

UBS Life USA Equity Tracker Fund

Fund Type

Passive USA equities for exempt approved UK pension funds.

Fund objective

The Fund aims to match the performance of the FTSE USA Index measured in Sterling.

Fund description

The Fund invests in the shares of a wide range of American companies.

Past performance is not a guide to future performance. The value of investments and the income from them can go down as well as up and are not guaranteed. You may not get back the amount originally invested.

Performance is based upon the underlying net asset value (NAV) price of 'A' Units. 'A' Units do not incur any fees or charges levied by the manager. The Fund is priced as at month end for performance and reporting purposes.

Changes in rates of exchange may cause the value of this investment to fluctuate.

As at 1 July 2015 companies involved in controversial weapons were banned from the passive market capitalisation weighted life funds. The stocks are identified by Ethix SRI Advisors. Given their relatively low number and index weightings, the ban has a minimal impact on expected tracking errors⁴. However, for the affected funds, at an individual stock level there may be a few larger weight deviations relative to the index than observed previously.

Fund risk analysis

	1 year	3 years	5 years
Annualised Standard Deviation of Fund ⁵	16.02	11.16	11.12
Annualised Standard Deviation of Index ⁵	16.04	11.17	11.14
Tracking Error ⁶	0.06	0.04	0.04

⁵For periods greater than 1 year, the annualised standard deviation is based on monthly logarithmic returns. ⁶Tracking error is the standard deviation of the difference between the monthly portfolio and benchmark returns, based on logarithmic returns and is annualised for periods greater than 1 year. Please note that historical tracking error is not a guide to the future. Tracking error levels will vary according to market conditions. For periods greater than 1 year, annualised returns are used to calculate the value added and the tracking error. ⁴Ex-ante tracking error is calculated using an appropriate risk system and risk model. The ex-ante tracking error is an indicative forecast only and may not reflect the realised (ex-post) tracking error experienced by the Portfolio.

³ Information shown is that of the index. The Fund seeks to track the index using full replication, rebalancing where required. For practical reasons, on a day to day basis, Fund weights may be marginally different from the index. Source: RIMES.

Economic overview

While there was no interest rate cut from the Federal Reserve over the quarter, policymakers softened their language on the interest rate outlook and Chairman Powell noted the case for easing monetary policy had grown stronger, and pledged to act as needed. Investors now fully expect the central bank to cut interest rates by a quarter of a percentage point when it meets in July, with further rate cuts seen as likely later in 2019.

Readings for US GDP for Q1 saw a healthy rate of annualised growth of 3.1%, ahead of expectations. However, there were mounting signs of a possible slowdown in the second quarter as global growth spluttered amidst ongoing trade tensions. Measures of services and manufacturing activity, as well as consumer spending, were muted.

While payroll numbers earlier in the quarter delivered positive surprises, expectations for June were missed by a wide margin and wage inflation remained subdued. Overall, unemployment is now at the lowest level seen for fifty years.

Fund manager comment

Following the FTSE quarterly review in June, two stocks were added to and two stocks were deleted from the index, along with various changes in the shares in issue of the index constituents. Two-way index turnover was around 1.62%.

Also during the quarter, but outside of the review, Dow was added to the index following a spin-off from DowDuPont. Newmont Mining Corp's weighting in the index increased following acquisition of Goldcorp. Uber Technologies was added to the index following an IPO.

Activity in the Fund reflected these changes.
