Performance quoted is past performance and no guarantee of future results. Results assume the reinvestment of all dividends and capital gains. Due to market volatility, current returns may be significantly higher or lower than those shown. See www.ubs.com/us-mutualfundperformance for current month-end performance. Investment return and principal value will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. You can lose money investing in the Fund.

Portfolio Positioning³

Special considerations:

Investors in the Fund should be able to withstand short-term fluctuations in the equity markets in return for potentially higher returns over the long term. The value of the Fund changes every day and may be affected by changes in interest rates, general market conditions, and other political, social and economic developments, as well as specific matters relating to the companies in whose securities the Fund invests. The value of the Fund's investments in foreign securities may fall due to adverse political, social and economic developments abroad, and due to decreases in foreign currency values relative to the US dollar. These risks are greater for investments in emerging market issuers than for issuers in more developed countries. Shares of Funds are not deposits or obligations of any bank or government agency and are not guaranteed by the FDIC or any other agency.

¹ As of March 31, 2023. Except where noted, comparative fund performance does not account for the deduction of sales charges and would be different if sales charges were included. Returns would be lower if certain expense waivers had not been in effect. Class P shares are not subject to an initial sales charge and are the Fund's lowest fee share class. The MSCI China All Shares Index captures large and mid-cap representation across China A-shares, B-shares, H-shares, Red-chips, P-chips and foreign listings. The index aims to reflect the opportunity set of China share classes listed in Hong Kong, Shanghai, Shenzhen and outside of China. It is based on the concept of the integrated MSCI China equity universe with China A-shares included. Index performance does not reflect deduction of fees and expenses.

² As of March 31, 2023, UBS Asset Management, a business group of UBS, manages \$1,117 billion worldwide. UBS Asset Management (Americas) Inc., the Advisor, managed \$368 billion in assets.

³ As of March 31, 2023. The Fund's portfolio is actively managed and its composition will differ over time. Holdings, sector weightings, portfolio characteristics and allocations are subject to change.

⁴ Expense ratios are as of the Fund's most recent prospectus dated October 28, 2021. UBS Asset Management (Americas) Inc., the Fund's investment advisor ("UBS AM (Americas)" or the "Advisor") have entered into a written agreement pursuant to which the Advisor has agreed to waive a portion of its management fees and/or to reimburse expenses (excluding expenses incurred through investment in other investment companies, interest, taxes, brokerage commissions, dividend expense and security loan fees for securities sold short and extraordinary expenses, such as proxy related expenses) to the extent necessary so that the Fund's ordinary operating expenses (excluding expenses incurred through investment in other investment companies, interest, taxes, brokerage commissions, dividend expense and security loan fees for securities sold short and extraordinary expenses, such as proxy related expenses), through the period ending October 28, 2022, do not exceed 1.35% for Class A shares and 1.10% for Class P shares. The fee waiver/expense reimbursement agreement may be terminated by the Fund's Board of Trustees at any time and also will terminate automatically upon the expiration or termination of the Fund's advisory contract with the Advisor.
