating risks.

The independent risk control process does not include business risks such as changes in the environment, technology or industry. They are monitored through the Bank's strategic planning process.

#### Risk management structure

The Board of Directors is ultimately responsible for identifying and controlling risks; however, there are separate independent bodies responsible for managing and monitoring risks.

#### Board of Directors

The Board of Directors is responsible for the overall risk management approach and for approving the risk strategies and principles.

#### Management Board

The Management Board has the responsibility to monitor the overall risk process within the Bank.

#### Risk controlling

The Risk Controlling Unit has the overall responsibility for the development of the risk strategy and implementing principles, frameworks, policies and limits. It is responsible for the fundamental risk issues and manages and monitors the relevant risk decisions.

The Risk Controlling Unit is responsible for implementing and maintaining risk related procedures to ensure an independent control process.

#### Internal audit

Risk management processes throughout the Bank are audited annually by the internal audit function that examines both the adequacy of the procedures and the Bank's compliance with the procedures. Internal Audit discusses the results of all assessments with management, and reports its findings and recommendations to the Audit Committee.

#### Risk measurement and reporting systems

The Bank's risks are measured using models which reflect both the expected loss likely to arise in normal circumstances and unexpected losses, which are an estimate of the ultimate actual loss based on statistical models. The models make use of probabilities derived from historical experience, adjusted to reflect the economic environment. The Bank also runs worst case scenarios that would arise in the event that extreme events which are unlikely to occur do, in fact, occur.

Monitoring and controlling risks is primarily performed based on limits established by the Bank. These limits reflect the business strategy and market environment of the Bank. In addition, the Bank monitors and measures the overall risk bearing capacity in relation to the aggregate risk exposure across all risks types and activities.

Information compiled from all the businesses is examined and processed in order to analyze, control and early identify risks. This information is presented and explained to the Management Board, Credit Risk Department and heads of business units concerned. The report includes aggregate credit exposure, credit metric forecasts, hold limit exceptions, VaR, liquidity ratios and risk profile changes. Reporting of industry risks takes place on a regular basis. Senior management regularly assesses the appropriateness of the allowance for credit losses. The Management Board receives a risk report once a quarter which is designed to provide all the necessary information to assess and conclude on the risks of the Bank.

For all levels throughout the Bank, specifically tailored risk reports are prepared and distributed in order to ensure that all business divisions have access to extensive, necessary and up-to-date information.

A regular briefing is given to the Management Board and all other relevant employees of the Bank on the utilization of market limits, analysis of VaR, proprietary investments and liquidity, plus any other risk developments.

# 20. Risk management (continued)

#### Risk mitigation

As part of its overall risk management, the Bank uses derivatives to manage exposures resulting from changes in foreign currencies.

#### Credit risk

Credit risk is the risk that the Bank will incur a loss because its customers, clients or counterparties failed to discharge their contractual obligations. The Bank manages and controls credit risk by setting limits on the amount of risk it is willing to accept for individual counterparties and for geographical and industry concentrations, and by monitoring exposures in relation to such limits.

The Bank has established a credit quality review process to provide early identification of possible changes in the creditworthiness of counterparties, including regular collateral revisions. Counterparty limits are established by the use of a credit risk classification system, which assigns each counterparty a risk rating. Risk ratings are subject to regular revision. The credit quality review process allows the Bank to assess the potential loss as a result of the risks to which it is exposed and take corrective action. The Bank continuously monitors credit risks and limits on risks set for different counterparties.

The Bank has traditionally been utterly prudent in setting its risk management policy. Credit risk accepted by the Bank in transactions arises primarily from interbank loans and placements on nostro accounts. The Bank takes a conservative position when placing temporarily available funds and chooses the CBR for placements in Russian rubles and UBS AG for placements in foreign currencies as correspondent banks. Insignificant portion of funds is placed to secure settlements with NCO NSD.

When participating in the interbank lending market, the Bank is to strictly comply with the limits set and approved by the credit risk department of UBS AG Group and the Bank's Credit Committee. The Bank set the limits for counterparty banks, either representing subsidiaries of foreign financial organizations or having strong individual credit ratings affirmed by international rating agencies. The Bank may not enter into transactions (unless fully prepaid) with counterparties (except for UBS AG) for which no limits have been set. In addition to concentration risks, the Bank limits portfolio risks by monitoring sensitivity of change in aggregate position to interest rates on assets and liabilities.

Conversion transactions and foreign currency transactions are conducted mainly at MICEX and with UBS AG. Transactions with other counterparties are conducted only if there is a corresponding limit available and strictly within such limit. The Bank does not accept currency risk arising from foreign currencies other than US dollar – all conversion transactions involving other currencies are fully hedged via UBS AG. The Bank limits aggregate currency risk exposure by monitoring sensitivity of change in position to volatility of currency pairs in which assets and liabilities are denominated.

#### Derivative financial instruments

Credit risk arising from derivative financial instruments is, at any time, limited to those with positive fair values.

The table below shows the maximum exposure to credit risk for the components of the statement of financial position, including derivatives.

	Notes	Maximum exposure 2011	Maximum exposure 2010
Cash and cash equivalents	5	2,994,584	4,089,032
Trading securities	7	2,571,311	3,402,707
Obligatory reserves with the Central Bank of the Russian Federation	6	91,839	128,480
Amounts due from other banks	8	41,808	_
Derivative financial assets	9	760	69,777
Other assets	12	92,086	26,208
Total credit risk exposure		5,792,388	7,716,204

Where financial instruments are recorded at fair value, the amounts shown above represent the current credit risk exposure but not the maximum risk exposure that could arise in future as a result of changes in values.

# 20. Risk management (continued)

# Credit risk (continued)

Credit quality per class of financial assets

The credit quality of financial assets is managed by the Bank using internal credit ratings.

All financial assets that include cash and cash equivalents (Note 5), trading securities (Note 7), obligatory reserves with the Central Bank of the Russian Federation (Note 6) and derivative financial assets (Note 9) have high ratings, they are neither impaired nor overdue.

According to the Bank's internal credit rating scale, a counterparty's financial position is evaluated as: "good" if its internal rating is "9" or less (high grade); "average or worse" if its internal rating is from "10" through "12" (standard grade); "poor" if its internal rating is above "12" (sub-standard grade).

# **Geographical concentration**

The geographical concentration of the Bank's monetary assets and liabilities is set out below:

	2011					
			Other

# 20. Risk management (continued)

# Liquidity risk and funding management

Liquidity risk is the risk that the Bank will be unable to meet its payment obligations when they fall due under normal and stress circumstances. To limit this risk, management has arranged diversified funding sources in addition to its existing core deposit base. It also manages assets with liquidity in mind, and monitors future cash flows and liquidity on a daily basis.

The Bank maintains a portfolio of diverse marketable assets that can be easily liquidated in the event of an unforeseen interruption of cash flow. The Bank also has committed an additional overdraft limit that it can access to meet liquidity needs. In addition, the Bank maintains a cash deposit (obligatory reserve) with the CBR, the amount of which depends on the level of customer funds attracted.

The liquidity position is assessed and managed by the Bank primarily on a standalone basis, based on certain liquidity ratios established by the CBR. As of 31 December, these ratios were as follows:

	<u> </u>	2010, %
N2 "Instant Liquidity Ratio" (assets receivable or realizable within one day/		
liabilities repayable on demand)	104.0	108.0
N3 "Current Liquidity Ratio" (assets receivable or realizable within 30 days/		
liabilities repayable within 30 days)	725.4	116.0
N4 "Long-Term Liquidity Ratio" (assets receivable in more than one year/		
sum of capital and liabilities repayable in more than one year)	0.0	0.0

The CBR requirements set the minimum permissible value of N2 and N3 ratios at 15% and 50%, respectively, and the maximum permissible value of N4 at 120%.

Analysis of financial liabilities by remaining contractual maturities

The table below summarizes the maturity profile of the Bank's financial liabilities as of 31 December 2011 and 2010 based on contractual undiscounted repayment obligations. Repayments which are subject to notice are treated as if notice were to be given immediately. However, the Bank expects that many customers will not request repayment on the earliest date the Bank could be required to pay and the table does not reflect the expected cash flows indicated by the Bank's deposit retention history.

Financial liabilities as of 31 December 2011	Less than 3 months	3 to 12 months	Total
Amounts due to credit institutions	1,111,938	_	1,111,938
Derivative financial instruments			
- Contractual amounts payable	3,111,786	_	3,111,786

All trading securities are included in the 'on demand' category as this portfolio is highly liquid and, in management's opinion, this approach better reflects the Bank's liquidity position.

# 20. Risk management (continued)

#### Market risk

Market risk is the risk of financial loss which the Bank may suffer due to unfavorable changes in market parameters. The Bank distinguishes two main groups of market parameters which include general and specific factors. General factors of the market risk are the parameters which depend on macroeconomic, geopolitical and other market conditions unrelated to any individual instruments or issuers. The indicators of general market risk factors include the level of interest rates and market indices, foreign exchange rates, prices for energy, metals and commodities and overall credit spread which is the excess of the effective loan interest rate over the interest rate on risk-free securities. Interdependence among the market risk indicators is taken into the account as well. Specific components are factors which cannot be attributed to general changes in market conditions. These components comprise quotes of debt and equity instruments, derivative financial instruments (including imbedded derivatives) linked to these debt and equity instruments.

The Bank discloses details of possible financial loss calculated using the Value-at-Risk (VaR) model. For the purpose of internal control, management also uses the worst scenarios data or stress-testing, risk concentration analysis, monitoring of qualitative and quantitative parameters.

All activities related to assessment and monitoring of the market risk level and control over compliance with the set risk limits are performed by the Bank's functions independent from the Bank's front-office functions (commercial units) that enter into transactions involving acceptance of market risk. Such segregation of the risk acceptance and risk assessment powers between the Bank's functions complies with the standards of UBS AG, existing international practice and is designed to eliminate any potential conflict of interests.

In securities transactions, the Bank does not invest in equity financial instruments, confining itself to debt instruments only. The Bank cautiously chooses issuers of securities and tries to ensure a reasonable balance between the yield and risk levels attributable both to the whole portfolio and its segments.

Limits on the nominal value and limits in the form of credit delta serve as instruments of hands-on management of the portfolio structure. Credit delta shows the maximum change in the market value of the portfolio if the risk-free yield rate changes (risk-free yield curve shifts) by 1 basis point. Thus, the use of credit delta helps control the volatility of the portfolio and makes its behavior predictable. Moreover, even with low volatility, the aggregate limit of the portfolio cannot exceed the nominal value of USD 200 million. The maximum credit delta of the whole portfolio is limited to USD 75 thousand; within this limit, the Bank also sets individual limits on credit delta by issuer and issuer category (as a rule, at or below USD 25 thousand and USD 50 thousand, respectively) and this rules out excessive concentration of investment in debt instruments of one issuer (these limits, in turn, may further be narrowed by the maximum risk per borrower or a group of related borrowers set by the CBR).

UBS AG Chief Risk Officer is responsible for developing control procedures over market risk and for independent control over implementation of these procedures. The market risk assessment unit of UBS Investment Bank provides support to all business units within the UBS AG Group in assessing and reporting market risks.

### Risk assessment

The Bank applies two main methods of assessing market risk – the VaR model and stress-testing. These assessment methods are supplemented by risk concentration analysis and additional controls. The Bank sets limits on the level of accepted exposure. For the purpose of regulating specific exposure when the standard limits do not meet the complex control criteria, the Bank sets additional limits for individual securities portfolios, portfolio segments, classes of assets and financial products.

#### Value-at-Risk (VaR) methodology

The Bank applies VaR methodology to assess the market risk positions held and to estimate a potential economic loss based upon a number of parameters and assumptions for various changes in market conditions. VaR is a statistical method used in measuring financial risk by estimating the potential negative change in the market value of a portfolio under the influence of general and specific risk factors, at a given confidence level and over a specified time horizon.

The Bank estimates VaR with a 10-day horizon for the purpose of internal control and with a 1-day horizon for additional analysis. VaR is a hypothetical loss attributable to a portfolio, which may be incurred as a result of changes in market factors during a given time period subject to a certain confidence level (99%). Thus, there is a statistical probability of 1% that the actual loss, which the Bank may theoretically suffer, will exceed the amount derived by applying the VaR model.

# 20. Risk management (continued)

# Market risk (continued)

VaR models are based on the historical simulation method and assume that market fluctuations in the next 10 days or 1 day will meet the scenario of market fluctuations over the previous 10 days or 1 day, respectively. For the general market risk, the Bank applies historical data for the past 5 years. This period usually corresponds to a market cycle and contains maximum and minimum levels of market indicators. Historical information for the period is applied to an existing securities portfolio. This method is known as a Historical Simulation Method.

To evaluate the adequacy of the calculation model applied, the market risk assessment unit of UBS Investment Bank performs back-testing on a regular basis by comparing simulated and actual losses.

Although VaR helps to assess the risk, it is necessary to consider disadvantages of this method, such as:

- Applying past changes in prices to asses future changes does not help to assess the full extent of possible future price fluctuations;
- ► Estimation of changes in financial market indicators for a 10-day period assumes that during this period all of the Bank's positions may be closed (or hedged). This estimate may inaccurately reflect the exact amount of market risk during the periods of lower market liquidity when the period of closing (hedging) the Bank's positions may increase;
- ▶ Applying the 99% confidence level does permit assessing the losses whose probability is below 1%; and
- VaR calculation is based on the Bank's positions exposed to market risk as of the end of the day and may not reflect the Bank's intraday risk.

Taking into account the disadvantages of the VaR method and for the purpose of obtaining more detailed information on market risk, the Bank uses, in addition to VaR calculation, market risk assessment based on scenario analysis and stress-testing.

Stress-testing is an imitation (scenario) modeling method designed to assess portfolio stability against irregular, sudden and highly adverse market fluctuations and obtain more detailed picture of the risk. This method is a supplement to the VaR models as it helps to obtain scenario assessment of losses which remain beyond VaR calculated based on the stated probability and historical data. By applying stress-testing, the Bank seeks to define a broad range of possible scenarios, assess portfolio sensitivity to sudden market fluctuations and determine control environment which enables total, transparent and timely control over changes in market conditions.

The results of interest rate risk calculation by applying the VaR method as of 31 December 2011 are presented in the table below (including comparative financial information as of 31 December 2010).

				As of				As of
	Minimum for 2011	Maximum for 2011	Average for 2011	31 December 2011	Minimum for 2010	Maximum for 2010	Average for 2010	31 December 2010
Type of risk Interest rate risk related to debt securities	89,974	362,086	211,514	241,026	33	481,993	175,915	242,190

According to the Bank, market risks related to non-traded assets are minimal.

#### Operational risk

Operational risk is the risk of loss arising from systems failure, human error, fraud or external events. When controls fail to perform, operational risks can cause damage to reputation, have legal or regulatory implications, or lead to financial loss. The Bank cannot expect to eliminate all operational risks, but through a control framework and monitoring and responding to potential risks, the Bank is able to manage these risks. Controls should include effective segregation of duties, access, authorization and reconciliation procedures, staff education and assessment processes, including the use of internal audit.

# 20. Risk management (continued)

# **Currency risk**

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. The Management Board has set limits on positions by currency based on CBR regulations. Positions are monitored on a daily basis.

2011

The Bank's exposure to currency risk on monetary assets and liabilities is as follows:

# 20. Risk management (continued)

# **Currency risk (continued)**

The table shows the analysis which calculates the effect of a reasonably possible movement in a currency rate against the Russian ruble on the statement of comprehensive income (due to the fair value of currency sensitive non-trading monetary assets and liabilities). The effect on equity does not differ from the effect on the statement of comprehensive income. A negative amount in the table reflects a potential net reduction in the statement of comprehensive income or equity, while a positive amount reflects a net potential increase.

Currency	Change in currency rate 2011	Effect on pre- tax profit and equity 2011	Change in currency rate 2010	Effect on pre- tax profit and equity 2010
Stronger USD	12.5%	205	8.9%	3,377
Weaker USD	12.5%	(205)	8.9%	(3,377)
Stronger CHF	15.5%	(7,802)	10.85%	(4,545)
Weaker CHF	15.5%	7,802	10.85%	4,545
Stronger GBP	13.69%	(190)	9.65%	(126)
Weaker GBP	13.69%	190	9.65%	126
Stronger EUR	11.77%	(350)	11.05%	(217)
Weaker EUR	11.77%	350	11.05%	217

#### Interest rate risk

The Bank takes on exposure in relation to the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. Interest margins may increase as a result of such changes, but may also reduce or create losses in the event that unexpected movements arise.

The Bank is exposed to interest rate risk, principally as a result of lending at fixed interest rates, in amounts and for periods, which differ from those of term borrowings secured at fixed interest rates. In practice, interest rates are generally fixed on a short-term basis. Also, interest rates that are contractually fixed on both assets and liabilities are often renegotiated to reflect current market conditions.

The Bank sets limits on the level of mismatch of interest rate repricing that may be undertaken and controls the compliance with the set limits on daily basis. In the absence of any available hedging instruments, the Bank seeks to match its interest rate positions.

The results of calculating interest rate exposure on debt securities by applying the VaR method are presented in the table above as part of market risk calculation.

#### 21. Fair values of financial instruments

The Bank uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

- Level 1: guoted (unadjusted) prices in active markets for identical assets or liabilities;
- Level 2: techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly;
- ▶ Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

The following table shows an analysis of financial instruments recorded at fair value by level of the fair value hierarchy:

2,571,311	_	_	2,571,311
<u> </u>	760	_	760
2,571,311	760	_	2,572,071
_	15,223	_	15,223
_	15,223	_	15,223
		- 760 <b>2,571,311 760</b> - 15,223	-     760     -       2,571,311     760     -       -     15,223     -

# 21. Fair values of financial instruments (continued)

31 December 2010	Level 1	Level 2	Level 3	Total
Financial assets				
Trading securities	3,402,707	_	_	3,402,707
Derivative financial instruments		69,777		69,777
	3,402,707	69,777	_	3,472,484
Financial liabilities				
Derivative financial instruments		54,770		54,770
		54,770		54,770

Financial instruments carried at fair value. Trading securities, other assets at fair value through profit or loss, and derivative financial instruments are recorded at fair value in the statement of financial position.

Cash and cash equivalents are carried at amortized cost which approximates their current fair value.

Loans and receivables carried at amortized cost. Interest rates on loans issued shortly before the reporting date do not differ materially from interest rates applicable to new instruments with similar credit risk and maturity. If the Bank determines that interest rates on previously issued loans differ materially from those applicable to similar instruments at the reporting date, the Bank estimates the fair value of these loans. The estimate is based on the discounted cash flow method and uses interest rates applicable to new instruments with similar credit risk and maturity. The use of interest rates is subject to instrument currency and maturity and credit risk of the counterparty.

Liabilities carried at amortized cost. The estimated fair value of these liabilities is based on market prices, if available. The estimated fair value of fixed-rate and maturity financial instruments that do not have quoted market prices is based on expected cash flows discounted at interest rates for new instruments with similar credit risk and maturity.

Derivative financial instruments. All derivative financial instruments are carried at fair value as assets when the fair value is positive and as liabilities when the fair value is negative. Refer to Note 9.

As of 31 December 2011 and 2010, the Bank's financial assets and financial liabilities are liquid or have a short-term maturity (less than three months), which results in their fair value being approximately equal to their carrying amount recorded in the statement of financial position.

# 22. Related party transactions

In accordance with IAS 24 *Related Party Disclosures*, parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions. In considering each possible related party relationship, attention is directed to the substance of the relationship, and not merely the legal form.

Related parties may enter into transactions which unrelated parties might not, and transactions between related parties may not be effected on the same terms, conditions and amounts as transactions between unrelated parties.

# 22. Related party transactions (continued)

The volumes of related party transactions, outstanding balances at the year end, and related expense and income for the year are as follows:

	2011		2010

# 22. Related party transactions (continued)

In 2006, the Bank entered into a sublease agreement with a related party, with an annual rate in rubles equal to USD 600 per 1 sq. m; as of 1 November 2009, this rate was increased to USD 1,000 per 1 sq. m.

Compensation to key management personnel comprised the following:

	2011	2010
Salaries	30,724	18,217
Bonuses	18,383	23,330
Unified social tax	433	299
Other social charges	255	235
Compensation to key management personnel	49,795	42,081

This amount of compensation represents short-term compensation only.

# 23. Capital adequacy

The objectives of the Bank's capital management are to ensure: (i) that the Bank complies with regulatory capital requirements established by the CBR and (ii) that the Bank is able to continue as a going concern. The Bank also performs on-going control of its capital adequacy ratio computed in accordance with the Basel Capital Accord to maintain it at no less than 8%. The compliance with the capital adequacy ratio established by the CBR is controlled through monthly reports with respective calculations submitted to the CBR.

According to effective capital requirements established by the CBR, banks should maintain a ratio of capital to risk-weighted assets ('capital adequacy ratio') at a level exceeding the mandatory minimum ratio. The CBR requires that banks should maintain an equity (capital) adequacy ratio of at least 10%. As of 31 December 2011, the Bank's regulatory capital adequacy ratio was 132.3% (2010: 42.6%). Regulatory capital is shown per the Bank's reports prepared under RAL and as of 31 December 2011 amounted to RUB 4,531,345 (2010: RUB 2,123,876).

# 24. Events after the reporting period

In 2011, the Bank's management made a decision pursuant to which at the beginning of 2012 the Bank voluntarily cancelled its license of a professional participant in the securities market for securities management activities, as the Bank was not engaged in such activities.

In February and March 2012, the Bank paid year-end bonuses for 2011 to its employees in the amount of RUB 246.9 million (including personal income taxes and excluding payroll taxes). Year-end bonuses for 2010 were paid in February 2011 in the amount of RUB 130.3 million, adjusted for personal income taxes.
