**Consideraciones Especiales**

Cada Fondo es una compañía de inversión no diversificada de fin cerrado inscrita bajo la Ley Número 6 de 19 de octubre de 1954, según emisores de Puerto Rico que no están inscritos por el Fondo. Un Fondo puede ser adquirido de forma que, por transferidos a, individuos que sean residentes de Puerto Rico y a entidades cuya oficina y localización de negocios principal están localizados en Puerto Rico. El rendimiento, el valor neto de los activos de un Fondo y el precio en el mercado de las acciones de capital común del Fondo (en adelante, las “Acciones”), podrán fluctuar y se determinarán por factores como la demanda y oferta en el mercado de las Acciones y las condiciones económicas, políticas y del mercado en general, al igual que otros factores que están fuera del control de un Fondo. Las Acciones son negociadas al precio del mercado, el cual puede reflejar una prima o descuento del valor neto de los activos de un Fondo y no se puede dar representación alguna sobre su liquidez o el mercado para disponer de las mismas. A pesar de que la intención de UBS Financial Services Incorporated of Puerto Rico (en adelante, “UBSFSPR”) de continuar manteniendo un mercado secundario para las Acciones, no está obligada a continuar haciéndolo. De otra parte, puede que no exista otra fuente de información de precios para las Acciones u otros compradores para las Acciones que no sea UBSFSPR.

Riesgo de concentración geográfica: El Fondo está expuesto a ciertos riesgos debido a la diversificación geográfica reducida de su cartera de inversiones. Los activos del fondo están invertidos principalmente en valores de emisores de Puerto Rico. A consecuencia, el Fondo generalmente es más susceptible a factores económicos, políticos, regulatorios y otros que podrían afectar adversamente a emisores de Puerto Rico que otra compañía de inversión la cual no esté tan concentrada en emisores de Puerto Rico. En adición, valores emitidos por el Gobierno de Puerto Rico y sus instrumentalidades se afectan por las finanzas del gobierno central. Eso incluye, pero no limita, ciertos gastos generales de Puerto Rico y los bonos de ingresos, contribuciones especiales o de agencias. El efecto en cada deuda específica podría no ser el mismo y depende de que parte del dinero del gobierno o sus ingresos se supone pague el interés de dicha deuda. En la medida en que un porcentaje relativamente alto de los activos del Fondo puedan ser invertidos en obligaciones de un número limitado de emisores de Puerto Rico, el valor neto de activos y su rendimiento puede aumentar o disminuir más que el de una compañía de inversión más diversificada, como resultado de cambios en cuanto a la evaluación de la condición financiera o prospectos financieros de un emisor de Puerto Rico. El Fondo también puede ser más susceptible a cualquier ocurrencia individual económica, política o regulatoria en Puerto Rico que una compañía de inversión más diversificada. En los pasados años, los bonos principales del Gobierno de Puerto Rico, al igual que valores emitidos por ciertas instituciones financieras de Puerto Rico han sido degradados por varios factores, incluyendo sin limitación, el empeoramiento experimentado por la economía de Puerto Rico y la condición financiera pobre del Gobierno de Puerto Rico. Al presente, el mercado de bonos de Puerto Rico está experimentando un periodo de mayor volatilidad, mas con los bonos de Puerto Rico traficando a precios más bajos y rendimientos más altos a los puntos de referencia de los pasados dos (2) años, y así afectando el valor neto de activos del Fondo.

Divulgación de Mercado Secundario: Dado que actualmente UBSFSPR es la fuente dominante, y podría ser la única fuente, de liquidez para la negociación de las Acciones en el mercado secundario, cabe la posibilidad que un inversor no pueda vender sus Acciones en el mercado secundario o que solamente pueda venderlas a pérdida, si UBSFSPR cesara de facilitar un mercado secundario para la negociación de las Acciones. Por lo tanto, la habilidad de un inversor para vender sus Acciones dependerá del interés de otros inversores que estén comprando Acciones o la disponibilidad de UBSFSPR de designar capital adicional para mantener Acciones en su inventario. UBSFSPR podrá, a su discreción, realizar transacciones adquiriendo valores secundarios para mantener Acciones en inventario. Si tal valor secundario se adquiere de inversionistas que estén comprando Acciones, UBSFSPR podrá usar los fondos obtenidos para financiar dichos inversionistas. En estos casos, UBSFSPR podría considerar el valor neto de activos del Fondo en inventario y los precios cotizados por éste podrán permanecer a los niveles previamente cotizados o aumentar. Por otro lado, cuando UBSFSPR vende Acciones de su inventario, los precios cotizados por éste podrán reducirse. En situaciones en que UBSFSPR está vendiendo Acciones, podría vender dichas Acciones a precios más bajos que cualquier orden de venta pendiente que fue puesta sobre sus Acciones por cualquier inversor. Cualquier decisión de UBSFSPR de aumentar o reducir su inventario será tomada en discreción y no son divulgadas al público.

**Distribución Contributiva sobre Acuerdos de Recompra:** A pesar de que existe precedente contable que apoya el concepto que los acuerdos de recompra y recompra a la inversa sean considerados como préstamos con garantía colateral para propósitos contributivos en Puerto Rico, dicho precedente no es determinante en cuanto a las disposiciones contributivas aplicables a los acuerdos de recompra que normalmente el Fondo suscribe, que contienen disposiciones que conceden al comprador de los valores subyacentes a dichos acuerdos derecho al vender, transferir, pignorar o hipotecar dichos valores. A pesar de que el Departamento de Hacienda de Puerto Rico (“Hacienda”) nunca ha expresado sobre si estos tipos de acuerdos deben ser considerados como una transferencia de titularidad sobre los valores subyacentes, Hacienda expresó que dicha posición y que los tribunales de Puerto Rico estén de acuerdo con dicha posición. En dicho caso, el interés exento pagado sobre los valores subyacentes a dichos acuerdos podría considerarse como ingreso no exento del pago de contribución para el vendedor de tales valores subyacentes. En la medida que el Fondo sea considerado el vendedor bajo el acuerdo de recompra correspondiente, los dividendos distribuidos sobre las Acciones que a su vez son derivados del ingreso del acuerdo de recompra correspondiente podrán ser considerado como un dividendo sujeto a tributación en ganancias de capital. Si tal dividendo fuera considerado como dividendo sujeto a tributación, los tenedores de las Acciones que sean individuos o fideicomisos de Puerto Rico podrían estar sujetos a una tasa tributaria de 20% sobre el dividendo distribuido sobre las Acciones que sean individuos o fideicomisos de Puerto Rico que también están sujetos a una tasa tributaria de 25% sobre dividendos distribuidos antes del 1 de julio de 2014 (o sobre dividendos distribuidos antes del 1 de julio de 2014). Por otro lado, tales dividendos fueron considerados como dividendos de ganancias de capital, los tenedores de las Acciones que sean individuos o fideicomisos de Puerto Rico estarían sujetos a una tasa contributiva de 15% (o a una tasa contributiva de 15% para dividendos de ganancias de capital distribuidos antes del 1 de julio de 2014 o la contribución básica alterna aplicable), y los tenedores de las Acciones que tributa como corporaciones, estarían sujeto a una tasa contributiva de 20% (tasa contributiva de 15% para dividendos de ganancias de capital distribuidos antes del 1 de julio de 2014).

Cambios Recientes a leyes contributivas de Puerto Rico: Las enmiendas que modificaron las reglas relacionadas el impuesto sobre valor y uso (“IVU”) aún se mantienen en vigor y son relevantes al Fondo en la medida que proveen para la imposición de un nuevo IVU de 4% sobre servicios profesionales y de otros tipos (con ciertas excepciones limitadas) prestados al Fondo después del 30 de septiembre de 2015 y hasta el 1 de abril de 2016. Las enmiendas a las leyes contributivas que permiten para la imposición de una tasa contributiva sobre valor añadido (“IVA”) de 10.5% en la adquisición de bienes y servicios fueron derogadas.

**Aviso Legal**

Rendimientos anteriores no son garantía de resultados futuros similares. Los rendimientos actuales podrían ser más bajos o más altos que el rendimiento aquí citado. Los valores emitidos por un Fondo están sujetos a riesgo de mercado, incluyendo la pérdida del principal invertido. Este documento no es una oferta de compra ni una solicitud de una oferta de compra para cualquier inversión en un Fondo y es para propósitos informativos solamente. Las inversiones en un Fondo están diseñadas principalmente para inversores que buscan inversionistas a largo plazo y no deben ser consideradas como un vehículo para fines de negociación. Estas inversiones puede que no sean adecuadas para cualquier inversor. Una inversión en un Fondo es equivalente a una inversión en los valores subyacentes en los cuales un Fondo invierte. El uso de apalancamiento por un Fondo representa ciertos riesgos a los inversor. En éste, y en ciertos casos, las fluctuaciones en...

Glossary of fund terms

– Ask Price: generally refers to the lowest price at which a seller will sell a specified number of units of a given security at a particular time. The ask price may incorporate a markup, which may vary by transaction and may include commissions and other charges. The ask prices quoted by UBSSPR represent its judgment of the market price for the Shares. The prices quoted by UBSSPR represent its judgment of the market price for the Shares. The ask price is for a limited number of Shares, and it may not be possible for sellers to obtain the current ask price.

– Bid Price: generally refers to the highest price a buyer is willing to pay at a particular time for a unit of a given security. UBSSPR publishes two types of bid prices for the Shares: firm or indicative. A firm bid is provided when UBSSPR has the risk capacity and/or appetite at the particular time to purchase a specified number of Shares. An investor can sell UBSSPR at the firm bid price up to the specified number of Shares at a particular time. On the other hand, an indicative bid is provided for informational purposes only when UBSSPR does not have the risk capacity and/or appetite at a particular time to purchase Shares. The prices quoted by UBSSPR represent its judgment of the market price for the Shares. The price quotes take into account market factors, including, but not limited to, recent transactions, supply and demand, the yield of similar types of products, the size and age of UBSSPR’s inventory, and the size, price, and age of pending customer orders, and may be higher (in which case the price is at a premium) or lower (in which case the price is at a discount) than the NAV of the Fund. The prices quoted by UBSSPR may also be affected by its willingness to hold additional inventory of the Shares or by its need to sell its inventory of Shares. Depending on market liquidity conditions, orders to buy or sell at the quoted price may not receive immediate execution, and an investor may not be able to sell its Shares at the price quoted by UBSSPR. Moreover, the proceeds an investor receives on a sale of Shares may be lower than the bid price due to discounts, markdowns, and other charges. Since inception, the Shares have historically traded at prices which reflect a premium to their respective NAV per Share, though on certain limited instances, they have traded at prices which reflect a discount to their respective NAV per Share. However, there is no assurance that the Shares will continue to trade at prices which reflect such a premium. The Fund is presently experiencing liquidity issues. As a result, the bid price is for a limited number of shares, and it may not be possible for sellers to obtain the current bid price.

– Credit Quality: a measure of the likelihood that a financial obligation will not be honored provided by one or more of the rating agencies. Rating agencies assign classifications to their ratings, with “AAA” being the highest and “D” being the lowest for S&P Global Ratings (“S&P”). The Fund may use other ratings and adjust them for use in this scale.

– Effective Duration: a calculation of duration that takes into account the embedded options in the securities of a portfolio and their expected changes in the cash flow of a portfolio caused by those options.

– Expense Ratio: The percentage of the Fund’s average net assets attributable to holders of the Shares and which is used to pay operating expenses and takes into account investment management fees, administration fees, and other operating expenses such as legal, audit, insurance, and shareholder communications.

– Hedge Notional: refers to the total net face value, reflecting any offsetting positions, of derivative instruments employed in hedging strategies of the Fund.

– Hedge Ratio: ratio of the Fund’s hedge notional amount to its total dollar amount of leverage as of the end of a calendar quarter, assuming the Fund is fully invested at quarter-end. The Fund’s investment adviser may, at its discretion, use a variety of derivative instruments including securities options, financial futures contracts, options on futures contracts, and other interest rate protection transactions such as swap agreements, to attempt to hedge its portfolio of assets and seek to enhance its return. There can be no assurance that any particular hedging strategy used will succeed.

– Leverage: the Fund may issue preferred stock or debt, enter into repurchase agreements, or borrow money, in order to increase the amounts available for investment (“leverage”). This gives the Fund’s investment adviser, in the fixed income area in particular, the opportunity to enhance yield. The use of leverage increases the likelihood of price volatility and market risk for the Shares. There is also the risk that the cost of funding leverage will exceed the earnings on the related investments, which will have the likely effect of reducing the Fund’s yield and the value of its investments.

– Leverage Adjusted Effective Duration: effective duration adjusted for the impact of the Fund’s utilization of leverage. A Fund that utilizes leverage will have a leverage-adjusted effective duration that is longer than its effective duration.

– Maturity: date on which the face value of a security/bond must be repaid. It measures the average length to maturity in years of all the bonds in the Fund’s portfolio. For mortgage- backed securities, the maturity takes into account the prepayment of the underlying mortgages.

– NAV: Net Asset Value. On a per-Share basis, it is determined by calculating the Fund’s total assets less its total liabilities and dividing such result by the Shares outstanding. On an aggregate, Fund basis, it is determined by calculating the Fund’s total assets less its total liabilities.

– Undistributed Income: the Fund’s net income that has not been distributed to holders of its Shares as of the latest available audited financial statements. In the case of a target maturity-type investment company (which is liquidated on or by a specific date), it also includes the amounts to be distributed on or by the liquidation date as the return of the initial investment.

Consequently, the Fund in general is more susceptible to
recent changes in the Puerto Rico tax law: Amendments that
change the sales and use tax rules are currently in effect and relevant to the Fund because they provide for the imposition of a new 4% SUT on professional and other services (with limited exceptions) rendered after September 30, 2015 and before April 1, 2016. Amendments providing for the imposition of a new "value added tax" of 10.5% on the purchase of goods and services have been repealed.

Legal Disclaimer
Past performance does not guarantee future results. Current performance may be lower or higher than the performance quoted. Securities issued by the Fund are subject to Shares. Dividends (UBSSFPR) to increase or decrease inventory are made at its sole discretion and are not generally disclosed.

Repurchase Agreement Tax Disclosure: While there is authority generally supporting the treatment of repurchase and reverse repurchase agreements as collateralized loans for Puerto Rico income tax purposes, that authority does not specifically address the tax treatment of the repurchase agreements that the Fund typically enters into, which contain provisions that grant the buyer the right to sell, transfer, pledge, or hypothecate the securities that are the object of such loans. Although the Puerto Rico Treasury Department ("PR Treasury") has never pronounced itself as to whether this type of arrangement should be viewed as a transfer of ownership of the underlying securities, it is possible that the PR Treasury could take that position in the future, and that Puerto Rico courts would agree with that view. In such an event, the tax exempt interest paid on such underlying securities could be deemed not to constitute tax exempt income for the seller of such securities, to the extent that the Fund was such seller, the dividends distributed on its Shares from such income could be treated either as taxable dividends or as capital gain dividends. If such dividends were treated as taxable dividends, holders of the Shares who are individuals or Puerto Rico trusts could be subject to a 15% income tax (or 10% income for dividends distributed before July 1, 2014) on the dividend (or the applicable alternate basic tax), and those which are corporate investors would be subject to a maximum effective income tax rate of 5.85% (or 4.5% for dividends distributed before July 15, 2014), (due to the Fund's investment in obligations of the Puerto Rico Internal Revenue Code, 15% of the dividend multiplied by a 39% maximum corporate income tax rate for dividends distributed on or after July 1, 2014 and 30% for dividends distributed before July 1, 2014). On the other hand, if such dividends were treated as capital gains, dividend holders of the Shares who are individuals or Puerto Rico trusts would be subject to a 15% income tax (or 10% income tax for capital dividends distributed before July 1, 2014) (or the applicable alternate basic tax), and holders of the Shares which are taxed as corporations would be subject to a 20% income tax (15% income tax for capital dividends distributed before July 1, 2014)

Fund investments are designed primarily and suitable for long-term investors and not viewed as a vehicle for trading purposes. They may not be suitable to all investors. Fund investments are not equivalent to investments in its underlying securities. The Fund's utilization of leverage poses certain risks to investors, and in some cases, interest rate fluctuations may increase the volatility of its return and affect the Fund to a significantly greater extent than the non-leveraged investment company. More detailed information about the Fund, including applicable fees, costs, penalties, investment objectives and policies, risk factors, and the effects of leverage, is further described in the Share's prospectus, which you should read carefully prior to making an investment. To obtain additional information related to the Fund (including investment returns calculated in accordance with Regulation 2766 of March 11, 1998, as amended) or a copy of the Shares' prospectus or Fund’s annual report, please contact the UBS Puerto Rico Family of Funds at 787-773-3888. To obtain the Fund's month-end performance or more up-to-date information, please contact your UBS Financial Advisor or see "press releases" at abs.com/prfunds.

Notes:
1 Generally, the Fund must invest at least 67% of the total market value of the Fund's portfolio securities (including, but not limited to, portfolio securities purchased with the proceeds of leverage), represented by cash equivalents, including cash equivalents, but excluding non-cash, non-portfolio securities items (including, but not limited to, prepaid items, receivables, and swap-marked-to-market), in Puerto Rico securities. Additionally, the Fund may issue preferred stock, debt securities, or other forms of leverage unless the value of its total assets less all its liabilities and indebtedness, other than the preferred stock, debt securities, or other forms of leverage being issued or already outstanding, is at least equal to 200% of the total aggregate liquidation preference/principal amount of all its outstanding preferred stock (not including any accumulated dividend or other distribution on such preferred securities) and other forms of leverage. Currently, the Puerto Rico bond market is experiencing a period of increased volatility, with Puerto Rico bonds trading at historically lower prices and lower yields. In view of these volatile market conditions, the Puerto Rico Office of the Commissioner of Financial Institutions (the "PROCFI") has granted to the Fund a temporary regulatory waiver from the Funds’ investment requirement in Puerto Rico securities of at least 67% of the Fund’s total assets and leverage limitation of 50% of its total assets and 200% asset coverage requirement described above, through June 30, 2020. Based on the representations and opinion of the Fund’s investment adviser and consistent with the Fund’s investment objective, the PROCFI has also granted no-objection relief with respect to the Fund’s investment-grade credit rating requirement for Puerto Rico securities, which permits the Fund to continue to invest in Puerto Rico municipal securities that do not have an investment grade credit rating, under certain conditions, at the discretion of the Fund’s investment adviser. These temporary waivers and no-objection relief may be renewed by the PROCFI for additional periods of time, should market conditions warrant, and upon written request by the Fund. It is the Fund's intention to
re-comply with these requirements as soon as market conditions permit, but there is no assurance as to whether and when the Fund will be able to do so.

On August 2015, the Board of Directors approved an extension of the Fund’s existing share repurchase program for the acquisition of up to 60% of the Fund’s issued Shares. The Repurchase Program is intended to enhance shareholder value by providing additional liquidity to Fund shareholders. For the quarter ended June 30, 2019, the Fund has not repurchased Shares in the open market. Since the program’s inception, the Fund has repurchased 1,475,409 Shares of common stock in the open market with an NAV of $8,948,626, at a cost of $8,541,392, and which represent 27.92% of the aggregate number of Shares issued by the Fund (net of Shares acquired for dividend reinvestment purposes and which remain outstanding).

As of June 30, 2019. Return figures were not calculated in accordance with Regulation 5766 of March 11, 1998, as amended, which requires that investment returns for an individual retirement account ("IRA") be calculated in the manner provided therein.

To the extent that an individual invests in the Fund through an IRA, his or her investment return figures will be less than those reported herein, when computed in accordance with Regulation 5766 and inasmuch as actual sales charges applicable to such IRA investments are taken into consideration. "Average Annual Total Return" figures reflect the percentage change in the market value, determined by calculating the average between the bid and ask prices, plus any income and capital gain dividends, and return of capital distributions, all such dividends and distributions reinvested as of the corresponding record date thereof, at the month-end NAV as of that date. In the case of "NAV Total Return," the Fund’s NAV per Share is used, rather than the average between the bid and ask prices, to determine such total return, as applicable. "Rolling Period Annual Returns" measure the monthly movement in the average of the Annualized Average Market Return figures over a one-year, three-year, five-year, and ten-year period (as applicable), as it moves over a consecutive time series that begins on the Fund’s inception date. Additionally, in the case of the Average Annual Total Return and Rolling Period Annual Return figures, commissions or sales charges payable in connection with a purchase or sale of Shares may vary with each brokerage institution. Total return figures are not representative of the performance of any individual investment, and taxes on capital gain distributions or income dividends, if any, have not been deducted. All calculations were performed by Thomson Reuters, based on certain financial data provided by this Fund and are annualized with the exception of year-to-date figures.

A $10,000 investment is hypothetical and is shown for illustrative purposes only.

"IPO Dividend Yield" is calculated by multiplying the current month’s distribution by twelve (12) and dividing the result by the initial public offering price. "Current Dividend Yield" is calculated by multiplying the current month’s distribution by twelve (12) and dividing the result by the month-end bid price.

Percentages may not total 100% due to rounding.

As outlined in the Fund’s Notice to Shareholders dated March 28, 2019, the bonds issued by the Puerto Rico Sales Tax Financing Corporation ("COFINA") were restructured pursuant to a Plan of Adjustment approved on February 12, 2019, which resulted, in certain instances, in the receipt of a non-recurring cash payment to the Fund. A special dividend was declared by the Fund’s Board of Directors from the proceeds of this cash payment and is reflected in the dividend yield.

Please refer to ubs.com/prfunds for Important Notices to all Shareholders of the Funds; and Commonwealth and PROMESA Update.
