

Seek opportunities in China

Seek opportunities in China

Author: Sagar Khandelwal, Strategist, UBS Switzerland AG

- **Why** 1) China's domestic tech innovation is accelerating, with significant progress on AI, semiconductor localization, and cloud computing, offering a way to diversify AI exposure. 2) Rising domestic liquidity in the stock market, supportive policy reforms, and still underweight global investor positioning offers scope for further upside. 3) These trends should also support positive returns for broader Asia ex-Japan, aided by a benign regional macro-outlook and a weaker US dollar.
- **Why now** 1) China's upcoming Five Year Plan is set to offer a targeted approach to stimulus that we think will benefit our preferred sectors. 2) China's trade surplus reached a record USD 1.2 trillion in 2025, reflecting solid demand for its goods despite rising trade barriers. 3) The Hang Seng Tech Index has experienced four major corrections since 2024, each followed by stronger recoveries. We think it is now recovering from its fifth such correction, supported by significant AI capex, self-sufficiency tailwinds, and strong cloud revenue growth.

Diversifying into China and Asia more broadly offers compelling opportunities, with AI-driven growth, rising earnings, and attractive market conditions supporting the outlook. Source: Hector Falcon_Unsplash

China tech

China's tech sector ramped up innovation in 2025, with notable advances across the AI value chain. New Chinese AI models have shown tech leadership, and supportive policy is reinforcing ecosystem resilience. Valuations have fallen from their recent highs, with the Hang Seng Tech Index experiencing four major corrections since 2024. Each has been followed by a strong recovery, and we anticipate this trend to hold in 2026. We expect strong earnings growth in 2026 to drive China's tech stocks higher, and view China's tech sector as a high-conviction idea within global equities.

Chinese equities

Beyond technology, the broader Chinese equity outlook has improved. Economic growth is holding up, and equities

should find support from deeper domestic liquidity, robust earnings, and rising retail flows. Government stimulus has been modest, but clarity on the government's approach should support business spending over the medium term. Valuations have declined from recent highs, and we think the current dip is an opportunity to build positions.

Asia ex-Japan

Positive returns for China and its tech sector should also support positive returns for Asia ex-Japan equity indices, and we expect double-digit returns by the end of 2026. A benign regional macro outlook and a weaker US dollar should provide additional support. Positive AI capex developments across Asia are a growth tailwind, earnings growth is solid, and the breadth of revisions continues to improve. Regional valuations look appealing, trading at a discount to global peers. Beyond mainland China, we also expect Hong Kong, India, and Singapore to deliver good returns as their business

This report has been prepared by UBS Switzerland AG. **Please see important disclaimers and disclosures at the end of the document.**

Seek opportunities in China

and earnings cycles turn.

Emerging markets

Investing in emerging markets offers not only a diversified way to invest in China but also diversified exposure to global AI and tech innovation beyond the US, with tech-related sectors now accounting for over 40% of the MSCI EM Index. We expect high-single-digit returns for emerging market (EM) equities by the end of 2026, supported by a constructive macro backdrop, Federal Reserve easing, and a softer US dollar—all of which should improve financial conditions and attract capital flows.

Global asset class preferences definitions

The asset class preferences provide high-level guidance to make investment decisions. The preferences reflect the collective judgement of the members of the House View meeting, primarily based on assessments of expected total returns on liquid and commonly known indices, House View scenarios, and analyst convictions over the next 12 months. Note that the tactical asset allocation (TAA) positioning of our different investment strategies may differ from these views due to factors including portfolio construction, concentration, and borrowing constraints.

Attractive: We consider this asset class to be attractive. Consider opportunities in this asset class.

Neutral: We do not expect outsized returns or losses. Hold longer-term exposure.

Unattractive: We consider this asset class to be unattractive. Consider alternative opportunities

Note: For equities, we have a five-tier rating system with two additional preferences

Most Attractive: We consider this asset class to be among the most attractive. Investors should seek opportunities to add exposure.

Least Attractive: We consider this asset class to be among the least attractive. Seek more favorable alternatives opportunities.

When equities are included with the other asset classes in the three-tier rating system, we collapse "Most Attractive" with "Attractive" and "Least Attractive" with "Unattractive."

Appendix

Risk information

UBS Chief Investment Office's ("CIO") investment views are prepared and published by the Global Wealth Management business of UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates ("UBS"), part of UBS Group AG ("UBS Group"). UBS Group includes former Credit Suisse AG, its subsidiaries, branches and affiliates. Additional disclaimer relevant to Credit Suisse Wealth Management follows at the end of this section.

The investment views have been prepared in accordance with legal requirements designed to promote the **independence of investment research.**

Generic investment research – Risk information:

This publication is **for your information only** and is not intended as an offer, or a solicitation of an offer, to buy or sell any investment or other specific product. The analysis contained herein does not constitute a personal recommendation or take into account the particular investment objectives, investment strategies, financial situation and needs of any specific recipient. It is based on numerous assumptions. Different assumptions could result in materially different results. Certain services and products are subject to legal restrictions and cannot be offered worldwide on an unrestricted basis and/or may not be eligible for sale to all investors. All information and opinions expressed in this document were obtained from sources believed to be reliable and in good faith, but no representation or warranty, express or implied, is made as to its accuracy or completeness (other than disclosures relating to UBS). All information and opinions as well as any forecasts, estimates and market prices indicated are current as of the date of this report, and are subject to change without notice. Opinions expressed herein may differ or be contrary to those expressed by other business areas or divisions of UBS as a result of using different assumptions and/or criteria. UBS may utilize artificial intelligence tools ("AI Tools") in the preparation of this document. Notwithstanding any such use of AI Tools, this document has undergone human review.

In no circumstances may this document or any of the information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes (i) valuation or accounting purposes; (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees. By receiving this document and the information you will be deemed to represent and warrant to UBS that you will not use this document or otherwise rely on any of the information for any of the above purposes. UBS and any of its directors or employees may be entitled at any time to hold long or short positions in investment instruments referred to herein, carry out transactions involving relevant investment instruments in the capacity of principal or agent, or provide any other services or have officers, who serve as directors, either to/for the issuer, the investment instrument itself or to/for any company commercially or financially affiliated to such issuers. At any time, investment decisions (including whether to buy, sell or hold securities) made by UBS and its employees may differ from or be contrary to the opinions expressed in UBS research publications. Some investments may not be readily realizable since the market in the securities is illiquid and therefore valuing the investment and identifying the risk to which you are exposed may be difficult to quantify. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS, into other areas, units, divisions or affiliates of UBS. Futures and options trading is not suitable for every investor as there is a substantial risk of loss, and losses in excess of an initial investment may occur. Past performance of an investment is no guarantee for its future performance. Additional information will be made available upon request. Some investments may be subject to sudden and large falls in value and on realization you may receive back less than you invested or may be required to pay more. Changes in foreign exchange rates may have an adverse effect on

the price, value or income of an investment. The analyst(s) responsible for the preparation of this report may interact with trading desk personnel, sales personnel and other constituencies for the purpose of gathering, synthesizing and interpreting market information.

Different areas, groups, and personnel within UBS Group may produce and distribute separate research products **independently of each other**. For example, research publications from **CIO** are produced by UBS Global Wealth Management. **UBS Global Research** is produced by UBS Investment Bank. **Research methodologies and rating systems of each separate research organization may differ**, for example, in terms of investment recommendations, investment horizon, model assumptions, and valuation methods. As a consequence, except for certain economic forecasts (for which UBS CIO and UBS Global Research may collaborate), investment recommendations, ratings, price targets, and valuations provided by each of the separate research organizations may be different, or inconsistent. You should refer to each relevant research product for the details as to their methodologies and rating system. Not all clients may have access to all products from every organization. Each research product is subject to the policies and procedures of the organization that produces it. The compensation of the analyst(s) who prepared this report is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking, sales and trading or principal trading revenues, however, compensation may relate to the revenues of UBS Group as a whole, of which investment banking, sales and trading and principal trading are a part.

Tax treatment depends on the individual circumstances and may be subject to change in the future. UBS does not provide legal or tax advice and makes no representations as to the tax treatment of assets or the investment returns thereon both in general or with reference to specific client's circumstances and needs. We are of necessity unable to take into account the particular investment objectives, financial situation and needs of our individual clients and we would recommend that you take financial and/or tax advice as to the implications (including tax) of investing in any of the products mentioned herein.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit UBS's ability to participate in or to advise on certain investment opportunities that otherwise would be consistent with the Client's investment objectives. The returns on a portfolio incorporating ESG factors or Sustainable Investing considerations may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by UBS, and the investment opportunities available to such portfolios may differ.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.
