

Income becomes more important at times of heightened geopolitical tension

CIO Essentials

Author: UBS CIO GWM, UBS Switzerland AG

- The conflict in Iran has resulted in higher energy and gold prices, lower equity markets, and increased volatility.
- Our base case remains that this will be only a brief disruption in markets and that the economic impact will be limited, as has been the case in the recent past.
- While we maintain a positive outlook for the global economy and equity markets in the long run, diversification remains key. We believe bonds can provide diversification and offer attractive yields compared to cash.

Source: UBS

Over the weekend, joint airstrikes by the US and Israel across Iran, which reportedly resulted in the death of Iran's leader Ayatollah Ali Khamenei, have intensified conflict in the region. Ongoing exchanges between Israel and Iran, along with impacts on other Gulf countries, have contributed to heightened uncertainty.

While the humanitarian consequences of the conflict are significant, the anticipated economic impact remains limited. Our base case expectation is for only a brief disruption to global energy supplies. Any initial increase in oil prices is likely to ease once it becomes clear that supply disruptions are temporary, critical infrastructure remains intact, and military activity subsides. In this scenario, markets may experience short-term volatility but are expected to refocus on positive global economic fundamentals, consistent with the pattern observed after previous geopolitical shocks.

However, the onset of military action raises the likelihood of a less favorable scenario, where prolonged energy supply disruptions could have a more pronounced effect on the global economy and financial markets. Although it is too early to determine the full impact, elevated volatility is set to persist, especially since markets are also assessing the future

of technology companies and how AI will disrupt companies and industrials.

In periods of uncertainty, a holistic approach to portfolio management—encompassing rebalancing, diversification, and appropriate hedging—can help manage risk and support long-term outcomes. Fixed income remains an important component of a balanced portfolio. For those with lower allocations to fixed income, current conditions may present an opportunity to increase exposure, especially as further monetary easing is anticipated in the US and UK, and income opportunities in Europe and Switzerland have become more limited.

Within fixed income, we prefer high-quality government and corporate bonds with medium durations (3-7 years). We expect these bonds to deliver mid-single-digit returns through a combination of yield and price appreciation. Returns from quality bonds should exceed those from cash, in our view, particularly in adverse scenarios where falling rate expectations drive bond prices higher. Diversification within fixed income remains a key strategy for navigating today's uncertain environment.

This report has been prepared by UBS Switzerland AG. **Please see important disclaimers and disclosures at the end of the document.**

We're more cautious on the riskier segments of fixed income, such as high yield, due to historically tight spreads. Nevertheless, diversified fixed income strategies—combining investment grade, select high yield, subordinated, and emerging market debt—can offer enhanced return potential when managed with a focus on risk control.

In markets where bond yields are low or credit spreads are tight, income-seeking investors may find attractive opportunities in equity-based strategies, including dividend and options approaches. Switzerland stands out for high-quality dividend stocks, with yields just under 3% for the Swiss Market Index—well above local bond yields. Southeast Asia also offers appealing dividend yields.

Global asset class preferences definitions

The asset class preferences provide high-level guidance to make investment decisions. The preferences reflect the collective judgement of the members of the House View meeting, primarily based on assessments of expected total returns on liquid and commonly known indices, House View scenarios, and analyst convictions over the next 12 months. Note that the tactical asset allocation (TAA) positioning of our different investment strategies may differ from these views due to factors including portfolio construction, concentration, and borrowing constraints.

Attractive: We consider this asset class to be attractive. Consider opportunities in this asset class.

Neutral: We do not expect outsized returns or losses. Hold longer-term exposure.

Unattractive: We consider this asset class to be unattractive. Consider alternative opportunities

Note: For equities, we have a five-tier rating system with two additional preferences

Most Attractive: We consider this asset class to be among the most attractive. Investors should seek opportunities to add exposure.

Least Attractive: We consider this asset class to be among the least attractive. Seek more favorable alternatives opportunities.

When equities are included with the other asset classes in the three-tier rating system, we collapse "Most Attractive" with "Attractive" and "Least Attractive" with "Unattractive."

Appendix

Risk Information

UBS Chief Investment Office's ("CIO") investment views are prepared and published by the Global Wealth Management business of UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates ("UBS"), part of UBS Group AG ("UBS Group"). UBS Group includes former Credit Suisse AG, its subsidiaries, branches and affiliates. Additional disclaimer relevant to Credit Suisse Wealth Management follows at the end of this section.

The investment views have been prepared in accordance with legal requirements designed to promote the **independence of investment research**.

Generic investment research – Risk information:

This publication is **for your information only** and is not intended as an offer, or a solicitation of an offer, to buy or sell any investment or other specific product. The analysis contained herein does not constitute a personal recommendation or take into account the particular investment objectives, investment strategies, financial situation and needs of any specific recipient. It is based on numerous assumptions. Different assumptions could result in materially different results. Certain services and products are subject to legal restrictions and cannot be offered worldwide on an unrestricted basis and/or may not be eligible for sale to all investors. All information and opinions expressed in this document were obtained from sources believed to be reliable and in good faith, but no representation or warranty, express or implied, is made as to its accuracy or completeness (other than disclosures relating to UBS). All information and opinions as well as any forecasts, estimates and market prices indicated are current as of the date of this report, and are subject to change without notice. Opinions expressed herein may differ or be contrary to those expressed by other business areas or divisions of UBS as a result of using different assumptions and/or criteria. UBS may utilise artificial intelligence tools ("AI Tools") in the preparation of this document. Notwithstanding any such use of AI Tools, this document has undergone human review.

In no circumstances may this document or any of the information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes (i) valuation or accounting purposes; (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees. By receiving this document and the information you will be deemed to represent and warrant to UBS that you will not use this document or otherwise rely on any of the information for any of the above purposes. UBS and any of its directors or employees may be entitled at any time to hold long or short positions in investment instruments referred to herein, carry out transactions involving relevant investment instruments in the capacity of principal or agent, or provide any other services or have officers, who serve as directors, either to/for the issuer, the investment instrument itself or to/for any company commercially or financially affiliated to such issuers. At any time, investment decisions (including whether to buy, sell or hold securities) made by UBS and its employees may differ from or be contrary to the opinions expressed in UBS research publications. Some investments may not be readily realizable since the market in the securities is illiquid and therefore valuing the investment and identifying the risk to which you are exposed may be difficult to quantify. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS, into other areas, units, divisions or affiliates of UBS. Futures and options trading is not suitable for every investor as there is a substantial risk of loss, and losses in excess of an initial investment may occur. Past performance of an investment is no guarantee for its future performance. Additional information will be made available upon request. Some investments may be subject to sudden and large falls in value and on realization you may receive back less than you invested or may be required to pay more. Changes in foreign exchange rates may have an adverse effect on

the price, value or income of an investment. The analyst(s) responsible for the preparation of this report may interact with trading desk personnel, sales personnel and other constituencies for the purpose of gathering, synthesizing and interpreting market information.

Different areas, groups, and personnel within UBS Group may produce and distribute separate research products **independently of each other**. For example, research publications from **CIO** are produced by UBS Global Wealth Management. **UBS Global Research** is produced by UBS Investment Bank. **Research methodologies and rating systems of each separate research organization may differ**, for example, in terms of investment recommendations, investment horizon, model assumptions, and valuation methods. As a consequence, except for certain economic forecasts (for which UBS CIO and UBS Global Research may collaborate), investment recommendations, ratings, price targets, and valuations provided by each of the separate research organizations may be different, or inconsistent. You should refer to each relevant research product for the details as to their methodologies and rating system. Not all clients may have access to all products from every organization. Each research product is subject to the policies and procedures of the organization that produces it. The compensation of the analyst(s) who prepared this report is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking, sales and trading or principal trading revenues, however, compensation may relate to the revenues of UBS Group as a whole, of which investment banking, sales and trading and principal trading are a part.

Tax treatment depends on the individual circumstances and may be subject to change in the future. UBS does not provide legal or tax advice and makes no representations as to the tax treatment of assets or the investment returns thereon both in general or with reference to specific client's circumstances and needs. We are of necessity unable to take into account the particular investment objectives, financial situation and needs of our individual clients and we would recommend that you take financial and/or tax advice as to the implications (including tax) of investing in any of the products mentioned herein.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit UBS's ability to participate in or to advise on certain investment opportunities that otherwise would be consistent with the Client's investment objectives. The returns on a portfolio incorporating ESG factors or Sustainable Investing considerations may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by UBS, and the investment opportunities available to such portfolios may differ.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

USA: This document is not intended for distribution into the US and / or to US persons.
