Client purchases a 1-year investment grade corporate bond in the secondary market for a principal amount of $5,000. Note
The maximum percentages for sales credits reflected above vary depending on the type of fixed income security and maturity date of the security and are lower for fixed income securities with shorter-term maturity dates. In addition, discounts may apply. At UBS, fixed income securities are typically purchased and sold in brokerage accounts on a principal basis and may be subject to a trading desk mark-up or mark-down. Structured products purchased or sold in brokerage accounts are subject to a trading desk markup or markdown of 0.250% of the principal value. Although an infrequent occurrence, transactions involving municipal securities in which the firm cannot determine a fair price may be charged a commission as opposed to a sales credit. The commission will not exceed the maximum allowable sales credit as defined for municipal secondary market transactions.

Disclosure
In addition to these mark-ups, fixed income purchases and sales are subject to the "Brokerage account and administrative account fees" described in "Your Relationship with UBS," which is available at ubs.com/us/en/wealth-management/about-us/disclosure-documents.
